

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

from the author.

## PREFACE.

In presenting this Catalogue to the Public, it has been deemed necessary to explain briefly the circumstances connected with its publication, and the causes of the delay that has occurred in its appearance, as well as to furnish a short sketch of the Life of the Compiler.

Mr. J. O. Voigt, the son of Dr. John Henry Voigt, was born March 22nd 1798, at Nordborg in Sleswick, a few miles distant from that portion of Jutland in Denmark, whence the Angles of ancient days passed over to England—still known as the province of Angeln. He received his early education in one of the Royal public schools, where he was as much distinguished for the bold and enterprizing spirit with which he entered into every scheme of fun and frolic, as for the energy and perseverance with which he applied to the more sober pursuits of his class.

At the age of sixteen, he passed with much credit from the school to the Royal University of Copenhagen, where he became an inmate in the family of his uncle, Dr. Giesseman, Professor of Anatomy there, and Physician to the Queen; and although he had been educated with a view to his entering the Church, circumstances soon determined him to make Physic his study. Towards the close of his collegiate course, whilst steadily pursuing his studies, and surrounded by every comfort that affluence could secure, he was suddenly reduced to considerable straits by the death of his uncle and his father, within a very short period of each other. His mother and an only sister were left in circumstances, not indeed of affluence, but of perfect comfort—yet such was his sense of honor, that he determined at once to withdraw his claim on their resources, and to create at all risks the means of his own support; at the same time he carefully concealed from his bereaved

parent the hardships his resolution entailed upon him. He now had recourse therefore to the only means open to a student, and devoted several hours of each day to imparting to others the knowledge he had himself attained in various branches of study, particularly in medicine; and it may here be mentioned that he so won the hearts of those who at this time enjoyed the benefit of his instructions by the peculiar openness and urbanity of his disposition, apart from the respect which the propriety of his conduct, and the high order of his attainments always commanded from them though scarcely his inferiors in age, that, when brighter days came, they could not allow their connection to close, without presenting him with a most handsome and flattering testimonial of their regard, accompanied by a little ode of no small merit, expressive of their deep respect and gratitude. During the first six weeks of his new occupation the ordeal was such as he found it difficult to stand; for to make both ends meet, to keep up the appearance of a gentleman, and yet to pursue his own course of study with unbroken zeal, he was often constrained to content himself with a hasty meal by the fireside of his own little study at the close of the day, preparatory to kindling the nightly lamp over which he pored to an early hour of each succeeding morning. In after-life he was accustomed facetiously to refer to this period of his life with unaffected satisfaction, as having been equally one of high moral benefit, and of genuine enjoyment.

At the age of twenty-one he quitted the University with high honors,—according to continental phraseology, with "the best character"—and, soon after, obtaining a commission in the King's service, he was appointed to a post immediately under Professor Withusen, successor to his uncle in Frederick's Hospital, where his own medical studies had been previously pursued. This he held for some years, but becoming at length weary of the incessant toil, and entire want of leisure, which the heavy duties of his situation entailed upon him, and having from early youth had a great desire to go abroad, he determined on accepting the post of Surgeon to this colony of Denmark, which had just become vacant, and arrived in Serampore early in 1827, having left his native land in the previous autumn with the intention of being absent for the term of only five years. Before the expiration of this period, however, he had formed connections in India which considerably changed his views. He so

highly estimated the delights of the domestic circle in which he now found himself, and which his warm and generous heart was formed so fully to appreciate, that he at once relinquished the idea of an early return to his native land. At the same time he so much valued the opportunities and advantages for intellectual and scientific pursuits, which the leisure of his situation afforded him, that although the emoluments it presented fell far below those his talents and skill might have commanded in a larger sphere, he refused to exchange it for the more lucrative prospects that were repeatedly offered him through the medium of the Honorable Company's Service.

Mr. Voigt had made Botany a study before he left Denmark, but was not induced to devote much time to it, until the society and Botanic Garden of the late eminent Dr. Carey, by presenting him with peculiar advantages, led him to turn his thoughts more particularly to that science; and the intercourse with this great man, to which his determination naturally led, became to him a source of abundant delight.

On Dr. Carey's death in 1834, his garden came immediately under Mr. Voigt's superintendence, and he entered on the duties and enjoyments with which it furnished him with energy and spirit peculiarly his own. Whatever his hand found to do, he may truly be said to have done with all his might. His day was portioned out with so much method that every hour had its allotted occupation, and yet time was found for every thing. That which was not employed in the ordinary duties and cares that usually devolve on the medical practitioner in India, was devoted to study, particularly to Botany; or to a renewal of acquaintance with his favourite authors among the classics, with all of whom he was particularly at home; or to exploring the rich field of English literature, which, having to his twenty-eighth year been to him as a sealed book, united to its other charms that of novelty. Yet the claims of the garden were never forgotten. Mr. Voigt was a very early riser, and a great advocate for air and exercise. His father had from his earliest childhood inured him to the most hardy and almost violent use of the latter, and so far agreed with Locke in the rules he lays down for the treatment of children, as to carry them out in the training of his son to the fullest extent-or, as Mr. Voigt used to remark, "to perfect his medical skill, by experiments at home." After a ride of several miles on horseback, the exercise to which he was most partial, and which from his uncommon strength of body, and buoyancy of spirit, he was well fitted to enjoy, two and sometimes three hours were devoted to the garden, preparatory to entering on the duties of the day.

Early in 1836, an Hospital was founded in Scrampore at the suggestion of the late Dr. Marshman, for the relief of the Native poor, under the auspices of the Queen of Denmark. To this Mr. Voigt immediately offered his gratuitous services, and thus enlarged in no small degree the sphere of his labors; but the energy of his mind was equal to every emergency, and rendered all things light that came within the sphere of duty; and in the discharge of gratuitous service, he was always peculiarly in his element. To be needy and friendless, was to possess a claim on his attention, and the opportunities his professional skill afforded him of being serviceable to others, and particularly to the widow and the orphan, were regarded as the chief redeeming qualities of a profession to which he was never particularly partial. With a mind of great strength and firmness, united in the discharge of professional duty, with uncommon calmness and self-possession, he combined such genuine kindliness and generosity of feeling, and so humble an estimate of his own worth, that in these instances, he always felt himself the person obliged. Numerous instances might here be adduced to shew his ready attention to the calls of humanity, his firm integrity of purpose, his unbending independence of mind, the simplicity and sincerity of his character, his disinterested and faithful discharge of duty, his sterling worth as a man and a friend, and the ardour of his affection in the more tender relations of life—but the brief nature of this sketch forbids it.

Dr. Carey's garden had furnished Mr. Voigt with so rich and varied a field of information and delight, that a sense of gratitude united with the deep veneration with which he cherished the memory of its philanthropic founder, led him to feel it his duty to place on record the results of the Botanical labors of this eminent man, embracing as they did, a period of upwards of thirty years; and he was subsequently induced by the advice of friends, to add to this, a sketch of the successful operations of the H. C. Botanic Garden, and to determine on publishing the whole Catalogue.

This was accomplished by the end of 1841, and placed by Mr. Voigt at the disposal of the Agricultural and Horticultural Society, who generously engaged to defray the expenses of the publication. After the first sixteen pages had passed through the Press however, obstacles arose to the acceptance of the Society's offer, and the printing of the work was suspended; so that when in 1842 the temporary charge of the H. C. Botanic Garden furnished him with opportunities for making additions to the work, he eagerly improved them to the utmost of his power. These were completed only the week before he was attacked with the distressing and severe illness which rendered recourse to a more salubrious climate immediately necessary.

He accordingly left India early in 1843, in the hope that restored health would enable him to carry the Catalogue through the Press either in England or in Denmark—but his lamented death in London on the 22nd June 1843, only a few weeks after his arrival in England, and when just on the eve of departure for his native land, at once frustrated every plan.

The manuscripts were after this detained by mistake in London, instead of being forwarded to Copenhagen. From thence they were brought back to India, and by the advice of the late Mr. Wm. Griffith, once more put to Press at the commencement of 1844, and it is solely to the kindness of this valued friend, that they owe their appearance, he having generously offered his invaluable services in superintending their progress through the Press.

The printing of the Catalogue was completed a few days before Mr. Griffith's removal to Malacca, but his departure prevented his preparing a Review of the work, which, with the Indexes and other parts necessary to its publication, he had kindly promised to furnish. These he proposed to forward from the Straits, but his melancholy and premature death soon deprived his friends and the interests of science of the invaluable services of this eminent Botanist. A few remarks which he made therefore in writing to a friend on receiving the manuscripts whilst at the H. C. Botanic Garden, are all that can now be given to shew his opinion of their merits.

"The MSS." he says "are very valuable indeed, and the arrangements so clear, the writing so lucid, the whole tendency

"so practical, the mass of information so great, that it would be a "mortal sin not to publish them. The work will do Voigt very great credit—it must have cost him great labour, and I can "answer for it, that it will perpetuate his name as an Indian Botanist. You know such works are the statistics of Botanical "Systematic Science.

"The Catalogue would certainly command an European sale, as it would be essential to all real Botanists. Indeed I know of none, which would contain so much interesting information. The present size perhaps had better be adopted; it is a common one on the Continent, and is not altogether unwieldy. To complete it, you must give a short outline of Voigt's life.

"I hope the work will be profitable pecuniarily, for I should "like to see a handsome monument erected to Voigt, if possible, "in these gardens, where, as his memory would then be associated "with that of Roxburgh, Jack, and I hope Buchanan, it would be "in good company.\*

"The MSS. when printed will be a mass of information avail"able to the Public. They give exact references to the native
"country, the Bengalee name, the medical or economical proper"ties, date of introduction and flowering season, and whether or
"no the fruits are ripened, also the description of plant, whether
"shrub, tree, etc. etc.

"It will be on the ground of its being a Genera of Plants of "Lower Bengal, and its great practical utility, that I shall be "delighted to recommend it as the systematic hand-book of the "Botanical class, as such it will constitute era the second in "Bengal Botany."

The Indexes and other parts necessary to the publication of the Catalogue were still untouched when Mr. Griffith's death frustrated

- Dr. Griffith was so bent on seeing the wish here mentioned accomplished, that he selected a monument himself some time before his departure for Malacca, and on the day of his embarkation desired that "it might still be reserved as he had originally directed for erection in the Garden on some future day in memory of Dr. Voigt." It is a melancholy fact, that the same monument has since been purchased by his friends for erection on his own remains at Malacca.
- † The number of Genera described is 1737, distributed under 278 orders, which with the number of species is enumerated in a subsequent page; as showing at a glance the contents of the work.

the hopes of any further help from his valuable pen. In these circumstances, the late Rev. Mr. Mack, with his accustomed generosity, kindly offered to aid in their preparation, but he had not proceeded far, when his sudden death deprived society in India of one of its brightest ornaments.

These circumstances will, it is hoped, in some measure, excuse the delay that has occurred in the appearance of the Catalogue. It is now presented to the public under all these disadvantages, with the hope that some apology for the defects that may be apparent in its *final* completion, will be admitted from the consideration that this task has devolved on one who feels herself wholly unequal to the performance, and has yet been impelled by the strongest feelings of conjugal affection to undertake it.\*

RACHEL S. VOIGT.

Serampore, 30th July, 1845.

• Since the above was written, an unfinished letter has been found among Mr. Griffith's papers addressed to Mr. Marshman, containing some directions regarding the completion of this Volume, and expressing his opinion of the merits of the work, of which the following is an extract. "As regards the merits of the work," he says:

"It is the most comprehensive and scientific Catalogue of the kind that has appeared, 'Roxburgh's Hortus Bengalensis' the only other one being, at this advanced period of Botany, incomplete, and arranged according to an Artificial not a Natural System. In this Catalogue, with the name of the plant you have access to all known information regarding it, either directly in the book itself, at least as regards valuable properties, or indirectly, through the copious list of Synonymes. Therefore characters only require to be supplied to make this a complete Flora of the Environs of Calcutta.

"It gives the general Geographical distribution of each of the Families, two hundred and seventy-eight in number, and a good deal of information regarding the specific distribution of the Indian species. And as each habitat is given to each species,—not a vague one of India Orientalis, but very generally specific ones,—from it a complete Catalogue, as far as yet known of the distribution of Indian forms, may be compiled.

"It gives a sufficiently copious and select Synonymy and reference to plates, so that as I have said, the possession of the name of the plant puts you in the way of possessing all known information regarding it, by merely turning to the books which are quoted.

"It gives, wherever the properties are tolerably uniform, the characteristic ones under each family, and in all cases the properties (the knowledge of which constitutes that very economic branch of Botany, Economic Botany,

Digitized by Google

well worthy the attention of Government) under each plant, with the authorities for the same.

"It gives the habit of the Plant, with some information regarding the flower, the native country, and time of flowering and seeding, from consultation of the last parts of which much instruction may be derived as to the selection of species for introduction, the necessity of changing the mode of cultivation, etc.

"It gives in all definable cases the vernacular names, and these appear to have been obtained by no common care, and consequently to lose in a great measure the usual inapplicability.

"Lastly. It gives a list of desiderata for introduction, generally founded on those principles without which introductions of plants become of no avail. To this the attention of all Indian Horticulturalists should be chiefly guided."

#### PRINCIPAL ABBREVIATIONS EMPLOYED IN THIS VOLUME.

5 A tree. 5 A small tree. 5 A shrub. 5 An undershrub.

4 A perennial. 6 A biennial. 6 An annual. A climber.

A twining plant. A Creeper. Fl. Flowers. Fr. Fruit.

H. S. Hot season. R. S. Rainy season. C. S. Cold season. 0. None.

Ach.—Acharius. A Swedish professor and writer on Lichens.

Adans. -- Adanson. A French systematic botanist.

Afzel,-Afzelius. A Swedish professor.

Ait .- Aiton. Superintendent of the King's Garden at Kew.

Ait. Hort. Kew .- Aiton, Hortus Kewensis.

All. (pedem.)—Allioni, (Carolus) Flora Pedemontana, 3 vols. 1785.

Amm. rath.—Amman, (Johan.) Stirpium rariorum in Imperio Rutheno sponte provenientium Icones et Descriptiones, 1739.

Andr. B. Repos.—The Botanist's Repository, by Henry Andrews, 10 vols. 4to. London, 1797, et seq.

Ann. mus.—Annales du Museum d'Histoire Naturelle, 24 vols. 4to. Paris, 1802, et seq.

Arn.—Arnott, (G. A. Walker.)

Arth. Hamilt. Mon. - A Monograph by Arth. Hamilton.

Asiat. Reser. - Asiatic Researches.

Aubl.—Aublet. A French traveller in Guiana.

- B. Cab.—Botanical Cabinet, by Conrad Loddiges and Sons, 14 vols.
- B. Mag.—Botanical Magazine, (Curtis's) formerly conducted by Sims, now by Sir William Hooker.
- B. Misc.—Botanical Miscellany, (by W. J. Hooker.)
- B. Reg.—Botanical Register, (Ker's) now conducted by Professor Lindley.

Balbis.—Balbis, (Joh. Baptist.) A French Professor of Botany.

Balb-diss.—Balbis. Miscellanea Botanica, 4to. 1804.

Banks. Herb.—Banksian Herbarium.

Bartl.—Bartling, (Th. Fr.); Ord. Nat. Plantarum.

Barton's Coll. mat. med.—Barton's Collection, Materia Medica.

Bauer Ill. fl. norf.—Bauer, (Ferdin.) Illustrationes Floræ Novæ Hollandiæ, fol. 1813

Bauh.—Bauhin brothers, (Johannes and Caspar.) Professors of medicine—published 1620-1650.

J. Bauh.—Bauhin, (Johannes.)

Baum.—Baumgarten, (J. C.) M.D. of Schasburgh in Transylvania. A botanist.

Beauv-agrost.—Beauvois, (Palisot de) Essai d'une nouvelle Agrostographie, 1 vol. Paris, 1812.

Beech. voy. pt. pl.—Beechey. A well known English navigator. Plants described in the account of his voyage, &c.

Bennet.—Bennet. Asst. Conservator of the Banksian Herbarium.

Benth.—Bentham, (Geo.) F. L. S.

Benth. Lab. gen. and sp.—Bentham. Labiatarum Genera et Species.

Benth. scrophul. ind.—Bentham. Scrophularineæ Indicæ.

Berg.—Bergius, (P. J.)

Bernh. -- Bernhardi. A German botanist.

Bertol.—Bertolini. A writer upon the Flora of Italy.

Bieb.—Bieberstein. A Russian botanist of note.

Bivon.—Bivona. A Sicilian botanist.

Bl. Bijdr.—Blume, (C. L.) Bijdragen tot de Flora von Nederlandsche Indië.

Bl. Cat.—Blume's (C. L.) Catalogue.

Bl. in Diar. batav. -- Blume, (C. L.) in the Batavian Diary.

Bl. Java.—Blume's (C. L.) Flora of Java.

Bl. Rumph.—Blume, (C. L.) Rumphia.

Blackw. herb.—Blackwell, (Eliz.) A curious Herbal, containing 600 cuts of the useful plants, 2 vols. fol. London, 1737.

Blane.—Blane, (Gilbert.)

Bocc.—Boccone, (Paolo) 1697.

Boerh.—Boerhaave, (Hermannus.) A Dutch botanist, 1710.

Booth.—Booth, (Dr.)

Bork.—Borckhausen. A writer on the Flora of Hesse Darmstadt.

Bosc.—Bosc. A French botanist and traveller in N. America.

Bojer. Hort. Maurit.—Bojer's Hortus of the Mauritius.

Br. (or R. Br.)—Brown, (Robert.) The first botanist of the age.

Brown pr. fl. norf.—Brown. Prodromus Floræ Novæ Hollandiæ.

Browne. jam.—Browne's (Patrick) Civil and Natural History of Jamaica.

Brid .- Bridel.

Brongn.—Brongniart, (Adolphe.) A French botanist.

Brot. fl. lusit.—Brotero. Flora Lusitanica.

Buch.—Dr. Francis Hamilton, (formerly Buchanan.)

Buch. Herb .- Buchanan's Herbarium.

Buch. MSS.—Buchanan's Manuscripts.

Buch. journ. Mysore.—Buchanan's Mysore Journal.

Buchoz.—Buchoz, (Pierre Joseph) Collection des Fleurs. Paris.

Bull. champ.—Bulliard. Histoire des Champignons de la France, 1798.

Bull. herb .- Bulliard. Herbier de la France, 1780.

Bunge. enum. pl. chin.—Bunge's plants of China.

Burch.—Burchell, (Wm.) A South African traveller and botanist.

Burm. afric.—Burmann's (Johannes) African plants.

Burm. zeyl.—Thesaurus Zeylanicus, by J. Burmann.

Burm. Ind.—Flora Indica, by N. L. Burmann.

C. G. H.—Cape of Good Hope.

Cass.—Cassini. A French botanist.

Catal. Ceyl. pl.—Catalogue of Ceylon plants.

Cat. Car.—Catesby, (Marsh) Natural Hist. of Carolina, Florida, &c. 2 vols. London, 1741.

Cavan. ic.—Cavanilles, (Ant. Jos.) Icones et Descriptiones plantarum quæ aut sponte in Hispania crescunt aut in Hortis hospitantur, 6 vols. fol. Madrid, 1791-1800.

Cham. and Schlect.—Chamisso and Schlectendal.

Chois.—Choisy. A Swiss botanist.

Clarke and Guss.-Clarke and Gussone of Naples.

Colebr.-Colebrooke, (H. T.) A well known English writer on Indian plants.

Commel. Hort. Am.—Commelyn, (Caspar) Horti Medici Amstelodamensis rariorum Plantarum Descriptio et Icones, 2 vols. 1703.

Commers. in Poir. Encyl.—Commerson in Poiret's Encyclopedia.

Crantz.—Crantz. An Austrian botanist.

Cunningh.—Cunningham.

Curt. Lond.—Curtis, (William) Flora Londinensis, 1777.

Cyril.—Cyrilli. An Italian botanist.

DC.—De Candolle, (Prof. Aug. Pyr.)

DC. pr.—De Candolle. Prodromus Systematis Naturalis Regni Vegetabilis.

DC. Cat. Hort. Monspel.—De Candolle, (Prof. Aug. Pyr.) Catalogus Horti Monspeliensis, 1777.

DC. fl. fr.—De Candolle, (Prof. Aug. Pyr.) et Lamark, Flore Françoise.

DC. leg. mem.—De Candolle, (Prof. Aug. Pyr.) Memoirs sur les Legumineuses.

DC. pl. grass.—De Candolle, (Prof. Aug. Pyr.) Plantarum historia succulentarum, 1799.

DC. reg. veg.—De Candolle, (Prof. Aug. Pyr.) Regni Vegetabilia Systema Naturale.

DC. (Alph.)—De Candolle, (Alphonse) son to A. P. De C.

Delarb.—Delarbre, (Antoine.)

Deless. ic. Select.—Delessert, (Benj.) Icones Selects plantarum in system. univers descriptarum, 1820.

Desf. fl. atl.—Desfontaine. (Rene Louiche) Flora Atlantica, 2 vols. 4to. Paris, 1798—1799.

Desf. mem. Mus par.—Desfontaine. (Rene Louiche) Memoires de l'Academie Royale des Sciences, 4to. Paris.

Desv-Journ. - Desvaux. Journal Botanique, 8vo. 1808.

Dicks.-Dickson. An English Criptogamic botanist.

Dietr.—Dietrich. A German gardener.

Dill. elth.—Dillenius, (John Jac.) Hortus Elthamensis, 2 vols. 1732.

Dill. Musc.—Dillenius, (John Jac.) Historia Muscorum, 4to. Oxon. 1741.

D. Don. pr. fl. Nep .- Don. (D.) Prodromus Floræ Nepalensis.

G. Don. in Mill. Dict.—Don. (G.) in Miller's Dictionary.

Donn. Hort. Cantab. - Donn. Hortus Cantabrigiensis, 1796.

Dougl.—Douglas. A collector of plants.

Dryand.-Dryander. A Swedish botanist.

Dub.-Dubois. A French botanist.

Duf.—Dufresne. A French writer upon Valerians.

Dum. cours. bot. cult.—Dumont Courset, Le Botaniste cultivateur, 5 vols. 1802.

Dun.—Dunal, (Mich. Felix.)

naceés.

Dun. Anon.-Dunal, (Mich. Felix.) Monographie de la Famille des Anno-

E. B.—English Botany, by Sowerby, 36 vols.

Ehret.-Ehret, (Geo. Dion.)

Ehrh.-Ehrhart. A German botanist.

Ell. fl. car.—Elliot, Flora of Carolina.

Endl. gen. pl. - Endlicher. Genera plantarum.

Endl. ichnogr.—Endlicher. Iconographia.

Fenill.—Feniller. A Chilian botanist.

Fisch.—Fischer. A Russian botanist.

Fl. Dan.—Flora Danica, by Oeder, Vahl, Hornemann, Liebmann and others; 1761, et seq.

Fl. Wett.-Flora der Wetterau, 1799.

Forsk. descr. - Forskaol's descriptions, etc.

Forsk. fl. Ægypt. Arab.—Forskaol, Flora Ægyptiaco-Arabica, 4to. 1745.

Forst. fl. nov.—Forster's Flora, etc.

Forst. gen, pl.—Forster's Characteres generum plantarum quas in Itinere ad Insulas Maris Australis, etc. —4to. 1776.

Fraz.—Frazer. A gardener and collector of plants in North America.

Gaerts. fr.—Gaertner, (Josephus) De fructibus et seminibus plantarum, 2 vols. 4to. 1788.

Garc. ab. hort. arom.—Ab. Horto seu del heurto, (Garcias,) aromatum et simplicium aliquot medicamentorum historia, 1567.

Gat. fl. Mont.—Gaterau, Description des Plantes qui croissent aux environs de Montauban, 1789.

Ger.—Gerard, (John) 1797.

Gilib.—Gilibert. A Lithuanian botanist.

Gmel.—Gmelin. A Russian botanist and traveller in Siberia.

Gooden.—Goodenough, Bishop of Carlisle. An English botanist.

Grah.—Graham, (Dr. J.) Professor of Botany at Edinburgh.

Grah. Cat. B. J. pl.—Graham's (J.) Catalogue of Bombay plants.

W. Griff. Assam Reser.—Griffith's (W.) Assam Researches. Gronov.—Gronovius. A botanist of Leyden.

Habl.-Hablizl. A Russian botanist.

Hall.—Haller. A Swiss botanist.

Ham.—Hamilton, (Dr. Francis) formerly Buchanan.

Hænke.-Hænke. A German botanist.

Haw. suppl. pl. succ.—Haworth, (A. H.) Synopsis Plantarum succulentarum, 1812.

Hb. Madr.—Herbarium, (Madras,) by Drs. Klein, Heyne, and Rottler.

Hb. Maurit.—Herbarium Mauritianum.

Hb. Lamb.—Herbarium, (Lambert's.)

H. B. Kth.—Humbold, Bompland, and Kunth.

H. C. G.—Honorable Company's Garden.

Hedw.-Hedwig. A German Cryptogamic botanist.

Heist.—Heister. A German botanist.

Herb. Amaryll.-Herbert's Amaryllideæ.

Herm. in herb. L'Herit.-Hermann in L'Heritier's Herbarium.

Hervey. gen. of S. African pl.—Hervey's genera of South African plants.

Hill.—Hillaire, (Aug. St.)

Hoffm. and Lk.—Hoffmanseg and Link, Flore Portugaise, 1806.

Hooker's bot. misc.—Hooker's Botanical Miscellany.

Hooker's exot. fl.—Hooker's Exotic flora, 3 vols. 8vo. 1825-1827.

Hook and Grev. ic. filic.—Hooker and Greville. Icones Filicum; Lond. 1829.

Hornem.—Hornemann. An eminent Danish botanist and professor.

Horsford pl. Jav.—Horsford's plants of Java.

Hort. Gotting .- Hortus Gottingensis.

Hortul.-Catalogi Hortulanorum.

Host Gram.—Host, (Nicot Thom) Icones et Descriptiones Graminum Austriacorum, 3 vols. 1801.

Houtt. Lin. pfl. syst.—Houttuyn, (Martin) des Ritters von Linné Pflanzensystem nach der Anleitung des Houttuynschen Werkes, 14 vols. 1777.

Huds.-Hudson. An English writer upon British plants.

Jack. - Jack, (Dr. William.) A most distinguished botanist.

Jacq. Amer.—Jacquin, (Nicolas Jos. von) stirpium Americanarum Historia, 1763.

Jacq. austr.—Jacquin, (Nicolas Jos. von) Floræ Austriacæ Icones, 5 vols.

Jacq. collect.—Jacquin, (Nicolas Jos. von) Collectanea ad Botanicum, 5 vols. 1786.

Jacq. ecl. Gram.—Jacquin, (Nicolas Jos. von) Eclogæ Botanicæ, 1811.

Jacq. fragm. bot.—Jacquin, (Nicolas Jos. von) Fragmenta Botanica, 1800.

Jacq. hort. schonbr.—Jacquin, (Nicolas Jos. von) Plantarum rariorum Horti Cæsarei Schænbrunensis, 4 vols. 1797.

Jacq. hort. vind.—Jacquin, (Nicolas Jos. von) Hortus Botanicus Vindobonensis.

Jacq. icon.—Jacquin, (Nicolas Jos. von) Icones Plantarum Rariorum, 3 vols. 1781.

Jacq. Stap.—Jacquin, (Nicolas Jos. von.) Stapeliæ cultæ, 1806.

Juss.—Jussieu.

Juss. Adr.—Jussieu, (Adrien de.)

Kamp. amoen.—Kæmpfer, (Engelbert) Amoenitates Exoticæ, 1712.

Kaulf.-Kaulfuss.-A German writer upon Ferns.

Ker in recens. bot. repos.—Ker, (John Bellenden) Recensio Plantarum hucusque in Repositorio Botanicorum depictarum.

Kock.-Koch. Professor at Erlang.

Koen.—Koenig, (John Gerard.) A Danish botanist, and pupil of Linnæus, Physician to the Tranquebar Mission, 1768.

Kol. Gram.—Koeler, (G. L.) Descriptio Graminum in Gallia et Germania nascentium.

Kth.-Kunth. An eminent Prussian botanist.

Kanze. - Kunze. A German Cryptogamic botanist.

#### 1. c.-locus citatus.

L. act. holm.—Linnæus in Kongl Soenska Vetenskaps academiens Hand lingar; Stockholm, 1739.

L. Amoen. acad.—Linnæi Amœnitates Academicæ, 1749.

L. Hort. Cliff.—Linnæus, Hortus Cliffortianus, 1737.

L. fl. zeyl.—Linnæus. Flora Zeylanica.

L. Mant.—Linnæus. Mantissa Plantarum, 1767.

L. spec.—Linnæus. Species plantarum, 1753.

L. fil. suppl.—Linnæus, (Carolus filius) Supplementum plantarum, 1781.

Labill.-Labillardiere.

Lag.—Lagasca, (Mariano) 1816-17.

Lam. dict.—Lamarck, (J. B. Monet de) Encyclopédie methodique Botanique; Paris, 1783, et seq.

Lam. fl. Fr.—Lamarck, (J. Be Monet de) Flore Française, 3 vols. 1778.

Lam. fl.—Lamarck, (J. B. Monet de) Illustration des genres.

Lamb.—Lambert, (Aylmer Bourke.)

Lamb. pin.—Lambert, (Aylmer Bourke) Description of the genus Pinus, 1803.

Lapeyr.—Lapeyrouse. A French writer upon the plants of the Pyrenees.

Lasm.-Laxmann. A writer on Siberian plants.

Ledeb.-Ledebour.

Lehm. nicot.—Lehmann. Generis Nicotianarum Historia, 1818.

Lesch.-Leschenault de la Tour.

L' Herit Stirp. nov.—L' Heritier. Stirpes novæ aut minus cognitæ; 1784, Paris.

L' Herit. Sert. angl.—L' Heritier. Sertum Anglicum, sive plantæ rariores; 1788.

Lindl. Nat. Syst.-Lindley's Natural System of Botany.

Lindl. suppl.—Lindley's Supplement.

Lindl. gen. and spec. Lindley's Genera and Species of Orchideous plants.

Lk. and Otto.-Link and Otto.

Lk. Abbild.—Link and Otto, Abbildungen and Beschreibungen seltener Pflanzen im Berliner garten.

Lob.-Lobelius.

Lockh.-Lockhart, (W.) Superintendent of the Trinidad botanical garden.

Lodd.-Loddiges.

Loisel.-Loiseleur. A French botanist.

Loud. Hort. Brit.-Loudon's Hortus Britannicus.

Loud. encl. of pl.—Loudon's Encyclopedia of plants.

Lour. fl. cochinch.—Loureiro's Flora Cochinchinensis, 1790.

Mart. sp.—Martius, (Carl. Phil. Fr. von) Genera et Species Palmarum Brasiliensium.

Mart. nov. gen.—Martius, (Carl. Phil. Fr. von) Nova Genera et Species Plantarum Brasiliensium.

Mass.—Masson, (Francis.) A collector of plants at the Cape and elsewhere.

Medik.—Medikus, (Fred. C.)

Meerb .- Meerburg.

Meisn. - Meisner.

Merat and Cass.-Merat and Cassini. French botanists.

Michx .- Michaux.

Mikan. - Mikan. A German writer on Brazilian plants.

Mirb.—Mirbel. A French Physiological botanist.

Moc. and Sessé.—Moçino and Sessé. Mexican botanists.

Moen.-Moench. A German botanist.

Monch. meth.—Moench. Methodus Plantas Horti et Agri Marburgensis describendi.

Moris. hist.—Morison, (Robt.) Historia Plantarum Universalis.

Müll.—Muller, (Otto Fred.) A Danish botanist.

Murr. comm. gott.—Murray, (Johannes Andreas) Prodromus Designationis Stirplum Gottingensium, 1770.

Nees.—Nees von Esenbeck, (C. G.)

o. c.—opus citatus.

Opiz.—Opiz, (P. M.)

Ort .- Ortega, (Caspar Gomez de.) A Spanish botanist.

Palis. flor. d'Oware.—Palisot de Beauvois. Flore des Royaumes d'Oware et de Benin.

Pall.—Pallas, (Peter Simon.) Flora Rossica, 1784.

Pers. Sgn.—Persoon's, (Chas. Henry) Synopsis Plantarum seu Enchiridion Botanicum, 2 vols. 1805.

Pet. Th.—Petit Thouars, (Du.)

Pet. Th. gen. madag.—Petit Thouars, (Du.) Genera Nova Madagascarensia.

Plenck. icon.—Plenck, (Jos. Jac.) Icones Plantarum Medicinalium, 1803, et seq.

Plum. et Burm.—Plumier, (Chas.) and J. Burmanno. Plantæ Americanæ.

Plum. fil.—Plumier. Traité des Fongéres de l'Amérique, 1705.

Plak. alm.—Plukenet, (Leonard) Almagestum Botanicum, 1796.

Pohl. pl. braz.-Pohl's Brazilian plants.

Poir. dict.—Poiret. Encyclopédie methodique Dictionnaire de Botanique.

Pourr.-Pourret. A French botanist.

Pros. Alp. Ægypt.—Prosper Alpinus, de Plantis Ægypti liber, 1592.

Raddi.—Raddi, (Joseph.) An Italian Cryptogamic botanist, and traveller in Brazil.

Rafin.—Rafinesque, (C.) A modern writer on Botany.

Ramat.-Ramatuelle.

Red. pl. lil.—Redouté, (P. J.) Les Lillacées, 1802.

Rees' Cyclopedia.

Reichenb. - Reichenbach, (Lodov.)

Retz. obs.—Retzius, (And. J.) Observationes Botanicæ, 1774.

Rheed. auct.—Rheede. Author of Hortus Malabaricus.

Rich. cat. h. med.—Richard, (Louis Claude) Catalogue; Hortus Medicus.

Rich. (A.)—Richard Achille, son to L. C. Richard.

Richt.-Richter, (Geo. Gott.)

Risso and Poit.-Risso and Poiteau.

Rohr skrift. naturh. selkh.—Rohr in "Skrifter af Naturhistoire Selskabet" of Copenhagen.

Röm and Sch.—Ræmer, (Joh. Jac.) and Schultes, (Joh. Aug.) Authors of Linnæi Systema Vegetabilium.

Roth nov. spec.—Roth, (Alb. Will.) Novæ Plantarum species præsertim Indiæ Orientalis.

Rottb. nov. act. hafn.—Rottboli, (C. F.) Descriptiones et Icones Plantarum rariorum. Hafnize, 1773.

Rottl.—Rottler, (Dr.) of Tranquebar.

Roscoe.—Roscoe. An English botanist and writer upon Scitamineæ.

Royle, Ill.—Royle's Illustrations.

Roxb. Corom.—Roxburgh's Plants of the Coast of Coromandel.

Roxb. ft. ind. ed Carey.—Roxburgh's Flora Indica, edited by the Rev. Dr. Carey.

Rozb. H. Bengl.—Roxburgh's Hortus Bengalensis.

Rudg.—Rudge, (Edw.) An English writer on Botany.

Rumph. Amb.—Rumphius, (G. Ev.) Herbarium Amboinense.

Ruiz. and Pav.—Ruiz, (Hipp) and Pavon, (Jos.) Authors of the Flora Peruviana et Chilensis.

Sab.—Sabine.

Salisb. par Lond.—Salisbury, (Rich. Ant.) Paradisus Londinensis, 2 vols. London, 1805.

Salm. Dyck.—Salm Dyck, (the Prince of.) A noble German amateur.

Salz.—Salzmann.

Salt. trav. - Salt's travels.

Schmidt.—Schmidt. A Bohemian botanist.

Schott.—Schott. A traveller in Brazil.

Schousb. moroc.—Schousboe, (P. K. A.) Jagttagelser over væxtriget i Morocco. Copenhagen, 1800.

Schleiden.—Schleiden. An eminent German physiologist and botanist.

Schkuhr. hand.—Schkuhr's (Christ.) Botanisches Handbuch, 3 vols. 1791.

Scop. carn.—Scopoli, (Joh. Ant.) Flora Carniolica, 1760.

Sm. and Sibth. fl. grac.—Smith and Sibthorp's Flora Graces, 6 vols. Lond. 1806.

Sloane, hist. jam.—Sloane, (Hans.) Voyage to Madeira, Barbadoes, Nevis, St. Christopher's, and Jamaica, 2 vols. 1707.

Sm. spicil.—Smith, (Jas. Edw.) Spicilegium Botanicum, 1791.

Smith exot. bot.—Smith, (Jas. Edw.) Exotic Botany, 1804.

Spreng. Neue Entdeck.—Sprengel. Neue Entdeckungen im ganzen Umfang der Pflanzenkunde, 1820.

Sprengl. syst.—Sprengel. Systema Vegetabilium. 5 vols.

Soland.-Solander. A Swedish botanist.

Sonnerat.—Sonnerat, (P.) Voyage a la Nouvelle Guinée, 1776.

Sut. fl. helv. - Satter. Flora Helvetica.

Steinh. Ann. sc. nat. - Steinhausen, Annales des Sciences Naturelles.

Swt. Brit. fl. gard.—Sweet's (R.) British flower garden, 1823.

Swz. fl. occid.—Swartz, Flora Indiæ Occidentalis, 3 vols. 1797.

Sower.—Sowerby. An English botanist and artist.

Tabern.—Tabernæmontanus, (Jac. Theod.) 1588.

Telf .- Telfair.

Ten.—Tenore. A Neapolitan botanist.

Thih.—Thibaud de Chanvalon, 1763. A French botanist.

Thore.—Thore. A French botanist.

Thonin.—Thonin. A French botanist.

Thuill.—Thuillier. A French botanist.

Till.—Tilli, (Mich. Aug.)

Thunb.—Thunberg, (Car. Petr.)

Thunb. ft. cap. ed. Schult.—Thunberg, (Car. Petr.) Flora Capensis, edited by Schultes.

Thunb. ft. Jap. rar.—Thunberg, (Car. Petr.) Flora Japonica, 1784.

Tournef.—Tournefort, (Pitton de.) A French botanist and traveller in Greece and Asia Minor, 1717.

Trans. Lina. Soc.—Transactions of the Linnman Society.

Trans. Med. Phys. Soc. Cal.—Transactions of the Medical and Physical Society of Calcutta.

Trin.—Trinius. A writer on Grasses.

Turp.—Turpin. A French botanist and draughtsman.

Tussc.—Tussac. A French writer on the Flora of the Antilles.

Vall. exum.—Vahl. (Prof. Martin) of Copenhagen.—Enumeratio Plantagen

Vahl. Symb.-Vahl. (Prof. Martin.) Symbolæ Botanicæ, 1790.

Vail.—Vaillant. A French botanist and traveller.

Vent. jard. de Cels.—Ventenat, (Etienne Pierre) Description des Plantes nouvelles ou peu connues du Jardin de J. M. Cels; Paris, 1800.

Vent Malm.—Ventenat, (Etienne Pierre) Jardin de la Malmaison, 1803.

#### THE CATALOGUE IS FOUNDED ON

- Dr. Carey's (Roxburgh's) Hortus Bengalensis, D: a catalogue of about 3500
  plants, which was the amount of species introduced into the Hon'ble
  Company's Garden, from its commencement to 1814.
- Dr. Carey's Garden Receipt-Book, in which he was accustomed to put down the names of the plants introduced into his garden, and afterwards to affix marks of their success. A present from the late Mrs. Dr. Carey.
- Several printed Sheets, (80 quarto pages,) embracing nearly the whole of
  the six first Linnæan Classes, limited to those species which had been cultivated in the Hon'ble Company's and the Serampore Gardens. This, Dr.
  Carey's last botanical work, was discontinued only by his death.
- 4. Mr. Masters's Private Catalogue of the Hon'ble Company's Garden.
- Dr. Wallich's Report to Government, 21st Dec. 1840, enumerating such plants as had been distributed from the Hon'ble Company's Garden, from the beginning of 1836 to the end of November 1840.
- A number of Dried Specimens of Plants, collected, with the Superintendent's permission, in the Hon'ble Company's Garden; and lastly,
- 7. ! Private Papers on botanical subjects, begun in 1830 and continued both during the life-time of Dr. Carey, and after his death, when the Superintendence of the Serampore Garden, in compliance with his wish, devolved on the Compiler.

#### THE CATALOGUE WILL CONTAIN

- Remarks on each order, their general properties, and geographical (especially Indian) distribution.
- The generic and specific names of the plants enumerated, with reference to the best authors and plates.
- 3. The Bengalee names of such plants as are indigenous, or commonly cultivated in Lower Bengal. These, though generally considered of little value, have been found very useful, when shown, in their original dress, to native gardeners, directed to go in search of particular plants.
- 4. The habit, flowering, and fruit-time, and the flowers of each individual plant.
- Their habitats, properties, and use, as far as these are known. And, lastly,
- 6. An Appendix (\*) to each order of such plants, as are thought desirable and likely to thrive in Lower Bengal. This has been added to aid horticulturists otherwise amply occupied in their selections, and if possible, to put an end to those injudicious and disappointing consignments, so frequently arriving from the nurseries in Europe.

OR FLOWERING PLANTS.

### HORTUS SUBURBANUS CALCUTTENSIS.

#### ORDER I.—RANUNCULACEÆ, DC. Lindl. Nat. Syst. p. 5.

#### THE CROW-FOOT TRIBE.

This chiefly herbaceous, rarely shrubby order, abounding in species, is extensively diffused throughout the cold and temperate parts of the globe. Their total amount may, perhaps, be estimated at 700, of which the greater part are found in Europe, Siberia, and the Levant. About 80 species have been discovered in N. America; 32 in S. America; 30 in China; 21 in Australasia; 15 in N. Africa; 20 in S. Africa; 6 in Mexico; 5 in the W. Indies; and a few in Japan, Cochin China, and Sierra Leone. In the tropics, they are found in mountainous regions, from the highest Alpine ranges down to such vallies of hilly tracts as are sufficiently elevated to compensate for low latitude; and though a few species straggle down to the plains, as, in India, Ranunculus sceleratus and aquatilis, Wight (111. p. 3.) is, no doubt, right in asserting, that wherever, within the tropics, we meet with herbaceous forms of Ranunculacese, we may feel assured of having attained an elevation sufficient to place us beyond the influence of jungle fever. In 1818, according to De Candolle, the Indian forms of this order amounted only to 19. At present their number has risen to 135; viz. 32 species of Clematis; 3 of Naravelia; 18 of Thalictrum; 16 of Anemone; 1 of Adonis; 32 of Ranunculus; 3 of Caltha; 1 of Trollius; 1 of Coptis; 2 of Isopyrum; 2 of Aquilegia; 14 of Delphinium; 7 of Aconitum; 1 of Actes; 1 of Cimicifuga; and 1 of Pæonia. Eight of these also belong to Europe.

"Acridity, causticity, and poison, are the general characters of this suspicious order, which, however, contains species in which these qualities are so little developed as to be innoxious. The caustic principle is, according to Kropfen, as cited by De Candolle, of a very singular nature; it is so volatile that, in most cases, simple drying, infusion in water, or boiling, are sufficient to dissipate it; it is neither acid nor alkaline; it is increased by acids, sugar, honey, wine, spirit, &c. and is only effectually destroyed by water and vegetable acids." (Lindl.) Notwithstanding their caustic

and poisonous properties, many species of this tribe have been used in medicine, as well internally as externally; they are, however, now obsolete. One of the Himalayan species, Aconitum ferox, Wall., commonly called and Bish, is a most virulent poison, used in the northern part of Hindoosthan for destroying tigers by means of poisoned arrows, shot from bows fixed near the tracks leading to their watering places. (Colebrooke.)

CLEMATIS, L. (DC. prodr. 1, p. 2;—W. and A. prodr. 1, p. 1.) Virgin's Bower.

- Flammula, L. (DC. l. c.) 5 

  S. Europe.—Fl. smallish, white,— May and June; fr. 0.
- 2. Gouriana, Roxb. (Fl. Ind. 2, p. 670;—DC. pr. 1, p. 3;—W. and A. pr. 1, p. 2;—J. Grah. Cat. B. pl. p. 1.) L. 5 India, from Dindygul and the Neelgherries up to Deyra Dhoon, along the foot of the Himalayas. Fl. smallish, white,—Septbr.; fr. Jan. and Feb.
- 3. Vitalba, L. (DC. pr. 1, p. 3.,—Jacq. fl. austr. t. 308;—E. B. 9, t. 612.) 5 

  ✓ Middle and South Europe, Tauria.—Fl. middle-sized, white, fragrant,—R. S., but rare; fr. 0.
- Wightiana, Wall. (W. and A. pr. 1, p. 2;—J. Grah. Cat. B. pl. p. 1.)
   Neelgherries, Mahableshwur, and the adjoining Ghauts. Has been introduced into H. C. G. Fl.?
- 5. grata, Wall. (Pl. as. rar. 1, t. 98.) 5 Nepal. Fl. small, yellowish, fragrant. Introduced here in 1840, but has not fl. yet.
- cylindrica, Sims. (B. M. 29, t. 1160;—DC. pr. 1, p. 7.) 5 N.
   America. Fl. large, blue,—June; fr. 0.
- Viorna, L. (DC. pr. 1, p. 7;—Jacq. ecl. 1, p. 50, t. 32.) 5 Virginia, Carolina. Fl. large, blue,—June, but rare.
- 8. reticulata, Walt. (DC. pr. 1, p. 7.—C. cordata, B. M. 43, t. 1816,) 5 S. Carolina, Georgia. Fl. largish, pale purplish,—July; fr. 0.
- integrifolia, L. (DC. pr. 1, p. 8;—B. M. 2, t. 65.)
   Hungary, Carniolia, Siberia, Pyrenees. Fl. large, indigo-coloured,—May and June; fr. August.
- ochroleuca, Ait. (DC. pr. 1, p. 8.)
   Pennsylvania, Carolina. Fl. large, yellowish,—June, but rare: fr. 0.
- florida, Thunb. (Flor. jap. p. 240;—DC. pr. 1, p. 8;—B. M. 22, t. 834.)
   Japan. Fl. very large, white,—C. S. Introduced in 1819, but has not fl. during the last twelve years.
- 12. Viticella, L. (DC. pr. 1, p. 9;—B. M. 16, t. 565.) 5 Warmer parts of Europe. Fl. very large, beautifully purple, with dark veins. Introduced in 1825. Has not fl.
- NABAVELIA, DC. (pr. 1, p. 10;—W. and A. pr. 1, p. 2.)
  - 1. Zeylanica, DC. (L. c.,—W. and A. l. c.,—J. Grah. Cat. B. pl. p. 1.—Atragene zeylanica, L;—Roxb. Corom. 2, t. 188; fl. ind. 2, p. 670.) Essential Chhagul-batee. 4. Ceylon. Both Peninsulas of India, Bengal, (Serampore,) &c. Fl. middle-sized, yellowish,—R. S;—fr. C. S.

- THALICTRUM, L. (DC. pr. 1, p. 11;—W. and A. pr. 1, p. 2.) Meadow Rue.

  —From 1817, up to the present time, 34 species of this genus—one of the surest indicators of a cold climate—have been introduced into the Serampore Garden, but only the following two have flowered:—
  - 1. foliolosum, DC. (l. c. p. 12.) 4. Nepal, Kemaon, Khassya Mountains. Fl. small, yellowish,—August. Herb bitter; used by the Natives in fever.
  - 2. fleruosum, Jacq. (Loud. hort. brit. p. 229, No. 14,529.) 4. Native place unknown. Fl. small, yellowish,—May and June; fr. Aug.—Seeds received from the Liverpool Botanic Garden.
    - T. bracteatum, Roxb. (Fl. ind. 2, p. 671.) 4.  $\smile$  N. Bengal. Introduced in 1797. Fl. C. S. (Roxb.) No doubt a species of Clematis.
- RANUNCULUS, L. (DC. pr. 1, p. 26;—W. and A. pr. 1, p. 3.) Crow-foot.
  - 1. sceleratus, L. (DC. pr. 1, p. 34;—E. B. 10, t. 681.—R. indicus, (Roxb. fl. ind. 2, p. 671.) © Europe, Siberia, Cochin China, India, (Serampore, Calcutta, &c.) Fl. small, yellow, and fr. C. S.—A very acrid plant; when applied fresh, quickly producing a blister.—Besides Ranunculus aquatilis, L., a variety of which has been found about Saharunpore, this is the only species of Crow-foot hitherto discovered in the plains of tropical India. The Natives have no name for it, nor do they use it.
  - bulbosus, L. (DC. pr. 1, p. 41;—E. B. 8, t. 515;—Roxb. H. B. p. 43.)
     Europe, America, Kunawur. Fl. largish, bright yellow,—March and April; fr. May. The whole plant, but especially the unripe fruit, very acrid.

  - maricatus, L. (DC. pr. 1, p. 42;—Sibth. fl. græc. t. 522.)
     Europe, along the Mediterranean.
     Fl. smallish, yellow,—Febr. and March; fr. April.
  - modiflorus, L. (DC. pr. 1, p. 43; —Waldst. and Kit. pl. rar. hung. 2, p. 192, t. 176.)
     France, Hungary. Fl. small, yellow, —Febr. and March; fr. April.

Eight other perennial species of Ranunculus, introduced between 1816 and 1828, could scarcely be kept alive during the hot season.

COPTIS. Salisb. (DC. pr. 1, p. 47.)

- Teeta, Wall. (Notes on the Drugs called Mishmee Teeta and Púcha Pat. Med. and phys. soc. Calcutta, vol. 8, p. 85.—W. Twining; Notes on the medical properties of the root of the Mishmee Teeta, l. c.)
   Mishmee mountains. Introduced into H. C. G. Fl.?—Root pure bitter, tonic, and as such recommended by Twining.
- ISOPYRUM, L. (DC. 1, pr. 1, p. 48.)
  - fumarioides, L. (DC. l. c.,—Schkuhr. handb. 2, No. 1531. t. 153.)
     Siberia. Fl. small, white,—Febr. and March; fr. April.

- NIGELLA, L. (DC. pr. 1, p. 48.) Fennel Flower.
  - 1. sativa, L. (DC. l. c. p. 49.)
    - δ indica, DC. (l. c.—N. indica, Roxb. fl. ind. 2, p. 646.) ▼ Indica, Kaljira. ⊙ S. Europe, Asia Minor, Syria. Acclimated in the gardens of India. Domesticated about Serampore. Fl. largish, white, and fr. C. S.—Seeds formerly used as pepper. The Natives esteem them as a condiment and stomachic.
  - 2. hispanica, L. (DC. l. c.,—B. M. 31, t. 1265.) 

    Spain, Barbary.

    Fl. large, blue, sometimes white,—Febr. and March; fr. April.
  - 3. orientalis, L. (DC. l. c.,—B. M. 31, t. 1264.) ⊙ Aleppo. Fl. largish, greenish-yellow, dotted with scarlet,—Febr. and March; fr. April.
- 4. damascena, L. (DC. l. c.,—B. M. 1, t. 22.) Countries along the Mediterranean. Fl. large, pale, blue,—Febr. and March; fr. April. Aquilegia, L. (DC. pr. 1, p. 50.) Columbine.
  - 1. vulgaris, L. (DC. l. c;—E. B. 5, t. 297.) 4. Europe.—Fl. large, bluish purple, and fr. C. S.—Plant astringent.
- DELPHINIUM, L. (DC. pr. 1, p. 51; -W. and A. pr. 1. p. 4.) Larkspur.
  - 1. Ajacis, L. (DC. l. c.;—W. and A. l. c;—Roxb. H. B. p. 43;— J. Grah. Cat. B. pl. p. 1.) ⊙ Tauria. Acclimated in India.—Fl. largish, of various colours, and fr. C. S.—Seeds very acrid.
  - 2. Consolida, L. (DC. l. c.;—E. B. 26, t. 1839.) ⊙ Europe, N. America.—Fl. large, purplish blue,—Febr. and March; fr. April.

  - No Aconitum or Paonia has ever flowered here.
  - \* Clematis orientalis, L. 5 ULevant. C. chinensis. Retz. 5 UChina. C. havanensis, H. B. and Kth. 5 U Havannah. C. balearica, Rich. (C. calycina, Ait; B. M. 24. t. 959.) 5 \( \times \) Minorca. C. caripensis, Humb. 5 - Trinidad. C. dioica, L. 5 - Jamaica. C. zanzibariensis, Bojer. 5 V Zanzibar. C. pedicellata, Swt. (C. cirrhosa, Sims; B. M. 27, t. 1070.) 5 — Majorca. C. chlorantha, Lindl.; B. Reg. 15, t. 1234. 5 Sierra Leone. C. Munroiana, Wight; ill. t. 1, Neelgherries. C. hedysarifolia, DC.; B. Reg. 7, t. 599. 5 Burma. C. smilacifolia, Wall. Cat. 5 V Khassya Mountains.— Desf. O Greece.-Ficaria ranunculoïdes, Mönch. (Ranunculus Ficaria, L.; E. B. 9, t. 584.) 4. Europe.—Garidella Nigellastrum, L.; B. M. 31, t. 1266. France, Italy.—Delphinium pubescens, DC. Mediterranean. D. Aconiti, L. O Levant. D. peregrinum, Willd. O Italy. D. ambiguum, L. O Barbary. D. Virgatum, Poir. ⊙ Syria. D. Staphisagria, L. of S. Europe.

Of the Sub-Order, *Podophylleæ*, Lindl. Nat. Syst. p. 7, only *one* species has been found in India, viz. *Podophyllum Emodi*, Wall. in Sirmore and Gossainthan.

ORDER II.—PAPAVERACEÆ, Juss.—Lindl. Nat. Syst. p. 7.

#### THE POPPY TRIBE.

Annual or perennial herbs, rarely under-shrubs, with a milky juice. The total amount of species is about 66, of which 28 have been found in Europe; 7 in the Levant; 9 in N. America; 5 in Mexico; 5 in India; 3 in Persia; 2 in Siberia; 2 in N. Africa; 3 in China and Japan; 1 in N. Holland; and 1 in S. Africa. Most of them are annuals, 21 perennials and chiefly mountainous, and 2 shrubby.—Of the five Indian species, two belong to Papaver, and three to Meconopsis. One of the latter, M. nepalensis, DC., especially its root, is according to D. Don. (Pr. fl. nep. p. 98), very poisonous.—The medicinal properties of the juice of the poppy (opsim) are well known, and their narcotic character is more or less traced throughout the whole order. The Sanguinaria canadensis, L, is, however, given in large doses, emetic and purgative, and, in smaller ones, stimulant, sudorific,, and expectorant. (Barton's coll. mat. med. 1. p. 37.)

PAPAVER, L. (DC. pr. 1, p. 117; -W. and A. pr. 1, p. 17.) Poppy.

- hybridam, L. (DC. l. c. p. 118;—E. B. 1, t. 43.) ⊙ W. and S. of Europe. Fl. largish, deep red.—Febr. and March; fr. April.
- 2. Argemone, L. (DC. l. c.,—E. B. 9, t. 643.) ⊙ Europe. Fl. largish, scarlet,—Febr. and March; fr. April.
- 3. dubium, L. (DC. l. c.,—E. B. 9, t. 644.) ⊙ Europe. Fl. large, palish scarlet.—Febr. and March; fr. April.
- 4: Rhoeas, L. (DC. l. c.,—E. B. 9, t. 645;—J. Grah. Cat. B. pl. p. 6.)

  Ο γ. Europe. Fl. large, scarlet,—Febr. and March; fr. April.
- somniferum, L. (DC. l. c. p. 119.) Opium-Poppy. 
   Morea, Egypt, hotter parts of Asia. Fl. large,—Febr. and March; fr. April and May.
  - a. nigrum. Fl. purplish. Seeds black.
  - B. album. Fl. and seeds white. (Papaver somniferum, E. B. 30, t. 2145;—Roxb. fl. ind. 2, p. 571;—W. and A. pr. 1, p. 17;—J. Grah. Cat. B. pl. p. 6.) Control Posto.—Extensively cultivated in India. The juice expressed from the seeds, held to be very useful in chronic diarrhea. (Dr. Gibson.) Their oil pure, sweet, for culinary purposes almost as good as olive oil.

Several varieties of a and  $\beta$  occur in our gardens, f. ex. fimbriatorubrum, album and nigrum; pleno-rubrum; purpureum; pleno-album, &c.

ROMERIA, Medik. (DC. pr. 1, p. 122.)

- hybrida, (DC. l. c.—Chelidonium hybridum, L.,—E. B. 3, t. 201.)
   Violet horned Poppy. 

   S. Europe, along the Mediterranean, England.
   Fl. large, purple,—Febr. and March; fr. April
- GLAUCIUM, Tournef. (DC. pr. 1. p. 122.) Horn Poppy.
  - 1. corniculatum, Curt. (Lond. 6, t. 32;—DC. l. c.)
    - a. phæniceum, DC. (l. c.—Glaucium phœniceum, Sm.,—E. B. 20, t. 1433.)
       O England, France. Fl. large, scarlet,—Febr. and March; fr. April.
- CHELIDONIUM, L. (DC. pr. 1, p. 122.) Celandine.
  - majus, L. (DC. l. c. p. 123;—E. B. 22, t. 1581.)
     Burope. Fl. smallish, yellow,—C. S.; but very rare.
  - laciniatum, Mill. (DC. l. c.)
     Germany, England. Introduced in 1820. Fl.?
- Chryseis, Lindl. (B. Reg. 23. t. 1948,—not Cass. nor Less.—Eschsholzia, Cham.,—DC. pr. 3. p. 344.)—Chamisso's name being merely a misspelling of Elsholtzia, a labiate genus, established by Willdenow in memory of Elsholtz, the father, must be excluded, though it was meant for Elsholtz, the son.—Chryseis, Less. is a synonyme of Amberboa, DC., and Cryseis, Cass. a section of it.

  - crocea, Lindl. (Eschsholzia crocea, Benth.;—B. Reg. 20, t. 1677;—B. M. 63. t. 3495.) ⊙ California. Fl. large, yellow,—Febr. and March; fr. April.
  - \* Papaver persicum, Lindl.; B. Reg. 19, t. 1570. Persia. P. amoenum, Lindl.; B. Reg. app. of 1839, p. 56. N. India. Seeds from Dr. Falconer. P. glabrum, Royl. ill. p. 67. Himalaya. P. orientale, L.; B. M. 2, t. 57. Levant.—Argemone mexicana, L. β ochroleuca, Lindl; B. Reg. 16, t. 1343. γ. albiflora, Lindl. (A. albiflora, Sims; B. M. 49, t. 2342.) A. grandiflora, Swt.; B. California.

# SUB-ORDER.—FUMARIEÆ, Lindl. Nat. Syst. p. 9.

#### THE FUMITORY TRIBE.

Herbaceous, mostly annual plants, inhabiting chiefly the temperate latitudes of the northern hemisphere. In all, they amount to about 70 species, of which 18 have been found in Europe; 18 in India; 11 in Siberia; 10 in N. America; 4 in S. Africa; 4 in Japan; 3 in the Levant; 2 in N. Africa; and 1 in Persia. The Indian species, besides 2 that are common to other countries, consist of 16 of Corydalis; 1 of Dactylocapnos; and 1 of Macrocapnos.

The herbs belonging to this tribe are filled with a watery, not milky, juice, and are bitterish, scentless, sudorific, and aperient. Their juice, formerly prescribed against abdominal obstructions, is now only used occasionally in cutaneous diseases. (DC.)

CORYDALIS, Vent. (DC. pr. 1, p. 128.)

- 1. capnoides, Pers. (DC. l. c. p. 129.)
  - β. lates, DC. (l. c.—Fumaria lutea, Sm; E. B. 9, t. 588.)
     Europe. Fl. largish, yellow,—and fr. C. S.
- glauca, Pursh. (DC. pr. 1, p, 128.—Fumaria glauca, Curt., B. M. 5, t. 179.) 

   Canada. Fl. largish, rosy yellow,—Febr. and March;
   fr. April.
- claviculata, DC. (l. c. p. 129.—Fumaria claviculata, L., E. B. 2, t. 103.)
   Europe. Fl. small, yellowish-white,—Febr. and March; fr. April.
- aurea, Willd. (DC. l. c. p. 128.—Fumaria aurea, Mühl.; B. Reg. 1,
   t. 66.) Shady rocks in Pennsylvania, Virginia and Canada. Fl. largish, gold-coloured,—Febr. and March; fr. April.
- Fumaria, L. (DC. pr. 1, p. 129; -W. and A. pr. 1, p. 18.) Fumitory.

  - officinalis, L. (DC. l. c.,—W. and A. l. c.,—E. B. 9, t. 589). ⊙
     Europe. Fl. like those of No. 1;—and fr. C. S.

<sup>\*</sup> Sarcocapnos crassifolius, DC. 4. N. Africa.—Fumaria capreolata, L.  $\odot$  S. Europe. F. media, Lois. (F. capreolata, Lightf. E. B. 14, t. 493.)  $\odot$  Europe.

ORDER III.—NYMPHÆACEÆ, Salisb.—Lindl. Nat. Syst. p. 10.

#### THE WATER-LILY TRIBE.

Floating plants, dispersed over various parts of the world, all perennial, and distinguished generally by large, beautiful flowers. Their number amounts to 29 species, of which 7 inhabit India; 6 N. America; 4 Europe; 3 S. America; 2 Egypt; 2 Siberia; 1 China; 1 Japan; 1 Madagascar; 1 S. Africa; and 1 the W. Indies. Of the 7 Indian forms, 1 belongs to Euryale; to Barclaya; and 5 to Nymphaa.

Their stems are bitter and astringent, and contain a considerable quantity of feecula, which may be used as food. (DC.)

Euryale, Salisb. (DC. pr. 1, p. 114.)

- ferox, Salisb. (DC. l. c.,—B. M. 35, t. 1447.—Anneslea (not Wall.) spinosa, Andr.; B. Repos. 9, t. 618;—Roxb. fl. ind. 2, p. 573.)
   Luknow, Tippera, Chittagong, Saharunpore. Fl. small, bluish-purple. R. S., fr. C. S.—Seeds farinaceous, and, after having been heated in hot sand and husked, eaten by the Natives. (Roxb.)
- NYMPHEA, L. (DC. pr. 1, p. 114;—W. and A. pr. 1, p. 16.) Water Lily.

  1. pubescens, Willd. (DC. l. c. p. 115;—W. and A. l. c.—J. Grah. Cat.
  B. pl. p. 6.—N. Lotus, Burm.,—Roxb. fl. ind. 2, p. 577,—not L.—
  Rheed. 11, t. 26. APTICE Buro-shaluk. A. Africa. Both Peninsulas of India, Bengal, (Serampore), &c.; in short, like the other species, except N. rubra, found in every part of India, from 8° to 32° N. Lat. (Royle.) Fl. large, white, of a vinous smell,—R. and C. S.;—fr. H. S.
  - 2. rubra, Roxb. (Fl. ind. 2, p. 576;—DC. l. c.,—W. and A. l. c. p. 17;—J. Grah. Cat. B. pl. p. 5;—B. M. 31, t. 1280;—Wight. ill. 1, t. 10.) 

    44.444 Buro-rukto-kumbul. 4. Both Peninsulas of India, Bengal, (Serampore). Fl. large, intensely red,—H. and R. S.,—fr. R. S.
    - β. rosea. (Roxb. l. c.,—B. M. 33. t. 1364.) ( chhoto-rukto-kumbul. 4. Bengal, (Serampore.) Fl. large, rose-coloured,—H. and R. S.,—fr. R. S.
  - 3. versicolor, Roxb. (Fl. ind. 2, p. 577;—DC. l. c.,—B. M. 29, t. 1189.) 

    The Buro-sundhi. A. Bengal, (Serampore), &c. Fl. large, rose-coloured, or bluish white,—H. and R. S.,—fr. R. S. β. alba. Bengal, (Serampore). Fl. white.
  - 4. edulis, (DC. pr. l. c.—N. esculenta, Roxb. A. ind. 2, p. 578.)

    (Elevis Chhoto-sundhi. 4. Bengal, (Serampore), &c. Fl. large, white,—H. and R. S.,—fr. R. S. The underground stems (roots) especially of this, but also of the other species, are much sought after by the Natives, both as an article of food and medicine. The capsules and seeds are either pickled, or made up with their curries, or ground and mixed with flour to make cakes. (Roxb.)

- 5. stellata, Willd. (DC. l. c.,—W. and A. pr. 1, p. 17;—Rost. fl. ind. 2, p. 579;—J. Grah. Cat. B. pl. p. 5;—Wight. icon. 1, t. 178.—Rheede, 11, t. 27.) ভোটনাৰ্থ Chhoto-neelpudmo. 4. Peninsula of India, Bengal, (Serampore), &c. Fl. smallish, blue,—H. and R. S.; fr. R. S.
  - β. major (N. cyanea, Roxb. fl. ind. 2, p. 577;—B. M. 46, t. 2058.) বড়নীৰপ্য, Buroneel-pudmo. 4. Bengal, (Serampore). Fl. largish, blue,—H. and R. S; fr. R. S.
- \* Barclaya oblonga, Wall. 4. Rangoon. Victoria regia, Lindl., B. Reg. 1838, app. p. 9—14. 4. Guiana.—Cabomba aquatica, Aubl. 4. Guiana.

# ORDER IV.-NELUMBIACEÆ, Lindl. Nat. Syst. p. 13.

#### THE SACRED-BEAN TRIBE.

Herbaceous plants, with very large leaves and flowers, inhabiting stagnant and quiet waters in N. America, Jamaica, the Caspian region, India, and formerly in Egypt. The order comprehends but one genus with five species; three of which are insufficiently known. The remaining two belong to India and N. America.

NELUMBIUM, Juss. (DC. pr. 1, p. 113;—W. and A. pr. 1, p. 16.)

- 1. speciosum, Willd. (DC. l. c.,—W. and A. l. c.,—Roxb. ft. ind. 2, p. 647;—J. Grah. Cat. B. pl. p. 5.) 4. All India, Persia, China, Cochin China, Japan. Fl. very large, nearly inodorous, H. and R. S.; fr. R. S. The underground stems are eaten by the Natives, boiled, or in their curries,—and the seeds raw, roasted, or boiled. The leaves are used as a substitute for plates. (Roxb.)—In China the roots are not only served up in summer with ice, but they are also laid up in salt and vinegar for the winter. (Loud. enc. of pl. p. 479.) Kent of Clapton, says, that the seeds will keep forty years, vegetate freely, and flower the first year. (Hort. trans. 3, p. 36.)
  - a. rubrum, (B. M. 23, t. 903.—Rheede, 11, t. 30.—Rumph. 6, t. 73.) **35913**, Rukto-pudmo. Fl. rose-coloured.
  - β. album. (Wight. ill. 1, t. 9.—Rheede, 11, t. 31.) (Ψ39), Shwet-pudmo. Fl. white.

<sup>\*</sup> N. luteum, Willd. 4. N. America.

# ORDER V.—MYRISTICACEÆ, Lindl. Nat. Syst. p. 15.

#### THE NUTMEG TRIBE.

Trees often yielding a red juice, (R. Br.) and arranged under three genera, Myristica, L., Virola, Aubl., and Knema, Lour. According to our materials, these contain 48 species, of which 29 are described, and 19 only named. Myristica numbers 46 species; 27 inhabiting the Moluccas, Cochin-China, Java, Ceylon, and the ultra-gangetic Peninsula of India; 4, the intra-gangetic Peninsula of India; 3, S. America; 2, Madagascar; 1, Aleppo; 1, Mauritius; 2, Chittagong; 2, the Khassya Mountains; and 2 New Holland. Virola and Knema have each but one species, the first a native of Guiana, the second found in Penang.

As to the properties of this order, all that can be said is this: 'The bark (of the well known species) abounds in an acrid juice, which is viscid and stains red; the rind of the fruit is caustic; the aril and albumen, the former known under the name of Mace, and the latter of Nutmeg, are important aromatics, abounding in a fixed oil of a consistence analogous to fat, which, in a species called Virola sebifera, Aubl. is so copious as to be extracted easily by immersing the seeds in hot water. The common Nutmeg is the produce of Myristica moschata, but an aromatic fruit is also borne by other species. The Nutmeg of Santa Fé is the Myristica Otoba, Humb.' (Lindl.)

MYRISTICA, L. (Spreng. syst. 3, p. 6, No. 2382;—R. Br. pr. p. 399 and 400.)

- 1. moschata, Thunb. (Spreng. o. c. p. 64;—Rozb. A. ind. 3, p. 843;
  —J. Grah. Cat. B. pl. p. 175.—M. officinalis, L., Gürtn. fr. 1, p.
  194, t. 41, f. 1. Hook. exot. fl. t. 155-6;—B. M. 54, t. 2756-57.

  —M. aromatica, Lam.,—Rozb. Corom. 3, t. 267.—Nux Myristica, Rumph. 2, t. 4.) True Nutmeg Tree.—5. 25 feet.—Moluccas. Successfully cultivated in Sumatra, Bencoolen, and Penang. Fl. small, pale yellow, inodorous. In H. C. G. some old trees, introduced in 1797, fl. R. S.; fr. H. and R. S. (Rozb.)—Mace.—— Tyree.—Albumen (Nutmeg) Tyree, Jupphul. The nut contains a volatile, as well as a fixed oil.
- tomentosa, Thunb. (Spreng. o. c. p. 65;—J. Grah. Cat. B. pl. p. 175.—Rheede, 4, t. 5.)—M. malabarica, Lam. 5. Moluccas, Malabar, S. Concan. Fl. small, yellowish. In H. C. G. Fl.?
- 3. peltata, Roxb. (Fl. ind. 3, p. 846.) 5. Mountains of the Moluccas. Introduced into H. C. G. in 1798, and the of there fl. H. S. (Roxb.)
- 4. spicata, Roxb. (Fl. ind. 3, p. 847.) 5. Moluccas. Introduced into H. C. G. in 1798. In 1804, the Q fl. R. S., but proved abortive. No part of the tree possesses any fragrance. (Roxb.)

L

C

- 5. parviflora. Roxb. (l. c.) 5 Moluccas. Introduced into H. C. G., where ♀ fl. R. S, but the fl. proved abortive. (Roxb.)
- \* Myristica fatua, Swz. 5. Guiana, W. Indies, Surinam. M. Otoba, Humb. 5. New Granada. M. Horsfieldii, Spreng. 5. Ceylon, Java. M. amygdalina, Wall. pl. as. rar. 1, t. 90. 5. Moulmein. M. sphærocarpa, Wall. pl. as. rar. 1, t. 89. 5. Martaban. M. sylvestris, Telf. 5. Mauritius.—Virola sebifera, Aubl. 5. Guiana.—Knema glaucescens, Jack. 5. Penang.

ORDER VI.-MAGNOLIACEÆ, DC.-Lindl. Nat. Syst. p. 16.

#### THE MAGNOLIA TRIBE.

Fine trees or shrubs, with large, beautiful, often strongly odoriferous flowers. Their number amounts to 47 species, of which 9 belong to N. America; 1 to Mexico; 29 to the E. Indies; and 8 to Cochin-China, China, R. Brown remarks, "that no species have been found on the continent of Africa, or any of the adjoining islands." (Lindl.) Of the 8 Asiatic species of Magnolia, enumerated by DC., in the section Gwillimia, Röttl., 2 have been removed to Michelia, and 1 to Talauma. Magnolias, (M. conspicua, Salisb., obovata, Thunb., gracilis, Salisb.), though with introrse anthers, cannot be joined to Michelia, Bl. having terminal flowers, and their fruit, besides, being unknown. The 2 remaining species (M.? Coco and ? inodora, DC.) are only known from Loureiro's very deficient descriptions. The Indian species are ranged under five genera,-Michelia, L.; Manglietia, Bl.; Aromadendron, Bl.; Sphenocarpus, Wall. Cat.; and Talauma, Juss. The first of these numbers 22 forms, or, if Wallich's Magnolia punduana, be no Michelia, only 21; viz. 7 from Nepal; 5 from Java; 3 from Ceylon; 2 from the Khassya Mountains; 1 from the Neelgherries; 1 from the Pulney Mountains; 1 from Malabar; 1 from Pegu; 1 from Amboyna; and 1 from Chilmori. Manglietia has 3 species; one from Nepal, and two from Java; Aromadendron and Sphenocarpus each 1 species, the first Javanese, the latter Khassyan; and Talauma, 2 Javanese-Molucca forms. Blume is of opinion, that Magnoliaceæ are absolutely known from Dilleniacese by their bitter and aromatic properties. Their fragrant flowers act decidedly on the nerves, some of them producing sickness, headache, and paroxysms of fever. The bark of the root of Magnolia glauca is an important tonic. (Bart.)

MICHELIA, L. Bl. (Wight ill. p. 11, from Bl.)

Doltsopa, Buch. (DC. pr. 1, p. 79; —Wall. tent. fl. nep. p. 7, t. 3; —Wight. ill. 1, p. 13.)
 Forests of Nepal. In H. C. G. Fl.? Wood fragrant, excellent, used in Nepaul for house-building. (D. Don. pr. fl. nep. p. 226.)
 Another Nepalese species, M. excelsa,

- Bl. (Magnolia excelsa, Wall.) yields valuable timber, of a fine texture; at first greenish, but soon changing into pale yellow. Wall. tent. fl. nep.)
- 2. Champaca, L. (Wight. ill. 1, p. 13;—Bl.,—DC. pr. 1, p. 79, partly;—Roxb. fl. ind. 2, p. 656.) Step Champa. 5. Moluccas, Java. Cultivated in Bengal, (Calcutta, Serampore, &c.) Fl. large, deep yellow, intensely fragrant,—H. and R. S.; fr. C. S. Indeed, it fl. and fr. nearly throughout the year.—Flowers highly esteemed by the Natives, especially for the use they make of them in their religious ceremonies.
- 3. Kisopa, Buch. (DC. l. c.,—Wall. tent. fl. nep. p. 8. t. 4.,—Wight, l. c.) 5 Forests of Nepal. In H. C. G. Fl.?
- 4. aurantiaca, Wall. (Pl. as. rar. 2, t. 147.) L. 5. Pegu. Fl. large, orange-coloured, fragrant,—C. S.; fr. June and July.
- fuscata, Bl. (Wight. ill. 1, p. 11.—Magnolia fuscata, Andr. B. Repos. 4, t. 229;—B. M. 25, t. 1008;—DC. pr. 1. p. 81;—Rosb. fl. ind. 2, p. 655.)
   China. Fl. largish, cream-coloured, purple-edged, fragrant,—March and April; fr. 0
- 6. oblonga, Wall. Cat. 5. Khassya Mountains. In H. C. G. Fl.? MAGNOLIA, L. (DC. pr. 1, p. 79.)
  - ? 1. obovata, Thunb. (DC. o. c. p. 81.)
    - β discolor, DC. (l. c.—M. discolor, Vent.—M. purpurea, Curt., B.
       M. 11. t. 390. M. obovata, Roxb. fl. ind. 2, p. 655.)
       Japan, China. Fl. large, dark, purple, rose-coloured, inodorous,—R. S.; fr. 0. (Roxb.)
- ? 2. conspicua, Salisb. (Par. t. 38.—B. M. 39, t. 1621.—M. Yulan, DC. pr. 1, p. 81.)
   5 China. Introduced in 1840.
- SPHENOCARPUS, Wall. Cat. Sine charactere! (Lindl. Nat. Syst. p. 16.)

  1. grandiflorus, Wall. Cat. (Liriodendron grandiflorum, Roxb. fl. ind.

  2, p. 653. L. indicum, Spreng. syst. 2, p. 642. Magnolia pterocarpa, Roxb. Corom. 3, t. 266.) [ [all bloom] Doolee-champa. 5. Chittagong, Sylhet. Fl. large, white, fragrant,—April and May; fr. C. S.

What may be Liriodendron Lilifera, Roxb. (Fl. ind. 2, p. 654.) Ratiform, Ouva-champa, a large tree from the Khassya Mountains, introduced into H. C. G. before 1814, is not easy to say. It is mentioned neither in Wall. Cat., nor in Royl. Ill., and to Mr. Griffith, who is familiar with Bhootan, Assam, and the Khassya Mountains, it is entirely unknown.

- TALAUMA, Juss. (G. Don's Mill. dict. 1, p. 85.)
  - 1. pumila, Bl. (G. Don., l. c.—Magnolia pumila, Andr. B. Repos. 3, t. 227;—B. M. 25, t. 977;—DC. pr. 1, p. 81,; Roxb. fl. ind. 2, p. 655;—not Spreng.) 5 China, Mountains of Amboyna and Java, Fl. largish, white, fragrant,—nearly throughout the year; fr. 0.
- LIRIODENDRON, L. (DC. pr. 1, p. 82.)
  - tulipifera, L. (DC. l. c.,—B. M. 8, t. 275.) Tulip Tree. 5. N. America. Introduced in 1840.

\* Michelia Rheedii, Wight.,—Rheede, 1, t. 19. 5. Malabar, Pulney Mountains, Shavagery Hills. M. Walkeri, Wight. 5. Ceylon. M. ovalifolia, Wight. 5. Ceylon. M. glauca, Wight. 5. Ceylon. M. nilagirica, Zenker, Neelgherries. M. pulneyensis, Wight. ill. t. 5. L. 5. Pulney Mountains. M. lanuginosa, Wall. 5 Nepal. M. lactea, Buch. Chilmori. M. macrophylla, Don, Nepal.—Manglietia insignis, Arn. (Magnolia insignis, Wall. pl. as. rar. 2, t. 182.) 5. Nepal.—Aromadendron elegans, Bl. 5. Java.—Talauma Rumphii, Bl. 5. Moluccas. T. Candollii, Bl.,—B. Reg. 20, t. 1709. 5. Java.

## ORDER VII.—WINTERACEÆ, Lindl. Nat. Syst. p. 17.

#### THE WINTER'S BARK TRIBE.

Shrubs or small trees, containing, under four genera, twelve species; viz. 2, inhabiting New Holland; 2, Chili; 2, Florida; 1, the vallies about the Magellan Straits; 1, New Granada; 1, Mexico; 1, Japan and China; 1, found by Mr. Griffith, on the Khassya Mountains; and 1, New Zealand.

The general properties of this order are stimulant and aromatic. The well-known Star Anise is the fruit of Illicium anisatum, L. Winter's Bark, the product of Drimys Winteri, Forst., and formerly much used in medicine, is now nearly neglected.

ILLICIUM, L. (DC.) pr. 1, p. 77.)

- 1. floridamen, Ell. (DC. l. c.,—B. M. 13, t. 439.) 5 E. Florida. Introduced into H. C. G. Fl.?
- \* Illicium anisatum, L. 5. China, Japan. I. parviflorum, Michx. 5 E. Florida.—Drimys mexicana, Moc and Sessé. Mexico.

ORDER VIII.—ANONACEÆ, Rich. Lindl. Nat. Syst. p. 18.

### THE CUSTARD-APPLE TRIBE.

With few exceptions, a tropical order, chiefly inhabiting America and the East Indies, and comprehending upwards of 200 species. Nine of these have been found in tropical Africa; 1 in Egypt; 3 in Madagascar and Mauritius; 6 in China and Japan; 1 in New Caledonia; 1 in New Holland; 5 in Carolina and Florida;—and about 95 in the East Indies. Of the latter, there are 42 species of Uvaria; 23 of Unona; 17 of Guatteria; 5 of Artabotrys; 2 of Orophea; 1 of Polyalthia; 1 of Miliusia; 1 of Hyalostemma; 1 of Lobocarpus; 2 of Pattonia; and 1 of Saccopetalum.

All trees or shrubs, the roots, bark, leaves, and especially capsular fruits of which are distinguished by their powerful aromatic taste and smell.

L

4

The fleshy fruits are edible, and much esteemed in the tropics. (DC.)—Blume remarks, that the Javanese species require, owing to their powerful properties, to be employed with caution; for if they are administered for too great a length of time, or in too large doses, they produce vertigo, homorrhage, or even abortion. (Lindl.)

Anona, L. (DC. pr. 1. p. 83;—W. and A. pr. 1, p. 7.)

- 1. squamosa, L. (DC. o. c. p. 85;—W. and A. l. c.,—Roxb. fl. ind. 2, p. 657;—B. M. 58, t. 3095;—J. Grah. Cat. B. pl. p. 2.—Rheed. 3. t. 29.—Rumph. 1, t. 46.) IIII Ata. Custard-Apple. 5. No doubt a native of tropical America, notwithstanding St. Hilaire's reasonings, which would make it of Asiatic origin. No Anona has, on any good authority, been found wild in Asia, and it is, perhaps, questionable, whether A. senegalensis, grandiflora and amplexicallis, are true natives of Senegal and Madagascar.—Completely domesticated in India. Fl. largish, yellowish green,—H. S.; fr. July—October.—Fruit delicious. Leaves with a heavy smell. Seeds acrid, fatal to insects, and therefore by the Natives powdered, mixed with gram flour, and thus occasionally used for washing their hair. (Royle.) The fruit has, on some occasions of famine, literally proved to the Natives the staff of life. (Grah. l. c.)
- 2. reticulata, L. (DC. pr. 1, p. 85;—W. and A. pr. 1, p. 7;—Roxb. fl. ind. 2. p. 657;—B. M. 56, t. 2911-12:—J. Grah. Cat. B. pl. p. 3.—Rheede, 3, t. 30, 31.) (ৰামা, Nona. Bullock's Heart. 5 W. Indies.—Domesticated in India. Fl. largish, yellowish-green, of a vinous smell,—H. S.; fr. July—November.
- 3. muricata, L. (DC. pr. 1, p. 84;—Roxb. H. B. p. 43;—J. Grah. Cat. B. pl. p. 3.) Sour Sop. 5 W. Indies. Cultivated in India. Fl. large, yellowish-green, of a vinous smell,—September; fr. H. S.
- Cherimolia, Mill. (DC. l. c.,—B. M. 45, t. 2011,—J. Grah. Cat. B. pl. p. 3.)
   Peru, New Granada. Introduced in 1820. Has not fl. here.—Its dark purple fruit is much esteemed in S. America.
- ? 5. Suriffa, Roxb. (H. B. p. 43.) 5. Sylhet.—Introduced into H. C. G. in 1794, where it fl. Feb.—April. (Roxb.)—What this species may be, we cannot determine, never having seen it. It is not mentioned in Wall. Cat., and to Mr. Griffith it is unknown. Royle Ill. p. 60, gives Shurifa as the Persian name for Anona squamosa, L., with which, however, Roxb. could not have confounded his A. Suriffa.

UVARIA, L. (DC. pr. 1, p. 88;—W. and A. pr. 1, p. 7.)

- odorata, Lam. (W. and A. o. c. p. 8;—Roxb. fl. ind. 2, p. 661.— Unona odorata, Dun.—DC. o. c. p. 90—Rumph. 2, t. 65.) 5 China. Sunda Islands, Martaban, Moluccas. Fl. large, yellowish-green, fragrant, nearly throughout the year; fr. C. S.
- grandistora, Roxb. (Fl. ind. 2, p. 665; —W. and A. pr. 1, p. 9; —Wall. pl. as. rar. 2, t. 121.—U. purpurea, Bl.; —Wall. rept. —Unona grandistora, Leschen; —DC. pr. 1, p. 90.) 5 Sumatra. Fl.

- large, 'crimson, changing to dark purple,—June and July; fr. C. S.
- macrophylla, Roxb. (Fl. ind. 2, p. 663;—Wall. pt. as. rar. 2, t. 122.)
   Silhet, Chittagong. Fl. large, dull reddish,—July and Aug.;
   fr. 0.
- 4. bicolor, Roxb. (Fl. ind. 2, p. 662.) 5 Silhet. Introduced in 1826. Fl. largish, brown red,—April; fr. R. S. (Roxb.)
- 5. ventricosa, Roxb. (Fl. ind. 2, p. 658.) 5. Tippera. Fl. greenish-white, fragrant,—March; fr. July.
- bracteata, Roxb. (Fl. ind. 2, p. 660.)
   Sylhet. Fl. small, pale yellowish-white. Introduced into H. C. G. in 1811. Fl. April and May; fr. Aug. and Sept. (Roxb.)
- tripetala, Roxb. (Fl. ind. 2. p. 667,—not Lam.;—Unona tripetala, DC.)
   Moluccas. Fl. largish, greenish-yellow, inodorous,—March, April, and May; fr. 0.
- 8. elongata, Roxb. (H. B. p. 43.) 5 Chittagong. Introduced into H. C. G. in 1806, and there fl. R. S. (Roxb.)
- heteroclita, Roxb. (Fl. ind. 2, p. 663.)
   Garrow Hills. Introduced into H. C. G. in 1812. Fl. June and July; fr. Oct. and Nov. (Roxb.)
- Unona, L. (DC. pr. 1, p. 88; W. and A. pr. 1, p. 9.)
  - discolor, Vahl. (DC. o. c. p. 91; —W. and A. l. c., —Roxb. fl. ind. 2, p. 669; —J. Grah. Cat. B. pl. p. 3.—Uvaria monilifera, Gürtn. fr. 2, p. 156, t. 114, f. 2.)
     5 Circars, Chittagong, Penang, Tavoy. Fl. large, yellowish. Introduced in 1840.—Wood chiefly used for rafters. (Roxb.)
  - 2. longiflora, Roxb. (Fl. ind. 2, p. 668.) 5 Silhet. Fl. large, yellow, orange,—April and May; fr. 0.
  - wadulata, Wall. (Pl. as. rar. 3, t. 295.—Uvaria undulata, Roxb. H. B. p. 43,—not Dun.)
     Silhet, Chittagong. Fl. very large, greenish-yellowish, fragrant,—H. S.; fr. Nov.
  - 4. demosa, Roxb. (Fl. ind. 2, p. 670.) 5 Silhet. Fl. large.—In H. C. G.,—fl. April and May; fr. Sept. and Oct. (Roxb.)
  - Dasymaschala, Bl. (Wall. Cat.)
     Singapore. In H. C. G. Fl. June; fr. —
  - 6. lævigata, Wall. (Rept.) 5 Native place? Introduced in 1840.
  - 7. penduliflora, Moç. and Sessé. (DC. pr. 1, p. 89.) 5 Mexico.—Introduced in 1840.
- ARTABOTRYS, R. Br. (B. Reg. 5, t. 423; -W. and A. pr. 1, p. 9.)
  - 1. odoratiesimus, R. Br. (B. Reg. l. c.,—W. and A. o. c. p. 10;—J. Grak. Cat. B. pl. p. 4.—Uvaria odoratissima, Roxb. fl. ind. 2, p. 666.

    —U. uncata, Lour. Roxb. l. c. excl. No. 15.—Unona esculenta and uncinata, DC. pr. 1, p. 90—Rheede, 7, t. 46.) 5 China, Cochin-China, both Peninsulas of India, Bengal, (Serampore), &c. Fl. large, greenish-yellow, fragrant,—H. and R. S.; fr. C. S.

# SCHIZANDREÆ, Bl.—Lindl. Nat. Syst. p. 19.

With one exception, (Villarezia,) trailing shrubs, containing 4 genera; viz. Kadsura, Juss.; Sphærostema, Bl.; Schizandra, Michx.; and Villarezia, Ruiz and Pav. The first genus, with one species, is a Native of Japan and the Khassya Mountains; the second, with four forms, inhabits Java and Nepal. The third and fourth, each with only one species, belong to N. America and Chili.—Leaves aromatic. (Lindl. B. Reg., not Nat. Syst. l. c. in which it is said, that Schizandress have no aromatic or bitter properties.) Kadsura, Juss. (DC. pr. 1, p. 83.—Sarcocarpon, Bl.)

joponica, Dun. (DC. l. c.—Kämpf. amoen. t. 477;—Uvaria japonica,
 L.) 5 Japan, Khassya Mountains, Nepal.—Introduced in 1827,
 but has not fl. here.

SPHEROSTRMA, Bl. (B. Reg. 20, t. 1688.)

- propinquum, Bl. (B. Reg. l. c.—Kadsura propinqua, Wall. tent. fl. nep. p. 11, t. 15.)
   Nepal. Has been introduced into H. C. G. Fl.?

  - \* Sphærostema axillare, Bl. Java. S. elongatum, Bl. Java.—Schizandra coccinea, Michx.; B. M. 34, t. 1413. 5 Carolina, Georgia.

### ORDER IX.—DILLENIACEÆ, DC.—Lindl. Nat. Syst. p. 20.

Handsome trees, shrubs, or undershrubs, rarely herbs, amounting to about 115 species, of which 47 belong to New Holland and Van Diemen's Land; 42 to the E. Indies; about 30 to S. America; 3 to Madagascar; 2 to Guinea; and 1 to New Caledonia.—The Indian forms are ranged under nine genera; viz. 12 under Tetracera; 5-6 under Delima; 3 under Wormia; 1 under Actinidia; 4 under Colbertia; 11 under Dillenia; 1 under Capellia; 3 under Acrotrema; and 1 under Schumacheria.—With a few exceptions, the properties of the order are unknown.

ORDER X.—APIACEÆ, Lindl. Nat. Syst. p. 21.

(Umbelliferse, Juss.)

#### THE CELERY TRIBE.

Herbaceous, rarely shrubby, plants, "natives chiefly of the northern hemisphere, inhabiting groves, thickets, plains, marshes, and waste places. They appear to be extremely rare in all tropical countries, except at considerable elevations, where they gradually increase in number as the other parts of vegetation acquire an extra-tropical, or mountain character. Hence, although they are hardly known in the plains of India, they abound on the mountains of the Himalaya." (Lindl.) According to DC. pr. they amounted, in 1830, to about 1000 species, of which 360 inhabit Europe; 136, S. America; 113, Caucasus and the Levant; 71, N. America; 59, S. Africa; 49, N. Africa; 38, New Holland; 31, Siberia; 11, Java; 7, New Zealand; 6, the Canaries; 6, China and Japan; 4, the Mascarenhas Islands; 3, Van Diemen's Land; 2, Tristan da Cunha; 1, St. Helena; and 1 Arabia. Twenty were common to several countries, and 18 unknown as to their native place.—The Indian species, enumerated by DC. l. c., amounted to about 74, but have now, as far as we can calculate, risen to 105; viz. 6-8 of Hydrocotyle; 1 of Sanicula; 4 of Helosciadium; 2 of Laserpitium; 5 of Ptychotis; 1 of Falcaria; 3 of Sison; 2 of Ammi? 2 of Carum; 3 of Pimpinella; 1 of Sium; 11 of Bupleurum; 2 of Oenanthe; 3 of Dasyloma; 1 of Faniculum; 1 of Eriocycla; 1 of Seseli; 1 of Cnidium; 1 of Trachydium; 2 of Hymenidium; 3 of Athamanta; 3 of Ligusticum; 5 of Selinum? 1 of Archangelica; 1 of Palimbia; 3 of Peucedanum; 1 of Anethum; 1 of Cortia; 2 of Pastinaca; 8 of Heracleum; 1 of Tordyliopsis; 1 of Torilis; 4 of Charophyllum; 1 of Pycnocycla; 1 of Osmorrhiza; 1 of Ozodia; 1 of Prangos; 1 of Vicatia; 1 of Pleurospermum; and 9 of Hymenolæna. Royle (Ill. p. 228,) says that the whole number is 127 species for the Indian Flora, of which eleven are found in the plains and at the foot of the hills, seven only in a cultivated state, and the remainder in the mountains, with the exception of a few in the Peninsula; but if we deduct from his herbarium those forms it has in common with Wallich's Cat. and some European species, our estimati on is, we suppose, pretty correct. The S. African Apiacese having since 1830 increased to 120 species, (Harvey's gen. of S.

African pl. 1838,) a similar augmentation has no doubt taken place, from later discoveries, in other parts of the world.

Though, according to structure, this is one of the most natural orders, yet we find its properties very different. Some species abound in resina containing a large quantity of an essential aromatic oil, and, therefore, act more or less as aromatics and stimulants, f. ex. the fruits of Pimpinella Anisum, (Anise,) P. magna, P. Saxifraga, Carum Carvi, (Caraway,) Anethum graveolens, (Dill,) Fæniculum vulgare, (Fennel,) F. Panmori, Cuminum Cyminum, (Cumin,) Coriandrum sativum, (Coriander,) &c. The leaves of Petroselinum sativum, (Parsley,) Apium graveolens, (Celery,) Anthriscus Cerefolium, (Chervil,) &c; the roots of Celery, Meum athamanticum, Pastinaca sativa, (Parsnip,) Archangelica officinalis, (Garden Angelica,) Imperatoria Ostruthium, (Masterwort,) Crithmum maritimum, (Samphire,) Levisticum officinale, Sium Sisarum, &c.—as well as the root of Daucus Carota, (Carrot,) Arracacha esculenta, Oenanthe pimpinelloïdes, Carum Bulbocastanum, Chærophyllum tuberosum, Eryngium campestre and aquaticum, &c. are especially, when cultivated, wholesome articles of food, while the leaves of Prangos pabularis yield abundant fodder for cattle.

Other umbelliferse, in which the abounding essential oil and mucilage change, the former to resin, the latter to gum, yield from wounds in the stem, or from the top of the root, dense juices well known under the name of fetid gum-resins, and some of them medicinally invaluable, f. ex. Galbanum officinale, D. Don; Opoponax Chironium, Koch; Ferula Asafætida L; F. persica, Willd.; Dorema Ammoniacum, D. Don, &c.—Others, lastly, in which a bitterish principle without aroma predominates, are generally speaking, suspicious, and offer in a high degree narcotically poisonous, f. ex. Oenanthe crocata, L.; O. Phellandrium, Lam.; Conium maculatum, L.; (Common Hemlock), Æthusa Cynapium, L. (Fool's Parsley); Cicuta vicosa, L. (Water Hemlock); &c.. Of the Indian species of this order none has been found poisonous.

HYDROCOTYLE, Tourn. (DC. pr. 4, p. 59. W. and A. pr. 1, p. 366.)

ORDER XI.—HEDERACEÆ, A. Rich. (Bot. med,—as to the name.)

Araliaceæ, A. Rich. Dict. class. d'hist. nat.—Lindl. nat. syst. p. 25.

#### THE IVY TRIBE.

Trees, shrubs, (sometimes climbing) rarely herbs, according to DC. pr. (1830) containing 14 genera and 123 species: 46 from the E. Indies; 42 from S. America; 8 from N. America; 5 from N. Zealand; 4 from the W. Indies; 3 from China; 3 from Japan; 3 from S. Africa; (5 Harvey) 3 from Mauritius and Bourbon; 1 from Madagascar; 2 from New Holland and the Sandwich Islands; 2 from Europe; and 1 unknown, as to its native place.—The E. Indian forms have since risen to 75; viz. 22 of Panax; 1 of Gilibertia? 1 of Toricellia; 2 of Aralia; 10 of Sciodaphyllum; 27 of Hedera; 9 of Paratropia; and 3 of Arthrophyllum. The greatest number of these inhabit the Moluccas, Java, and the Himalayas; the rest have been discovered on the Khassya mountains, in the two Peninsulas of India, Ceylon and Cochin China.—We are not acquainted with Endlicher's genus, Botryodendron.

"The plants of this family are not possessed of very decided medical properties, though the Ginseng, produced by Panax quinquefolia, L., has been more celebrated than plants of greater value. This plant, produced in the mountains of Chinese Tartary, between 39° and 47°, was recognized from the description in Canada and Virginia, whence it is now exported to China. Subsequently the same plant, or a species so closely allied to it, that Dr. Wallich had called it Panax Pseudo-Ginsing, (Pl. as. rar. 2, t. 137), was discovered by him on Sheopore, at an elevation of 9000 to 10,000 feet, an additional instance of the existence of similar plants in the mountains of China, N. America, and the Himalayas." (Royl. ill. p. 233 and 234.) Aralia nudicaulis, L. is used in N. America as a substitute for Sarsaparilla.

Panax, L. (DC. pr. 4, p. 252;—W. and A. pr. 1, p. 376.) Panax, acis, f. Lucret.

- 1. aculeata, Ait. (DC. l. c.; —Jacq. icon. rar. 3. t. 634.) 5. China. Fl. small, greenish, C. S.
- cochleata, DC. (o. c. p. 253;—J. Grah. Cat. B. pl. p. 85. Panax conchifolium, Roxb. fl. ind. 2, p. 77.—Rumph. 4. t. 31.)
   Moluccas, Java. Does not fl. in Bengal, and rarely in the Moluccas. Whole plant, when dried, strongly smelling of Celery.
- fragrans, Roxb. (Fl. ind. 2. p. 76;—DC. pr. 4, p. 254;—J. Grah. Cat. B. pl. p. 85.)
   Khassya Mountains, Nepal. Fl. small, fragrant C. S; fr. H. S.
- fruticosa, L. (DC. pr. 4, p. 254;—Rosb. fl. ind. 2, p. 76;—W. and A. pr. 1, p. 376;—J. Grah. Cat. B. pl. p. 85;—B. Repos. 9. t. 595.—Rumph. 4, t. 33.)
   Moluccas, Java. Fl. small, brownish green,

- May and June; fr. C. S. Pulp of berries stains paper of a dark violet colour. Whole plant, especially dried, smelling strongly of Celery.
- 5. digitata, Roxb. (Fl. ind. 2, p. 75.) 5. Silhet. Fl. small, greenish-yellow. In H. C. G.—fl. C. S; fr. H. S. (Roxb.)
  - palmata, Roxb. (Fl. ind. 2, p. 74.)
     Chittagong. Fl. small, white. In H. C. G.—fl. Sept. and Oct.; fr. Nov. (Roxb.)

    Penang. Courtallum.

ORDER XII.—GROSSULACEÆ, Mirb. Lindl. Nat. Syst. p. 26.

#### THE CURRANT TRIBE.

Shrubs, unarmed or thorny, arranged under 5 genera (Spack.) containing, according to DC. pr. (1828), 53 species, of which 49 inhabit N. America; 6 Siberia; 5 Europe; 2 Caucasus; 1 Syria; 11 Mexico, Chili and Peru; and 1 the vicinity of the Straits of Magellan. Three of these are common to several countries, and 1 unknown, as to its native place. Six or more have since been added from N. America, and 4 from the Himalayas. To this order belong Ribes Grossularia, L. (Gooseberry); R. rubrum, L. (Red Currant); and R. nigrum, L. (Black Currant.) Their refreshing flavour is well known, whereas the fruit of the other species is unpleasantly acrid.

Digitized by Google

RIBES, L. (DC. pr. 3, p. 477.)

- Grossularia, L. (E. B. 18, t. 1291. R. uva crispa, L. ξ sativum, DC. o. c. p. 478.)
   Europe, Siberia. Cultivated. This is the only species of the order, which has fl. here, and that only once in the H. S. Wall. Cat. mentions it as an inhabitant of Buddrinath, near the almost inaccessible sources of the Ganges; Royle, however, puts it down as a distinct species, under the name of R. Himalense.
- \* Ribes orientale, Poir. 5 Syria.

# ORDER XIII.—ESCALLONIACEÆ, Lindl. Nat. Syst. p. 27.

Handsome shrubs, of 7 genera, and 34 species: 23 in S. America, at elevations of 6,000 to 14,760 feet (*Humb*.); 2 in N. America; 1 in Bourbon; 2 in New Holland; 1 in Van Diemen's Land, and 5 in the E. Indies. (*Polyosma*.)—Properties unknown.

ITBA, L. (DC. pr. 4, p. 6.)

- 1. virginica, L. (DC. l. c.;—B. M. 50. t. 2409.) 5 Pennsylvania.— Lately introduced.
- \* Forgesia borbonica, Pers. 5 Bourbon.—Polyosma fragrans, Bennet. (Itea? fragrans, Wall.) 5 Singapore. P. Wallichii; Bennet. 5 Khassva mountains.

# ORDER XIV.—BERBERACEÆ, Lindl. Nat. Syst. p. 29.

#### THE BERBERRY TRIBE.

Shrubs or perennial herbs, of 10 genera, and more than 60 species: 23 S. American; 6 N. American; 5 European; 3 Siberian; 4 from the Levant; 2 from China; 5 or more from Japan; and 9 (*Berberis*) from India. Of the latter, 6 are Himalayan; 2 from the Neelgherries; and 1 from Kunawur.—The common Berberry is well known.—Properties of the rest of no great importance.

- Berberis, L. (DC. pr. 1, p. 105; W. and A. pr. 1, p. 15.)
  - asiatica, Roxb. (Fl. ind. 2, p. 182;—DC. o. c. p. 107;—Deless. icon. sel. 2, t. 1.)
     Nepal, Kemaon. Fl. small, yellow, February and March; fr. R. S.
  - Leschenaultii, Wall. (W. and A. pr. 1, p. 16.—Mahonia Napaulensis, DC. β. Roxburghii, DC. pr. 1, p. 109.—Berberis pinnata, Roxb. fl. ind. 2, p. 184.)
     Neelgherries, alt. 8000 f. Munipore. (Roxb.) Fl. smallish, bright yellow, January.

3. aristata, DC. (pr. 1, p. 106;—B. M. 52, t. 2549.—B. Chitria, Buch. B. Reg. 9, t. 726.) 5 Nepal, Kemaon, Mussooree.—Introduced into H. C. G. Fl.?

Nandina, Thunb. (DC. pr. 1, p. 109.)

- domestica, Thunb. (DC. L. c;—Roxb. fl. ind. 2, p. 184;—B. M. 28, t. 1109.)
   Japan.—Has not fl. here, though cultivated for many years.
- Berberis ruscifolia, Lam.
   Buenos Ayres.
   B. Lycium, Royle.

   B. tenuifolia, Lindl.
   Vera Cruz.

# ORDER XV.-VITACEÆ, Lindl. Nat. Syst. p. 30.

#### THE VINE TRIBE.

Climbing, sarmentose, sometimes simple shrubs, rarely herbs. Excluding 8 of DC's. untenable species, his pr. (1824) enumerates, under 5 genera, 102 forms; viz. 32 E. Indian; 20 S. American; 11 N. American; 11 W. Indian; 4 from Madagascar, Bourbon and Mauritius; 4 S. African; 4 from Guinea; 1 from Zanguebar; 4 Arabian; 3 Syrian and Armenian; 2 Japanese; 2 from Timor; 1 from New Holland; and 3 unknown, as to their native place. Since then, the number of forms has been considerably increased, f. ex. in S. Africa to 16, (Harvey.) and in the E. Indies to 108. Of the latter, 87 species belong to (Vitis; Vitis, Cissus and Ampelopsis, Auct.) 20 to Leea; and 1 to Pterisanthes. There can, however, be no doubt, that upon a strict examination of authentic specimens, the number will be much reduced, as the leaves, from which their specific characters are chiefly drawn, are but little to be relied on either in Vitis or Leea.

The properties of the grape and its products are well known. The leaves of several species are acrid, or astringent, or sometimes with the young shoots and fruit so acrid, that according to Wight. (IU. 1, p. 151,) the mere taste of a berry, is sufficient to cause in a short time the most insufferable sense of burning all over the mouth and fauces, lasting for several hours. With the exception of, perhaps, the N. American Fox-grapes, the grape-vine would seem to be the only species of Vitaces possessed of valuable properties.

VITIS, L. (R. Br., W. and A. pr. 1, p. 125.) Vine.

1. quadrangularis, Wall. (W. and A. l. c.; Wight. icon. 1, t. 51. Cissus quadrangularis, L. DC. pr. 1, p. 628.—Roxb. fl. ind. 1, p. 407; ed. Carey, 1, p. 426;—J. Grah. Cat. B. pl. p. 33;—Rheed. 4, t. 41;—Rumph. 5, t. 44, f. 2.) Exempl. Hurjora. 4. Both Peninsulas of India, Bengal, (Serampore.) Fl. small, white, R. S.; fr. C. S. Tender leaves and young shoots eaten by the natives. Berries very acrid.

- 2. pallida, W. and A. (pr. 1, p. 125; —Wight. icon. 1, t. 50.—Cissus vitiginea, Roxb. fl. ind. 1, p. 406; ed. Carey, 1, p. 424, not L.; —J. Grah. Cat. B. pl. p. 33.) (গারাবির্মাণতা Goaliya-luta. 5 Peninsula of India. Bengal (Serampore.) fl. small, red, R. S.; fr. C. S.
- 3. cordata, (Cissus cordata, Roxb. fl. ind. 1. p. 407. excl. syn. Rheed.;—ed. Carey, 1. p. 425;—J. Grah. Cat. B. pl. p. 32;—Rumph. 5, t. 164. f. 1.) 5 . Amboyna. Fl. small, purplish. In H. C. G. fl. R. S. (Roxb.) Leaves very acrid.
- 4. glauca, W. and A. (pr. 1. p. 126.—Cissus glauca, Rozb. fl. ind. 1, p. 406; ed. Carey, 1, p. 425;—DC. pr. 1, p. 628;—J. Grah. Cat. B. pl. p. 32.) গ্রগোরাজিয়া Gur-goaliya. 5 . Travancore, Permacoil. The Concans. Bengal, (Serampore.) Fl. small, H. S.; fr. R. S.

# ORDER XVI.—PITTOSPORACEÆ, Lindl. Nat. Syst. p. 31.

Trees or shrubs, simple or twining, of 6 genera, and about 35 species: viz., 15 from New Holland; 2 from Van Diemen's Land; 2 from Australasia; 2 from Mauritius; 1 from Japan and China; 1 from the Moluccas; 1 from S. Africa; 2 from the Canaries; 1 from Madeira; 1 from Guinea; and 5 from India. The latter (species of *Pittosporum*) have been found in Ceylon, on the Neelgherries, at Mussooree, and in the Kheree Pass.

"The wood of Senacia undulata, Lam. is handsomely veined. The berries of Billardiera are eatable, but they have a resinous odour, and a bitter sub-acrid taste. The bark of Pittosporum Tobira, Ait. has a resinous smell." (Lindl.) "The seeds of the Indian species are covered with a fragrant resinous fluid, which, however, soon dries on exposure to the air, and loses its smell." (Wight.)

PITTOSPORUM, Banks. (DC. pr. 1, p. 346;—W. and A. pr. 1, p. 153.)

- 1. ferrugineum, Ait. (DC. l. c.;—B. M. 46, t. 2075.) 5. Guinea. Fl. small, whitish, Feb.; fr. —
- verticillatum, Wall. (Rept. P. floribundum, W. and A. pr. 1, p. 154;—Royle. ill. p. 77.—Celastrus verticillata, Roxb. fl. ind. 1. p. 624; ed. Carey, 2, p. 393.—Senacia Nepalensis, DC. pr. 1, p. 347.)
   Peninsula of India, Nepal, Kheree Pass. alt. 2000 f. Fl. small, whitish, January and June; fr. April and September.
  - Tobira, Ait. (DC. pr. 1, p. 346; Roxb. fl. ind. 1, p. 631; ed. Carey,
     p. 416; B. M. 34, t. 1396.
     Japan. Has not fl. here, though cultivated for more than twenty years.

# ORDER XVII.--OLACACEÆ, Lindl. Nat. Syst. p. 32.

Trees or shrubs, sometimes climbing of 12 genera, containing about 29 species: 3 from New Holland; 2 are common to several countries; 1 from Martinique; 1 from Guiana; 1 from Guinea; 1 from Jamaica; 2 from Madagascar; 1 from Mauritius; and 17 from the E. Indies. Of the latter, which chiefly inhabit the Peninsula of India, but of which species are also found in Lower Bengal, Chittagong, Silhet, the Khassya Mountains, Ceylon and Java, 10 belong to Olax; 1 to Ximenia; 1 to Opilia; 1 to Stemonurus; 3-4 to Gomphandra; and 1 to Balanites.

With the exception of the wood of Heistera coccinea, Jacq. (Partridge mood of the Cabinet-makers), the properties of the order would seem to be unimportant.

ORDER XVIII.—FRANCOACEÆ, Ad. Juss. Lindl. Nat. Syst. p. 33.

Found in the temperate parts of S. America. Properties unknown. (Lindl.)

Francoa, Cav. (Spreng. syst. 2, p. 176, No. 1519.)

- ramosa, Hook. (B. M. 67, t. 2824.)
   Valparaiso. Introduced into H. C. G. Fl.?
- \* Francoa appendiculata, Cav.; —B. Reg. 19, t. 1645. 4. Chili.—Tetilla hydrocotylæfolia, DC. 4. Chili.

ORDER XIX.—ŒNOTHERACEÆ, (ONAGRACEÆ, Lindl. Nat. Syst. p. 35.)

#### THE EVENING PRIMROSE TRIBE.

Shrubs or herbs, (annual or perennial) under 24 genera, (Lindl. o. c. p. 523,) amounting to about 252 species; viz. 80 from N. America; 60 from S. America; 28 from Mexico; 7 from the W. Indies; 14 from Europe; 1 from Siberia; 8 from S. Africa; 1 from Guinea; 2 from Senegal; 1 from Egypt; 1 from Madagascar; 1 from Mauritius; 2 from N. Zealand; 1 from N. Holland; 2 from Caucasus; 1 from Persia; and 28 from the E. Indies. Six are common to several countries, and of seven, the native places unknown.—Of the E. Indian species, 14 belong to Epilobium; (2 common to other countries); 7 to Ludwigia; 5 to Jussiena; and 1 to Vanhallia. The Epilobiums are all Himalayan; the rest tropical.—Properties nearly unknown.

Oenothera, L. (DC. pr. 3, p. 45.) Evening Primrose.

SUB-ORDER.—TRAPEÆ, (HYDROCARYES, Link.; Lindl. Nat. Syst. p. 36.)

# THE WATER-NUT TRIBE.

Floating plants, of 1 genus, and 5 species: 1 from Europe and Siberia; 3 from the E. Indies; and 1 from China.

- Teapa, L. (DC. pr. 3, p. 63;—W. and A. pr. 1, p. 337.) Water Caltrops.
  - 1. bispinosa, L. (DC. o. c. p. 64;—W. and A. l. c.;—Roxb. Corom. 3, t. 234; ft. ind. 1, p. 428; ed. Carey, 1, p. 449;—J. Grah. Cat. B. pl. p. 75;—Rheed. 11, t. 33.) পাৰীকৰ Panee-phul. সিম্মার Singara. © Both Peninsulas of India, Bengal, (Serampore,) Nepal. Fl. smallish, white, May and June; fr. C. S.—Fruit sold in the bazar, and eaten by the Natives. In Guzerat it forms an important article of food. During the Hooly festival a red dye is made of it, mixed with a yellow dye procured from the flowers of Butea frondosa, Roxb.
  - quadrispinosa, Roxb. (Fl. ind. 1, p. 430; ed. Carey, 1, p. 451.)
     Silhet. In H. C. G. fl. R. S.; fr. C. S. (Roxb.) The Kernels of this species are also eaten by the Natives.

## SUB-ORDER.—HALORAGEÆ, R. Br.—Lindl. Nat. Syst. p. 37.

Herbaceous, or more rarely shrubby plants, generally growing in damp places, ditches, and stagnant waters, occasionally on hills, of 10 genera, comprising 36 species: 7 N. American; 3 S. American; 2 European; 8 from New Holland and the South Sea Islands; 1 from Australasia; 2 from China and Japan; 1 from Bourbon; 2 from S. Africa; and 7 from India. Of the latter, 4 belong to Myriophyllum; 1 to Haloragis; and 2 to Serpicula.—We are not acquainted with the distribution of Mejonectes, R. Br.; Riesenbachia, Presl., and Gongylocarpus, Schlecht.—Properties unimportant.

MYRIOPHYLLUM, L. (DC. pr. 3, p. 68;—W. and A. pr. 1, p. 338.)

Water-Milfoil.

- verticillatum, L. (DC. l. c.;—Roxb. H. B. p. 12;—E. B. 4, t. 218.)
   Europe, N. America, Bengal, (Serampore.)
   Fl. small, yellow, R. and C. S.; fr. C. S.
- indicum, Willd. (DC. l. c.;—W. and A. pr. 1, p. 339.) ⊙ Ceylon, Coromandel, Bengal, (Serampore.) Fl. minute, R. S.; fr. C. S.
- 3. tetrandrum, Roxb. (Fl. ind. 1, p. 451; ed. Carey, 1, p. 470;—DC. pr. 3, p. 69;—J. Grah. Cat. B. pl. p. 76.) ⊙ Peninsula of India, Bengal, (Serampore.) Fl. minute, white, R. S.; fr. C. S.
- 4. tuberculatum, Roxb. (Fl. ind. 1, p. 451; ed. Carey, 1, p. 471.) ⊙ Bengal, (Serampore.) Fl. minute, bright red, R. and C. S.; fr. C. S.

ORDER XX.—COMBRETACEÆ, R. Br.—Lindl. Nat. Syst. p. 38.

## THE MYROBALAN TRIBE.

Trees or shrubs, simple or climbing, of 22 genera, and about 140 species: 44 inhabiting S. America, Mexico, and the W. Indies; 6 Senegal;

15 Guinea; 2 S. Africa; 4 Madagascar; 2 Bourbon and Mauritius; 1 the Society Islands; 2 China; and 64 the E. Indies. Of the latter, 23 belong to Terminalia; 25 to Combretum; 2 to Poivrea; 2 to Getonia; 2 to Quisqualis; 4 to Anogeissus; 2 to Lumnitzera; 1 to Bobua; 1 to Sphalanthus; 1 to Ceratostachys; and 1 to Agatisanthes.

Astringency seems to be the chief characteristic of the order. Bucida Buceras, L. yields a bark, in the W. Indies employed for tanning. The same is the case in Brazil with the bark of Laguncularia racemosa, Gärtn. The seeds of a species of this tribe are recommended as an efficacious vermifuge by Dr. Oxley of Malacca, who gives them pounded and mixed with a little jam or honey. "The dose," says he, "may be as large as you can get a child to take; but I believe four or five good nuts are sufficient. The natives sometimes eat them by handfuls, so they are perfectly harmless. I have known one dose discharge, without any other medicine given after it, twenty-nine lumbrici." (Trans. med. and phys. soc. Calcutta, vol. 7, p. 489.) Dr. Wallich who only saw the fruit, referred it to Quisqualis indica, L. To judge from a flowering branch, lately received from Dr. Oxley, of the plant in question, it is, however, a species of Combretum.

TERMINALIA, L. (DC. pr. 3, p. 10;—W. and A. pr. 1, p. 312.)

- 1. angustifolia, Jacq. (DC. o. c. p. 11;—W. and A. l. c.;—J. Grah. Cat.
  B. pl. p. 69:—T. Benzoin, L.—Catappa Benzoin, Gürtn. fr. 2, t.
  127.) 5. Peninsula of India. Fl. small, green, odoriferous, March
  and April. A milky juice flows out from this tree, which being fragrant on drying and resembling Benzoin, is used in Churches at the
  Mauritius as a kind of incense. (Royle.) Fruit used like that of T.
  Chebula.
  - 2. Catappa, L. (DC. pr. 3, p. 11;—W. and A. pr. 1, p. 313;—Rosb. fl. ind. 2, p. 430;—J. Grah. Cat. B. pl. p. 69;—B. M. 57, t. 3004;—Wight. icon. 1, t. 172.—T. moluccana, Lam.—DC. l. c. not Roxb.—Rheed. 4, t. 3-4;—Rumph. 1, t. 68.) ANN Badam. Country Almond tree. L. 5 Moluccas. Both Peninsulas of India, Bengal, (Serampore.) Fl. small, purplish-green, H. S; fr. R. S.—Wood good. Kernels (Country Almonds) palatable.
  - procera, Roxb. (Corom. 3, t. 244;—fl. ind. 2, p. 429;—DC. pr. 3, p. 12.)
     L. 5 Andaman Islands. Fl. small, white. In H. C. G., fl. Feb. and March; fr. R. S. (Roxb.)
  - 4. bialata, Wall. (Rept.—Pentaptera bialata, Roxb. fl. ind. 2, p. 441;—DC. pr. 3, p. 15.) L. 5 Mountainous parts of India. Fl. small, greenish-yellow. In H. C. G. fl., H. S.; fr. Jan. and Feb.
  - 5. Bellerica, Roxb. (Corom. 2, t. 198;—fl. ind. 2, p. 431;—DC. pr. 3, p. 12;—W. and A. pr. 1, p. 313;—Wight. ill. 1, t. 91;—J. Grah. Cat. B. pl. p. 69;—Rheed. 4, t. 10.) The Buhura, L. 5 Peninsula of India, Goalparrah, Sukanaghur, Goruckpur, Dhomtola, Morung Mountains. Fl. small, greyish-green, offensively smelling, H. S.; fr. C. S.—Wood white, softish, durable, (Roxb.) Bark, when wounded, gives

- out a large quantity of an insipid gum, resembling Gum arabic. Fruit (Beleric myrobalans) astringent, tonic. Kernels, tasting like filberts, eaten by the natives, and held to be intoxicating, when eaten in abundance. (Rosb.)
- 6. moluccana, Roxb. (Fl. ind. 2, p. 432; non Lam.) 5 Khassya Mountains, Assam, &c. Fl. small, dull yellowish brown, unpleasantly smelling. In H. C. G. fl. April and May; fr. March. a, macrocarpa, largish-fruited; β, microcarpa, small-fruited. Both kinds of fruit sold in the bazar under the name of <?? (Buhura.)</p>
- 7. Chebula, Retz. (DC. pr. 3, p. 12;—W. and A. pr. 1, p. 313;—Roxb. Corom. 2, t. 197;—fl. ind. 2, p. 435;—J. Grah. Cat. B. pl. p. 69.)

  The Hareetukee, L. 5 Both Peninsulas of India, Bengal, Monghir up to Lower Nepal. Fl. small, whitish, offensively smelling, H. S.; fr. Jan. and Feb.—Fruit, as well as the galls of this species, very astringent and much used by dyers. With alum they give a durable yellow, used on the Coromandel Coast by Chintz-painters, and with ferruginous mud an excellent black, employed by harness-makers for preparing ink, &c. (Ainslie. Roxb.) Unripe fruit, according to age, known under the name of black, yellow and chebulic myrobalans, and thought to be gently laxative. (Royle.)
- citrina, Roxb. (Fl. ind. 2, p. 435;—DC. pr. 3, p. 12.—Myrobalanus citrina, Gärtn. fr. 2, p. 91, t. 97.) L. 5. Assam, Khassya Mountains, &c. Fl. small, yellowish. In H. C. G. fl. H. S.; fr. Jan. and Feb.—Wood very hard, shunned by insects. (Roxb.) Fruit used as that of T. Chebula.
- Fatræa, DC. (pr. 3, p. 12.)
   Madagascar. Introduced in 1840.
- Berryi, W. and A. (pr. 1, p. 314.—Pentaptera angustifolia, Roxb. fl. ind. 2, p. 437;—J. Grah. Cat. B. pl. p. 69;—DC. pr. 3, p. 15.) L. 5. Peninsula of India. Balla-ghaut Mountains. Banks of the rivers Kalinadi and Gutpurba. In H. C. G. fl. April and May; fr. Dec. (Roxb.) Timber good.
- 11. Arjuna, W. and A. (pr. 1, p. 314, ann.—Pentaptera Arjuna, Roxb. fl. ind. 2, p. 438;—DC. pr. 3, p. 14;—J. Grah. Cat. B. pl. p. 69.)

  The Arjooni, L. 5 Bengal, Jungles in the S. E. of Surat. Fl. small, greenish-white, April and May; fr. Dec.—Timber good.—Bark in great repute among the Natives as a tonic internally, and a vulnerary applied externally; it is sold by most Druggists. (Dr. Gibson.)
- crenulata, W. and A. (pr. 1, p. 314.—Pentaptera crenulata, Roxb. fl. ind. 2, p. 438; not DC.) L. 5 Coromandel. In H. C. G. fl. H. S.; fr. C. S. (Roxb.) Timber good.
- glabra, W. and A. (pr. 1, p. 314.—Pentaptera glabra, Roxb. fl. ind.
   p. 440;—DC. pr. 3, p. 15.—P. crenulata, DC. l. c.—P. obovata, DC. o. c. p. 14.) L. 5 Peninsula of India, Monghir, Silhet, Rajmahl. In H. C. G. fl. H. S.; fr. C. S. (Roxb.) Timber good.

.!

- 14. tomentosa, W. and A. (pr. 1, p. 314; —Wight. icon. 1, t. 195. Pentaptera tomentosa, Roxb. ft. ind. 2, p. 440; —DC. pr. 3, p. 14; —J. Grah. Cat. B. pl. p. 69.) Similar Ashan. Figiriar Piysahal, L. 5 Monghir, Rajmahl, Oude. Common on the Ghauts and in the Concans. Fl. small, greenish-white, April, May and June; fr. C. S. —Timber very valuable. Much used for making shafts of Gigs, and other things where toughness of fibre is required. (Dr. Gibson.) Bark astringent and dyeing black.
- coriacea, W. and A. (pr. 1, p. 315.—Pentaptera coriacea, Roxb. fl. ind. 2, p. 438;—DC. pr. 3, p. 15.) L. 5. Mountains of Coromandel. Fl. small, dull yellow. In H. C. G. fl. H. S; fr. C. S. (Roxb.) Wood strong, hard, heavy, made into solid wheels for buffalo carts. (Dr. Berry.)
- paniculata, W. and A. (pr. 1, p. 315.—Pentaptera paniculata, Roxb. fl. ind. 2, p. 442;—DC. pr. 3, p. 14;—J. Grah. Cat. B. pl. p. 70.) L. 5. Courtallum. Malabar. Vallies of the Concan Rivers near their sources. Abounding in the jungles, S. E. of Surat. (J. Grah.) Fl. small. In H. C. G. fl. Nov. and Dec.; fr. May and June. (Roxb.) Timber good.
- 17. gangetica, Roxb. (fl. ind. 2. p. 437. T. [by a mistake] bengalensis, DC. pr. 3, p. 12.) at Hur. 5. Banks of the Ganges. In H. C. G. fl. H. S.; fr. C. S. Fruit used like chebulic myrobalans.—This tree is not alluded to in Wall. Cat., and is only mentioned in Royl. ill.
- GETONIA, Roxb. (DC. pr. 3, p. 15; -W. and A. pr. 1, p. 315.)
  - 1. nutans, Roxb. (fl. ind. 2, p. 428;—DC. l. c.) 5 Rajmahl. Fl. smallish, greenish, H. S.; fr. C. S.
- Anogeissus, DC. (pr. 3, p. 16, under Conocarpus.—Wall. Cat.)
- 1. latifolius, Wall. (Cat.—Conocarpus latifolius, Roxb. fl. ind. 2, p. 442; —DC. o. c. p. 17;—W. and A. pr. 1, p. 316;—J. Grah. Cat. B. pl. p. 70;—Royle. ill. t. 45, f. 1.) L. b. Chillaune, Islamabad, Kennery jungles, Vallies of the Concan Rivers near their sources, Inland Deccan Hills, Deyra-Dhoon. Fl. small, pale greenish, Jan. and Feb.; fr. H. S. Timber good, durable, if kept dry. (Roxb.)
  - 2. acuminatus, Wall. (Cat.—Conocarpus acuminatus, Roxb. fl. ind. 2, p. 443;—DC. pr. 3. p. 17;—W. and A. pr. 1, p. 316.) L. 5. Nopalry. Fl. small, pale-greenish, C. S; fr. H. S. Timber good, durable, fit, like that of No. 1, for house-building. (Roxb.)
- POIVREA, Commers. (DC. pr. 3, p. 17;—W. and A. pr. 1, p. 317.)
  - 1. Roxburghii, DC. (o. c. p. 18; —W. and A. l. c. Combretum decandrum, Roxb. Corom. 1, t. 59; —fl. ind. 2, p. 232; not Jacq.) 5 Mountains of Coromandel, Khassya Mountains, Nepal, Sirmore. Fl. small, pale greenish, C. S.; fr. R. S.
  - pilosa, W. and A. (pr. 1, p. 317, annot.—Combretum pilosum, Roxb. fl. ind. 2, p. 231.)
     Kbassya Mountains, Assam. Fl. small, greenish-yellow, Feb. and March; fr. R. S.

- coccinea, DC. (pr. 3, p. 18.—Cristaria coccinea, Sonner.—Combretum coccineum, Lam.—C. purpureum, Vahl.;—Roxb. fl. ind. 2, p. 233;—B. Reg. 5, t. 429;—B. M. 46, t, 2102.)
   Madagascar. Fl. smallish, crimson, C. S. but very rare; fr. 0.
- COMBRETUM, Löfl. (DC. pr. 3. p. 18; -W. and A. pr. 1, p. 317.)
  - 1. ovalifolium, Roxb. (fl. ind. 2, p. 226;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 70.) 5 Tanjore, Elephanta, Jungly tracts of the Concan, Guzerat. Fl. small, yellowish-white. In H. C. G. fl. March and April; fr. R. S. (Roxb.)

# ORDER XXII.—RHIZOPHORACÆ, Lindl. Nat. Syst. p. 40.

(W. Griffith, On the family of Rhizophoreæ; in Trans. med. and phys. soc. Calcutta, vol. 8, p. 1—13. With a plate.—Arnott; in Ann. of nat. hist. 1, p. 359—374, incl. and in Wight. ill. 1, p. 207—211.)

### THE MANGROVE TRIBE.

Trees, rarely shrubs, natives of salt swamps and marshes of the tropics, where they root in the mud, forming dense, most unhealthy jungles down

to the very edge of the ocean. There are 6 genera, 26 species; 2 of these are common to several parts of the world (Rhizophora mucronata, Lam. and Ceriops Candollianus, Arn.) 6 are found in America; 1 in Madagascar; 1 in New Holland; 1 in China; and 15 in the E. Indies. Of the latter, 1 belongs to Rhisophora; 1 to Ceriops; 1 to Kandelia; 8 to Bruguiera; and 4 to Carallia.—Properties unimportant.

RHIZOPHOBA, Lam. (Arn. l. c.; -Wight. l. c. p. 209.)

- 1. mucronata, Lam. (Arn. l. c.;—DC. pr. 3, p. 32;—Wight. icon 1, t. 238;—R. Mangle, L. ? ex pte.—Roxb. fl. ind. 2, p. 459;—R. Candelaria, W. and A. pr. 1, p. 310, not DC.;—and excl. syn. Rheed. and Rumph.;—J. Grah. Cat. B. pl. p. 68.—R. macrorrhiza, Griff. o. c. p. 8.—) CSTA Bhora, L. 5 Mauritius, Madagascar, Ceylon, Java, Arabia Felix, Malabar, Soonderboons, &c. Fl. largish, white, sweet-scented. In H. C. G. fl. April and May; fr. C. S.—Wooddark reddish, hard and durable. (Roxb.)
- conjugata, L. (Arn. l. c.;—DC. pr. 3, p. 33;—Roxb. H. B. p. 36.
   R. Candelaria, DC. o. c. p. 32;—Griff. o. c. p. 7.—Rheed. 6. t. 34;—Rumph. 3, t. 71-72.)
   5 Ceylon, Java, Malabar, Tenasserim, &c.—Fl. middle-sized, white, faintly scented. Introduced into H. C. G. in 1796, but had not fl. up to 1814.

# CERIOPS, Arnott. (Wight. ill. p. 209.)

1. Roxburghianus, Arn. (l. c. Rhizophora decandra, Roxb. H. B. p. 36.—Bruguiera decandra, Griff. o. c. p. 10.) গৰাৰ Goran. 5. Penang, Martaban, Tavoy, Soonderbuns.—Fl. small, greenish-white, H. S.; fr. C. S.

### KANDELIA, W. and A. (pr. 1, p. 310.)

1. Rheedii, W. and A. (l. c. Griff. o. c. p. 9; — Wight. ill. t. 89.—Rhizophora Candel, L.; — DC. pr. 3, p. 32; — Roxb. H. B. p. 36; — J. Grah. Cat. B. pl. p. 68; — Rheed. 6, t. 35.) 5, Malabar, Tenasserim, Soonderboons, &c. Fl. largish, white and green. Introduced into H. C. G. before 1814.—Fl.?

# ORDER XXIII.—MEMECYLACEÆ.—Lindl. Nat. Syst. p. 40.

Fine shrubs, of 3 (5) genera, containing 36 species; 26 from the E. Indies; 3 from Mauritius and Bourbon; 1 from Madagascar: 2 from Brazil; 1 from Guiana; 1 from Mexico; 1 from the W. Indies; and 1, as to its native country, unknown. Of the E. Indian forms, 2 belong to Scutula, a genus nearly unknown; and 24 to Memecylon. Two of these have been found on the Khassya Mountains; the rest in the two Peninsulas of India, Ceylon, Java and Cochin-China. Memecylon grande, Retz. has been traced as far northwards as Monghir. We are unacquainted with Guildingia, Hook, and Fenzlia, Endl. Properties unimportant.

- MEMECYLON, L. (DC. pr. 3, p. 5;—W. and A. pr. 1, p. 319.)
  - 1. ramiflorum, Lam. (DC. o. c. p. 6; W. and A. l. c.—M. tinctorium. Kön.—W. and A. l. c; Wight. ill. t. 93; —J. Grah. Cat. B. pl. p. 71. excl. syn. Roxb.) 5 Malay Peninsula, Coromandel, Mahableshwur, Kundalla and along the Ghauts, Silhet. Fl. small, blue, H. S. Leaves used in dyeng yellow.
  - 2. capitellatum, L. (DC. pr. 3, p. 6.—M. edule, Roxb. Corom. 1, t. 82; fl. ind. 2, p. 260;—DC. l. c.) 5 Ceylon, Coromandel, &c. Fl. small, blue, H. S.—Ripe berries astringent, eaten by the natives.

\* Memecylon Heyneanum, Benth. 5 Courtallum, Wight. icon. 1, t. 278.—M. amplexicaule, Roxb. Wight. icon. 1, t. 279. 5 Travancore, Malabar, Penang, Singapore. M. jambosioides, Wight. icon. 1, t. 277. M. cordatum, Lam. 5 Peninsula of India, Mauritius.—Mouriria guianensis, Aubl. 5 Forests of Guiana. M. myrtilloides, Poir. 5 Jamaica.

ORDER XXIV.—MELASTOMACEÆ, D. Don.—Lindl. Nat. Syst. p. 41.

Trees, shrubs, (rarely climbing,) or herbs, sometimes annual, in 1828, according to DC., under 69 genera amounting to 718 species; viz. 625 American; 18 African; 3 Chinese; and 72 E. Indian. According to Lindl. (e. c. p. 42-43,) the genera had, in 1836, risen to 93, containing, says Wight, at least 1000 species. The E. Indian forms, with the additions from Wallich's and Wight's herbaria, have now risen to 133; 2 of Oxyspora; 18 of Sonerila; 29 of Osbeckia; 1 of Tristemma; 72 of Melastoma; 1 of Triplectrum; 4 of Pternandra; 1 of Medinilla; 1 of Sarcopyramis; 1 of Kibessia; and 2 of Astronia. To these must, however, be added Blume's new genera: Otanthera, Lachnopodium, Pogonanthera, Allomorphia, Pachysentria, Ochthocharis, Dissochata, Aplectrum, Marumia, Creochiton, Phyllagathis, and Ewyckia. The number of their species we have not been able to ascertain, but Wight says, that if the other genera are somewhat in proportion to Medinilla, of which Java produces 21 species, Blume must nearly have doubled the Indian list of Melastomacese.

Far the greater part of the Indian forms are tropical, but few extending towards the Khassya Mountains and the foot of the Himalayas in Nepal. These are Melastoma malabathricum, L.; M. normale, Don.; M. Wallichii, DC.; Oxyspora paniculata, DC.; Sonerila angustifolia, Roxb.; S. squarrosa, Wall.; S. tenera, R. Br.; S. arguta, R. Br.; S. maculata, Roxb.; Osbeckia angustifolia, Don.; O. nepalensis, Hook.; O. stellata, Don.; O. ternifolia, Don.; O. pulchella, Benth.; O. campestris, Buch.; O. longicollis and crinita, Benth.; O. nutans, Wall.; O. capitata, Benth.; Medinilla erythrophylla, Lindl.; and Sarcopyramis nepalensis and lanceolata, Wall.

The order, "though one of the most extensive known, is entirely destitute of any unwholesome properties." (Lindl.) Astringency is said to be its prevailing character.

MELASTONA, Burm. (DC. pr. 3, p. 144;—W. and A. pr. 1, p. 324.)

1. malabathricum, L. (DC. o. c. p. 145; — W. and A. l. c., —Roxb. fl. ind. 2, p. 405; —J. Grah. Cat. B. pl. p. 71; —B. Reg. 8, t. 672; — Wight. ill. 1, t. 95; —Rheed. 4, t. 42; —Rumph. 4, t. 72.)

49969 Buro-phootika. 5 Moluccas, Sumatra, Cochin-China,

# ORDER XXV.—MYRTACEÆ, R. Br.—Lindl. Nat. Syst. p. 43.

### THE MYRTLE TRIBE.

Trees or shrubs, of 45 genera, amounting to 670 species, the greatest number of which belong to S. America, New Holland and the South Sea Islands and the E. Indies. The latter contain, according to our materials, about 131 forms; viz. 2 of Melaleuca; 3 of Metrosideros, (Roxb.); 1 of Fabricia, (Roxb.); 1 of Bäckea; 3 of Sonneratia; 1 of Nelitris; 1 of Psidium; 1 of Jossinia?; 1 of Myrtus; 1 of Monoxera; Wight, (Myrtus spectabilis, Bl.); 110 of Eagenia, (Wight. ill. 2, p. 13;)—, of Rhodamnia; 2 of Glaphyria, and 2 of Myrtus? Wall. Three have been found in Cochin-China, but are nearly unknown; 14 in Madagascar, Bourbon, Mauritius, and the Sechelles; 2 in Guinea and Senegal; 3 in S. Africa, (Harvey); and 1 (Myrtus communis, L.) in S. Europe.—Bäckea frutescens, L., a Chinese shrub has been discovered on Mount Ophir, near Malacca, by Dr. Oxley.

"The pellucid dotting of the leaves and other parts indicates the presence of a fragrant aromatic or pungent volatile oil, which gives the principal quality to the produce of the order." (Lindl.) The properties of the Indian Myrtacese will be adverted to under the different species.

Tristania, R. Br. (Hort. Kew. ed. alt. 4, p. 417;—DC. pr. 3. p. 210.)
1. megaphylla, Cunningh. 5 Australasia, C. S. 1839.

MELALEUCA, L. (DC. pr. 3, p. 211; - W. and A. pr. 1, p. 326.)

- 1. Cajuputi, Roxb. (Fl. ind. 3, p. 394; W. and A. l. c.—M. minor Sm.; DC. o. c. p. 212.) 5 Moluccas, &c. Fl. small, white, especially C. S.—Yields the well-known Cajuputi-oil.
- 2. Leucadendron, L. (DC. pr. 3, p. 212;—Roxb. fl. ind. 3, p. 397;—
  Rumph. 2, t. 16.) 5 Moluccas, Malacca. Fl. small, white, C. S.;
  fr. H. S.
  - 3. nodosum, Sm. (Exot. bot.—Ait. Hort Kew. ed. alt. 4, 413.) N. Holland, December 1839.

Callistemon, R. Br. (DC. pr. 3, p. 222.)

linearis, DC, (l. c.—Metrosideros linearis, Sm.;—Roxb. fl. ind. 2, p. 479.)
 N. Holland. Fl. small, greenish, April and May; fr. Feb. and March.

- lophanthus, Swt. (G. Don. Mill: dict. 2, p. 822.—C. salignus, Sims.;—B. M. 43, t. 1821, not DC.)
   N. Holland. Has been introduced into H. C. G. Fl.?
- METROSIDEROS, Rumph. (DC. pr. 3, p. 224.)
- 1. verus, Rumph. (Herb. amb. 3, t. 7.—DC. l. c.;—Raxb. fl. ind. 2, p. 477.) 5 Amboina, Java. Fl. small, white, H. and R. S.; fr. Sept. and Oct. Nelitels, Gärtn. (DC. pr. 3, p. 231.)
  - paniculata, Lindl. (DC. l. c.—N. polygama, Spreng.—Eugenia polygama, Roxb. fl. ind. 2, p. 491.)
     Penang. Has been introduced into H. C. G.?
- PRIDIUM, L. (DC. pr. 3, p. 232; W. and A. pr. 1, p. 328.) Guava tree.

  1. pumilum, Vahl. (DC. l. c.; W. and A. l. c.; P. Cujavillus, Burm.
  Rumph. 1. t. 49.) 5. Ceylon, Moluccas. Fl. middle-sized, white, fragrant, March; fr. R. S., delicious.
  - 2. pyriferum, L. (DC. pr. 3, p. 383; W. and A. L. c.; Roxb. fl. ind. 2, p. 480; J. Grah. Cat. B. pl. p. 72; B. Reg. 13, t. 1079; Rheed. 3, t. 34; Rumph. 1, t. 47.) 5 W. Indies, Tropical S. America. Domesticated in India. (\*\*\*ITA\*\*) Peyara. Fl. largish, white, sweetish scented, H. S.; fr. R. S.
  - 3. pomiferum, L. (DC. pr. 3, p. 334;—W. and A. pr. 1, p. 328;—
    Roxb. fl. ind. 2. p. 480;—J. Grah. Cat. B. pl. p. 72;—Rheed. 3, t.
    35;—Rumph. 1, t. 48.) আত্তোরারা Lal-peyara. 5 W. Indies,
    Mexico. Tropical S. America. Domesticated in India. Fl. largish,
    white, sweetish scented, H. S.; fr. R. S.
  - 4. guineense, Swz. (DC. pr. 3, p. 235.) 5 W. Indies, introduced, it is said, from Guinea. Fl. small, white, H.S.; fr. R.S. Fruit of a fine flavour, fulvous, red inside.
  - 5. polycarpon, Lamb. (DC. pr. 3, p. 235;—B. Reg. 8, t. 653.) 5 Trinidad.—Introduced into H. C. G.—Fl. ? Fruit about the size of a plum, yellow inside, of a delicate taste.
- JOSSINIA, Commers. (DC. pr. 3, p. 337.)
  - 1. buxifolia, (DC. o. c. p. 338.—Eugenia buxifolia, Lam.) 5 Bourbon.—Introduced into H. C. G. Fl.?
- MYRTUS, L. (DC. pr. 3, p. 238; W. and A. pr. 1, p. 328.)
  - 1. communis, L. (DC. o. c. p. 239;—Roxb. fl. ind. 2, p. 497;—J. Grah. Cat. B. pl. p. 73.) Common Myrtle. Authority Bilati-mendee.

    5 S. Europe. Common in gardens. Fl. smallish, white, fragrant, H. S.; fr. 0. Used as a hedge-plant in Egypt. (Macullough.) Berries eaten in Syria.
  - 2. tomentosa, Ait. (DC. pr. 3, p. 240;—W. and A. pr. 1, p. 328;—Roxb. fl. ind. 2, p. 498;—B. M. 7, t. 250.—M. canescens, Lour.; Roxb. l. c. excl. No. 3.) 5 China, Cochin-China, Neelgherries, Penang, Singapore. Fl large rose-coloured, with crimson filaments.—Introduced into H. C. G. in 1798; but had not fl. up to 1814. Berries eaten on the Neelgherries.

- 3. melastomoïdes, Cunningh. 5 Moreton Bay.
- PIMENTA, Lindl. (Loud. encycl. of plants, p. 418, No. 1123.)
  - vulgaris, Lindl. (Loud. enc. l. c. Wight. ill. 2, p. 13.—Eugenia Pimenta, DC. pr. 3, p. 285, a. longifolia. Myrtus Pimenta, L. a longifolia, Roxb. H. B. p. 37; B. M. 30, t. 1236.)
     Jamaica, &c. Fl. small, white, March and April; fr. July and August. The dried fruit of this tree is imported into Europe from the W. Indies in large quantities, and sold in shops under the name of Allspice or Jamaica Pepper. Leaves aromatic.
  - acris. Wight. (Ill. 2, p. 13, Eugenia acris, W. and A. pr. 1, p. 331;—J. Grah. Cat. B. pl. p. 74.—E. Pimenta, DC. pr. 3, p. 285. β ovalifolia.—Myrtus Pimenta, L. β latifolia, Roxb. H. B. p. 37.—Myrcia acris, DC. pr. 3, p. 243;—B. M. 59, t. 3153.—M. pimentoides, DC. l. c.) b Jamaica, &c. Fl. small, white, March and April; fr. July and August.—Wild Cinnamon or Wild Clove-tree. Timber hard, red and heavy, capable of being polished and used for mill-cogs and other purposes, where much friction is to be sustained. Bark brown, then ash-coloured, finally white, astringent, somewhat aromatic. Leaves sweetly aromatic, agreeably astringent, often used in sauce. Berries aromatic, agreeable for culinary purposes. (Lunan. Hort. Jamaica.)

EUGENIA, L. (Wight. ill. 2, p. 12.)

Sub-genus I.—Eucugenia, Wight. (o. c. p. 13.)

- 1. bracteata, Roxb. (fl. ind. 2, p. 490;—DC. pr. 3, p. 264;—W. and A. pr. 1, p. 331.—E. zeylanica, Roxb. l. c., not Willd.) Explained Hijolee-mendee. 5 Ceylon, Peninsula of India. Fl. as large as those of the common myrtle, white; and fr. throughout the year.
- 2. Michelii, Lam. (DC. pr. 3, p. 263.—Plinia pedunculata, L. fil.;—B. M. 14, t. 473.) 5 Brazil. Fl. small, white, fragrant, H. S.; fr. R. S. Sub-genus II.—Jambosa, DC. (Wight. ill. 2, p. 14.)

Common Pomegranate Tree. 5 N. Africa. Cultivated in India. Fl. large, scarlet and fr. at different periods of the year.—The roots of this tree were already known in the time of Celsus as a remedy against worms, but have since 1804 performed such wonders in this respect, that they may almost be considered specific against tape-worms; two ounces of the bark of the dried root, cut into pieces, are boiled in a pint and a half of water till half a pint remains, four table spoonsful of the strained decoction are then given (to grown-up persons) every half hour, till general discomfort is produced, when the worms soon appear.—To infants it has been found preferable to give, twice a day, half a tea spoonful of the expressed juice of the young roots, mixed with a table spoonful of curds (WE) and a little sugar, till the worm is expelled. The flowers and the rind of the fruit are tonic and astringent, and as well as a decoction of the bark of the root, used in dysenteric and other affections of the bowels. (Trans. med. phys. soc. Calcutta, vol. 1, p. 363-64. B, flore pleno. Flowers double.

    2, p. 99 and 100;—Rheed. 3, t. 36.) Both Peninsulas of India, extending as far north as the Jumna, along the foot of the Himalayas. L. 5
    Fl. large, greenish-white, March; fr. July.

FORTIDIA, Commers. (DC. pr. 3, p. 295.)

- 1. mauritiana, Lam. (DC. l. c.;—J. Grah. Cat. B. pl. p. 73.) 5 Mauritius, where it is called "bois puant." FL pale greenish, largish, with white filaments, fragrant, R. and C. S; fr. 0.
- \* Gustavia augusta, L. 5 Surinam. G. speciosa, DC. b New Granada.

# ORDER XXVI.-LECYTHIDACEÆ, Lindl. Nat. Syst. p. 46.

Large trees, of 6 genera, containing 27 species, all natives of the hottest parts of S. America, especially of Guiana and Brazil.

\* Lecythis ollaria, L. 5 "The most gigantic tree in the ancient forests of Brazil." (Lindl.)—L. minor, Jacq. 5 Carthagena. Fl. large, white, fragrant.—Bertholletia excelsa, H. and Bonpl. 5 S. America; cultivated in Brazil and Guiana. "The well known Brazil nuts of the shops of London, are the seeds of this tree." (Lindl.)—Couroupita guianensis, Aubl. B. M. 59, t. 3158-9. This ever-flowering, most magnificent tree, a native of the forests near Cayenne, is cultivated successfully in St. Vincent. We have no tree in this country to rival its beauty.

# ORDER XXVII.—PHILADELPHACEÆ, Lindl. Nat. Syst. p. 47. THE SYBINGA TRIBE.

Deciduous shrubs, arranged under 3 genera, containing 18 species: 11 from N. America; 5 from the Himalayas; 1 from S. Europe, and 1 from Japan. The Indian forms are, 2 of *Philadelphus*, and 3 of *Deutsia*. Properties unknown.

PHILADELPHUS, L. (DC. pr. 3, p. 205.)

- coronarius, L. (DC. l. c.;—B. M. 11, t. 391.) Common Philadelphus;
   Moch Orange. 5 S. Europe. Fl. large, cream-coloured, fragrant;
   March; but only once.
  - \* Decumaria barbarea, L. 5 S. Carolina.

ORDER XXVIII.—HAMAMELIACEÆ, Lindl. Nat. Syst. p. 48.

### THE WITCH-HAZEL TRIBE.

Shrubs, seldomer trees, of seven genera, containing nine species: 2
N. American; 1 S. African; 1 from Madagascar; 1 Persian; 1 Chinese;
1 Japanese; and 2 from the Khassya Mountains and Upper Assam.
The latter Bucklandia populaea, R. Br. and Liquidambar cerasifolia,
Griff. (Sedgwickia cerasifolia, Wall. et. Griff.) Properties unknown.

Bucklandia, R. Br. (Wall. Cat.; —W. Griffith, As. Res. 19, pt. 1, p. 94.)

1. populaes, R. B. (L. c. Griff. l. c.) L. 5 Khassya Mountains, from Cherra Poonjee to Surureem. Fl. small, greenish. Has been introduced into H. C. G. Fl.?

\* Hamamelis chinensis, R. Br. 5 Nankin, Chusan.—Dicoryphe stipulacea, Jaum. 5 Madagascar.

# ORDER XXIX.—CORNACEÆ, Lindl. Nat. Syst. p. 49. THE DOGWOOD TRIBE.

Trees or ahrubs, seldom herbs, of 6 genera and 28 species: 8 from N. America; 3 from Europe and N. Asia; 4 from Mexico; 2 from Japan; 1 from Guiana; 2 unknown, as to their native place; 3 from Nepal; and 5 from Java. Of the E. Indian forms, 2 belong to Cornus, 1 to Benthamia, and 2 to Mastizia. Properties of little importance.

AUEUBA, Kämpf. (DC. pr. 4, p. 274.)

- 1. japonica, Thunb. (DC. l. c.;-B. M. 30, t. 1197.) 5. Japan.—Has not fl.
  - \* Votomita guienensis, Aubl. 5. French Guiana.

### ORDER XXX.-LORANTHACEÆ, Lindl. Nat. Syst. p. 49.

Parasitical undershrubs, arranged, according to Lindl., under 12 genera, and, as far as we can judge from DC. (Pr. 4. p. 277, &c. with add.), W. and A. (Pr. 1, p. 379, &c.) and Wight. (Ill. p. 67.) containing 338 species (upwards of 400, Wight.),—all referred by DC. to four genera. 186 species have been found in S. America, Mexico and the W. Indies; 103 in the E. Indies; 15 in S. Africa, (Harvey); 3 in Mauritius and Bourbon; 9 in New Holland and the South Sea Islands; 7 in Guinea and Senegal; 4 in N. America; 3 in Abyssinia; 2 in Europe; 2 in Japan; 1 in Madagascar; 1 near Tiflis; 1 in China; and 1 in Caramania. Of the Indian forms, 22 belong to Viscum; 78 to Lorenthus; and 2 to Schöpfia, chiefly inha-

biting Java, the mountains of the two Peninsulas of India, the Khassya Mountains, and Nepal. A few only have been found in Lower Bengal, Ceylon, and Luzon. Properties nearly unknown.

Several species of Loranthus have been introduced into H. C. G. as well as here, but they have not succeeded.

LOBANTHUS, L. (DC. pr. 4, p. 286; W. and A. pr. 1, p. 381.)

- 1. longiflorus, Dear. (DC. o. c. p. 304;—W. and A. o. c. p. 384;—Wight icon. 1, t. 302;—Roxb. fl. ind. ed. Carey, 2, p. 217.—L. bicolor, Roxb. Corom. 2, t. 139;—fl. ind. 1, p. 548, and 2, p. 185; ed. Carey, 2, p. 205;—DC. o. c. p. 307;—Rheed. 10. t. 4.) 

  The munda. Parasitic. 5 Peninsula of India, Bengal, (Serampore.) &c. Fl. large, greenish orange-scarlet, and fr. nearly throughout the year.
- 2. globosus, Roxb. (fl. ind. 1, p. 550, and 2, p. 187; ed. Carey, 2, p. 206;—DC. pr. 4, p. 297. excl. syn. Rheed.) (Cloud Chhoto-munda. Parasitic. 5. Bengal. (Serampore.) Fl. small, greenish-orange, and fr. nearly the whole year.

ORDER XXXI.—CUCURBITACEÆ,—Juss. Lindl. Nat. Syst. p. 51; (partly) Wight. ill 2, p. 24—33.

### THE GOURD TRIBE.

Annual or perennial, climbing or creeping herbs, rarely undershrubs, chiefly natives of hot countries in both hemispheres, ranged by Meisner under 35, by Endlicher under 28 genera. Of species, DC. (1828) assigns for S. America, Mexico and the W. Indies 40; for N. America 5; Europe 4; Egypt and Arabia 7; Senegal 2; Abyssinia 1; Tunis 1; Guinea 3; Mozambique 1; Astrachan 1; Persia 1; Levant 2; Canaries 3; China and Japan 5; and the Society Islands 1. The S. African forms amount to 15, (Harvey,) and those of unknown origin to as many. In the E. Indies have been discovered about 130 species; viz. 1 of Bryonopsis; 4 of Achmandra; 1 of Melothria? 1 of Pilogyne; 2 of Zehneria; 2 of Karivia; 1-2 of Mukia; 31 of Bryonia; 2 of Citrullus; 12 of Momordica; 16 of Luffa; 1 of Benincasa; 1 of Lagenaria; 25 of Trichosanthes; 2 of Gymnopetalum; 12 of Cucummis; 4 of Cucurbita; 1 of Coccinia; 2 of Sicyos; 1 of Erythropalum; and I of Herpetospermum. To these must, however, be added about 20 species (including common forms), enumerated by Blume since 1828. DC. then assigned to this author 26, but Wight (Ill. 2, p. 26,) now informs us that Blume in all, enumerates 46 Javanese species; thus increasing the E. Indian Cucurbitaceæ to 160. The generic distribution of his additions we are not acquainted with.

"Acrimony and drastic tendency pervade many species, the fruit of some of which" (f. ex. the Colocynth,) "afford cathartics of remarkable power, acting, in even small doses, with great energy on nearly the whole line of the alimentary canal. This intensity of power is, however, of rare occurrence, though the property is found more or less active in every part of the plants, mildly in the roots of some, and the leaves and young shoots of others, but in greatest intensity in the pulp surrounding the seed. The seeds themselves do not partake of this property, being nearly all mild and oily. There is reason to believe that some at least, if not all of the edible sorts, owe their freedom from this property to cultivation, as some of them in their wild state are found to possess it in great intensity. many of the species of Cucumis, are powerfully cathartic, among which C. Hardwickii and Pseudo-Colocynthis, Royl., may be mentioned as the chief ones, but even the common Cucumber, especially the less highly cultivated varieties of this country, are sometimes known to prove strongly aperient in susceptible constitutions. But of all those yet mentioned, none approach the Elaterium (Spirting Cucumber) in the concentrated virulence of this quality, a few grains of the pulp being known occasionally to bring on symptoms of poisoning. Notwithstanding these drawbacks this is certainly a most useful family of plants, owing to the great size of their fruit, and the large quantity of nutritious matter which the edible sorts afford, and which on that account are extensively cultivated in every part of India. Those unfit for food, supply many useful medicines; but even the best known ought to be used cautiously when not ameliorated in their qualities by cultivation." Wight. ill. 2, p. 26-27.

KARIVIA, Arn. (Wight, ill. 2, p. 30.)

1. sumbellata, Arn. (l. c.—Bryonia umbellata, Klein;—DC. pr. 3, p. 305;—W. and A. pr. 1, p. 345;—J. Grah. Cat. ### ORDER XXXIII.—CACTACEÆ, Lindl. Nat. Syst. p. 53.

### THE INDIAN FIG TRIBE.

Of this order of succulent, polymorphous plants, which, under 9 genera, contains about 250 species, "America is the station, no species appearing to be natives of any other part of the world. The species, which are said to be either wild or naturalized in Europe, Mauritius, and Arabia," (India and China) "have been introduced from America, and having found themselves in situations suitable to their habits, have taken possession of the soil like actual natives.—Hot, dry, exposed places are the favorite stations of Cactaceæ, for which they are peculiarly adapted, in consequence of the imperfect evaporating pores which they possess, as compared with other plants; a circumstance, which, as De Candolle has satisfactorily shown, will account for the excessively succulent state of their tissue." (Lindl.)

The chief importance of this order, is, that some of its species supply the food on which the cochineal insect lives.

MAMMILLARIA, Haw. (DC. pr. 3, p. 458.)

# ORDER XXXIV.—HOMALIACEÆ,—Lindl. Nat. Syst. p. 55.

Trees or shrubs, of 9 genera, embracing 28 species: 12 from Madagascar and Mauritius; 3 from S. Africa; 6 from S. America, and the W. Indies; 1 from China; and 5 from the E. Indies. The latter all belong to Blackwellia.—Properties unknown.

BLACKWELLIA, Commers. (DC. pr. 2. p. 54.)

- spiralis, Wall. (DC. l. c. p. 55;—Wall. As. Research, 13, p. 400, with a plate.)
   b Pegu. Fl. very small, whitish, January and Feb.; fr. 0.
- 2. feetida, Wall. (Ludia feetida, Roxb. fl. ind. 2, p. 508.) 5 Amboina. Fl. small, whitish, R. S.; fr. 0.
- 3. propingua, Wall. Cat. 5 Penang. In H. C. G., fl. Feb.
- cochinchinensis, R. Br. (Astranthus cochinchinensis, Lour.;—DC. pr. 2, p. 55;—B. M. 53, t. 2659.)
   Cochin-China. Fl. small, whitish. Introduced into H. C. G. Fl.
- \* B. nepalensis, Wall. (Pl. as. rar. 2, t. 179.) 5 Deyra Dhoon.—B. paniculata, Lam. ("Bois à écorce blanche.") 5 Bourbon.—B. padiflora, Lindl; B. Reg. 16. t. 1308. 5 China. The finest species of the genus.—Homalium racemosum, Jacq.; B. Reg. 6, t. 519. 5 Jamaica.

# ORDER XXXV.—MESEMBRYANTHEMACEÆ, MESEMBRYACEÆ,—Lindl. Nat. Syst. p. 56.

Shrubby or herbaceous plants, rarely annual, referred by Lindl. to 4 genera: Mesembryanthenum, Glinus, Orygia, and Kolleria. Excluding from Harvey's genera 21 species, they contain of S. African forms alone, 477. Only a few have been found in N. Holland, Van Diemen's Land, China, Chili, Peru, S. Europe, N. Africa, and the E. Indies. The latter consist of 3-4 species of Glinus.—Properties, as far as they are known, of no importance.

MESEMBRYANTHEMUM, L. (DC. pr. 3, p. 415.) Fig-marygold.—Nearly all natives of C. G. H.

- crystallinum, L. (DC. o. c. p. 448.) ⊙ of C. G. H. Fl. small, white, H. S.; fr. 0.—Also a native of the Canaries.
- cordifolium, L. (DC. o. c. p. 449;—Jacq. ic. rar. 4, t. 487.)
   G. H. Fl. smallish, crimson, nearly throughout the year; fr. 0.

### GLINUS, L. (DC. pr. 3, p. 455;—W. and A. pr. 1, p. 362.)

- 1. dictamnoïdes, L. (DC. l. c.;—W. and A. l. c.—Pharnaceum pentagynum, Rosb. fl. ind. 2, p. 103;—Burm. ind. t. 36, f. 1.) আসরা শাক Dosura-shak. ⊙ Both Peninsulas of India. Bengal, (Serampore.) Fl. small, greenish-red, R. and C. S.; fr. C. S.—The tender shoots are eaten by the Natives in their curries.
- \*Mesembrianthemum dolabriforme, L.; B. M. 1, t. 32. 5—M. coccineum, Haw.; B. M. 2, t. 59. 5—M. pinnatifidum, L.; B. M. 2, t. 67. ⊙—M. barbatum, L.; B. M. 2, t. 70. 5—M. aureum, L.; B. M. 8, t. 262. 5—M. edule, L. 5—M. viridiflorum, Ait; B. M. 10. t. 326. 5—All Cape plants.

# ORDER XXXVI.—BEGONIACEÆ, R., BR.—Lindl. Nat. Syst. p. 56.

Shrubby or herbaceous, rarely annual plants, amounting, as far as we can judge from Spreng. syst., B. M., B. Reg., and Wall. Cat., to 124 species, of which I belongs to Eupetalum, Lindl., and the rest to Begonia. The greater part of them inhabit S. America, Mexico and the W. Indies; 30 have been found in the E. Indies, chiefly in Nepal, the Khassya Mountains, the Neelgherries, and Tavoy; 2 in Madagascar; 1 in Mauritius; 1 in China; 1 in Japan, and 1 in the Island of Johanna.—Eupetalum is a Brazilian genus.—Properties apparently unimportant.

BEGONIA, L. (Spreng. Syst. 2, p. 565, No. 1998.)

- humilis, Dryand. (Spreng. o. c. p. 626;—B. Reg. 4, t. 284.)

ORDER XXXVII.—BRASSICACEÆ, Lindl. Nat. Syst. p. 58.

#### THE CABBAGE TRIBE.

Herbs, annual, biennial, or perennial, very seldom under-shrubs. Exclusive of species that are uncertain, or common to several different countries, it appears that about 100 are found in the southern hemisphere, and about 800 in the northern, and of these 91 in the new and the rest in the old world.

This calculation will, however, require considerable modification, especially in the Asiatic and N. American numbers, (Lindl.) and we shall, perhaps, not err much, if we take the amount of species of the whole order to be upwards of 1200. The Indian forms according to our materials, are 48:7 of Nasturtium; 2 of Turritis; 2 of Arabis; 8 of Cardamine; 2 of Pteroneuron; 1 of Farsetia; 6 of Draba; 1 of Cochlearia? 1 of Thlaspi; 1 of Capsella; 1 of Hesperis; 1 of Sisymbrium; 1 of Alliaria; 1 of Lepidium; (Roxb.) 1 of Tauscheria; 9 of Sinapis; 1 of Eruca; and 1 of Crambe. Fourteen of these are common to several parts of the world; 16 have been found in the Himalayas; 5 on the Neelgherries; 2 in Cochin-China; 4 in Java; 8 in Kunawar; and 11 in the plains, chiefly of Bengal.

Acrimony and bitterness form the grand characteristics of this useful order, to which we owe most of our antiscorbutic herbs, and a number of our Kitchen-vegetables. The principle of acridity seems to be a volatile oil, that soon evaporate, and, therefore, is greatly diminished by drying. It abounds in the Horse-radish, Common Cress, Radish, (especially the black Spanish Radish,) &c. which renders it necessary that these should be eaten fresh. In others the acrimony is mitigated by an abundance of mucilage,

various parts of such plants becoming wholesome food, f. ex. Turnip, Cabbage, Sea-kale, and the stems of several species of the Cabbage-tribe. The seeds retain their pungent qualities for a longer period of time, such as those of the white mustard, which have been highly esteemed for their tonic qualities. A great deal of azot enters into the nature of the whole tribe; hence perhaps their animal odour, when in a state of decomposition.

# ORDER XXXVIII.—CAPPARIDACEÆ, Lindl. Nat. Syst. p. 61.

### THE CAPER TRIBE.

Annual and perennial herbs, shrubs, (rarely climbing.) or trees, placed by Lindl. (o. c. p. 62.) in 26 genera, and, according to DC. (pr.) amounting to about 100 species for S. America, Mexico and the W. Indies; 23 for Africa, excluding the south; 11 for Arabia; 10 for New Holland and the South Sea Islands; 4 for Persia and Iberia; 4 for the Levant; 4 for N. America; 3 for Europe; 3 for Madagascar; 2 for Tauria; 2 for Timor; 1 for Mauritius; and 1 for China. For S. America, Sprengel, (syst.) adds 5 species. S. Africa contains 20 forms, (Harvey;) and the E. Indies 64. Of the latter, 1 belongs to Gynandropsis; 4 to Cleome; 4 to Polanisia; 4 to Crateva; 2 to Niebuhria; 2 to Cadabs; 46 to Capparis; and 1 to Roydsia. Of these, 2 only (Capparis nepalensis, DC. and C. obovata, Buch.) have been found in the Himalayas; the rest are all tropical. Properties unimportant. Capers are the flower-buds of Capparis spinosa, L., a S. European shrub.

GYHANDROPSIS, DC. (pr. 1, p. 237; -W. and A. pr. 1, p. 21.)

1. pentaphylla, DC. (o. c. p. 238;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 7.—Cleome pentaphylla, L.;—Roxb. fl. ind. 3, p. 126;—B. M. 40. t. 1681;—Rheed. 9, t. 24;—Rumph. 5. t. 96. f. 8.) \*\*[INITIAL Kanala, INITIAL Kanala, INITIAL Kanala, INITIAL Kanala, INITIAL KANALA, INITIAL KANALA, INITIAL KANALA, WINTERSON, Seharunpore, Nepal. ORDER XXXIX.—RESEDACEÆ, DC.—Lindl. Nat. Syst. p. 62.

### THE MIGNONETTE TRIBE.

Annual or perennial herbs, of 4 genera, (Lindl. l. c.) containing, according to Spreng. syst., 22 species: 13 from Europe; 5 from N. Africa; 1 from S. Africa; 1 from the Canaries; 1 from China; and 1 from Cochin-China. One of the European species has been found on the Neel-gherries.—Properties unimportant.

- RESEDA, L. (Spreng. syst. 2, p. 445, No. 1791;—W. and A. pr. 1, p. 28.)

  1. Lateola, L. (Spreng. o. c. p. 463;—E. B. 5, t. 320.) Dyer's Weed.

  © Europe. Fl. small, yellowish, Feb. and March; fr. April.—
  Yields a yellow dye.
  - 2. virescens, Horn. (Spreng. l. c.) 

    Spain. Fl. small, greenish, Feb. and March; fr. April.

- odorata, L. (Spreng. o. c. p. 464;—B. M. l., t. 29;—J. Grah. Cat. B. pl. p. 9.) Mignonette. 

   N. Africa. Fl. small, greenish, fragrant, Feb. and March; fr. April.

- alba, L. (Spreng. l. c.;—W. and A. pr. 1, p. 28;—Wight ill. 1, t. 15.)
   S. Burope, Neelgherries. Fl. small, white, C. S.
  - \* Ochradenus baccatus, Delile. 5 Egypt.

### ORDER XL.—VIOLACEÆ, Lindl. Nat. Syst. p. 63.

### THE VIOLET TRIBE.

Perennial, rarely annual herbs, under-shrubs or shrubs (sometimes climbing) or small trees, amounting, under 17 genera, (Lindl.,) according to DC. pr., to 66 species for S. America, Mexico and the W. Indies; 34 for N. America; 27 for Europe; 6 for Siberia; 6 for N. Holland; 7 for Madagascar; 3 for Senegal; 2 for Caucasus; 1 for Altai; 1 for Persia; 1 for Arabia; and 1 for Manilla. S. Africa contains 3 species; (Harvey) and the E. Indies 27, viz. 11 from Nepal; 2 from the Khassya Mountains; 2 from the Neelgherries; 1 from Kunawur; 1 from Ceylon; 2 from Java; 2 from Penang; 1 from Oude; 4 from the plains of India; and 1 from Cochin-China; 19 of them belong to Viola; 3 to Ionidium; 3 to Alsodeia; and 1-2 to Pentaloba.

The roots of nearly all of the section Violëse, have an acrid, nauseous taste, and possess the property of acting as emetics, in a greater or smaller degree. This is especially the case with Pombalia Ituba, Ging., a S. American under-shrub, which with Ionidium parviflorum, Vent. is considered to form part of those plants that produce *Ipecacuanha*. In Europe, Viola odorata, canina, tricolor and arvensis are among the emetic plants, though not acting powerfully enough to be of use in medicine. VIOLA, L. (DC. pr. 1, p. 291;—W. and A. pr. 1, p. 31.)

- cucullata, Ell. (DC. o. c. p. 292; β glaberrima;—B. M. 43, t. 1795.)
   N. America. Fl. large, purplish-blue, C. S.; fr. 0.
- Roxburghiana, (V. primulifolia, Roxb. fl. ind. 1, p. 650; ed. Carey, 2, p. 448; not L. nor Pursh. V. mysorensis, Wall. Cat.?)
   Interior of Bengal, (Roxb.)
   smallish, indigo-coloured; and fr. throughout the year.
- 3. odorata, L. (DC. pr. 1, p. 296;—E. B. 9, t. 619.) Sweet Violet. 4. Europe, Siberia, China. Fl. largish, violet, sweet-scented, C. S.
- 4. serpens, Wall. (DC. l. c.; -Rosb. fl. ind. ed. Carey, 2, p. 449; -

- Royle. ill. t. 18, f. 1.) 4. Nepal, Khassya Mountains. Fl. smallish white, C. S.
- distans, Wall. (Cat.;—Trans. med. and phys. soc. Calcutt. vol. 7, part 2, p. 227)
   Khassya Mountains. Fl. small, palish-violet, C. S.
- tricolor, L. (DC. pr. 1, p. 303;—J. Grah. Cat. B. pl. p. 10;—E. B. 18, t. 1287.) Heart's-ease. © Europe, Siberia, N. America. Fl. largish, violet, variegated with white and yellow, Jan. Feb. and March. Herb successfully used against crusta lactea.

IONIDIUM, Vent. (DC. pr. 1, p. 307; -W. and A. pr. 1, p. 32.)

1. suffruticosum, Ging. (DC. o. c. p. 311;—W. and A. l. c.;—Wight, icon. 1, t. 308;—J. Grah. Cat. B. pl. p. 10.—Viola suffruticosa, L.; Rozb. fl. ind. 1, p. 649; ed. Carey, 2, p. 447.—Rheed. 9. t. 60.) EXIV Noonbora. 5 Peninsula of India. Bengal, (Serampore,) extending up the Gangetic Valley, nearly as far as Delhi. Fl. small, rose-coloured; and fr. nearly throughout the year.

ALSODEIA, Pet. Th. (DC. pr. 1, p. 313.)

- bengalensis, Wall. (Trans. med. and phys. soc. Calcutt. vol. 7, part
   p. 224.—Pentaloba? bengalensis. Wall. Cat.)
   Khassya Mountains.
   Fl. very small, white, nearly throughout the year.
- Rosburghii, Wall. (l. c.—Vareca heteroclita, Rosb. fl. and. 1. p. 648;
   ed. Carey, 2, p. 446.—Pentaloba? Roxburghii, Wall. Cat.) 5 Lucknow,
   Amboina. Fl. small, white, C. S.
- \* Calyptrion Aubletii, Ging. 5 Guiana.—C. pyrifolium, Mart. 5 Brazil.
  Noisettia longifolia, H. and B. 5 Cayenne.—Glossarrhen floribundus,
  Mart. 5 Brazil.—Viola pramorsa, Dougl.;—B. Reg. 15, t. 1254. 4.

  620.—Solea concolor, Ging. 4. Pennsylvania.—Pombalia Ituba, Ging.
  (Ionidium Ipecacuanha, \(\beta\): B.M. 51, t. 2453.) 5 Guiana.—Hybanthus
  havanensis, H. B. and Kth. 5 Havanna.—Alsodeia physiphora, R. Br.
  5 Brazil.—Piparea dentata, Aubl. 5 Cayenne.

SUB-ORDER.—SAUVAGESIEÆ, Lindl. Nat. Syst. p. 64.

Shrubs or annual herbs, of 2 general, and 9 species; 8 from tropical S. America, and 1 from Madagascar.—Properties unimportant.

\* Samageria geministera, Moç. and Sesse. 4. Mexico.—S. erecta, L.

O S. America.

### ORDER XLI.—SAMYDACEÆ, Lindl. Nat. Syst. p. 64.

Shrubs or trees, of 3 genera, containing, to judge from DC. pr., Wall. Cat. and Rept. and Royl. ill., 60 species: 1 from New Caledonia; 1 from Mauritius; 37 from S. America, Mexico and the W. Indies; and 21 from the E. Indies. Of the latter, 18 belong to Casearia, and 3 are by R. Br. in Wall. Cat. put down as Samideæ. They inhabit chiefly the Himalayas, the Circars, the Khassya Mountains, Assam, and Penang. 1 has been found in the Moluccas, and 3 in Java.—Properties unimportant.

CASEARIA, Jacq. (DC. pr. 2, p. 48.)

- Vareca, Roxb. (fl. ind. 2, p. 418.—Vareca, Gärtn. fr. 1, t. 60.)
   Khassya Mountains, Goalpara. Fl. small, greenish-yellow, May; fr. Sept. and Oct.
- glomerata, Roxb, (o. c. p. 419.)
   Silhet. Fl. small, greenish-yellow.—In H. C. G. fl. Dec.; fr. March. (Roxb.)
- Canziala, Wall. (Samyda Canziala, Buch. in Wall. Cat.—C. ovata, Roxb. fl. ind. 2, p. 420. excl. syn. Rheed;—not Willd.)
   Goalpara. Fl. small, greenish, March.
- 4. glabra, Roxb. (fl. ind. 2, p. 421.) L. 5 Moluccas. Fl. small, greenish. In H. C. G. fl. nearly throughout the year. (Roxb.)
- 5. tomentosa, Roxb. (fl. ind. 2, p. 421.) 5 Circars, Kemaon, Deyra-Dhoon. Fl. small, greenish, yellow, H. S.; fr. R. S.
- 6. lanuginosa, Buch. Goalpara.
  - \* Samyda rosea, Sims.; B. M. 16, t. 550. 5 St. Domingo.

### ORDER XLII.—MORINGACEÆ, Lindl. Nat. Syst. p. 65.

### THE HORSE-BADISH-TREE TRIBE.

The only genus belonging to this order is:—
MORINGA, Burm. (DC. pr. 2, p. 478;—W. and A. pr. 1, p. 178.)

1. pterygosperma, Gärtn. (DC. l. c.;—W. and A. l. c.;—Wight. ill. 1, t. 77;—J. Grah. Cat. B. pl. p. 43.—Hyperanthera Moringa, Vahl.;—Roxb. fl. ind. 2, p. 368;—Rheed. 6, t. 11;—Rumph. 1, t. 74.) Mighai Sujina. Horse-radish-tree. 5 Both Peninsulas of India. Bengal, (Serampore,) Hindoosthan, &c. up to the Himalayas.—Domesticated in equatorial America. Fl. middle-sized, smelling of honey, Jan. Feb. and March; fr. H. S.—Root a substitute for Horse-radish, used medicinally by the Natives.—Bark, wounded, exudes a quantity of gum. Leaves, flowers and immature capsules eaten by the Natives in their curries, the latter forming, according to Dr. Gibson, a good substitute

for asparagus. Oil of the seeds in the W. Indies used as salad oil, and because it does not congeal or turn rancid, employed by watchmakers, and for retaining the aroma of delicate flowers.

3. rubriflora, Roxb. Fl. red.—Malda.

\* M. concanensis, Nimmo; J. Grah. Cat. B. pl. p. 43. 5 South Con-

Besides these two species, 3 additional ones (2 Indian, and 1 Arabian,) are mentioned, but they are very uncertain.

ORDER XLIII.—DROSERACEÆ, DC.—Lindl. Nat. Syst. p. 66.

#### THE SUNDEW TRIBE.

Herbaceous, rarely shrubby, bog or water-plants, of 6 genera amounting to 52 species: 13 from S. America; 6 from N. America; 4 from Europe; 12 from S. Africa; 1 from Madagascar; 8 from New Holland; 2 from Van Diemen's Land; 2 from China; and 4 from the E. Indies. One species, Drosera Burmanni, Vahl., grows on the mountains as well as on the plains, and one, Drosophyllum lusitanicum, Lk., lives on hills and on the barren sands of Portugal. Of the E. Indian forms, 1 belongs to Aldrovanda, and is, according to W. and A., identical with the S. European A. vesiculosa, L. The 3 others are species of Drosera. Properties unimportant. Drosera communis, St. Hil., of Brazil, is said to be poisonous to sheep. The same has been said of other species. D. lunata, Buch. might perhaps, according to Royle, yield a valuable dye, as the paper in which the plants were dried became of a pink colour.

DROSERA, L. (DC. pr. 1, p. 317; -W. and A. pr. 1, p. 33.)

1. Burmanni, Vahl. (DC. o. c. p. 318;—W. and. A. o. c. p. 34;—Roxb. fl. ind. 2, p. 113;—Wight. ill. 1, p. 42, t. 20;—J. Grah. Cat. B. pl. p. 11.—Burm. zeyl. t. 94, f. 2.) ⊙ Ceylon, Peninsula of India. Bengal, Silhet. Fl. very small, yellow; and fr. C. S.

ALDROVANDA, L. (DC. pr. 1, p. 319;—W. and A. pr. 1, p. 34.)

- 1. vesiculosa, L. (DC. l. c.;—W. and A. l. c.—A. verticillata, Rozb. fl. ind. 2, p. 112.) statistic Malaka-jkanji. ⊙ Standing water in S. Europe and Bengal. Fl. small, white. Has been introduced into H. C. G. The Bengalee name of the plant is familiar to some of my gardeners, but they have as yet not succeeded in procuring it from the neighbourhood.
- \* Drosera indica, L.; Wight. ill. 1, p. 42, t. 20, f. C. Ceylon, Peninsula of India, Tavoy.—D. lunata, Buch.; Wight. ill. 1, p. 42, t. 20, f. D. under the name of D. peltata.

# SUB-ORDER.—PARNASSIEÆ. Arn.—Wight ill. 1, p. 43.

A small tribe of herbaceous perennial herbs, of 1 genus, and 12 species: 1 European; 1 Siberian; 5 N. American; and 5 Indian. Of the latter, 1 has been found on the Mountains in the south of the Peninsula of India; 1 in Mysore; the rest in the Himalayas. Properties unimportant. Parnassia palustris, L. was formerly used in diseases of the eye, and liver.

\* Parnassia mysorensis, Heyne. Wight. ill. 1, p. 45, t. 21. 4. Mysore.

# ORDER XLIV.—FRANKENIACEÆ, St. Hil.—Lindl. Nat. Syst. p. 67.

Herbs, rarely annual, or under-shrubs, of 3 genera, containing 25 species; 3 N. African; 6 S. African; 2 N. American; 1 S. American; 1 from the Canaries; 1 from St. Helena; 1 from Mogador; 3 from New Holland; 1 from Tauria; and 5 common to several parts of the world.—Properties unknown.

\* Frankenis pulverulenta, L.—E. B. 17, t. 1211. © Sea-shores of Europe.

Beatsonia portulacifolia, Roxb. 5. Shores of St. Helena.

### ORDER XLV.—PASSIFLORACEÆ,—Lindl. Nat. Syst. p. 67.

#### THE PASSION-FLOWER TRIBE.

Herbs or shrubs, generally climbing, seldom erect, very rarely trees, of 14 genera, and more than 200 species. By far the greater part of these inhabit S. America, Mexico, and the W. Indies. 20 have been found in the E. Indies; 7 in New Holland and Van Diemen's Land; 4 in Madagascar; 3 in Sierra Leona; 2 in S. Africa; 1-2 in N. America; and 1 in Mauritius. Of the E. Indian forms, which chiefly have been found in Java and both Peninsulas of India, 1 belongs to Tacsonia; 6 to Passifora; and 12 to Modecca.

"Nothing is known of the properties of this order further than that the succulent aril and pulp that surround the seed are fragrant, juicy, cooling, and pleasant, in several species." (Lind.)

Passiflora, L. (DC. pr. 8, p. 322;—W. and A. pr. 1, p. 352.)

- 1. minima, Jacq. (DC. o. c. p. 325;—B. Reg. 2. t. 144;—Roxb. H. B. p. 49;—J. Grah. Cat. B. pl. p. 80.) 5 Curação. Fl. small, yellowish-green, fragrant; and fr. the whole year.
- suberosa, L. (DC. l. c.;—Roxb. H. B. p. 49.)
   W. Indies. Fl. white, fragrant, R. S.

- biffors, Lam. (DC. pr. 3, p. 326.—P. lunata, Sm.;—B. Reg. 7, t. 577;—B. M. 49, t. 2354.)
   Mexico, Jamaica. Fl. middle-sized, greenish-white, fragrant, throughout the year.
- 4. serratifolia, L. (DC. pr. 3, p. 327;—B. M. 18, t. 651.) 5 Surinam. Fl. large, greenish-blue, purple, fragrant, R. S.
- 5. quadrangularis, L. (DC. pr. 3, p. 328;—B. M. 46, t. 2041;—B. Reg. 1, t. 14.) 5 ∪ Jamaica. Fl. very large, whitish rose-coloured, variegated with blue, &c. fragrant, R. S.
- 6. alata, Ait. (DC. l. c.;—B. M. 2, t. 66;—B. Cab. 3, t. 246.) 5 
  Peru, W. Indies. Fl. very large, rose-scarlet, variegated with several colours, fragrant, R. S.
- 7. laurifolia, L. (DC. l. c.;—Roxb. H. B. p. 49;—J. Grah. Cat. B. pl. p. 80;—B. Reg. 1, t. 13.) 5 W. Indies, Surinam. Fl. large, blue, variegated with several colours, fragrant, R. S.; fr. C. S.
- racemosa, Brot. (DC. pr. 3, p. 329;—B. Reg. 4, t. 285;—B. M. 45, t. 2001.—P. princeps, B. Cab. 1, t. 84.)
   Brazil. Fl. very large, intensely red, variegated with purple, scentless; at different periods of the year, but especially C. S,
- 9. coeruleo-racemosa, Sab. (DC. l. c.;—B. C. 6, t. 573.) A Hybrid of P. racemosa (female) and P. coerulea (male.) 5 ∪ Fl. large, scentless, blue, R. S.
- incarnata, L. (DC. pr. 3, p. 329;—B. M. 65, t. 3697.) β alba.
   Virginia. Introduced in 1840.
- edulis, Sims. (B. M. 45, t. 1989;—DC. l. c.—P. incarnata, β. B. Reg. 2, t. 152.)
   b Srazil. Fl. middle-sized, greenish-white, R. S., fr. C. S., eatable, of a grateful scent.
- 12. coerulea, L. (DC. pr. 3, p. 330;—B. M. 1, t. 28;—B. Reg. 6, t. 488;—Rozb. H. B. p. 49.) 5 ∪ Brazil. Fl. large, pale-green, variegated with deep-green, blue, pale-rose and yellow, R. S.
- foetida, Cav. (DC. pr. 3, p. 331;—B. Reg. 4, t. 321;—B. M. 53,
   t. 2619;—J. Grah. Cat. B. pl. p. 80.)
   Creeping. W. Indies.
   Fl. largish, greenish-white, R. S.; fr. C. S.—Whole plant fetid.
- 14. chinensis, Wall. MSS. 5 China? Introduced in 1836. Fl. 1839.
- Mayana, Veitch. MSS. 5 

   □ Received from Killerton Nursery, Exeter. Has not fl. here.

ORDER XLVI.—PAPAYACEÆ,—Mart. Lindl. Nat. Syst. p. 69.

THE PAPAW TRIBE.

Trees, natives of S. America, arranged in 1 genus, containing according, to Spreng. syst., 6 species.

Carica, L. (Spreng. syst. 3, p. 895, No. 3190;—W. and A. pr. 1, p, 325.) 1. Papaya, L. (Spreng. o. c. p. 905;—Roxb. fl. ind. 3, p. 824;—W. and A. l. c.; -J. Grah. Cat. B. pl. p. 80; -B. Reg. 6. t. 459. (male); -B. M. 56. t. 2898-9; -Wight. ill. 2, t. 106-7; -Rheed. 1, t. 15. f. 1, (male,) and 2 (female).—Rumph. 1, t. 50.) (ofform Pepiya. 5. S. America. Domesticated in India. Fl. middle-sized, pale yellow, fragrant; and fr. nearly the whole year.—Trees about Scrampore either straight and without branches like a palm, or branched. Leaves employed by the negroes in the W. Indies to wash their linen, instead of soap. Fruit, when unripe, used in curries by the Natives, also pickled, and made into a preserve; --when ripe, the soft, yellow pulp, which is very delicious to many, is eaten without the addition of pepper and sugar, as in the W. Indies. It is certainly wholesome, more especially when some of the olive-coloured, pungent, caper-like seeds are partaken of at the same time. Juice of the pulp employed in the W. Indies against freckles, of the unripe fruit as an efficient vermifuge. "The tree has, moreover, the singular property of rendering the toughest animal substances tender, by causing a separation of the muscular fibre; its very vapour even does this; newly-killed meat suspended among the leaves, and even old hogs and old poultry, when fed on the leaves and fruit, become tender in a few hours.-A principal constituent of the juice of the unripe fruit is fibrine, a principle otherwise supposed peculiar to the animal kingdom and to fungi." (Lindl.)

\* C. citriformis, Jacq. fil; B. M. 65, t. 3133. 5 Guiana.

ORDER XLVII.—FLACOURTIACEÆ.—Lindl. Nat. Syst. p. 70. Bennet in Horsf. pl. jav. rar. 2, p. 189-190

Shrubs or small trees, forming 10-13 genera, Flacourtia, Phoberos, Roumea. Banara, Zylosma, Prockia, Thiodia, Aphloia, Azara, Echinocarpus, Trichospermum, Ludia? Lætia? from Madagascar; Guinea; Africa; Mauritius; New Holland; S. America. Fifteen species are from the E. Indies. Of those which inhabit Nepal, the Neelgherries, Java, Sumatra and the Moluccas, 9 belong to Flacourtia; and 9 to Phoberos.—Properties nearly unknown.

FLACOURTIA, L'Herit. (DC. pr. 1. p. 256;—W. and A. pr. 1, p. 29.)

- Ramontchi, L'Herit. (DC. l. c.; —W. and A. l. c.; —Roxb. fl. ind. 3, p. 834; Wight. icon. 1, t. 85; —J. Grah. Cat. B. pl. p. 10.)
   Madagascar. Introduced into H. C. G. Fl.?
- sapida, Roxb. (Corom. 1. t. 69;—fl. ind. 3. p. 835;—DC. pr. 1,
   p. 256;—W. and A. pr. 1, p. 29;—J. Grah. Cat. B. pl. p. 10.)
   Booinch. 5 Peninsula of India. Bengal, (Serampore,) Hindoos-

- than and northwards to Deyra-Dhoon. Fl. minute, greenish, C. S.; fr. H. S.—Fruit eaten by the Natives.
- sepiaria, Roxb. (Corom. 1, t. 68;—fl. ind. 3, p. 835;—DC. pr. 1, p. 256;—W. and A. pr. 1, p. 29;—J. Grah. Cat. B. pl. p. 10;—Rheed.
   t. 39.)
   Peninsula of India, Bengal, Nepal, Kemoan. Fl. minute, greenish, C. S.; fr. H. S.
- inermis, Roxb. (Corom. 3, t. 222;—fl. ind. 3, p. 833;—DC. pr. 1, p. 256;—W. and A. pr. 1, p. 29.)
   Moluccas, both Peninsulas of India, Silhet. Fl. minute, greenish, Feb. and March; fr. Nov. Fruit too sour to be eaten raw, but makes very good tarts. (Roxb.)
- 5. cataphracta, Roxb. (fl. ind. 3, p. 834;—DC. pr. 1, p. 256.) of Panecyala. 5 Assam, Monghir, Nepal. Fl. minute, greenish, C. S.—Fruit palatable, reckoned wholesome. (Roxb.)
- 6. ferox, Wall. MSS.—In H. C. G. Fl.?
- 7. obcordata, Roxb. (fl. ind. 3, p. 835.) 5 Chiftagong. Has been introduced into H. C. G.?
- 8. cordifolia, Roxb. (H. B. p. 73.) 5 Silhet. Introduced into H. C. G. in 1810, but had not fl. in 1814.
- 9. rotundifolia, Roxb. (l. c.) 5 Coromandel. Introduced into H. C. G. in 1804, but had not fl. in 1814.
- Campbelliana, Roxb. (l. c.) 5 Sumatra.—Introduced into H. C. G. in 1800, but had not fl. in 1814.

PHOBEROS, Lour. (W. and A. pr. 1, p. 29.)

- 1. chinensis, Lour. (Roumea chinensis, Wall. Cat.) 5 Introduced in 1840.
- Rozburghii, Bennet. (in Pl. Jav. Rar. p. 182. sine charactere.—Ludia spinosa, Rozb. fl. ind. 2, p. 507.—Flacourtia? Stigmarota, Wall. Cat.)
   Sumatra. Fl. small, reddish-white, March and April; fr. Sept. (Rozb.) The tree in the garden here unarmed.
- \* ? Erythrospermum macrophyllum, Poir. 5 Mauritius. ?—E. paniculatum, Poir. 5 Mauritius. ?—E. verticillatum, Lam. 5 Mauritius.

# ORDER XLVIII.—PANGIACEÆ, Lindl. Nat. Syst. p. 70.

Containing only the 3 following species:-

L

HYDNOCARPUS, Gärtn. (DC. pr. 1, p. 257; -W. and A. pr. 1, p. 30.)

- 1. inebrians, Vahl. (DC. l. c.;—W. and A. l. c.;—Wight. ill. 1, t. 16;

  —J. Grah. Cat. B. pl. p. 10.) 5 Ceylon, Malabar. Fl. small, white.—In H. C. G. Fl.?—Fruit used at Ceylon for poisoning fish.
- odoratus, Lindl. (Wight. ill. 1, p. 37.—Gynocardia odorata, Roxb. Cor.—Chaoolmoogra odorata, Roxb. fl. ind. 3, p. 836.)
   L. 5 Assam, Silhet. Fl. large, pale yellow, fragrant. Has been in the garden

here for more than twelve years, without fl.—Seeds used by the Natives at Silhet in the cure of cutaneous disorders. Freed from their integuments, they are beaten up with clarified butter into a soft mass, and in this state applied thrice a day to the parts affected. (Roxb.)

\* Pangium Rumphii, (Rumph. 2, t. 59.) 5 Java, Moluccas.

## ORDER XLIX.—TURNERACEÆ, DC.—Lindl. Nat. Syst. p. 71.

Annual and perennial herbs, sometimes under-shrubs, all natives of S. America, Mexico and the W. Indies, of 2 genera and 31 species.—Properties unknown.

TURNERA, L. (DC. pr. 3, p. 346.)

- 1. ulmifolia, L. (DC. l. c.)
  - β. angustifolia, DC. (T. angustifolia, Curt.;—B. M. 8, t. 221.) 5
    Jamaica. Fl. largish, uniformly yellow; and fr. the whole year.
    Domesticated about Serampore.
- trioniflora, Sims. (B. M. 47, t. 2106;—DC. pr. 3, p. 346.)
   Trinidad, Mexico. Fl. large, cream-coloured with a dark purple-eye; and fr. the whole year. Domesticated about Serampore.
- \* T. cuneiformis, Juss. 5 Rio Janeiro—T. brasiliensis, Willd. 5 Brazil.

  —T. acuta, Spreng. 5 Jamaica.—Piriqueta villosa, Aubl. © Guiana.

### ORDER L.—BIXACEÆ.—Lindl. Nat. Syst. p. 72.

#### THE ARNOTTO TRIBE.

Trees of only one genus, and 1-2 species.

BIXA, L. (DC. pr. 1, p. 259;—W. and A. pr. 1, p. 31.)

- 1. Orellana, L. (DC. l. c.) 5 Hot parts of America. Fl. largish, inodorous, R. S.; fr. C. S.
  - a caribea, (Bixa Orellana, B. M. 35, t. 1456.) Cultivated in the W. Indies. Fl. rose-coloured; immature fr. dark reddish-brown.
  - β. indica, (Bixa Orellana, Roxb. fl. ind. 2, p. 581;—W. and A. pr. 1, p. 31;—Wight. ill. 1, t. 17;—J. Grah. Cat. B. pl. p. 10;—Rumph. 2, t. 19.) 可多数 Luthun. Flowers white; immature fruit, green. Cultivated in India.

Bixa yields the substance Arnotto, in France called Rocou, which is the pulp of the seeds. Farmers use it to stain their cheeses, and dyers to obtain a reddish colour. The dye of the Indian variety is neither so abundant, nor so good, as that from the W. Indies; where also the bark of the tree is used for cordage.

# ORDER LI.—GARCINIACEÆ (CLUSIACEÆ. Lindl. Nat. Syst. p. 74.)

#### THE MANGOSTEEN TRIBE.

Trees or shrubs, rarely climbing, sometimes (Clusia) parasitical, with the exclusion of Xanthochymus, contained, according to Lindl. (l. c.) in 22 genera. Of these our materials only assign 35 species to S. America, Mexico and the W. Indies, but their number must be considerably greater. Two species have been found in Madagascar; 1 in Mauritius; 1 in Guinea; 1 in Tongatabu; and 60 in the E. Indies. (Moluccas, Java, Ceylon. Both Peninsulas of India. The Khassya Mountains, Silhet.) Of the latter, 30 belong to Garcinia; 20 to Calophyllum; 6 to Mesua; 1 to Gynotroches; 1 to Kayea; 1 to Calysaccion; and 1 to Apoterium.

A very good synopsis of the Indian Garciniaceæ (Guttiferæ) will be found in Wight's. ill. 1, p. 124-129.

"The species of this order, (Guttiferæ,) all abound in a viscid, yellow, acrid and purgative gum-resinous juice resembling Gamboge. This gum-resin is obtained by removing the bark, or by breaking the leaves and young shoots." (Lindl.) "The most important and finest qualities are generally considered to come from the kingdom of Siam, and are imported into England from China by way of Singapore. Among these the wholesale druggist distinguishes by name at least two, and generally three varieties—Pine Gamboge, Cake or Lump Gamboge and Coarse Gamboge." (Graham in Companion to Bot. Mag.) The first variety is well known under the name of Gum Gamboge.

GARCINIA, L. (Wight. ill. 1, p. 124.)

- Mangostana, L. (Wight. l. c.;—DC. pr. 1, p. 560;—Gärtn. fr. 2, t. 105;—Roxb. fl. ind. 2, p. 618;—J. Grah. Cat. B. pl. p. 26;—Rumph. 1, t. 43, female.)
   Moluccas. Malay Islands. Fl. large, reddish green yellow. Has not fl. in Bengal, I believe; indeed, it can scarcely be kept alive.—Gives the well-known fruit, Mangoosteen, believed to be the most palatable of all known fruits.
- cornea, L. (Wight. ill. 1, p. 124;—DC. pr. 1, p. 561;—Roxb. fl. ind.
   p. 229;—Wight. icon. 1, t. 105;—Rumph. 3, t. 30.)
   Moluccas.
   Penang. Moulmein. Fl. middle-sized, yellowish, Feb. and March; fr. May and June.
  - 3. Kydiana, Roxb. (H. B. p. 42; —Wight. ill. 1, p. 125; icon. 1, t. 113.—G. Kydia, Roxb. fl. ind. 2, p. 623, not W. and A.) 5 Andaman Islands. Fl. middle-sized, yellowish.—In H. C. G. fl. Feb.; fr. July. Fruit very sharp but pleasantly acid, and, like the rest of the genus, the aril is by far the more palatable part. (Roxb.)
  - pedunculata, Roxb. (fl. ind. 2, p. 625;—Wight. ill. 1, p. 125;—icon.
    1, t. 114. (female,) and 115, (male.)) L. 5 Rungpore.—In H. C. G.
    Fl.?—Aril copious, firm, and of a very sharp, pleasantly acid taste.
    (Roxb.)

- paniculata, Roxb. (fl. ind. 2, p. 628;—Wight. ill. 1, p. 125; icon. 1,
   t. 112.)
   Silhet. Fl. small, white. In H. C. G. fl. C. S; fr. July.
   Aril palatable, tasting somewhat like that of the Mangosteen. (Roxb.)
- 6. purpurea, Roxb. (fl. ind. 2, p. 624; —Wight. ill. 1, p. 125; —J. Grah. Cat. B. pl. p. 25.) 5. Malabar. In H. C. G. Fl.?—Fruit agreeably acid, eaten by the Natives. Workers in iron use the acid juice as a mordaunt; a concrete oil is obtained from the seeds, which is well known and used at Goa for adulterating ghee. (Bombay Courier, 12th June, 1830.)
- lanceæfolia, Roxb. (fl. ind. 2, p. 623;—Wight. ill. 1, p. 125;—icon.
   t. 103. male.)
   Silhet. In H. C. G. Fl.?—Cultivated at Silhet, on account of its fruit, of which the Natives are fond.
- 8. Roxburghii, Wight. (ill. 1, p. 125;—icon. 1, t. 104;—J. Grah. Cat. B. pl. p. 26.—G. Cambogia, Roxb. Corom. 3, t. 298;—fl. ind. 2, p. 621; not Desrouss.—G. zeylanica, Roxb. fl. ind. p. 621.—G. Cowa, Roxb. fl. ind. 2, p. 622;—W. and A. pr. 1, p. 101.—G. affinis, W. and A. l. c.—J. Grah. Cat. B. pl. p. 25.) 5 Ceylon, Travancore, Malabar, Chittagong. Fl. small, sulphur-coloured, Feb.; fr. June. Fruit eatable, but very acid.
- 9. dioeca, Sm. (Rees' Cyclop. vol. 15.) 5 In H. C. G. Fl.? 10. porrecta, Wall. Ceylon. In H. C. G. Fl.?

MAMMBA, L. (DC. pr. 1, p. 561.) Mammee tree.

- 1. americana, L. (DC. l. c.;—Roxb. H. B. p. 41.) 5 W. Indies.—
  In. H. C. G. fl, H. S. (Roxb.) In the W. Indies the juice is employed to destroy the chiggers, little insects which attack the naked feet, introducing themselves into the flesh below the toe nails. (Lindl.)
- MESUA, L. (DC. pr. 1, p. 562;—W. and A. pr. 1, p. 102.)
  - 1. Roxburghii, Wight. (ill. 1, p. 127.—Mesua ferrea, Roxb. fl. ind. 2, p. 605, not W. and A.?) aistand Naghushur. 5 Cultivated in Bengal. Fl. very large, fragrant, H. S.; fr. C. S. Flowers found in the bazars in a dried state, being used in medicine as well as esteemed for their fragrance. The grandees of Ava are said to stuff their pillows with the dried anthers of the flowers, on account of their fragrance. (Roxb.)
- CALOPHYLLUM, L. (DC. pr. 1, p. 562;—W. and A. pr. 1, p. 102.)
  - 1. Inophyllum, L. (DC. l. c.;—excl. syn. Rumph.;—W. and A. o. c. p. 103. excl. syn. Rumph. and C. Bintagor, Roxb.;—Roxb. fl. ind. 2, p. 606;—Wight. icon. 1, t. 77;—J. Grah. Cat. B. pl. p. 26.) স্থাতাৰাট্যা Sultana-champa. L. b Both Peninsulas of India. Fl. largish, white, fragrant, June and July; fr. C. S.
    - 2. polyanthum, Wall. 5 Khassya Mountains. In H. C. G.
    - 3. angustifolium, Roxb. (fl. ind. 2, 608.) 5 Penang.
    - 4. Tacamahaca, Wild. (DC. pr. 1, p. 562.) 5 Madagascar, Sechelles.

KAYBA, Wall. (Wight. ill. 1, p. 129.)

- 1. floribunda, Wall. (Pl. as. rar. 3, t. 201; Wight. l. c.) L. 5 Khassya Mountains. Fl. largish, white, tinged with rose, fragrant. In H. C. G. Fl.?
  - \* Garcinia speciosa, Wall. pl. as. rar. 3, t. 258. 5. Amherst.—G. celebica, L. Rumph. 1, t. 44. 5. Island of Celebes.—G. cochinchinensis, Choisy. Rumph. 3, t. 32. 5. China. Perhaps the very tree that yields the Pipe Gamboge.—G. Cambogia, Desrouss. Rheed. 1, t. 24. 5 Ceylon. Malabar. Courtallum.—G. Gutta, Wight. ill. 1, t. 44. 5 Ceylon.—G. javanica, Bl. 5 Java.—G. Bhoomicowa, Wall. Cat. 5 Silhet.—Gynotroches axillaris, Bl. 5 Java.—Mesua speciosa, Choisy. Rheed. 3, t. 5. Malabar.—M. ferrea, L. Wight. icon. 1, t. 118. 5 Ceylon. M. coromandelina, Wight. icon. 1, t. 117. 5 Courtallum.—M. pedunculata, Wight. icon. 1, t. 119. 5 Mergui.—Calophyllum Blumii, Wight. 5 Java,—C. Bintagor, Roxb. Rumph. 2, t. 71. 5 Moluccas. Mauritius .- C. tomentosum, Wight. 5 Ceylon .- C. decipiens, Wight. Rheed. 4. t. 39. 5 Travancore. S. Concan,—C. Moonii, Wight. icon. 1, t. 111. 5 Ceylon.—C. Burmanni, Wight. icon. 1, t. 108. 5 Ceylon.—Calysaccion longifolium, Wight. 5 Bombay.—Rheedia lateriflora, L. 5 Martinique.—Pentadesma butyracea, R. Br. The Butter-tree of S. Leona.—Moronobea coccinea, Aubl. 5 Guiana.— Micranthera clusiæfolia, Choisy. 5 Cayenne.—Quapoya scandens, Aubl. 5 Guiana.—Q. Panapanari, Aubl. 5 Guiana.—Clusia rosea, L. 5 St. Domingo.—C. alba, L. 5 S. America.—C. flava, L. 5 Jamaica.—Tavomita guianensis, Aubl. 5 Guiana, Brazil.

ORDER LII.—CANELLACEÆ, Mart.—(Sub-Order? CANELLEÆ, Lindl. Nat. Syst. p. 75.)

Trees, contained in 2 genera, Platonia Mart.; S. American, and Canella, P. Browne, (DC. pr. 1, p. 563.)

alba, Murr. (DC. l. c.;—Trans. Linn. Soc. 1, p. 102, t. 8. Winterana Canella, L.)
 W. Indies. Fl. small, glaucous-brown, fragrant, H. S.; fr. 0. Bark stimulant, tonic, but now almost obsolete.

ORDER LIII.—CARYOCARACEÆ, (RHIZOBOLACEÆ,—DC. Lindl. Nat. Syst. p. 76.)

"Six large trees found in the forests of the hottest parts of S. America constitute the whole of the order.—Some of them are known for producing the Souari (vulgo Suwarrow) Nuts, of the shops, the kernel of

which is one of the most delicious fruits of the nut kind that is known. An oil is extracted from them not inferior to that of the Olive." (Lindl.)

\* Caryocar nuciferum, L. B. M. 54. t. 2727-8. Souari, or Butter-nut. Essequebo, Berbice. Flowers very large, purplish-brown.—C. glabrum, Pers. Guiana.—C. tomentosum, Willd. Guiana.—C. butyrosum, Willd. Guiana.

## ORDER LIV. MARCGRAAVIACEÆ, Juss. Lindl. Nat. Syst. p. 77.

Shrubs, sometimes of a scrambling habit, (Marcgraavia) of 4 genera, containing 9 species: 1 from New Caledonia, and 8 from S. America and the W. Indies.—Properties unknown.

\* Marcyraavia umbellata, L. 5 Trinidad. M. coriacea, Vahl.. 5 Guiana. Norantea guianensis. Aubl. 5 Guiana. N. brasiliensis, Choisy. 5 Brazil. Ruyschia clusiafolia, Jacq. 5 Guiana. R. Souroubea, Willd. 5 Guiana.

# ORDER LV.—HYPERICACEÆ, Lindl. Nat. Syst. p. 77.

#### THE TUTSAN TRIBE.

Perennial herbs, undershrubs, shrubs, or trees, "very generally spread all over the earth, inhabiting mountains and vallies, marshes and dry plains, meadows and heaths, in N. America, Asia, S. America, Europe, Africa, and its neighbouring Islands, and New Holland," (Lindl.), who refers all of them to 13 genera.—"These are by Spach increased to 27, species of 23 of which were formerly united under the large and very complex genus Hypericum." (Wight. ill. 1, p. 111.) DC. (1824) enumerates 165 species, of which N. America contains the largest number, 38; Europe 28; S. America 20; the E. Indies 9, &c. The latter now amount to 45; 1 of Ancistrolobus; 4 of Xanthochymus; 7 of Norysca; 2 of Brathys; and, according to DC., Spreng, and Wall. Cat., 31 of Hypericum, and "Hypericineae."—Most of these species have been found on the Himalayas, the Khassya Mountains, the Neelgherries, and at Penang and Singapore.—Properties unimportant.

Ancistrolobus, Spach. (Wight. ill. 1, p. 111.)

- 1. carneus. Wall. (Rept.—Hypericum carneum, Wall. Cat.) 5 China. Fl. small, palish scarlet, March, April and May; fr. C. S.
- XANTHOCHYMUS, Roxb. (DC. pr. 1, p. 562;—W. and A. pr. 1, p. 101)—
  Referred to this order conformably with the views of Wight. ill.
  1, p. 122.
  - pictorius, Roxb. (Corom. 2, t. 196;—fl. ind. 2, p. 633;—DC. pr. 1, p. 562;—W. and A. pr. 1, p. 102.)
     L. 5 Circars. Penang. Silhet.

- Fl. small, greenish-white, April; fr. C. S.—This beautiful tree yields a green fruit and a large quantity of indifferent gamboge. (Roxb.) Does not possess the elements of Gamboge. (Wight.)
- ovalifolius, Roxb. (fl. ind. 2. p. 632;—W. and A. pr. 1, p. 102;— J. Grah. Cat. B. pl. p. 26.—Stalagmites cambogioïdes, Moon's Cat. Ceylon, pl.—Cambogia Gutta, Burm. fl. ind. ex pte.) 5 Ceylon. Fl. very small, greenish-white, H. S. fr. July.
- dulcis, Roxb. (fl. ind. 2, p. 631;—B. M. 58, t. 3088;—Wight. icon.
   t. 192.)
   Moluccas, Penang. Fl. smallish, greenish-white, June and July; fr. C. S.

NORYSCA, Spach. (in Wight. ill. 1, p. 113.)

- 1. chinensis, (Hypericum chinense, L.;—DC. pr. 1, p. 545.—H. monogynum, L.;—B. M. 10, t. 334;—Roxb. fl. ind. 3, p. 400.) 5 China. Fl. large, gold-coloured, and fr. the greater part of the year.
- 2. cernua (Hypericum cernuum, Roxb. fl. ind. 3, p. 400.) 5 Hurdwar, Shreenagur. Fl. large, gold-coloured, Jan. Feb. and March; fr. 0.
- 3. patula, (Hypericum patulum, Thunb.—H. uralum, Buch.;—B. M. 50, t. 2375.) 5 Nepal, Kemaon, Khassya Mountains.—Has been introduced into H. C. G. Fl.?
- \* Haronga madagascariensis, Choisy. 5 Madagascar, Bourbon.—Vismia sessilifolia, Pers. 5 Guiana.—V. reticulata, Choisy. 5 Guiana.—V. guianensis, Pers. 5 Guiana.—V. rufescens, Pers. 5 Guiana.—V. brasiliensis, Choisy. 5 Brazil.—V. cayennensis, Pers. 5 Cayenne.—Norysca mysorensis, Arn. 5 Mysore, Neelgherry.—N. Hookeriana, Wight. 5 Peninsula of India.—Brathys japonica, Wight. 5 Khassya Mountains, Martaban.—B. Wightiana, Wight. 5 Neelgherry.—? Ochranthe arguta, Lindl.; B. Reg. 21, t. 1819. 5 China.

# ORDER LVI.—TERNSTRÖMIACEÆ, DC.—Lindl. Nat. Syst. p. 79.

Trees or shrubs, according to Lindl., forming 28 genera, to which our materials refer 182 species: 56 for S. America, Mexico and the W. Indies; 57 for the E. Indies; 13 for China and Japan; 4 for N. America; and 1 for Guinea. Of the E. Indian forms, chiefly discovered in Java, Ceylon, both Peninsulas of India, the Khassya Mountains, Assam, and Nepal, 1 belongs to Cocklospermum; 9 to Ternströmia? 1 to Anneslea; 1 to Adinandra; 9 to Eurya; 4 to Cleyera; 12 to Saurauja; 9 to Gordonia; 7 to Camellia; 1 to Thea; 2 to Schina; — to Pyrenaria; and 1 to Reimogratia, Geeria. Bl. as perhaps not distinct, (Wight.) is here joined to Eurya.

The most remarkable plant of the tribe is the Tea, of which by far the best information will be found in W. Griffith's Report on the Tea-plant of Upper Assam.

- Anneslea, Wall. (Pl. as. rar. 1, t. 5.)
  - 1. fragrans, Wall. (l. c.) 5 Moulmein. Fl. smallish, whitish-yellow, fragrant.—Introduced into H. C. G.?
- BURYA, Thunb. (DC. pr. 1, p. 525; -W. and A. pr. 1, p. 86.)
  - 1. fasciculata, Wall. (Cat.) 5 Silhet.—Has been introduced into H. C. G. A.?
- SAURAUJA, Willd. (DC. pr. 1, p. 525.)

(

L

C

- 1. fasciculata, Wall. (Pl. as. rar. 2, t. 148.) 5 Nepal. Fl. smallish, white, rose-coloured, slightly sweet-scented. Introduced into H. C. G. F1. ?
- 2. Rosburghii, Wall. (Ternströmia serrata, Recb. fl. ind. 2, p. 521.) 5 Sylhet. Fl. small, rose-coloured. In H. C. G. fl. April and May; fr. July and Aug. (Roxb.)
  - GORDONIA, Ellis, (DC. pr. 1, p. 528;—W. and A. pr. 1, p. 87.)
    - 1. integrifolia, Roxb. (H. B. p. 33,-fl. ind. 2, p. 572,-G. Wallichii, DC. pr. 1. p. 528.) L. 5 Khassya Mountains. Has been introduced into H. C. G. Fl.?
    - 2. floribunda, Wall. Cat. Martaban, Chappedong, Tavoy. Has been introduced into H. C. G. Fl.?
  - Camellia, L. (DC. pr. 1, p. 529.)
    - 1. Kissi, Wall. (Pl. as. rar. 3, t. 256;—D(
    - pr. 1, p. 529.) 5 Nepal.
      2. caudata, Wall. (Pl. as. rar. 3, p. 36.) 5 Khassya Mountains.
  - THEA, L. (DC. pr. 1, p. 530.)
    - 1. chinensis, Sims. (DC. l. c.)
      - β. Bohea, (B. M. 25, t. 998.) 5 China. In H. C. G. fl. C. S. (Rozb.)
  - COCHLOSPERMUM, Kth. (DC. pr. 1, p. 527; -W. and A. pr. 1, p. 87.)
    - 1. Gossypium, DC. (l. c.; -W. and A. l. c.; -J. Grah. Cat. B. pl. p. 22. Bombax Gossypium, L. Rozb. fl. ind. 3, p. 169.) 5 Travancore, Coromandel, Hurdwar. Fl. large, bright-yellow, March and April; fr. R. S. The tree yields the gum, called Kuteera, which in the N. W. Provinces of India is substituted for Tragacanth. (Royle.)
    - \* Eurya Wightiana, Wall, Wight. ill. 1, t. 38. 5 Peninsula of India. E. tristyla, W. and A. 5 Peninsula of India.—E. chinensis, R. Br. 5 China.—Laplacea speciosa, H. B. and Kth. 5 S. America.—Ventenatia glanca, Beauv. 3 Benin in Africa.—Cochlospermum insigne, A. St. Hil. 5.—C. serratifolium, DC. 5 Mexico.—C. vitifolium, 5 N. Spain.—C. tinctorium, R. Br. 5 Senegambia.— Archytea triflora, Mart. 5 Brazil.-Mahurea palustris, Aubl. 5 Guiana, Brazil.—Marila racemosa, Swz. 5 W. Indies.—Kielmeyera corymbosa, Mart. Brazil.—K. rosea, Mart. Brazil.

ORDER LVII.—ACERACEÆ, Lindl. Nat. Syst. 1, p. 81.

#### THE SYCAMORE TRIBE.

Trees, under 3 genera, comprising 40 species; 10 from N. America; 9 from Nepal and the Himalayas; 9 from Europe; 6 from Japan; 1 from Iberia; 1 from the Levant; 1 from Tartary; 1 from Mexico; 1 from Cochin-China? and 1 of unknown origin. Of the Indian species, 8 belong to Acer, and 1 to Dobiaca.

"The species are only known for the sugary sap of Acer saccharinum and others, from which sugar is extracted in abundance, and for their light useful timber." (Lind!.)

ACER, L. (DC. pr. 1. p. 593.)

- oblongum, Wall. (DC. l. c.)
   b Nepal. Fl. very small, greenish, March; fr. 0.
- 2. lævigatum, Wall. (Pl. as. rar. 2, t. 104.) L. 5 Higher Mountains of Nepal, Kemaon. In H. C. G. Fl.?

NEGUNDO, Mönch. (DC. pr. 1, p. 596.)

- 1. frazinifolium, Nutt. (DC. l. c.;—Acer Negundo, L.) 5 N. America.

  Has been in the garden many years, but does not fl.
  - \* Dobinæa vulgaris, Buch. 5 Nepal.

ORDER LVIII .- SAPINDACEÆ, Juss .- Lindl. Nat. Syst. p. 81.

#### THE SOAP-TREE TRIBE.

Trees or shrubs, often climbing and cirrhiferous, seldom climbing herbs. The order contains 43 genera, of which the greater number of species (150) inhabits S. America, Mexico and the W. Indies. One has been found in the southern parts of the United States; 2 in Senegal; 4 in Guinea; 10 in S. Africa; 1 in Madagascar; 9 in Bourbon and Mauritius; 2 in Japan; 4 in China; 2 in Timor; and about 10 in New Holland and the South Sea Islands. Our materials furnish us with only 50 forms for the E. Indies; 2 of Cardiospermum; 1 Sioja; 9 of Schmidelia; 1 of Harpullia; 3 of Baccaurea; 14 of Sapindus; 2 of Cupania; 1 of Hedycarpus; 10 of Nephelium; 1 of Schleichera; 2 of Dodonea; 1 of Eustathes; and 1 of Pedicella.—What may be the amount of species discovered in Java, and of Wall's unpublished Sapindaceæ, we have no means of ascertaining, but the probability is, that they will at least double our Indian forms. Blume's new genera are Irina, Lepisanthes, Mischocarpus; (Cupania, Lindl.) and Aphania.

" It is singular that while the leaves and branches of many of these plants are unquestionably poisonous, the fruit of others is valuable as an article of

- dessert." (Lind.) To the former belong some species of Paullinia, and, as regards fish, also of Magonia and Serjania; to the latter Nephelium Lichi and lappaceum, Pierardia sapida and dulcis, Hedycarpus malayanus, Schmidelia dulcis, Sapindus esculentus, Paullinia subrotunda, Cupania sapida, &c. The fruit of several species of Sapindus is used instead of soap.

# ORDER LIX.—ÆSCULACEÆ,—Lindl. Nat. Syst. p. 84.

#### THE HORSE-CHESNUT TRIBE.

Trees or shrubs, of 4 genera, and 14 species: 9 from N. America; 2 from Nepal and the Khassya Mountains; 1 from N. India; (DC.) and 2 of unknown origin.—"The bulky seed of Pavia indica, containing a large proportion of fecula, though combined with some bitter principle, is eaten in the Himalayas, as those of the Horse Chesnut (Asculus Hypocastanum, L.) have been in other parts of the world, in times of famine." (Royle.) The bark of the latter has been used as a febrifuge, but with little success. Pavia, Boerh. (DC. pr. 1, p. 598.)

- 1. indica, Colebr. L. 5 Kemaon, Sirmore, Gurhwal, Kunawar; alt. 8000-10,000 f.
- 2. khassyana, (P. punduana, Wall. Cat.) 5 Khassya Mountains; alt. 4500 f.—Does not exist at Pundua, (*Griff.*) Both of these trees have been introduced into H. C. G. Fl.?
- \* Pavia macrostachya, Herb. amat. t. 212. (Macrothyrsus?) 5 Banks of the rivers of Georgia.

## ORDER LX.—POLYGALACEÆ,—Lindl. Nat. Syst. p. 84.

#### THE MILK-WORT TRIBE.

Herbs or shrubs, rarely climbing or arboreous, ranged under 15 genera. DC. pr. and Spreng. syst. enumerate 92 species for S. America, Mexico and the W. Indies; 22 for N. America; 11 for Europe; 10 for New Holland and Van Diemen's Land; 4 for Guinea; 3 for Siberia; 2 for Japan; 2 for China; 1 for Arabia; 1 for Madagascar; 1 for the Canaries; and 1 for Armenia. The S. African forms amount to 100, (Harvey); and the E. Indian to 49. Of the latter, our materials furnish 29 of Polygala; 6 of Salomonia; 11 of Xanthophyllum; 1 of Soulamea; and 2 of Securidaca;—all, with a few exceptions, inhabiting mountainous or hilly places in Nepal, the Khassya Mountains, both Peninsulas of India, Ceylon, Java and the Moluccas.

Digitized by Google

The chief characteristic of the order is bitterness, but its qualities have not been thoroughly examined, and the praise which was formerly bestowed on the medicinal powers of some, has, in most cases, been found to be undeserved. Even Polygala Senega is now comparatively seldom used in diseases of the chest, and that only in chronic catarrhs, where all inflammation has ceased.

#### ORDER LXI.—KRAMERIACEÆ, Mart.—Lindl. Nat. Syst. p. 87.

Undershrubs, of 1 genus, and 8 species, natives of S. America, Mexico, and the W. Indies.—"The genus is of an extremely anomalous structure, and remarkable for its tonic and excessively astringent qualities.

Its root is sold in Europe under the name of Ratanhia, and is one of the substances which, in conjunction with gum Kino, is used for adulterating port wine in England." (Lindl.)

# ORDER LXIV.—LINACEÆ,—Lindl. Nat. Syst. p. 89.

#### THE FLAX TRIBE.

Annual and perennial herbs, undershrubs and shrubs, referred to 2 genera. According to DC. pr. and Spreng. syst., 32 species have been found in Europe; 9 in S. America and Mexico; 6 in N. Africa; 3 in N. America; 2 in Tauria and Iberia; 1 in Dahuria; 1 in Siberia; 1 in Syria; and 1 in New Zealand. The S. African forms amount to 10, (Harvey); and the Indian ones to 5, all natives of the Peninsulas, the Khassya Mountains and Nepal, and all belonging to Linum.—The common flax (Linum usitatissimum, L.) is found everywhere in the plains, though perhaps only domesticated.

"The tenacity of their fibre, and the mucilage of their diuretic seeds, are striking characters of Linacese, which are also usually remarkable for the beauty of their flowers." (Lindl.)

# ORDER LXV.—HUGONIACEÆ, Arn.—Lindl. Nat. Syst. p. 89.

The following are the only known species of this shrubby order, which consists of one genus:—

HUGONIA, L. (DC. pr. 1, p. 522;—W. and A. pr. 1, p. 72.)

- 1. Mystax, L. (DC. l. c.;—W. and A. l. c.;—Wight. ill. 1, t. 32;—Rheed. 2, t. 19.) 5 Malabar, Coromandel, Ceylon. Fl. large, yellow. Has been introduced into H. C. G.? Fl.?
- \* H. ferruginea, W. and A. 5 Ceylon.—H. serrata, Lam. 5 Mauritius.
  —H. tomentosa, Cav. 5 Mauritius.

ORDER LXVI.—CHLENACEÆ,—Pet. Th.—Lindl. Nat. Syst. p. 90.

Trees or shrubs, of 4 genera, and 8 species, all natives of Madagascar.

—Properties unknown.

\* Sarcolana grandiflora, Pet. Th.—Leptolana multiflora, Pet. Th.—Schizolana rosea, Pet. Th.—Rhodolana altivola, Pet. Th.

#### ORDER LXVII.—CISTACEÆ, Lindl. Nat. Syst. p. 91.

#### THE ROCK-ROSE TRIBE.

Herbs and undershrubs, of 4 genera, and, according to DC., 160 species: 15 N. American; 6 S. American; 3 Syrian, and the rest all from S. Europe, N. Africa, and the Canaries.—Properties unimportant.

HELIANTHEMUM, Tournef. (DC. pr. 1, p. 266.)

- 1. eriocaulon, Don. (DC. o. c. p. 271.) © Spain, France. Fl. smallish, yellow, Feb. and March; fr. April.
- 2. inconspicuum, Thib. (DC. l. c.) © Spain. Fl. minute, yellow, Feb. and March; fr. April.
- 3. egyptiacum, Mill. (DC. o. c. p. 273.) ⊙ Egypt, Barbary, Spain. Fl. small, white, Feb. and March; fr. April.

\* H. guttatum, Mill; E. B. 8. t. 544. © England. S. Europe.—H. plantagineum, Pers. © S. Europe. N. Africa.—H. punctatum, Willd. © France.—H. ledifolium, Mill, E. B. 34. t. 2414. © England.—H. intermedium, Thib. © Spain.—H. denticulatum, Thib. © S. France.—H. salicifolium, Pers. © Spain. Italy.—H. sanguineum, Lag. © Spain.

ORDER LXVIII.—REAUMURIACEÆ,—Lindl. Nat. Syst. p. 91.

Shrubs, of 2 genera, and a few species, belonging to Sicily, Egypt, and Syria.—Properties unimportant.

\* R. vermiculata, L. 5 Egypt.

ORDER LXIX.—STERCULIACEÆ, Vent.—Lindl. Nat. Syst. p. 92.

Trees or shrubs, sometimes climbing or twining, referred to 82 genera. DC. pr. and Spreng. syst. enumerate about 115 species for S. America. Mexico and the W. Indies, which, however, have been much increased since 1827; 19 for Bourbon and Mauritius; 3 for Madagascar; 2 for St. Helena; 8 for Tropical Africa; 16 for New Holland and Van Diemen's Land; 2 for Timor; 1 for Arabia; 1 for Persia; and 3 for China. S. Africa exhibits 100 forms, (Harvey); and the E. Indies (in a great measure exclusive of Java) 111, viz., 1 of Isora; 15 of Helicteres; 1 of Pterygota; 3 of Heritiera; 1 of Sterculia; (Endl. and Schott.) 13 of Sterculia; (Roxb. Wall. DC .- partly); 9 of Southwellia, 2 of Cavallium; 2 of Hildegardia; 1 of Scaphium; 1 of Erythropsis; 1 of Ophelus; 2 of Durio; 1 of Gossampinus; 2 of Salmalia; 1 of Pentapetes; 3 of Melhania; 1 of Trochetia? 13 of Pterospermum; 4 of Kydia; 2 of Wallichia; 2 of Abroma; 2 of Commersonia; 8 of Büttnera; 1 of Kleinhovia; 1 of Jürgensia; 3 of Lochennia, Arn.; 1 of Visenia; and 1 of Waltheria.—By far the greater part of these inhabit the two Peninsulas of India, the Khassya Mountains, and Assam. Some few extend to Nepal.—"Excluding Bombacese, Java has, according to Blume, 22 species;" (Wight,) among which representatives are found of his new genera-Prosthesia, Visemia, and Maranthes.

The whole order is chiefly remarkable for abundance of mucilage and tenacity of fibre. Its peculiar properties will be mentioned under the different species.

A. Helictereæ, Schott. and Endl. (Melet. bot. p. 30.) ISORA, Schott and Endl. (l. c.)

1. corylifolia, Schott. and Endl. (l. C.—Wight icon. 1, t. 150.—Helicteres Isora, L.;—DC. pr. 1, p. 475;—Roxb. fl. ind. 3, p. 143;—W. and A. pr. 1, p. 60;—J. Grah. Cat. B. pl. p. 16;—B. M. 46, t. 2061;—

- Rheed. 6, t. 30;—Rumph. auct. t. 17. f. 1.) Signify Antumora. 5 Extends from one end of India to the other, particularly along the foot of the Himalayas. (Serampore.) Fl. largish, brick-coloured, R. and C. S.; fr. Feb. and March. Fruit used by the Natives in dysenteries and bowel-complaints, from mere superstition. At Bombay it is employed medicinally in diseases of the ear. (Dr. Gibson.)
- Helicteres, L. (DC. pr. 1, p. 476; sect. Orthocarpæa.—Schott. and Endl. o. c. p. 31.)
  - 1. kirsuta, Lour, (DC. pr. 1, p. 476;—J. Grah. Cat. B. pl. p. 16.—H. spicata, Colebr.;—Rosb. H. B. p. 97.) 5 Cochin-China, Archipelago of the Eastern Peninsula of India. Fl. largish, dark purplish brown, throughout the year; fr. C. S.
  - angustifolia, L. (DC. pr. 1, p. 476.)
     China. Fl. small, white-purple, C. S.; fr. H. S.
  - 3. elongata, Wall. Cat. 5 Taong-Dong. Fl. largish, pale yellow, C. S.; fr. H. S.
  - 4. virgata, Wall. Cat. (G. Don's Mill. dict. 1, p. 508.) 5 China. Fl. small, C, S; fr. H. S.
  - pulckra, Wall. 5 Burma. Fl. small, C. S.; fr. H. S.
     B. Sterculiëæ, Schott. and Endl.

PTREYGOTA, Schott. and Endl. (o. c. p. 32.)

- 1. Rosburghii, Schott. and Endl. (l. c.—Sterculia alata, Rozb. fl. ind. 3, p. 182.) L. 5 Silhet. Chittagong. Fl. largish, ferrugineous, streaked with crimson and yellow, Feb. and March; fr. Dec.—Seeds at Silhet eaten by the Natives as a cheap substitute for opium. (Rozb.)
- Heritiera, Ait. (DC. pr. 1, p. 484;—W. and A. pr. 1, p. 63;—Schott. and Endl. l. c.)
  - 1. minor, Lam. (DC. l. c.; —Roxb. fl. ind. 3. p. 142; —excl. syn. Rumph.—
    H. Fomes, Willd.; —Buch.; —DC. l. c.—Balanopteris minor, Gärtn. fr.
    2, t. 98, f. 2.) AND Soondree. L. 5 Soonderbuns. Fl. small, dull orange, March and April; fr. Sept. and Oct. Used in Calcutta, &c., for fire-wood.
  - littoralis, Ait. (DC. pr. 1, p. 484; excl. syn. Rumph.—Roxb. fl. ind.
     p. 142;—W. and A. pr. 1, p. 63;—J. Grah. Cat. B. pl. p. 18.—
     Balanopteris Tothila, Gürtn. fr. 2, t. 99;—Rheed. 6, t. 21,) 5 Mauritius, Peninsula of India. Fl. small reddish.—Introduced into H. C. G. in 1810, but had not fl. in 1814.
  - 3. macrophylla, Wall. 5 Munipore. Fl. small, yellowish, H. S. fr. 4. acuminata, Wall. 5. Hills N. E. of Bengal.

TRIPHACA, Lour.

- 1. africana, Lour. (fl. cockin. 2, p. 577;—DC. pr. 1, p. 483,) 5 Mozambique. C. S. 1838.
  - STERCULIA, L. (Schott. and Endl.)
- 1. fetida, L. (DC. pr. 1. p. 483;—Roxb. fl. ind. 3, p. 154;—W. and A. pr. 1, p. 63;—Wight. icon. 1, t. 181. and 2, t. 364;—J. Grah.

Cat. B. pl. p. 18;—Sonner. it. 2, t. 132;—Rumph. 3, p. 169, t. 107.)

GRAFICIAN Junglee-badam. L. 5. Moluccas. Both Peninsulas of India, Bengal. Fl. middle-sized, scarletish-sulphur, very fetid. March; fr. R. S.—Seeds roasted, and eaten by the Natives. (Rosb.)

#### Southwellia, Salisb. (Schott. and Endl. l. c.)

- Balanghas, Schott. and Endl. (l. c.—Sterculia Balanghas, L.;—DC. pr. 1, p. 482;—Roxb. fl. ind. 3, p. 144;—W. and A. pr. 1, p. 62;—ill. 1, t. 30;—J. Grah. Cat. B. pl. p. 17;—Rheed 1, t. 49.) China Chesnut. 5 China. Both Peninsulas of India. Fl. small, flesh-coloured, faintly fragrant, H. S.; fr. R. S. Seeds considered wholesome, and, when roasted, nearly as palatable as chesnuts. (Roxb.)
- coccinea, (Sterculia coccinea, Roxb. fl. ind. 3, p. 151;—DC. pr. p. 1, 482.)
   Silhet, Penang. Fl. largish, greenish-yellow, tinged with rose, C. S; fr. H. S.
- 3 angustifolia, (Sterculia angustifolia, Roxb. fl. ind. 3, p. 148;—DC. pr. 1. p. 482;—not Jack.) 5 Nepal, Penang. In H. C. G. fl. March. (Roxb.)
- parviflora (Sterculia parviflora, Roxb. fl. ind. 3, p. 147;—G. Don Mill. dict. 1, p. 516.)
   Tippera. Penang. In H. C. G. fl. Feb. March and April. (Roxb.)

### CAVALLIUM, Schott. and Endl. (l. c. p. 33.)

- 1. urens, Schott-and Endl. (l. c.—Sterculia urens, Rosb. Corom. 1, t. 24; —ft. ind. 3, p. 145;—DC. pr. 1, p. 483;—W. and A. pr. 1, p. 63;—J. Grah. Cat. B. pl. p. 18.) L. 5 Peninsula of India. Fl. small, greenish, C. S.; fr. H. S.—Yields a gum resembling Tragacanth. Seeds roasted and eaten by the Natives, though they are said to be cathartic.—A kind of coffee may be made of them. (Dr. Gibson.) Native guitars are made of the wood of this tree, (J. Grah.) which is soft and spongy.
  - comosum, Schott. and Endl. (l. c.;—Sterculia comosa, Wall. pl. as. rar. 2, t. 127.)
     L. 5 Amboyna. Fl small, purplish, sweet-scented. In H. C. G. Fl.?

#### HILDEGARDIA, Schott. and Endl. (l. c.)

populifolia, Schott. and Endl. (l. c.;—Sterculia populifolia, Roxb. fl. ind. 3, p. 148;—Wall. pl. as. rar. 1. t. 3;—not DC.) 5 Coromandel. Fl. large, scarlet. Introduced into H. C. G. in 1800, but had not fl. in 1814.

#### ERYTHROPSIS, Lindl. (Schott. and Endl. l. c.)

Roxburghiana, Lindl. (Sterculia colorata, Roxb. Corom. 1 t. 23;—fl. ind. 3, p. 146;—DC. pr. 1, p. 483;—W. and A. pr. 1, p. 83;—J.
 Grah. Cat. B. pl. p. 17.) L. 5 Peninsula of India, Khassya Mountains, Hurdwar. Fl. large, red, C. S.; fr. H. S.

#### FIRMIANA, Marsigli.

 platanifolia, Schott. and Endl. (Sterculia platanifolia, L. suppl. DC. pr. 1, p. 483.) 5 China, Japan—R. S. 1838. Sterculiæ not referable to Schott. and Endl. genera l. c.

- a. villosa, Roxb. (fl. ind. 3. p. 153;—DC. pr. 1. p. 483;—W. and A. pr. 1. p. 83;—J. Grah. Cat. B. pl. p. 18.) 5 Peninsula of India. Forests from Hurdwar to the Jumna. Fl. smallish, pale yellow-scarlet, March; fr. 0.
- β. guttata, Roxb. (f. ind. 3, p. 148;—DC. pr. 1, p. 482;—W. and A. pr. 1, p. 62;—Wight. ic. 2, t. 487;—J. Grah. Cat. B. pl. p. 17;—Rheed. 4, t. 61.) 5 Peninsula of India. Fl. middle-sized, yellow, inside with purple glands, Dec.; fr. June. Bark fibres tough, adapted for cordage.—The Natives of the lower coasts of Wynaad contrive to make a sort of clothing from them. (Roxb.)

γ. lanceæfolia, Roxb. (fl. ind. 3, p. 150.—S. Roxburghiana, Wall. pl. as. rar. 3, t. 262.) 5 Khassya Mountains. Fl. middle-sized, scarlet, C. S.; fr. H. S. (Roxb.)

- 8. acerifolia, Cunningh. (S. heterophylla, Cunn. MSS.;—S. diversifolia, A. 770, L. 61.

  G. Don.) 5 Fl. middle-sized, whitish-sulphur, somewhat scented like the common Primrose, H. S.; fr. 0.
- s. pallens, Wall. 5 Nepal.
  p. campanulata, 5 Khassya Mountains. Have not fl. here as yet.
- n. ornata, Wall. MSS. 5 Burma. In H. C. G.
  - C. Bombëæ (Bombaceæ, Schott. and Endl. l. c. p. 34.)

OCHROMA, Swz. (DC. pr. 1, p. 480; -Schott and Endl. l. c.)

- 1. Lagopus, Swz. (DC. l. c.) 5 Mountains of Jamaica, Portorico,, Mexico. &c. In H. C. G. fl. April; fr. C. S. (Rosb.)
- Dunio, L. (DC. pr. 1, p. 480;—Schott. and Endl. l. c.)
- 1. zibethinus, L. (DC. l. c.;—Roxb. fl. ind. 3, p. 398;—J. Grah. Cat. B. pl. p. 17;—Linn. Trans. 7. t. 14, 15 and 16.—Rumph. 1. t. 29.) Durian Tree. 5 Moluccas, Indian Archipelago. Was introduced into H. C. G. in 1809, but had not fl. in 1814.—Fl. largish, white; fr. remarkably fetid, but its taste considered delicious.—Flowering specimens of a second species have lately been sent us from Malacca, by Dr. Oxley.

Gossampinus, Buch (Scott. and Endl. l. c.)

1. Rumphii, Schott. and Endl. (l. c.—Eriodendron anfractuosum, DC. a. indicum, pr. 1, p. 479;—W. and. A. pr. 1, p. 61;—J. Grah. Cat. B. pl. p. 17;—Wight. icon. 2, t. 400.—Bombax pentandrum, L.; Roxb. fl. ind. 3, p. 165.—Ceiba pentandra, Gärtn. fr. 2, t. 133;—Rheed. 3, t. 49, 50, 51;—Rumph. 1, t. 80.) Confined Shwet Shimool, White Cotton Tree. L. 5 Moluccas, both Peninsulas of India, Bengal, (Serampore,) Hindoosthan. Fl. largish, whitish, Feb. and March; fr. April and May. The woolly cotton that envelops the seeds of this species, as well of those of the Red Cotton Tree, is much esteemed for stuffing cushions and bedding, being unfit for the loom. The wood yields a gum, which is given with spices in certain stages of bowel complaints. (Ainslie.)

BOMBAX, L. (Schott. and Endl. l. c.)

Ceiba, L. (DC. pr. 1, p. 478;—Rozb. H. B. p. 50;—J. Grah. Cat. B. pl. p. 17.)
 L. 5 Jamaica, &c. Was introduced into H. C. G. in 1808, but had not fl. in 1814.—In the W. Indies its immense trunk is commonly scooped out and converted into canoes.—Juice of the root aperient; bark emetic.

Adansonia, L. (DC. pr. 1, p. 478; ... Schott. and Endl. o. c. p. 36.)

1. digitata, L. (DC. l. c.;-W. and A. o. c. p. 61;-Roxb. fl. ind. 3, p. 164; -J. Grah. Cat. B. pl. p. 16; -B. M. 55, t. 2791-2.) Baobab or Monkey-Bread Tree. L. 5 Senegal. Cultivated in India at Samulcotta, Madras, Negapatam, Bombay, Guzerat, &c. Fl. very large, white, May and June; fr. C. S.—The largest tree in the world in the diameter of its trunk, which is sometimes 30 feet. Its height is not in " It is emollient and mucilaginous in all its parts. The proportion. leaves dried and reduced to powder constitute Lalo, a favorite article with the Africans, which they mix daily with their food, for the purpose of diminishing the excessive perspiration to which they are subject in those climates, and even Europeans find it serviceable in cases of diarrhoea, fevers and other maladies. The fruit is perhaps the most useful part of the tree. Its pulp is slightly acid and agreeable, and frequently eaten; while the juice is expressed from it, mixed with sugar, and constitutes a drink, which is valued as a specific in putrid and pestilential fevers." (Hook; B. M. l. c.) The dried pulp is mixed with water, and administered, in Egypt, in dysentery. (Delile.) Along the sea-coast of Guzerat, the fishermen use the large fruit as a float for their nets. It is also used medicinally by the Natives, who, like the Africans, esteem it cooling. The leaves are eaten with their food, and are said to restrain excessive perspiration. (J. Grah. l. c.)

ORDER LXX.-MALVACEÆ, Juss.-Lindl. Nat. Syst. p. 95.

#### THE MALLOW TRIBE.

Herbs, undershrubs, shrubs, rarely climbers, and trees, referred to 36-37 genera. Of species, DC. pr. and Spreng. syst. assign about 260 to S. America, Mexico and the W. Indies; 50 to Europe; 24 to Bourbon and Mauritius; 16 to N. America; 12 to N. Africa; 12 to New Holland and the South Sea Islands; 8 to China; 7 to tropical Africa; 6 to the Levant; 4 to Timor; 4 to the Canaries; 3 to Madagascar; 5 to Arabia; 1 to Persia; 1 to Siberia; and 1 to Caucasus. Forty have been found in S. Africa; (Harvey) and, judging from our materials, 130 in the E. Indies, viz. 9 of Malva; 1 of Althea; 10 of Urena; 4 of Pavonia; 2 of Lebretonia; 30 of Hibiscus; 3 of Paritium; 2 of Decaschistia; 14 of Abelmoschus; 3 of Thespesia; 5 of Gossypium; 2 of Lagunea; 11 of Abutilon; and 34 From these must, however, be deducted 12-41 species, common of Sida. to other parts of the world. As in Sterculiacese, by far the greater part of the order is tropical, a few species only extending to the slope of the Himalayahs.

"The uniform character of this tribe is to abound in mucilage, and to be totally destitute of all unwholesome qualities." (*Lindl.*) The peculiar properties are noticed under the several species.

MALVA, L. (DC. pr. 1, p. 480;—W. and A. pr. 1, p. 45.)

- 1. americana, L. (DC. l. c.) © St. Domingo. Fl. small, yellow, Feb. and March; fr. April. Domesticated about Serampore.
- polystachya, Cav. (DC. pr. 1, p. 430.)
   Peru. Has been introduced into H. C. G. Fl.?
- hispanica, L. (DC. pr. 1, p. 431.) ⊙ Spain, Barbary. Fl. small, flesh-coloured, C. S.; fr. March.

- stipulacea, Cav. (DC. l. c.) ⊙ Spain. Fl. smallish, purple, C. S.;
   fr. March.

    - populifolium, G. Don. (Mill. dict. 1, p. 503;—A. indicum. β W. and A. pr. 1, p. 56.—Sida populifolia, Lam;—DC. pr. 1, p. 470;—Roxb. fl. ind. 3, p. 179;—Rheed. 6, t. 45;—Rumph. 4, t. 11.) σ. 4.
       Fl. largish, orange, R. and C. S.; fr. C. S. Moluccas, Peninsula of India, Bengal, (Serampore.)
    - 6. asiaticum, G. Don. (W. and A. pr. 1, p. 56;—J. Grah. Cat. B. pl. p. 15.—Sida asiatica, L.;—DC. pr. 1, p. 470;—Rosb. fl. ind. 3, p. 179.) of Peninsula of India, Bengal, (Serampore.) (PIRIA) Petaree. Fl. largish, orange, R. and C. S.; fr. C. S.

The three last species contain a great deal of mucilage, and are on that account used in the same manner here, as the Mallows and Marsh-mallows in Europe.

- 7. graveolens, W. and A. (pr. 1, p. 56;—J. Grah. Cat. B. pl. p. 15.—Sida graveolens, Roxb. fl. ind. 3, p. 179;—DC. pr. 1, p. 473;—Rumph. 4, p. 29, t. 10.) 本版的 Bura-kungi. 4. Moluccas. Both Peninsulas of India, Bengal, Hindoosthan. Fl. large, deep orange, C. S.; fr. H. S.
- 8. tomentosum, W. and A. (pr. 1, p. 56.—Sida tomentosa, Roxb. fl. ind. 3, p. 178.) ⊙ Peninsula of India, Bengal. Fl. large, light orange, R. and C. S.; fr. C. S.
- Avicenna, Gärtn. (fr. 2, t. 135, f. 1.—Sida Abutilon, L;—DC. pr. 1, p. 470;—Rosb, fl. ind. 3, p. 178. excl. syn. Rumph.) ⊙ S. France, Switzerland, Siberia, N. China. Fl. largish, light orange, R. S.; fr. C. S.—Said to be cultivated in the North of China, as a substitute for hemp and flax, (Rosb.)

- auritum (Sida aurita, Wall. Cat.;—DC. pr. 1, p. 468;—B. M. 51 2495.) 5 Java. Fl. largish, deep orange, and fr. whole year.
- molle, G. Don. (Mill. dict. 1, p. 503.—Sida mollis, Ort.;—DC. pr. 1, p. 470.—S. grandifolia, Willd.;—B. Reg. 5, t. 360.)
   Peru. Fl. large, yellow, and fr. throughout the year.
- 12. striatum, Dicks. (B. M. 67, 3840.) 5 Brazil. Fl. C. S. 1841.

# LAGUNEA, Cav. (DC. pr. 1, p. 474; -W. and A. pr. 1, p. 55.)

lobata, Willd. (DC. l. c.;—W. and A. l. c.—Solandra lobata, Murr.;
—Lam. ill. t. 580.—Triguera acerifolia, Cav. diss. 1, t. 11.) ⊙ Dindygul, Ginghie, Monghir. Fl. white, smallish. In. H. C. G. fl. R. S.; fr. C. S. (Rosb.) As this genus only differs from Hibiscus by the total absence of an involucel, it is rather singular to observe Hibiscus Solandra, Roxb. fl. ind. 3, p. 197, and H. pumilus, Roxb. o. c. p. 203, quoted, (in W. and A. pr. add. and corrig. p. 448,) as synonymes of Lagunea lobata, Willd.; Roxburgh saying of the former, "exterior calyx minute or wanting," and of the latter "exterior calyx minute and from 6-9 parted." Perhaps the genus Lagunea, has been formed from specimens, in which the involucel had dropped off.

# Anoda, Cav. (DC. pr. 1, p. 458.)

- hastata, Cav. (DC. o. c.) ⊙ Mexico. Fl. largish, light blue, C. S.;
   fr. Feb. and March.
- Dilleniana, Cav. (DC. l. c.—Sida cristata, Curt.;—B. M. 10, t. 330, excl. syn.) 

   Mexico. Fl. large, deep-rose coloured, C. S.; fr. Feb. and March.
- triangularis, DC. (pr. 1, p. 459.—Sida deltoidea, Horn.) ⊙ Mexico.
   Fl. largish, light-blue, C. S.; fr. Feb. and March.
- 4. acerifolia, DC. (l. c.—Sida hastata, Sims;—B. M. 37, t. 1541. excl. syn.) ⊙ Mexico. Fl. largish, pale-blue, C. S.; fr. Feb. and March. Pavonia, Cav. (DC. pr. 1, p. 442;—W. and A. pr. 1, p. 47.)
  - 1. Columella, Cav. (DC. o. c. p. 443.) 5 Bourbon. Fl. largish, white-purplish, C. S.; fr. March.
  - odorata, Willd. (DC. pr. 1, p. 444;—Roxb. fl. ind. 3, p. 214;—W. and A. pr. 1, p. 47.—P. sidoïdes, Horn.;—DC. l. c.)
     Q. Gingie, Dindygul, Vendaloore. Fl. middle-sized, rose-coloured, and fr. the whole year. An infusion of the roots is prescribed as a diet-drink in fevers. (Wight.)
  - 3. roses, Wall. Cat. 5 Burma. Fl. middle-sized, rose-coloured, and fr. the whole year.
  - 4. zeylanica, Cav. (DC. pr. 1, p. 444;—Roxb. fl. ind. 3, p. 214;—W. and A. pr. 1, p. 47;—J. Grah. Cat. B. pl. p. 246.—Hibiscus zeylanicus, L.;—Burm. ind. t. 48, f. 3.) ⊙ Ceylon, Trichinopoly. Fl. middle-sized, whitish, R. S.; fr. C. S.
- ACHANIA, Swz. (Malvaviscus, DC. pr. 1, p. 445.)
  - 1. Malvaviscus, Swz. (B. M. 49, t. 2305.—Malvaviscus arboreus Cav.;

- —DC. l. c.) 5 Jamaica, N. Granada, Mexico. Fl. largish, crimson, C. S; fr. H. S.
- 2. pilosa, Swz. (Malvaviscus pilosus, DC. pr. 1, p. 445.) 5 Jamaica. Fl. largish, crimsonish, C. S; fr. H. S.

# Hibiscus, L. (W. and A. pr. 1, p. 47.)

- vesicarius, Cav. (DC. pr. 1, p. 453;—W. and A. l. c.;—J. Grah.
   Cat. B. pl. p. 13.) ⊙ C. G. H. Peninsula of India. Fl. large, cream-coloured, with a dark-purple eye, C. S; fr. Feb. and March.
- Trionum, L. (DC. l. c.;—B. M. 6, t. 209;—Roxb. H. B. p. 52.) ⊙ Italy.
   Carniolia. C. G. H. Cuddapah in the Peninsula of India. Fl. like those of No. 1, C. S.; fr. Feb.
- surrattensis, L. (DC. pr. 1, p. 449;—Roxb. fl. ind. 3. p. 205;—W. and A. pr. 1, p. 48;—J. Grah. Cat. B. pl. p. 13;—B. M. 33, t. 1356;—Wight. icon. 1, t. 197;—Rheed. 6, t. 44;—Rumph 4, t. 16.) 4. Moluccas. Both Peninsulas of India. Fl. large, pale sulphur, with a dark-purple eye, R. and C. S.; fr. Feb. and March.
- 4. furcatus, Roxb. (fl. ind. 3, p. 204;—DC. pr. 1, p. 449;—W. and A. pr. 1, p. 48;—J. Grah. Cat. B. pl. p. 246.) 5. Ghauts. Interior of Bengal. Fl. large, pale sulphur, with a dark purple eye, R. S.; fr. C. S.—Yields an abundance of strong, white, flaxy fibres, but being very prickly, it is unfit for handling. (Roxb.)
- bifurcatus, Cav. (DC. pr. 1, p. 449;—Rosb. H. B. p. 51.)
   Porto-Rico, Brazil. Fl. large, purplish, (DC.)
   In H. C. G. fl. R. S.; fr. C. S. (Rosb.)

#### ORDER LXXI.—ELÆOCARPACEÆ, Lindl. Nat. Syst. p. 97.

Trees or shrubs, referred to 9 genera including 65 species: 5 from S. America; 2 from New Zealand; 2 from New Holland; 1 from Mauritius, and 55 from the E. Indies. Of the latter, 40 belong to Eleocarpus, which, however, upon a strict revision of authentic species, will, no doubt, be somewhat reduced; 11 to Monocera; 2 to Ganitrus; and 1 to Acronodia. 2-3 are natives of Cochin-China; 2 of the Moluccas; 1 of Luzon; 7 of the Khassya mountains and Assam; 11 of Java; and the rest of the two Peninsulas of India. Properties but little known.

A synopsis of some of the Indian species will be found in Wight's ill. 1, p. 83-84.

MONOCERA, Jack. (W. and A. pr. 1, p. 83.)

- rugosa, Wight. (ill. 1, p. 83;—icon. 1, t. 61.—Elseocarpus rugosus.
   Roxb. fl. ind. 2, p. 596.)
   L. 5 Assam, Chittagong. Fl. large white,
   In H. C. G. fl. fr. Feb. and March; fr. June and July. (Roxb.)
- Roxburghii, Wight. (ill. 1, p. 83;—icon. 1, t. 63.—Elæocarpus aristatus, Roxb. fl. ind. 2, p. 599.)
   L. 5 Khassya Mountains. Fl.

middle-sized, yellow, fragrant. In H. C. G. fl. April; fr. August.

GANITRUS, Rumph. (Gärtn. fr. 2, p. 271.)

- 1. sphæricus, Gärtn. (o. c. t. 139; Wight. ill. 1, p. 83; -icon. 1, t. 66, -Elæocarpus Ganitrus, Rosb. fl. ind. 2, p. 592; -J. Grah. Cat. B. pl. p. 22; Remph. 3, t. 101.) L. 5 Moluccas, Assam, Khassya and Morung Mountains, Nepal. Fl. middle-sized, white. In H. C. G. fl. Feb. and March; fr. Nov. (Roxb.) The hard, dry, deeply grooved and elegantly sculptured seeds are frequently worn as beads by Brahmins and Fakeers, and set in gold, are sometimes even sold as ornaments in England. (Royle.)
- LELEGCARPUS, L. (W. and A. pr. 1, p. 82.)

  1. prinodes (E. serratus, Rosb. fl. ind. 2, p. 596, not L.;—W. and A. l. c. annot.) un file Julpai. 5 Assam, Khassya Mountains, Kamaon. Fl. small, white, H. S.; fr. R. S. Fruit eaten by the Natives in their curries, or pickled. No oil can be extracted from them. (Rozb.)
  - 2. lanceæfolius Roxb. (fl. ind. 3, p. 598;—Wight. icon. 1, t. 65.) 5 Khassya Mountains, Assam. Fl. small, white. In H. C. G. fl. June and July; fr. Sept. and Oct. (Rosb.) Seeds used like those of Ganitrus sphæricus. (Royle.)
  - 3. robustus, Roxb. (fl. ind. 2, p. 597; Wight. icon. 1, t. 64.) L. 5 Khassya Mountains. Fl. largish, white, fragrant, June and July; fr. Sept. and Oct.
  - 4. lucidus, Roxb. (A. ind. 2, p. 600.) 5 Chittagong. Introduced into H. C. G. in 1810, but had not fl. in 1814.
  - 5. longifolius, Bl. (Spreng. c. p. p. 189.) 5 Java. Banks of the Saluen. Introduced in 1839. Has not fl.
  - 6. integrifolius, Lam. (DC. pr. 1, p. 519.) 5 Mauritius. Has been introduced into H. C. G. Fl.?
  - \* Monocera toberculata, W. and A.; Wight. ill. 1, t. 35. 5 Travancore. Neelgherry, -M. Griffithii, Wight. 5 Mergui. -M. ferruginea Wight. 5 Neelgherry .- M. Munronii, Wight. 5 Coorg .- M. petiolata, Jack. 5 Penang.—Elwocarpus serratus, L. 5 Travancore,—E. cuneatus, Wight. 5 Malabar, Quilon, Ceylon.

ORDER. LXXII.—DIPTEROCARPACEÆ, (DIPTERACEÆ, Lindl. Nat. Syst. p. 98.)

#### THE CAMPHOR TREE TRIBE.

Generally large trees, arranged in 5 genera comprising 32 species: 2 for Sierra Leona; (Lophira); and the rest E. Indian, viz. 11 of Dipterocarpus; 10 of *Hopea*; 5 of *Vatica*; and 4 of *Vateria*. Besida these, Blume has three species for Java, probably belonging to Dipterocarpus. Roxburgh's Hopea eglandulosa, constitutes a new genus, to be referred probably to Euphorbiaceæ or its neighbourhood. More than 2-3ds. of the species inhabit mountainous or hilly parts of the two Indian Peninsulas.

Almost every species of this order abounds in a balsamic resinous juice, well known under the common English names of Dammer and Wood-oil, according to its hardening or continuing liquid, when exposed to the air. That drawn from the Vaticas and Vaterias hardens and forms Dammer and Piney; that from the Dipterocarpi retains its fluidity, and is the Wood-oil of the bazars. Some of the species produce a fragrant resin, which is burnt in the temples as incense. Dammer is used in India for most of the purposes to which pitch and rosin are applied in Europe. Wood-oil either alone, or thickened with Dammer, supplies a useful varnish for wood, possessing the valuable property of repelling, for a long time, the attacks of white ants, as well as of resisting the influence of the climate. (Wight.)

VATERIA, L. (W. and A. pr. 1, p. 88.)

indica, L. (W. and A. l. c.; —Wight ill. 1, t. 36; —Rowb. Corom. 3, t. 288; fl. ind. 2, p. 602; —J. Grah. Cat. B. pl. p. 22. Eleocarpus copalliferus, Rets.; —Rheed. 4, t. 15.) Piney Varnish tree. L. 5 Malabar. Fl. middle-sized, white. In H. C. G. fl. H. S.; fr. Aug. (Rosb.)

Vateria indica produces the resin called in India, Copal, (in England known by the name of Gum Anime) as very nearly approaching the true resin of that name. (Lindl.) When recent, it is found from pale green to a deeper amber colour, with all the intermediate shades. In some parts of India, béads are made of such pieces as most resemble Amber beads, even to being electrical, when excited by rubbing. (Rosb.) The resin is procured by cutting a notch in the tree, sloping inwards and downwards. This is soon filled with the juice, which in a short time hardens by exposure to the air. When used as a varnish (Piney Varnish), the usual practice is to apply the balsam, before it has become hard; but when this cannot be procured, the resin melted by a slow fire and mixed with boiling Linseed-oil forms a varnish, which answers equally well for most purposes. The resin is on the Malabar-coast also made into candles. While burning, these diffuse an agreeable fragrance, give a fine clear light with little amoke, and consume the wick so as not to require snuffing. (Wight.)

lanceæfolia, Roxb. (fl. ind. 2, p. 601; — Wight ill. 1, p. 88.)
 sam, Khassya Mountains. Fl. largish, white, fragrant. In H. C. G. fl. April and May; fr. July and Aug. (Roxb.) This tree yields a resin like that of No. 1, from which the Indians prepare one of the materials of their religious oblations. (As. Res. 12, p. 539.)

VATICA, L. (W. and A. pr. 1, p. 84.—Shorea, (Roxb.)

1. robusta, W. and A. (Shorea robusta, Rosb. fl. ind. 2, p. 615;—Corom. 3, t. 212.) সাৰ Sal. L. 5 Morung, Nepal. Extends more nor-

therly than any other of the order, being found all along the Himalaya, to the neighbourhood of the Jumna, forming vast forests, frequently unmixed with any other tree, but generally confined in the most northern parts within the first range of the hills, (Royle). Fl. middle-sized, yellowish-white, fragrant, April and May; fr. R. S. It affords the best and most extensively used timber in India; the goodness of which must depend in a great measure on the resin, (called ral in the northern, and dhoona in the southern provinces) which it contains. (Royle.)

- 2. Tumbuggaia, W. and A. (pr. 1, p. 84;—Wight icon. 1, t. 27.—Shorea Tumbuggaia, Rosb. H. B. p. 42;—fl. ind. 2, p. 617.) 5 Paulghat Mountains. Fl. middle-sized. Introduced into H. C. G., before 1814. Fl.?
- DIPTEROCARPUS, Gärtn. (W. and A. pr. 1, p. 84.)

ζ,

- 1. levis, Buch (W. and A. o. c. p. 85.—Dipterocarpus turbinatus, Rosh. Corom. 3, t. 213;—ft. ind. 2, p. 612.) L. 5 Tippera, Ava. Fl. large white, tinged with red. In H. C. G. fl. March; fr. May and June, Yields an abundance of Wood-oil. A large notch is cut into the trunk of the tree, near the ground, where a fire is kept up, till the wound is charred, soon after which the balsam begins to ooze out: the average produce of the best trees during the season, is said to be sometimes 40 gallons. It is found necessary, every three or four weeks, to cut off the old charred places and burn them again. In large healthy trees, abounding in balsam, they even cut a second notch in some other part of the tree and char it as the first. These operations are performed during the months of November, December, January and February. Should any of the trees appear sickly the following season, one or several years respite is given them. (Rosh.)
- 2. angustifolius, W. and A. (pr. 1, p. 84. annot.—Dipterocarpus costatus, Rosb. fl. ind. p. 613, not Gärtn.) L. 5 Chittagong. In H. C. G. fl. C. S; fr. April and May. (Rosb.) Next to the following species, it furnishes the largest quantity of Wood-oil.
- 3. incanus, Roxb. (A. ind. 2, p, 614.) L. 5 Chittagong. In H. C. G. fl. Nov. and Dec.; fr. April. (Roxb.)
- 4. alatus, Roxb. (fl. ind. 2, p. 614.) L. 5 Pegu, Mascal Islands. Introduced into H. C. G. in 1809. Here the tree has not fl., though cultivated for more than fourteen years.

HOPEA, Roxb. (W. and A. pr. 1, p. 85.)

- odorata, Roxb. (fl. ind. 2, p. 609.)
   Chittagong, Pegu. Fl. small, pale-yellow, fragrant.
   In H. C. G. fl. April and May; fr. R. S. (Rosb.)
- 2. faginea Wall Cat. Penang. Introduced in 1840.

Leona.

ORDER. LXXIII.-TILIACEÆ, Juss. Lindl. Nat. Syst. p. 99.

#### THE LINDEN TRIBE.

Trees, shrubs, seldom undershrubs or herbs, referred by Lindl. to 29 genera, from which must be deducted Vatica. As to species, DC. pr. and Spreng. syst. enumerate 53 from S. America, Mexico, and the W. Indies; 8 from tropical Africa; 6 from Europe; 5 from Japan; 4 from N. America; 4 from Arabia; 2 from the Society Islands; 2 from Mauritius; 1 from China; 1 from Madagascar, and 1 from New Zealand. To these Wall. Cat. adds 1 from St. Helena, and 1 from Zanzebar. Six forms have been discovered in S. Africa (Harvey); and 82 in the E. Indies, viz. 53 of Grewia; 12 of Triumfetta; 8 of Corchorus; 3 of Columbia; 1 of Diplophractum; 1 of Neesia; 1 of Porpa; 1 of Espera; (Spreng.) 1 of Berrya; and 1 of Brownlowia. With the exception of a few Nepalese species, the order is in India confined to the tropics.

General properties mucilaginous and emollient; special ones noticed under the different species.

CORCHORUS, L. (DC. pr. 1, p. 504;—W. and A. pr. 1, p. 72.)

- 1. fascicularis, Lam. (DC. pr. 1, p. 505;—W. and A. l. c.;—Roxb. f. ind. 2, p. 582.) स्मान शांहे Junglee-pat. दिन सामिन Bil-nalita. © Peninsula of India, Bengal, (Serampore,) extending up to the arid region on the western banks of the Jumna. Fl. small, yellow, R. and C. S.; fr. C. S.

# ORDER LXXIV.—LYTHRACEÆ,—Lindl. Nat. Syst. p. 100.

#### THE LOOSESTRIFE TRIBE.

Herbs, undershrubs, seldomer shrubs or trees, referred to 27 genera. Of species, DC. (1828) enumerates about 105 for S. America, Mexico and the W. Indies; 10 for Europe; 7 for N. America; 4 for N. Africa; 4 for Senegal; 1 for Iberia; 1 for Caucasus; 1 for Timor; 1 for Mauritius; 1 for China; and 1 for New Holland. In South Africa have been found 3 species, (Harvey); and in the E. Indies 32: 3 of Rotala; 1 of Symmetria; 2 of Cryptotheca; 4 of Ameletia; 7 of Ammannia; 1 of Lythrum; (Cashmere); 1 of Fatioa; (Lagerströmia parviflora?) (Royle); 1 of Pemphis; 1 of Nesæa, (Wight); 1 of Lawsonia; 1-2 of Grislea; 8 of Lagerströmia; and 1 of Duabanga. Five of these have also been found in other parts of the world. Most of them are tropical, only 4 extending to the foot of the Himalayas, in the Deyra Dhoon.—Properties unimportant. Rotala, L. (Wight. ill. 1, p. 205-6.)

1. Roxburghiana, Wight. (ill. 1, p. 206; icon. 1 t. 260. A.—Ammannia pentandra, Roxb. fl. ind. 1, p. 427; ed. Carey, 1, p. 448;—DC. pr. 3, p. 79;—W. and A. pr. 1, p. 305.) ⊙ Peninsula of India, Bengal, (Serampore,) Nepal. Fl. minute, red; and fr. R. S.

ORDER LXXV.—MELIACEÆ, Juss.—Lindl. Nat. Syst. p. 101.

#### THE BEAD-TREE TRIBE.

Trees or shrubs, by Lindl. referred to 35 genera, (adding Munronia and Monocyclis, and deducting Aitonia, which Harvey places among Zygophyllaceæ.) Of their species, DC. pr. and Spreng. syst. enumerate 22 for S. America, Mexico and the W. Indies: 1 for tropical Africa; 5 for Madagascar; 5 for Mauritius; 1 for Arabia; 1 for China; and 3 for New Holland and the South Sea Islands. To these Lindl. adds an Hartighsea for N. Zealand. S. Africa exhibits 3 species, (*Harvey*); and the E. Indies

72; viz., 5 of Turræa; 1 of Naregamia; 4 of Munronia; 4-5 of Melia; 1 of Azadirachta; 2 of Mallea; 1 of Cipadessa; 5 of Amoora; 3 of Milnea; 4 of Walsura; 1 of Monocyclis; 2 of Sphærosacme; 10 of Dysoxylum; 1 of Chisocheton; 2 of Hartighsea; 6 of Epicharis; 1 of Didymocheton; 1 of Gonocheton; 1 of Sandoricum; 1 of Lansium; 5 of Heynia; 2 of Xylocarpus; 1 of Calpandria; and 7 of Aglaia. Twenty-four of these inhabit Java; 4 the Moluccas; 4 Assam; 4 the Khassya Mountains; 4 Nepal; and the rest the two Peninsulas of India, Ceylon, Sumatra, and Bengal.

"Bitter, astringent, and tonic qualities belong to the species of this order, but often developed in so considerable a degree as to render their employment dangerous, without much precaution." (Lindl.) The latter is however, not the case with our Indian Meliacese, unless f. ex. the Neembark and fruit are taken in an immoderate dose.

Quivisia, Juss. (DC. pr. 1, p. 620.)

- 1. heterophylla, Cav. (Diss. 7, p. 368. t. 213;—DC. o. c. p. 621.) 5

Fl. small, greenish-white, honeyscented, March and April; fr. Dec. and Jan. Fruit of this larger, and not so rounded as that of No. 2.
  - robusta, Roxb. (fl. ind. 2, p. 397;—W. and A. l. c.; not Willd.)
     Mysore, Concan.
  - 3. Azedarach, L. (DC. pr. 1, p. 621;—Roxb. fl. ind. 2, p. 395;—W. and A. pr. 1, p. 117;—J. Grah. Cat. B. pl. p. 30;—B. M. 27, t. 1066;—Wight. icon. 1, t. 160.) Common Bead-tree. Persian Lilac. L. b Syria, China, N. India. Common about villages both in the Concan and Deccan. Fl. smallish, white, externally lilac at the top, fragrant, March; fr. Nov. and Dec.—Cultivated in Provence and in our gardens.—Root bitter, nauseous, used in N. America as anthelmintic. (A. Richard.)
  - 4. Bukayun, Royle. (ill. p. 141.—Melia sempervirens, Roxb. fl. ind. 2, p. 395;—W. and A. pr. 1, p. 117; Swz.?) atama Bukarjun. Hind, Bukayun. 5 Persia, Nepal, Kemaon. Cultivated in our gardens. Fl. smallish, lilac, fragrant; and fr. the whole year.

AZADIRACHTA, Ad. Juss. (W. and A. pr. 1, p. 117.)

1. indica, Ad. Juss. (W. and A. o. c. p. 118;—J. Grah. Cat. B. pl. p. 30;—Wight. icon. 1, t. 17.—Melia Azadirachta, L.;—DC. pr. 1, p. 622;—Rozb. fl. ind. 2, p. 394;—Burm. zeyl. t. 15;—Rheed 4, t. 52.) 阿斯 Nim. 5 Ceylon, Peninsula of India, Ava, Bengal, (Serampore,)

Hindoosthan, Assam. Fl. small, white, honey-scented, Feb. and March; fr. May and June. Bark used as a good substitute for Peruvian bark. . Leaves, especially mixed with equal parts of those of Vitex Negundo, L. are used successfully in various ways. The mixed, dried leaves, added to common poultices, act powerfully in preventing glandular tumors from coming to maturity. The same discutient effect is produced, after the application of leeches, in all kinds of bruises and sprains, by a watery or vinous infusion of them, particularly when spirit of camphor is now and then sprinkled over the cloth, steeped in the infusion. We have seen the greatest benefit from this application, in the worst cases of compound fracture. A sacculus aromaticus of these leaves, with a few grains of powdered camphor, seldom fail to afford relief in rheumatic affections of the ears, eyes, and teeth. From the fruit a bitter oil is expressed, which is used against worms, and that, according to Dr. Buchanan, in doses of one ounce. This, Achil. Richard observes, is another instance, after the Olive, of the pericarp (pulp) yielding that subtance which is usually obtained from the seed. The seeds after being skinned are used for killing insects, and the kernels, powdered and mixed with water, for washing the hair. Timber hard, durable, fit for ship-building-"Leaves beaten into a pulp, and thus externally applied, act like a charm in removing the most intractable forms of psora, and other pustular eruptions." (Wight.)

MALLEA, Ad. Juss. (W. and A. pr. 1, p. 118.)

- Rothii, (W. and A. l. c.; J. Grah. Cat. B. pl. p. 31.—Melia baccifera, Roth.; DC. pr. 1. p. 622.—Ekebergia indica, Roxb. fl. ind 2, p. 392.) 5 Circars, Katruj Ghaut, near Poona. Fl. small, white; and fr. the whole year.

ORDER LXXVI.—CEDRELACEÆ, Ad. Juss. Lindl. Nat. Syst. p. 103.

#### THE TOON-TREE TRIBE.

Large trees, of 9-10 genera comprising about 16-18 species: 5 from South America, Mexico and the W. Indies; 2 from New Holland; 1 from Senegal, and 8-10 from the E. Indies. Of the latter, 1 belongs to Soymida; 1 to Chikrassia; 1 to Chloroxylon; 1 to Flindersia; 4-5 to Cedrela; and 1 to Ixionanthes, which, perhaps does not belong to the order. Properties under the species.

SWIRTENIA, L. Ad. Juss.

- 1. Mahagoni, L. (DC. pr. 1, p. 625;—Cav, diss. 7, p. 365, t. 209;—Roxb. H. B. p. 33.) Mahagoni Tree. L. 5 Rocky places in the hotter parts of America. Fl. very small, pale greenish-white, April; fr. 0.—Bark accounted febrifugal.
- SOYMIDA, Ad. Juse. (W. and A. pr. 1, p. 122.)
- 1. febrifuga, Ad. Juss. (W. and A. l. c.—Swietenia febrifuga, Roxb. Corom. 1, t. 17; fl. ind. 2, p. 398;—DC. pr. 1, p. 625;—J. Grah. Cat. B. pl. p. 32.) AN Rohuna. Red-Wood tree. L. 5 Central and Southern Provinces of India. In considerable abundance in various parts of Guzerat; also at the Sindwah Ghaut, and in the Adjunta and Jowar jungles. Fl. smallish, greenish-white, March and April; fr. July and Aug. The Rohuna Bark is a useful tonic in intermittent fevers, where quinine cannot be had.

CHICKRASSIA, Ad. Juss. (W. and A. pr. 1, p. 122.)

- 1. tabularis, Ad. Juss. (W. and A. o. c. p. 123;—Wight ill. 1, t. 76.—Swietenia Chickrassa, Rosb. fl. ind, 2. p. 399;) For Chikrasee, L. 5 Chittagong. Cunnawady Hills, near Dindygul. Fl. middle-sized, greenish-white. In H. C. G.: fl. H. S.; fr. C. S. The wood of this tree, (Chittagong Wood,) is close-grained, light-coloured, elegantly veined, and employed by the cabinet-makers. (Rosb.)
- CHLOROXYLOW, DC. (pr. 1, p. 625;—W. and A. pr. 1, p. 123.)
  - Swietenia, DC. (l. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 32.—Swietenia Chloroxylon, Rosb. Corom. 1, t. 64; fl. ind. 2, p. 400.) Satin-Wood tree. 5 Circars, about the falls of Gokauk, on sandstone hills, Alleh Belah Hills. Fl. small, greeniah-white, March and April; fr. C. S. Wood, close-grained, yellow-coloured, like the box. One of the trees that yield wood-oil.
- FLINDERSIA, R. Br. (DC. pr. 1, p. 125; -- Spreng. syst. 1, p. 520. No. 889.)
  - 1. amboinensis, Poir. (DC. l. c.; —Spreng. syst. 1, p. 794; —Rumph. 3, t. 129.) 5 Moluccas. In H. C. G. Fl.?
  - 2. australis, R. Br. (DC. l.c.) 5 N. Holland. In H. C. G. Fl.?
  - CEDRELA, L. (DC. pr. 1, p. 624; -W. and A. pr. 1, p. 123.)
    - 1. Toona, Roxb. (Corom. 3, t. 238; fl. ind. 1, p. 635;—ed. Carey, 2, p. 423;—DC. l. c.;—W. and A. o. c. p. 124;—Wight icon. 1, t, 161.

      —C. hexandra, Wall. in Roxb. o. c. annot.;—Rumph. 3, t. 39.) Toon. L. 5 Peninsula of India, Bengal, (Scrampore.) Foot of the Himalayas. Fl. small, whitish, honey-scented, May and June; fr. R. S. Wood forms the Mahogany of India, though it is lighter and more loose-textured than Mahogany. Bark accounted febrifugal.
    - \* Khaya senegalensis, Ad. Juss. 5 Senegal.—Cedrela serrata, Royle; ill. t. 25. 5 Valleys of the Himalaya.—C. odorata, L. 5 W. Indies.—C. angustifolia, Moç. and Sessé. 5 N. Spain.—Oxleya santhoxyla, Cunningh. 5 N. S. Wales.

ORDER LXXVII.—HUMIRIACEÆ,—Ad. Juss. Lindl. Nat. Syst. p. 104.

"All Brazilian trees." (Lindl.)

\* Helleria obovata, Mart.—Humirium crassifolium, Mart.—H. floribundum, Mart. The latter, "when the trunk is wounded, yields a fragrant, liquid, yellow balsam, called Balsam of Umiri, resembling in properties Copaiva and Balsam of Peru." (Martius.)

# ORDER LXXVIII.—CITRACEÆ.—(AURANTIACEÆ, CORR. Lindl. Nat. Syst. p. 105.)

#### THE CITRON TRIBE.

Trees or shrubs, comprehended in 18 genera. Of the species, 2 have been found in the South Sea Islands; 5 in China; 1 in Timor; 1 in Mauritius; 1 in Madagascar; 2 in Japan; 1 in Florida; 2 in S. America; and 74 in the E. Indies. Of the latter, 5 belong to Atalantia; 1 to Triphasia; 11 to Limonia; 11 to Glycosmis; 11 to Sclerostylis; 1 to Bergera; 3 to Murraya; 4-5 to Cookia; 8-9 to Clausena; 1-2 to Micromelum; 1-2 to Paramignya; 2 to Luvunga; 1 to Polycyema; 1 to Feronia; 1 to Ægle; 9 to Citrus, and 1 to Chionotria. Several species of the order will, however, require a thorough re-examination from authentic specimens. With the exception of Limonia Laureola, Wall., and L. retusa, D. Don, (Nepalese plants,) all the Indian species are tropical

The wood of the species of this order is universally hard and compact. They abound in a volatile, fragrant, bitter, exciting oil. The pulp of the fruit is always more or less acid, (DC.)

A. LIMONEE, W. and A. pr. 1, p. 90.

ATALANTIA, COIT. (DC. pr. 1, p. 535;—W. and A. pr. 1, p. 90.)

- 1. monophylla, DC. (l. c.;—W. and A. o. c. p. 91;—J. Grah. Cat. B. pl. p. 23.—Limonia monophylla, L.;—Roxb. Corom. 1, t. 82; fl. ind. 2, p. 378.—Turræa virens, Kön; not L.—Trichilia? spinosa, Willd.;—DC. pr. 1, p. 623.—Limonia pumila, Burm. zeyl. t. 65, f. 1;—Rheed. 4, t. 12.) 5 Coromandel. Common on the Ghauts, at Sidney Point, Mahableshwur. Fl. small, white, Oct. and Nov.; fr. Feb.
- 2. ? pubigera, Wall. 5 Assam. Introduced in 1839, has not fl. TRIPHASIA, LOUI. (DC. pr. 1, p. 535;—W. and A. pr. 1, p. 91.)
- 1. trifoliata, DC. (o. c. p. 536; —W. and A. l. c.; —J. Grah. Cat. B. pl. p. 23.—T. Aurantiola, Lour.; —Roxb. H. B. p. 25.—Limonia trifoliata, L.; —Burm. ind. t. 35, f. 1; —Jacq. icon. rar. 3, t. 463.—L.? discantha, DC. pr. 1, p. 536.) চিৰাৰাইছি Cheena-narungee. 5 China. Cultivated

in gardens. Fl. middle-sized, white, fragrant; and fr. the whole year. Fruit very pleasant.

- LIMONIA, L. (DC. pr. 1, p. 536;—W. and A. pr. 1, p. 91.)
  - 1. acidissima, L. (DC. l. c.; —W. and A. o. c. p. 92; —J. Grah. Cat. B. pl. p. 23.—L. crenulata, Roxb. Corom. 1, t. 86; —fl. ind. 2, p. 381; —DC. l. c.; —Rheed. 4, t. 14.) 5 Coromandel. Common on sandstone hills at Padshapore, and at the Falls of Gokauk. Monghir. Hurdwar. Assam. Fl. small, white, fragrant, H. S.; fr. R. S.—Fruit much used as a tonic in Malabar, where it forms an article of commerce with the Arabs. (J. Grah.)
  - angulata, W. and A. (pr. 1, p. 91. annot.—Citrus angulata, Willd.
     —DC. pr. 1, p. 540;—Rumph. 2, t. 32.) 5 Moluccas. Soonderbuns.
     Fl. small, white, fragrant. Introduced in 1840. Has not fl.
  - 3. caudata, Wall. Khassya Hills. Introduced in 1839. Has not. fl.
  - 4. ? grata, Wall. Native place ?-In H. C. G. Fl.?
  - 5. ? alternans, Wall. 5 Pegu, Oct. 1821.
- GLYCOSMIS, Corr. (DC. pr. 1, p. 538;—W. and A. pr. 1, p. 92.)
  - arborea DC. (l. c.; —W. and A. l. c.; —J. Grah. Cat. B. pl. p. 23.
     —Limonia arborea, Rosb. Corom. 1, t. 85; fl. ind. 2, p. 381; —B. M. 46, t. 2074.)
     5 Circars. Bombay Presidency. Ava. Fl. small, greenish-white. Has been introduced into H. C. G.? Fl.?
  - 2. pentaphylla, DC. (pr. 1, p. 538;—W. and A. pr. 1, p. 93;—J. Grah. Cat. B. pl. p. 23.—Limonia pentaphylla, Retz?—Roxb. fl. ind. 2, p. 381,—Corom. 1, t. 84.) আল্লে বি Ashshoura. 5 Peninsula of India, Bengal, (Serampore.) Fl. small, white, fragrant; and fr. R. and C. S.
  - 3. tetraphylla, Wall. 5 Khassya Mountains. Fl. small, white, fragrant, nearly the whole year; fr. 0.
  - 4. ozyphylla, Wall. 5 Near to No. 4. Khassya Mountains.

Sclerostylis, Bl. (W. and A. pr. 1, p. 93.)

1. atalanticides, W. and A. (l. c.—Limonia bilocularis, Rosb. ft. ind. 2, p. 377.) 5 Coromandel. Fl. small, white, nearly inodorous,—May and June; fr. July and Aug.

BERGERA, Kön. (DC. pr. 1, p. 537; -W. and A. pr. 1, p. 94.)

- 1. Königii, L. (DC. l. c.;—Roxb. Corom. 2, t. 112; fl. ind. 2, p. 375; —W. and A. l. c.;—Wight icon. 1, t. 13;—J. Grah. Cat. B. pl. p. 24;—Trans. Linn. Soc. 15, t. 5, f. 4;—Rheed. 4, t. 53.) 

  Bursunga. Curry-leaf. 5 Coromandel, Assam, Kemaon. Fl. small, white, fragrant, C. S.; fr. H. S. Leaves very fragrant, used for seasoning curries, stomachic, and tonic. Dried they retain these qualities, and are sold in the bazars. An infusion of them considered antemetic.
  - B. CLAUSENEE, W. and A. pr. 1, p. 90.
- MURRAYA, Kön. (DC. pr. 1, p. 537; W. and A. pr. 1, p. 94.)
  - 1. exotica, L. (DC. l. c.; —W. and A. l. c.; —Wight icon. 1, t. 96; J. Grah. Cat. B. pl. p. 24; —Roxb. fl. ind. 2, p. 374, as to the sp. char. only.—Marsana buxifolia, Sonner. it. 3, t. 139.—Chalcas japonensis, Lour; —Rumph. 5, t. 18, f. 2.) কামিনা Kaminee. 5 Monghir.

- Foot of the Himalaya. Much cultivated. Fl. middle-sized, white, strongly-fragrant, H. and R. S.; fr. C. S.
- 2. paniculata, Hb. Sm. (W. and A. pr. 1, p. 94;—J. Grah. Cat. B. pl. p. 24.—M. exotica, Rosb. A. ind. 2, p. 374, as to the wild plant and description. Chalcas paniculata; L.; Lour.) 可知 Kaminee. 5 Circars. Table land at Mahableshwur. The Ghauts. Goalpara.—Fl. middle-sized, white, strongly fragrant, H. and R. S; fr. C. S.
- 3. sumatrana, Roxb. (fl. ind. 2, p. 375;—W. and A. pr. 1, p. 95.—M. paniculata, Jack.; Mal. Misc. 1, p. 31,—in Hook. bot. misc. 2, p. 79;—Hook. exot. fl. t. 79;—DC. pr. 1, p. 587; excl. syn. Lour.—Rumph. 5, t. 17.) 5 China, Cochin-China, Moluccas. Fl. largish, white, sweet-scented, May; fr. 0.
- COOKIA, Sonner. (DC. pr. 1, p. 537; -W. and A. pr. 1, p. 95.)
  - punctata, Retz. (DC. l. c.; —W. and A. pr. l. c.; —Roxb. fl. ind. 2, p. 382; —J. Grah. Cat. B. pl. p. 24. —Quinaria Lansium, Lour.; —Rumph. 1, t. 55.) Whong-pi. 5 China. Fl. small, white, faintly fragrant, Feb. and March; fr. R. S. —Fruit very agreeable.
- CLAUSENA, Burm. (DC. pr. 1, p. 538; -- W. and A. pr. 1, p. 95.)
  - 1. nana, W. and A. (l. c. annot.—Amyris nana, Roxb. fl. ind. 2, p. 249.) 5 Moluccas. Fl. minute, fragrant, whitish. In H. C. G. fl. H. S.; fr. R. S. (Roxb.)
  - 2. suffruticosa, W. and A. (pr. 1, p. 95. annot.—Amyris suffruticosa, Rosb. fl. ind. 2, p. 250.) 5 Chittagong. Fl. small, greenish-white, H. S.; fr. R. S.

  - sumatrana, W. and A. (pr. 1, p. 95. assot.—Amyris sumatrana, Rosb. fl. ind. 2, p. 250.)
     Sumatra. Fl. small, greenish-white, R. S.; fr. C. S. Fresh leaves, when bruised, emit the fragrance of a lemon leaf.
- 5. punctata, W. and A. (pr. 1, p. 95. annot.—Amyris punctata, Roxb. fl. ind. 2, p. 251;) 5 Chittagong. Fl. small, white, H. S.; fr. R. S. MICROMBLUM, Bl. (Wight. ill. p. 107.)
- 1. integerrimum, W. and A. (pr. 1, p. 94. annot.—Bergera integerrima, Buch.;—Roxb. fl. ind. 2, p. 376;—DC. pr. 1, p. 537.) 5 Banks of the Megna. Fl. small, greenish-white, fragrant, C. S; fr. R. S.
  - PARAMIGNYA, Wight (ill. 1. p. 108.)
    - ? 1. citrifolia, Wight. (Limonia citrifolia, Roxb. fl. ind. 2, p. 379.) 5.
      Chittagong. Fl. middle-sized, white, fragrant, H. S; fr. 0.
  - Luvunga, Buch. (Wight ill. 1, p. 108.)
    - 1. scandens, Buch. (Limonia scandens, Roxb. fl. ind. 2, p. 380.) 

      \*\*Luvunga-luta.\*\* S Usilhet, Chittagong. Fl. middle-sized, white, fragrant, H. S; fr. August and Sept.

#### POLYCYBNA.

1. pentaphyllum, (Amyris pentaphylla, Ross. fl. ind. 2, p. 247.) B Cawnpore. Fl. small, whitish, fragrant, H. S.; fr. R. S.;—Leaves, when bruised between the fingers, very fragrant. W. and A. would refer it to Cookia, from which, as well as from Clauseneze, the many ovula in each cell of the ovary exclude it.

FERONIA, Corr. (DC. pr. 1, p. 538;—W. and A. pr. 1, p. 96.)

1. Elephantum, Corr. (DC. l. c.;—W. and A. l. c.;—Roxb. Corom. 2, t. 141; fl. ind. 2, p. 411;—Wight icon. 1, t. 15;—J. Grah. Cat. B. pl. p. 24.—Cratæva Vallanga, Kön. Anisifolius, Rumph. 2, t. 43.)

\*\*\*Coronal Coronal Coro

ÆGLE, COTT. (DC. pr. 1, p. 538;—W. and A. pr. 1, p. 96.)

4 1. Marmelos, Corr. (DC. l. c.; -W. and A. l. c.; -Rosb. Corom. 2, t. 143; fl. ind. 2, p. 579; -J. Grah. Cat. B. pl. p. 24; -Wight icon, 1, t. 16.—Feronia lucida, Roth.;—DC. l. c.—Cratæva Marmelos, L.: —Rheed 3, t. 37.—Rumph. 1, t. 81.) ( Bel. 5 Coromandel. Malabar Hill, Bombay. Elephanta, Bengal, (Serampore.) Assam, Common about the Pagodas, as the Natives have a deep reverence for this tree. Fl. middle-sized, greenish-white, fragrant, May; fr. Oct. and Nov. The fruit is nutritious, warm, cathartic, delicious, exquisitely fragrant. Its aperient and detersive qualities, and its efficacy in removing habitual costiveness, have been proved by constant experience. (Rosb. in As. Res. 2, p. 349.) The bark of the root is sometimes used by the Natives in compound decoctions against intermittent fevers; while the fresh expressed juice of the leaves, diluted, is praised in catarrhs and feverishness—the leaves in a poultice against ophthalmias and a decoction of the immature dried fruit against diarrhoea and dysentery. The mature fruit, mixed with tamarind juice, forms a sort of antifebrile sherbet. (Trans. Med. and Phys. Soc. Calcutta. 4, p. 110.) The astringent rind of the fruit is used in dyeing yellow, while the glutinous and tenacious matter which surrounds the seeds is considered an excellent addition to mortar, especially in well-building. (Royle.)

CITRUS, L. (DC. pr. 1, p. 539; W. and A. pr. 1, p. 97.)

decumana, L. (DC. l. c.; -W. and A. l. c.; -Roxb. fl. ind. 3, p. 393;

# ORDER LXXIX.—SPONDIACEÆ, Kth.—Lindl. Nat. Syst. p. 106.

#### THE HOGPLUM TRIBE.

Trees, of 3 genera and 8 species: 2 from S. America and the W. Indies; 1 from the Society Islands; 2 from Bourbon and Mauritius; and 3 (Spondias) from the E. Indies.—With Lannea, G. and P. we are not acquainted.—Fruit of several species eatable.

SPONDIAS, L. (DC. pr. 2, p. 74; -W. and A. pr. 1. p. 172.)

- lutea, L. (DC. pr. 2, p. 75;—Bojer Hort. Maurit. p. 81. S. Myrobalanus, L.—Jacq. amer. p. 139, t. 88.—Gärtn. fr. 2, p. 102. t. 204.)
   W. Indies. H. S. 1842.
- 2. mangifera, Pers. (DC. o. c. p. 75; W. and A. o. c. p. 173; —Rosb. fl. ind. 2, p. 451; —J. Grah. Cat. B. pl. p. 42; —Wight. ill. 1, t. 76. S. amara, Lam.—S. Amra, Buch.—Mangifera pinnata, Kön.—L. fil; not Lam.—Poupartia mangifera, Bl.; —Rheed. 1, t. 50; —Rumph. 1, t. 61.?) Mayi Amra. L. 5 Peninsula of India, Bengal, (Serampore.) Valleys of Deyra Dhoon and Kyarda. Fl. small, white, March; fr. Dec. and Jan.—Fruit, when ripe, eaten raw; unripe it is pickled, put in curries, made into tarts, &c. From wounds in the bark a large quantity of a pure gum exudes, which soon hardens into a substance like gum arabic.

- 3. acuminata, Roxb. (fl. ind. 2, p. 453;—W. and A. pr. 1, p. 173;—J. Grah. Cat. B. pl. p. 42.) 5 Malabar. Hills near Kennery Caves. Was introduced into H. C. G. in 1808, but had not fl. in 1814.—Here the plant has been cultivated for twelve years, without fl.
- 4. longifolia, Roxb. (fl. ind 2, p. 453.) 5 Mauritius.—Introduced into H. C. G. in 1810. Fl.?
- 5. axillaris, Roxb. (fl. ind. 2, p. 453.) 5 Nepal.—In H. C. G. fl. March and April; fr. R. S. (Roxb.)
- 6. dulcis, Forst. (DC. pr. 2, p. 75;—Roxb. fl. ind. 2, p. 452;—J. Grah. Cat. B. pl. p. 42.—S. Cythersea, Sonn. it. 2, t. 123;—Lam. ill. t. 384. —Gärtn. fr. 2, p. 101, t. 103.) বিশাতিকামতা Bilati-amra. Otaheyti Apple-tree. L. 5 Society Islands. Cultivated in India. Fl. small, greenish-yellow, March; fr. Dec. and Jan. Fruit used in the same manner as that of No. 1.

Poupartia, Commers. (DC. pr. 2, p. 75.)

- 1. borbonica, Lam. (DC. l. c.) 5 Bourbon. In H. C. G. fl. in March.
  - \* Spondias purpurea, L. 5 W. Indies.—S. lutea, L. 5 W. Indies.

ORDER LXXX.-RHAMNACEÆ,-Lindl. Nat. Syst. p. 107.

#### THE BUCKTHORN TRIBE.

Trees and shrubs, simple or climbing, by Lindl. referred to 30 genera. Of species, DC. pr. and Spreng. syst. enumerate 58 for S. America, Mexico and the W. Indies; 22 for New Holland and the South Sea Islands; 16 for Europe; 15 for N. America; 7 for China; 5 for Mauritius; 4 for N. Africa; 3 for the Canaries; 3 for Timor; 2 for Persia; 2 for Senegal; 2 for St. Helena; 1 for Dahuria; 1 for Siberia; 1 for the Azores; 1 for Guinea; 1 for Abyssinia; 1 for Tristan d'Acunha, and 1 for the Antarctic Islands. S. Africa possesses 50 species, (Harvey); and the E. Indies, according to our materials, 55; viz. 2 of Paliurus; 25 of Zizyphus; 5 of Berchemia; (3 uncertain. DC.) 2 of Sageretia; 1 of Ventilago; 6 of Rhamnus; 1 of Scutia; 1 of Hovenia; 2 of Colubrina; 3 of Ceanothus; and 4 of Gouania. With Blume's two new genera, Lepionurus and Crypteronia, and the Javanese species in general we are not acquainted. Of the Indian forms, 23 have been discovered at the foot of the Himalayas and in Nepal; the rest are tropical. Properties under the species.

ZIZYPHUS, Tournef. (DC. pr. 2, p. 19; -W. and A. pr. 1, p. 161.)

rugosa, Lam. (DC. o. c. p. 20; —W. and A. o. c. p. 162; —J. Grah. Cat. B. pl. p. 39; —Wight. icon. 2, t. 339; —Z. latifolia, Rosb. fl. ind. p. 607; ed. Carey, 2, p. 355; —DC. l. c.) 5 Travancore, the Ghauts. Khassya Mountains. Assam. Oude, Nepal. Fl. minute, greenish, March; fr. R. S. —Fruit eaten by the Natives. (J. Grah.)

- glabrata, Heyne. (W. and A. pr. 1, p. 162; —Wight. icon. 1, t. 282, —Z. trinervia, Roxb. fl. ind. 1, p. 606; ed. Carey, 2, p. 354; —not Poir.)
   Mysore. Fl. small greenish-yellow. In H. C. G. fl. H. S.; fr. Oct. and Nov. (Roxb.)
- Xylopyrus, Willd. (DC. pr. 1, p. 21; W. and A. pr. 1, p. 162; —
  Roxb. fl. ind. 1, p. 611; ed. Carey, 2, p. 360; —J. Grah. Cat. B. pl.
  p. 39. Z. elliptica, Roxb. fl. ind. 1, p. 610; ed. Carey, 2, p. 359.—Z.
  Caracutta, Buch.; —Roxb. fl. ind. 1, p. 612; ed. Carey, 2, p. 361.—Z.
  orbicularis, Schult.; —DC. pr. 2, p. 21.) 5 Courtallum. The Ghauts.
  Hills from Shergotty to Roghonautpore. Fl. small, greenish-yellow,
  R. S.; fr. C. S. Fruit used by the shoemakers to blacken leather,
  and to make blacking. (Dr. Gibson.)
- 4. Jujuba, Lam. (DC. pr. 2, p. 21;—W. and A. pr. 1, p. 162;—Roxb. fl. ind. 1, p. 608;—ed. Carey, 2, p. 357;—Wight icon. 1, t. 99;—J. Grah. Cat. B. pl. p. 39.—Z. sororia, Schult.;—DC. l. c.—Rhamnus Jujuba, L.;—Rheed. 4, t. 41;—Rumph. 2, t. 36.) The Keol-gachh, The Byur. 5 Moluccas, Sunda Islands. Both Peninsulas of India, Bengal, (Serampore,) Assam. The valleys of Gurhwal and Sirmore. Fl. small, greenish-yellow, R. S.; fr. C. S. Fruit eatable.
  - B. fructu oblongo; oblong fruited. বারিকেনীকুল Narikelee-kool. বড় বন্ধর Buru-Byar. Fruit eaten by Europeans, as well as Natives; lately much improved by culture.
- nummularia, W. and A. (pr. 1, p. 162.—Z. microphylla, Rosb. fl. ind. 1, p. 613;—ed. Carey, 2, p. 262.—Z. rotundifolia, Lem.;—DC. pr. 2, p. 21.—Rhamnus nummularia, Burm. ind. p. 61.)
   Palamcotta, Courtallum. Fl. small, greenish-yellow, May and June; fr. 0.
- 6. Oenoplia, Mill. (DC. pr. 2, p. 21;—W. and A. pr. 1, p. 163;—Rosb. fl. ind. 1, p. 611;—ed. Carey, 2, p. 360;—J. Grah. Cat. B. pl. p. 39.—Z. scandens, Rosb. H. B. p. 17.—Z. Napeca, Roth.;—Rosb. fl. ind. 1, p. 613;—ed. Carey, 2, p. 363, not Willd.;—Burm. Zeyl. t. 61.) Wighther Kool. 5 Both Peninsulas of India. Ceylon. Bengal, (Serampore.) Rajmahl Hills. Assam. Banks of the Jumna, near Delhi. Kheree Pass. Fl. small, greenish-yellow, H. S.; fr. R. S.
- albens, Roxb. (f. ind. 1, p. 607;—ed. Carey, 2, p. 355.)
   China. In H. C. G. fl. April. (Rosb.)
- sitida, Roxb. (f. ind. 1, p. 609.;—ed. Carey, 2, p. 358.)
   Schina. Fl. small, yellow. In H. C. G. fl. H. S.; fr. C. S. (Roxb.)
- vulgaris, Lam. (DC. pr. 1, p. 19;—Rosb. fl. ind. 1, p. 609;—ed. Carey, 2, p. 358;—Rhamnus Zizyphus, L.) 5 Syria, and thence introduced into Persia and Hindoosthan. In H. C. G. fl. R. S.; fr. C. S. (Rosb.)
- Lotus, Lam. (DC. pr. 1, p. 19;—Roxb. fl. ind. 1, p. 610;—ed. Carey,
   p. 359.—Rhamnus Lotus, L.) 5 N. Africa, Persia. In H. C. G.
   fl. H. S. (Roxb.)

- Rosburghiana, (Z. tomentosa, Rosb. fl. ind. 1, p. 611;—ed. Carey, 2, p. 360; not Poir.)
   Chittagong. Introduced into H. C. G. in 1810, but had not fl. in 1814.
- glabra, Roxb. (fl. ind. 1, p. 614;—ed. Carey, 2, p. 364.)
   Chittagong. Introduced into H. C. G. in 1810, but had not fl. in 1814.
- incurva, Roxb. (fl. ind. 1, p. 614.—ed. Carey, 2, p. 364.)
   Dhoon. Fl. small, greenish. In H. C. G. fl. R. S. (Roxb.)
- 14. feruosa, Wall. (Roxb. fl. ind. ed. Carey, 2, p. 365.) L. 5. Gossain Than. Mountains towards Cashmere. In H. C. G. Fl.?
- Berchemia, Neck. (DC. pr. 2, p. 22;—W. and A. pr. 1, p. 163.)
  - floribunda, Wall. Cat. (Zizyphus floribundus, Wall.;—Roxb. fl. ind. ed. Carey, 2, p. 368.) 5 Khassya Mountains. Nepal, Kemaon. Fl. small, white. Introduced in 1839. Has not fl.
- SAGERETIA, Brongn. (G. Don's Mill. dict. 2, p. 28.)
  - 1. oppositifolia, Brongn. (Berchemia? oppositifolia, Wall. Cat.—Zizyphus oppositifolia, Wall.;—Roxb. fl. ind. ed. Carey, 2, p. 370.—Rhamnus trigynus, Don.;—DC. pr. 2, p. 27; ex. pte.) 5 Deyra Dhoon. Fl. small, greenish, R. S.; fr. C. S.
  - hamosa, Brongn. (Berchemia? hamosa, Wall. Cat.—Zizyphus hamosa, Wall.—Rosb. fl. ind. ed. Carey, 2, p. 369.—Rhamnus trigynus, Don.;
     —DC. pr. 2, p. 27, ex. pte.) 5 

    Nepal. Fl. small, greenish. In H. C. G. Fl.?
- VENTILAGO, Gärtn. (DC. pr. 2, p. 38;—W. and A. pr. 1, p. 164.)
  - 1. maderaspatana, Gärtn. (DC. l. c.; —W. and A. l. c.; —Rosb. Corom. 1, t. 76; —fl. ind. 1, p. 629; —ed. Carey, 2, p. 413; —Wight. icon. 1, t. 163; —J. Grah. Cat. B. pl. p. 40; —Gärtn. fr. 1, t. 49; —Rumph. 5, t. 2.) \*\*The Rukta-pita. L. 5 Moluccas. Both Peninsulas of India, Hills of Bengal, Assam, Nepal, Kemaon. Fl. small, greenish, offensively smelling, C. S.; fr. H. S.—Bark used for cordage. (As. Res. 6, p. 352.) According to Rumphius, the Amboyna fishermen use the long climbing stems instead of ropes.
- RHAMNUS, L. (DC. pr. 2, p. 23;—W. and A. pr. 1, p. 164.) Buck-thorn.
  - virgatus, Roxb. (f. ind. 1, p. 604;—ed. Carey, 2, p. 351;—DC. pr. 2, p. 24.)
     Neelgherries, Mussooree, Gurhwal, Deyra Dhoon, Kemaon. Fl. very small, greenish-yellow. In H. C. G. fl. H. S; fr. Oct. and Nov. (Roxb.)
  - incanus, Roxb. (fl. ind. 1, p. 603; ed. Carey, 2, p. 350.)
     Moluccas.
     Fl. small, greenish-yellow. In H. C. G. fl. C. S.; fr. H. S. (Roxb.)
- Scutia, Commers. (W. and A. pr. 1, p. 165.)
  - indica, Brongn. (W. and A. l. c.; -Wight. ill. 1, t. 73; -J. Grah. Cat. B. pl. p. 39. -Rhamnus circumscissus, L.; -Roxb. fl. ind. 1, p. 603; ed. Carey, 2, p. 350. -R. myrtinus, Burm.; -DC. pr. 2, p.

- 27.—Ceanothus circumscissa, Gärtn. fr. 2, t. 106;—DC. pr. 2, p. 30.—C. zeylanica, Heyne;—DC. l. c.—Celastrus zeylanica, Roth.;—DC. pr. 2, p. 9;—Rheed 5, t. 30, 31.) 5 Peninsula of India. Fl. small, greenish-yellow, Jan., Feb. and March; fr. Dec. and Jan. Hovenia, Thunb. (DC. pr. 2, p. 40.)
  - dulcis, Thunb. (Rosb. ft. ind. 1, p. 630;—ed. Carey, 2, p. 414;—J. Grah. Cat. B. pl. p. 40;—B. M. 50, t. 2360;—DC. l. c.—H. inequalis, DC. l. c.—H. acerba, Lindl.;—B. Reg. 6, t. 501;—DC. l. c.)
     L. 5 China. Japan, Nepal, Kamaon, Mussooree. Fl. small, white, H. S; fr. R. S.—Peduncles of the fruit extremely enlarged and succulent, and are in much esteem in China, resembling in flavour, as it is said, a ripe Pear. (Lindl.)
- COLUBRINA, Rich. Brongn. (W. and A. pr. 1, p. 165.)
  - 1. asiatica, Brongn. (W. and A. o. c. p. 166;—Wight ill. 1, t. 74;—
    J. Grah. Cat. B. pl. p. 39.—Ceanothus asiaticus, L.;—DC. pr. 2,
    p. 30;—Roxb. fl. ind. 1, p. 615;—ed. Carey, 2, p. 373.—C.? capsularis,
    Forst.;—DC. pr. 2, p. 32;—Burm. Zeyl. t. 48.) L. 5 Both Peninsulas of India. The Ghauts. Elephanta. Siam, Singapore, Amherst,
    Moulmein, Ceylon, Mauritius. Fl. small, pale-greenish, April and
    May; fr. June and July.
  - nepalensis, G. Don. (Mill. dict. 2, p. 36.—Ceanothus nepalensis, Wall.;—Roxb. fl. ind. ed. Carey, 2, p. 375.)
     Nepal. Fl. small, greenish, May; fr. June and July.
  - ? 3. macrophylla, Wall. 5 Martaban. In H. C. G. Fl.?
- VITMANNIA, W. and A. (pr. 1, p. 166; not Vahl.—Willemetia, Brongn.; not Neck. Cassini, &c.)
  - africana, W. and A. (l. c.—Wight icon. 2, t. 490.—Willemetia africana, Brongn.—Ceanothus africana, L.;—DC. pr. 2, p. 32.)
     G. G. Fl.?
- GOUANIA, Jacq. (DC. pr. 2, p. 38; -W. and A. pr. 1, p. 166.)
  - 1. leptostachya, DC. (o. c. p. 40;—W. and A. l. c.—G. tilizefolia, Roxb. Corom. 1, t. 98;—fl. ind. 1, p. 632;—ed. Carey, 2, p. 417; not Lam.) 5 Circars. Chittagong, Bengal, (Serampore.) Assam. Deyra Dhoon. Fl. small, greenish, R. and C. S.; fr. H. S.
  - 2. madagascariensis, Rich. 5 U Bourbon. Fl. 1840.
  - \* Paliurus virgata, Don.; B. M. 52, t. 2535. 5 Nepal.—Z. mirzaporensis, Royle. 5 from Shergatty to Roghonautpore.—Berchemia parviflora, Wall.; Wight icon. 1, t. 19. 5 Peninsula of India.—Sageretia theezans, Brongn. 5 China.—Rhamnus Wightii, W. and A.; Wight icon. 1, t. 159. 5 Courtallum.—Colletia spinosa, Lam. 5 Brazil.—Scutia Commersonii, Brongn. 5 Mauritius.—Gouania microcarpa, DC. 5 Courtallum.—G. nepalensis, Wall. 5 Nepal.

ł

ORDER LXXXI.—CHAILLETIACEÆ, DC. Lindl. Nat. Syst. p. 108.

Trees or shrubs, referred by Lindl. to 4 genera. Of their species, 3 have been found in Guiana; 2 in Sierra Leona; 2 in Madagascar; 1 in Timor; and 1 in Silhet. To the latter R. Br. in Wall. Cat. adds 2 more, one from Penang, the other from Tavoy. Properties nearly unknown. Moacubra, Roxb. (fl. ind. 2, p. 69.)

- gelonioides, Roxb. (l. c.) 5 Silhet. Fl. small, greenish. In H. C.
   G. fl. April and May; fr. Dec. (Rosb.)
- \* Chailletia pedunculata, DC. 5 Cayenne.—C. timoriensis, DC. 5 Timor.

  —C. Dichapetalum, R. Br. 5 Madagascar.—Tapura guianensis, Aubl.

  5 Guiana.—Montabea guianensis, Aubl. 5 Guiana.

#### ORDER LXXXII.-BURSERACEÆ, Kth. Lindl. Nat. Syst. p. 110.

Trees or shrubs, (excluding Colophonia,) referred by Lindl. to 12 genera. Of their species, 29 inhabit S. America, Mexico and the W. Indies; 8-4 Arabia; 3 Madagascar; 2 S. Africa; 1 Congo; 1 Mauritius; and 1 Timor. In the E. Indies 18-19 forms have been found: 7 of Canarium; 4-5 of Protium; 3 of Boswellia; 2 of Balsamodendron; 1 of Icica; and 1 of Garuga;—nearly all natives of the tropics.

They have all an abundance of fragrant resinous juice, which is, however, destitute of the acridity and staining property of that of Anacardiaces—Balsam of Acouchi is produced by Icica Aracouchini, Aubl.; Gum elemi by Icica heptaphylla, Aubl.; Balm of Gilead by Balsamodendron gileadense Kth.; Myrrh by B. Myrrha, Ehrenb. and Hempr.; Opobalsamum or Balsam of Mecca, by B. Opobalsamum, Kth.; a substance like Gum elemi by Icica Icicariba, DC. and Carana,—and a yellow concrete essential oil by Bursera acuminata, Willd. (Lind.)

Boswellia, Roxb. (DC. pr. 2, p. 76;—W. and A. pr. 1, p. 174.)

1. serrata, Stackh. (B. thurifera, Colebr.;—Rost. A. ind. 2, p. 383;—
W. and A. l. c.;—J. Grah. Cat. B. pl. p. 42.) The Salai. ACTA
Luban. L. b Mountains of Coromandel. S. Concan. Jungles above
Rajoor. Hill of Shendoor in the Chichooree Talook, of the Belgaum
Collectorate. Bundlekund. Fl. smallish, greenish-white, March and
April; fr. C. S.—This tree produces the gum-resin, Olibanum, (ANNKoondwroo,) a substance chiefly used as a grateful incense, but which
also possesses stimulant, astringent, and diaphoretic properties. (Ainslie.)

CANARIUM, L. (DC. pr. 2, p. 79; W. and A. pr. 1, p. 174.)

commune, L. (DC. l. c.; -W. and A. o. c. p. 175; -Kön. in ann. bot.
 p. 260, t. 7, f. 2; -Roxb. fl. ind. 3, p. 137. -C. Mehenbethene,

- Gärtn. fr. 2, p. 98. t. 102?—Amyris zeylanica, Retz.—Balsamodendron zeylanicum, Kth.;—DC. pr. 2, p. 76.—Colophonia mauritiana, DC. pr. 2, p. 79.—Bursera paniculata, Lam.—Rumph. 2, t. 47.) L. 5 Moluccas. Ceylon. Mauritius. Peninsula of India. Introduced into H. C. G. in 1798, but had not fl. up to 1814. The resinous juice of this tree has the same properties as the Balsam of Copaiva. The three-cornered nuts are eaten in Java both raw and dressed, and an oil is expressed from them, which is used at table when fresh, and for burning when stale. The raw nuts are, however, apt to produce diarrhosa. (Ainslie.)
- 2. strictum, Roxb. (fl. ind. 3, p. 138;—W. and A. pr. 1, p. 175.) b
  Tinevelly. Introduced into H. C. G. in 1808, but had not fl. in 1814.
  Known in Malabar under the name of the Black Demmer-tree, in contradistinction to Vateria indica, or white Dammer-tree. It is common in the alpine forests about Courtallum in the Tinevelly district, and is there regularly rented for the sake of its Dammer. This is transparent and of a deep brownish yellow or amber colour, when held between the eye and the light, but when adhering to the tree has a bright shining black appearance. (Wight.)
- 3. bengalense, Roxb. (fl. ind. 3, p. 136.) L. 5 Assam. Fl. small. In H. C. G. fl. May and June; fr. Jan. and Feb. (Roxb.) From fissures and wounds in the bark, a large quantity of very pure, clear, amber-coloured resin exudes, which soon becomes hard and brittle, and is not unlike Copal, yet the natives set little or no value on it. (Roxb.)
- sigrum, Roxb. (fl. ind. 3, p. 188.—Marignia acutifolia, DC. pr. 2. p. 79.—Dammara nigra, Rumph. 2, p. 160, t. 52, 53.)
   L. 5 Amboyna, and other Molucca Islands. Fl. small. In H. C. G. fl. May. A reddish, soft, viscid, heavy-smelling substance exudes from wounds in the bark. (Rumph.)
- sylvestre, Gärtn. (fr. p. 99, t. 102;—DC. pr. 2, p. 79;—Rosb. fl. ind. 3, p. 137.—C. sylvestre alterum, Rumph. 2, p. 155, t. 49.—C. Pimela, Kön.;—Ann. bot. 1, p. 361, t. 7, f. 1;—DC. pr. 2, p. 80.—Pimela nigra, Lour.)
   5 Amboyna. Cochin China, China. Introduced into H. C. G. in 1798, but had not fl. up to 1814.
- ICICA, Aubl. (DC. pr. 2, p. 77; W. and A. pr. 1, p. 177.)
  - bengalensis, (I. indica, W. and A. l. c.—Bursera serrata, Wall.;—
    Colebr. in Linn. soc. trans. 15, p. 362, t. 4.—Schinus bengalensis, Saharia and Niara, Hb. Buch.) L. b Chittagong, Assam. Fl. very small, green, March and April.—Timber close-grained, hard, as tough, but heavier than oak, used for furniture by the Natives.
- Balsamodendron, Kth. (DC. pr. 2, p. 76; -- Wight ill. 1, p. 185.)
  - 1. Berryanum, (B. Berryi, Arn.; Wight ill. l. c.—Protium gileadense, W. and A. pr. 1, p. 177, excl. syn. Kth. DC. and Vahl.—Amyris gileadensis, Roxb. fl. ind. 2, p. 246, excl. syn. Willd. and "Arabia.")

    B Peninsula of India, where it is constantly used for making fences.

- (Wight.) Was introduced, by Dr. Berry, into H. C. G. in 1798, but had not fl. up to 1814.
- Rosburghianum, Wall. (Protium Roxburghianum, W. and A. pr. 1, p. 176.—Amyris acuminata, Rosb. fl. ind. 2, p. 246;—not Poir.) 5 Moluccas. Fl. small, yellowish, May; fr. 0.—The bark and all the tender parts, on being bruised or wounded, discharge a small quantity of pale whey-coloured liquid, which possesses a fragrance somewhat like that of an orange leaf. (Rosb.)
- 3. Agallocka, W. and A. (pr. 1, p. 96, annot.—B. Roxburghii, Arn.; Wight ill. 1, p. 185.—Amyris Agallocha, Roxb. H. B. p. 28.—A Commiphora, Roxb. fl. ind. 2, p. 244, excl. syn. Jacq.) \*\*\*(\*\*\* Googgul. 5 Assam, Garrow-Hills. Fl. small, reddish, Feb. and March; fr. 0. Produces the Gum Bdellium of commerce, and perhaps of Dioscorides. (Royle.) The whole plant, while growing, is considerably odoriferous, particularly when any part is broken or bruised, and diffuses to a considerable distance around a grateful fragrance, like that of the finest myrrh. (Roxb.)

MARIGNIA, Commers. (DC. pr. 2, p. 79.)

 obtusifolia, DC. (l. c.—Bursera obtusifolia, Lam.—Dammara graveolens, Gärtn. fr. 2, p. 100. t. 103. f. 11, excl. syn. Rumph.) 5 Mauritius, where it is called Colophane bastard.—Fl. small, whitish, May; fr. 0.

SORINDBIA, Pet. Th. (DC. pr. 2, p. 80;—W. and A. pr. 1, p. 170.)

- 1. madagascariensis, (DC. l. c.; —W. and A. l. c.—Mangifera pinnata, Lam.; —not L.) 5 Madagascar, where the French call it Manguier à grappes.—Fl. small, greenish, Feb; fr. May 1836.
- 2. ? attenuata, Wall. 5 Penang.—March 1885.

GARUGA, Roxb. (DC. pr. 2, p. 80; - W. and A. pr. 1, p. 175.)

- 1. pinnata, Roxb. (Corom. 3, t. 208;—fl. ind. 2, p. 400;—DC. o. c. p. 81;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 43;—Rheed 4, t. 33.)

  W Joom. L. 5 Coromandel. The Ghauts. The hilly parts of the Concan. Bengal, (Serampore.) Assam. Deyra Dhoon, Kyarda. Flowers smallish, cream-coloured, March; fr. C. S.—Fruit eaten by the Natives raw or pickled.
- \* Boswellia glabra, Roxb. Corom. 3, t. 207. 5 Mountains of Coromandel, Deccan.—Bursera gummifera, Jacq. 5 W. Indies.—B. acuminata, Willd. 5 St. Domingo.—Protium caudatum, W. and A. 5 Peninsula of India.—P. pubescens, W. and A. 5 Peninsula of India.—P. javanicum, Burm, Rumph. 7. t. 23. 5 Java.—Icica Aracouchini. 5 Guiana.—I. guianensis, Aubl. 5 Cayenne. I. heptaphylla, Aubl. 5 Guiana.—I Icicariba, DC. 5 Brazil.—Balsamodendron Wightii, Arn. 5 Peninsula of India.—B. gileadense, Kth. 5 Arabia.—Was, in 1837, introduced into the Bombay Hort. Soc. Gardens from Mecca.—Hedwigia balsamifera, Swz. 5 Hayti.

# ORDER LXXXIII.—EUPHORBIACEÆ, Ad. Juss.—Lindl. Nat. Syst. p. 112.

#### THE EUPHORBIUM TRIBE.

As we have but extremely insufficient materials regarding this large family, we shall abridge from Lindley's remarks (l. c.) as much as will suit "Trees, shrubs, or herbaceous plants, often abounding our purpose. in acrid milk. The order, which probably does not contain fewer than 1500 species, exists in the greatest abundance in equinoctial America, where about 3-8ths of the whole number have been found, sometimes in the form of large trees, frequently of bushes, still more usually of diminutive weeds, and occasionally of deformed, leafless, succulent plants, resembling Cactaceæ in their port, but differing from them in every other particular. In the Western world they gradually diminish, as they recede from the equator, so that not above 50 species are known in N. America, of which a very small number reaches as far as Canada.—There are about 120 species from Europe, including the basin of the Mediterranean; of these 16 only are found in Great Britain, and 7 in Sweden." (Lindl.) S. Africa contains 100 species, (Harvey.) Of Indian, Roxb. in his fl. ind. describes 112. What may be the amount of Blume's Javanese Euphorbiaceæ, we cannot ascertain, his works being inaccessible to us. That their number however, must be considerable, we conclude from his 21 new genera, enumerated by Lindl. Our ignorance is still more increased by the Catalogues of Heyn's, Klein's, Rottler's, Buchanan's, Finlayson's, Wallich's, Wight's, and Royle's discoveries in this order being unpublished.

"The general property of this order is that of exciting, varying greatly in degree, and consequently in effect. This principle resides chiefly in the milky secretion of the order, and is most powerful in proportion as the secretion is abundant. The smell and taste of a few are aromatic: but in the greater part the former is strong and nauseous, the latter acrid and pungent. The hairs of some species are stinging. Some of them are emetic, others cathartic-many of them are also dangerous, even in small doses, and so fatal in some cases, that no practitioner would dare to prescribe them; as for example, Manchineel. In fact, there is a gradual and insensible transition, in this order, from mere stimulants to the most dangerous poisons. Whatever the stimulating principle of Euphorbiacese may be, it seems to be of a very volatile nature, because application of heat is sufficient to dissipate it. Thus the root of Jatropha Manihot or Cassava which, when raw, is one of the most violent of poisons, becomes a wholesome nutritious article of food when roasted. In the seeds, the albumen is harmless and eatable, but the embryo itself is acrid and dangerous. Independently of this volatile principle, there are two others belonging to the order, which require to be noticed; the first of these is Caoutchouc, that most innocuous of all substances, produced by the most poisonous of all families, which may be almost said to have given a new arm to surgery, and which has become an indispensable article of life; it exists in Artocarpese and elsewhere, but is chiefly the produce of species of Euphorbiacese. The other is the preparation called Turnsol, which, although chiefly obtained from Crozophora (Croton) tinctoria, is to be produced equally abundantly from many other plants of the order." (Lind!.)

## A. Buxes, Bartl.

SARCOCOCCA, Lindl. (B. Reg. 12, t. 1012.)

- 1. pruniformis, Lindl. (l. c.) Nepal Bastard-Plum. 5 Nepal. Fl. small, greenish-yellow, C. S.; fr. 0.
  - a. latifolia. (Pachysandria? coriacea, Hook. exot. fl. t. 148.)
  - β. angustifolia. (? Buxus saligna, Don. pr. fl. nep. p. 63;—Spreng. syst. 3, p. 847.)

Buxus, L. (Spreng. syst. 3, p. 760, No. 3103.)

- 1. chinensis, Lk. (Spreng. syst. p. 847.) China Bas Tree. 5 China. Fl. small, yellowish-green. Has been introduced into H. C. G. Fl.?
- 2. balearica, Lam. (Spreng. l. c.) Balearic Box Tree. 5 Minorca. Fl. small, yellowish-green. Introduced in 1841. Has not fl.
- 3. sempervirens, L. (Spreng. syst. l. c.) 5 South Europe, North Persia. In H. C. G.

In some parts of Persia where Box Trees abound, the Camel cannot be employed, because it is found impracticable to prevent that animal from browzing upon the leaves, which invariably prove poisonous to it. (Lindl.)

SECURINEGA, Juss. (Spr. syst. 1, No. 1112.)

1. borbonica, Rich. Bourbon.

Fluggea, Willd. (Spreng. syst. 1, p. 523. No. 939.)

- 1. Leucopyrus, Willd. (Spreng syst. 1, p. 825.—Phyllanthus Leucopyrus, Köz.;—Rosb. fl. ind. 3, p. 658.) L. 5 Coromandel. Fl. small, greenish; and fr. R. S.
- 2. retusa, Roxb. (Phyllanthus retusus, Roxb. fl. ind. 3, p. 657.) L. 5
  Bengal, (Serampore,) extending northwards to the banks of the Jumna. Fl. small, greenish; and fr. whole year.
- 3. virosa, Roxb. (Phyllanthus virosus, Roxb. fl. ind. 3, p. 659;—Spreng. syst. 3, p. 22.) L. 5 Circars, Banks of the Jumna. Fl. small, greenish. In H. C. G. fl. H. and R. S.; fr. R. S. (Roxb.) The bark is a strong astringent, and possesses, when thrown into the water, the power of intoxicating fish, whereby they are easily taken. (Roxb.)

#### B. PHYLLANTHER, Bartl.

- GLOCHIDION, Forst. (Juss. gen. pl. p. 442. Bradleia, Gärtn.; Lindl. nat. Syst. p. 116.)
  - 1. multiloculare, (Bradleia multilocularis, Rosb. fl. ind. 3, p. 696;—Spreng. syst. 3, p. 19.) 5 Bengal, (Serampore.) Fl. small, greenish cream-coloured, H. and R. S.; fr. C. S.

- lanceolarium, (Bradleia lanceolaria, Roxb. fl. ind. 3, p. 697.) L. 5
   Assam. Fl. small, greenish cream-coloured, March and April; fr. R. S.—A useful timber-tree. (Roxb.)
- 3. nitidum, (Bradleia nitida, Roxb. fl. ind. 3, p. 699.) 5 Circars. Fl. small, greenish cream-coloured, C. S.; fr. H. S.
- 4. sinicum, (Bradleia sinica, Gärtn. fr. 2, p. 127, t. 109, f. 1;—Spreng. syst. 3, p. 19;—Rosb. fl. ind. 3, p. 700;—J. Grah. Cat. B. pl. p. 184, under Bridelia.) 5 Penang. Kandalla. Along the Ghauts. Fl. small, white. In H. C. G. Fl.?
- 5. kirsutum, (Bradleia hirsuta, Rosb. fl. ind. 3, p. 699.) 5 Penang. Introduced into H. C. G. Fl.?
- ? 6. spinatum, (Bradleia pinnata, Roxb. fl. ind. 3, p. 700.—Phyllanthus obscurus, Roxb. Willd.;—Spreng. syst. 3, p. 22.) 5 Penang. Fl. small, yellow, nearly the whole year.
- Cicca, L. (Spreng. syst. 1, p. 375, No. 569.)
  - 1. disticha, L. (Spreng. syst. 1, p. 500;—Lam. ill. t. 757, f. 1;—J. Grah. Cat. B. pl. p. 180.—Phyllanthus longifolius, Jacq. Schönb. 2, p. 36, t. 1, 194;—Roed. ft. ind. 3, p. 672.—Averrhoa acida, L.;—Rheed. 3, t. 47-48.—Rumph. auct. p. 33, t. 17, f. 2.) वर्षाणे Nubaree. वर्णे Nursee. 5 Native place uncertain. Commonly cultivated in gardens. Fl. small, reddish, H. S.; fr. R. and C. S. Leaves sudorific. Fruit succulent, sub-acid, cooling, wholesome, eaten raw, or made into pickles and preserves.—Seeds cathartic.
- EMBLICA, Gärtn. (Spreng. syst. 3, p. 4, No. 2343.)
  - 1. officinalis, Gärtn. (fr. 2, p. 122, t. 108, f. 2;—Spreng. syst. 3, p. 20.—Phyllanthus Emblica, L.;—Roxb. fl. ind. 3, p. 671;—J. Grah. Cat. B. pl. p. 180;—Rheed. 1. t. 38;—Rumph. auct. p. 1, t. 1.)

    WINI Amla. L. 5 Moluccas. Coromandel. Concans, Deccan, South Mahratta country. Bengal, extending northwards to the Banks of the Jumna. Cultivated in gardens. Fl. minute, greenish-yellow, H. and R. S.; fr. C. S. Wood hard and durable, particularly under water. Bark very astringent, used by the Natives for tanning.—Fruit succulent, sharp, unpalatable, unless pickled or preserved with sugar. (Roxb.)
- PHYLLANTHUS, L. (Spreng. syst. 3, p. 4. No. 2344.)
  - maderaspatensis, L. (Spreng. syst. 3, p. 21;—Roxb. fl. ind. 3, p. 654;—J. Grah. Cat. B. pl. p. 180.) ⊙ Peninsula of India, Bengal, (Serampore.) Fl. small, greenish; and fr. the whole year. Taste herbaceous, somewhat astringent. Cattle eat it. (Roxb.)
  - simplex, Retz. (Spreng. syst. 3, p. 23;—Rosb. fl. ind. 3, p. 654.)
     Coromandel, Bengal, (Serampore.) Fl. small, greenish, R. S;
     C. S.—Fresh leaves, bruised and mixed with butter-milk, used by the Natives to cure the itch in children. (Rosb.)
  - 3. fasciculatus, Poir. (p. 304.—Phyllanthus Kirganelia, Willd.;—Rosb. fl. ind. 3, p. 668.—Kirganelia virginea, Pers. syn. 2, p. 591.—

- Kirganelia, Juss.) 5 Mauritius, where it is called Bois de Demoiselle. Fl. small, reddish, the whole year; fr. 0. or rare.
- 4. reticulatus, Poir. (Ph. Vitis Idaa, Kön.;—Rosb. fl. ind. 3, p. 665;—
  J. Grah. Cat. B. pl. p. 180;—Rheed. 5 t. 44.) That is a Hamketojooli. L. 5 Coromandel. Concans. Bengal, (Serampore.) Fl. small,
  greenish; and fr. the whole year. Wood white and durable, employed by the Hill people for various economical purposes. Cattle eat
  the leaves. Frequently employed for ornamental hedges. (Rosb.)
- obcordatus, Roxb. (fl. ind. 3. p. 656.)
   Bengal, (Serampore.)
   small, greenish; and fr. the whole year.
- 6. Niruri, L. (Spreng. syst. 3, p. 23;—Rosb. A. ind. 3, p. 659;—J. Grah. Cat. B. pl. p. 180.—Urinaria indica, Burm. seyl. t. 93;—Rheed. 10, t. 15.) The same Sada-hajur-musi. Peninsula of India, Bengal, (Serampore,) Fl. minute, greenish; and fr. the whole year. Leaves deobstruent, diuretic, healing. Fresh rost a good remedy in jaundice. Half an ounce, rubbed up in a cup of milk, and given every morning and evening, will complete the cure in a few days, without any sensible operation of the medicine. (Rosb.)
- 8. bacciformis, L. (Rosb. fl. ind. 3, p. 661;—Pers. syn. 2, p. 690.—Agyneia phyllanthoides, Spreng. syst. 3, p. 19.) of Coromandel. Fl. small, greenish; and fr. the whole year.
- 9. pendulus, Rosb. (fl. ind. 3, p. 662.) of Coromandel. Fl. small, greenish, R. S.; fr. C. S.
- 10. multiflorus, Willd. (Spreng. syst. 3, p. 22;—Rosb. fl. ind. 3, p. 664;

  —J. Grah. Cat. B. pl. p. 180;—Rheed. 10, t. 27.) etteration Panshiooli. 5 Coromandel. Concans. Bengal, (Serampore.) Fl. small, greenish-white; and fr. the whole year.
- turbinatus, Kön. (Roxb. fl. ind. 3, p. 666;—H. B. p. 104;—B. M. 44, t. 1862;—Spreng. syst. 3, p. 21, excl. syn. Ker;—J. Grah. Cat. B. pl. p. 180.—P. Simsianus, Wall. rept;—Rheed. 5, t. 43) L. 5 or 5 Mountains of Orissa. Coromandel. Malabar and Worlee hills. Salsette. Fl. small, greenish.—In H. C. G.—Fl.?
- 12. patens, Roxb. (fl. ind. 3, p. 667.) 5 Chittagong. Fl. small, greenish; and fr. the whole year.
- 13. tenellus, Roxb. (fl. ind. 3, p. 668.) 5 Mauritius. Fl. minute, pale pink. In H. C. G. fl. and fr. the whole year. (Rosb.)
- 14. reclinatus, Roxb. (fl. ind. 3, p. 669.) 5 Sumatra. Fl. small, yellowish, R. S.; fr. C. S.
- strictus, Roxb. (f. ind. 3, p. 670.)
   Malay Islands. Fl. small, deep-purple; and fr. the whole year.

- ? 16. tetrandrus, Roxb. (f. ind. 3, p. 674;—P. reticulata, Lodd. Cab.
  2. t. 116, not Poiret.—P. multiflorus, Poir., not Willd.) 5. Silhet. Fl. minute, purple, April and May; fr. Sept. and Oct.
  - jumiperinus, Wall. 5. Nepal. Fl. small, greenish; and fr. the whole vear.

- 7. barbata, Wall. 5 Penang. Introduced in 1840.—Has not fl.

Codimum, Rumph. (Spreng. syst. 3, p. 762. No. 3134.)

- chrysosticton, Rumph. (Spreng. syst. 3, p. 866.—Croton variegatum, L.;—Rosb. fl. ind. 3, p. 678;—J. Grah. Cat. B. pl. p. 182.)
   Moluccas. Fl. small, greenish-yellow, H. and R. S.; fr. R. S. but rare.
   —Root and bark acrid, exciting, if chewed, a burning sensation in the mouth. Leaves sweet and cooling. (Rumph.)
  - a. medium; yellow-green-leaved. (Rheed. 6, t. 61;—Rumph. 4, t. 25.)
  - β. crispum; crisp-leaved. (Rumph. 4, t. 26, f. 2.)

- γ· latifolium; painted-leaved. (Codiseum pictum, Hook. B. M. 58, t. 3051.)
- & viride; long and uniformly green-leaved.
- Gelonium, Roxb. (Spring. syst. 2, p. 445. No. 1793.)
  - bifarium, Roxb. (fl. ind. 3, p. 830;—Spreng. syst. 2, p. 465.)
     Native place uncertain. Fl. small, yellow; Feb. and March; fr. R. S.
  - lanceolatum, Roxb. (fl. ind. 3, p. 831;—Spreng. syst. 2, p. 465.)
     Bengal. (Serampore.)
     Fl. small, yellow, fragrant, H. S.; fr. C. S.
  - 3. fasciculatum, Roxb. (f. ind. 3, p. 832;—B. M. 60, t. 8231.—Suragada glabra, Roxb. MSS.) বৰবার্যালা Bunnaranga. 5 Circars. Bengal. (Serampore.) Fl. small, yellow, fragrant, H. S.; fr. R. S.

## RICINUS, L. (Spreng. syst. 3, p. 762, No. 3138.)

- 1. communis, L. (Spreng. syst. 3, p. 878;—Rosb. fl. ind. 8, p. 689;—
  J. Grah. Cat. B. pl. p. 183;—B. M. 48, t. 2209.—Ricinus speciosus,
  Burm. ind. t. 63, f. 2;—Rheed. 2, t. 32;—Rsmph. 4, t. 41.) (Sat)
  Bherunda. Palma Christi. Castor-oil plant. 5 Greece. N. Africa. India.
  Much cultivated. Seeds used by dyers to mix with colours and render them permanent. (J. Grah.) The oil often used in lamps, especially by the Natives. Leaves a favourite food of some silk worms.
- dicoccus, Roxb. (fl. ind. 3, p. 690;—Rumph. 4. t. 64.)
   Amboyna. Fl. small, greenish-yellow, H. S.; fr. R. S.
- 3. Mappa, L. (Rozb. fl. ind. 3, p. 690.—Mappa moluccana, Spreng. syst. 3, p. 878.—Acelypha Mappa, Willd;—Rumph. 3, t. 108.) 5 Moluccas. Fl. small, greenish, R. and C. S.; fr. 0.

## JAMIPHA, Kth. (Spreng. syst. 3, p. 8, No. 2404.)

- Yuquilla, Kth. (var. J. Loflingii, Kth.;—Spreng. syst. 3, p. 77.) 5 S.
   America. Introduced in 1841.
- 2. Manihot, Kth. (Spreng. syst. 3, p. 77;—B. M. 58, t. 3071.—Jatropha Manihot, L.;—Roxb. H. B. p. 69;—J. Grah. Cat. B. pl. p. 183.) Tapioca. Manioc, or Cassava-Plant. Fl. smallish, reddish. Has never fl. here, nor had it done so in H. C. G. in 1814, though introduced in 1794.—S. America.—The roots yield a flour (Cassava) of immense importance in S. America. This is obtained by crushing them, after the bark has been removed, and then straining off the water; after which the mass is gradually dried in pans over a fire. Tapiocs is a preparation from the same root. (Liadl.)
- JATROPHA, L. (Spreng. syst. 3, p. 8, No. 2403.)
  - 1. panduræfolia, Andr. (Spreng. syst. 3, p. 76;—B. M. 17, t. 604.) 5 Cuba. Fl. largish, scarlet; and fr. the whole year.
  - 2. Curcas, L. (Spreng. syst. 3, p. 77;—Roxb. fl. ind. 3, p. 686;—J. Grah. Cat. B. pl. p. 183.—Castiglionia lobata, Ruiz. and Par.) বার্ত্তের্বা Bagh-bharanda. 5 Cuba, S. America. Domesticated in India. Fl. small, green; and fr. the whole year. Seeds purgative and occasionally emetic. An expressed oil is obtained from them, which is reckoned a valuable external application in itch and herpes; it is also used, a

- little diluted, in chronic rheumatism. The varnish used by the Chinese for covering boxes is made by boiling this oil with oxide of iron. The leaves are considered rubefacient and discutient. The milky-juice is supposed to be detergent and healing, and dyes linen black. (Ainslie.)
- 3. multifida, L. (Spreng. syst. 3, p. 77;—Roxb. H. B. p. 69;—J. Grah. Cat. B. pl. p. 183;—Salisb. lond. t. 91.) Coral-plant. 5 S. America. Fl. small, red; and fr. the whole year.
- glandulifera, Roxb. (fl. ind. 3, p. 688.—J. glauca, Vahl.?) 5 India;
   locality uncertain. Fl. small, greenish-yellow; and fr. the whole
   year. Exudes a pale thin juice, which the Hindoos employ for removing films from the eyes. (Roxb.)
- 5. carnosa, Wall. 5 Bengal. H. C. G.

#### MACARANGA, Pet. Th.?

1. Rasburghii, Wall. (Osyris peltats, Rosb. 3, p. 755.) 5 Circars. All the young parts of this plant are covered more or less with soft resinous adhesive matter, smelling strongly of turpentine.

## ELEOCOCCA, Commers. (Eleococcus, Spreng. syst. 3, p. 763, No. 3140.)

- 1. Versicia, Ad. Juss. (Spreng. syst. 3, p. 884.—Vernicia montana, Lour.—Dryandra Vernicia, Corr.) 5 China, Cochin-China. Assam. Fl. largish, white, R. S. This and the next species are the Varnishtrees of the Chinese.
- 2. verrucosa, Ad. Juss. (Spreng. syst. 3, p. 884.—Dryandra cordata. Thunb. jap. p. 267, t. 27.—D. oleifera, Lam.;—Banks icon. Kümpf. t. 23.) 5 Japan. In H. C. G.? Fl.?

## ALEURITES. Forst. (Spreng. syst. 8, p. 13, No. 2473.)

1. trilobs, Forst. (Spreng. syst. 3, p. 147;—Rosb. fl. ind. 3, p. 629;
—J. Grah. Cat. B. pl. p. 181.—Camirium cordifolium, Gürtz. fr.
p. 195, t. 125. f. 2.—Juglans Camirium, Lour.—Camirium, Rumph. 2,
t. 58.) WEXTE Ukhrot. L. b. Moluccas, Malay Islands. South
Mahratta country about Belgaum. Bengal, (Serampore,) Assam. Fl.
small, greenish-white, H. S.; fr. Aug. Kernels eatable, tasting like
fresh walnuts. They yield by expression a large proportion of very
pure, palatable oil. (Rosb.)

# Anda, Pis. (Spreng. syst. 3, p. 6, No. 2380.)

1. Gomesii, Juss. (Spreng. syst. 3. p. 54.) L. 5. Brazil. Fl. small, whitish, somewhat sweet-scented, March and April; fr. nearly a year after. The seeds either eaten raw, or prepared as an electuary, act as a purgative. They yield an oil, which is said to be drying and excellent for painting. (A. St. Hilaire.)

## D. ACALYPHEE, Bartl.

## ACALYPHA, L. (Spreng. syst. 3. p. 762, No. 3139.)

ciliata, Forak. (Spreng. syst. 3, p. 879;—Rosb. fl. ind. 3, p. 676;—
Vahl. symb. 1. p. 77, t. 20.) ⊙ Guinea, Arabia, Bengal, (Serampore,)
extending northwards to the banks of the Jumna. Fl. small, greenish, R. S.; fr. C. S.

- 2. indica, L. (Spreng. syst. 3, p. 880;—Rosb. fl. ind. 3. p. 675;—J. Grah. Cat. B. pl. p. 186;—Rheed. 10, t. 81, 83.) ★★ Mookto-joori. © Peninsulas of India. Bengal, (Serampore,) &c. Fl. small, greenish, R. S.; fr. C. S. Root, bruised in hot water, cathartic. A decoction of the leaves laxative. (Rheed.) Cats are as much affected by the roots as by those of Valerian. (Nimmo.)
- 3. chinensis, Roxb. (A. ind. 3. p. 677.) ⊙ China. In H. C. G. fl.; and fr. the whole year. (Roxb.)

## ORDER LXXXIV.—EMPETRACEÆ, Lind. Nat. Syst. p. 117.

#### THE CROWBERRY TRIBE.

Small shrubs, of 3 genera, and 4 species: 2 from S. Europe; 1 from N. America; and from the Straits of Magellan.—Properties unknown.

\* Corema album, D. Don. 5 Portugal.

ORDER LXXXV.-FOUQUIERACEÆ, DC.-Lindl. Nat. Syst. p. 118.

Trees or shrubs, of 2 Mexican genera, each with 1 species.—Properties unknown.

\* Fouquiera formosa, H. B. and Kth. 5 Mexico.

## ORDER LXXXVI.—CELASTRACEÆ, Lindl. Nat. Syst. p. 119.

Trees or shrubs, sometimes climbing, referred by Lindl. (adding Lopphopetalum) to 26 genera. Of species, DC. pr. and Spreng. syst. enumerate 22 from S. America, Mexico and the W. Indies; 9 from N. America; 5 from Japan; 5 from Madagascar and Mauritius; 3 from Europe; 2 from N. Africa; 2 from the Canaries; 2 from Arabia; 2 from New Holland and the South Sea Islands; 1 from China; 1 from Caucasus; and 1 from Senegal. To these Wall. Cat. adds 1 for China, and 1 for Mauritius. S. Africa exhibits 60 forms, (Harvey.) and the E. Indies, according to our materials, 80. Of these, 28 belong to Euonymus; 3 to Lophopetalum; 33 to Celastrus; 3-4 to Elaodendron; 2 to Pleurostylia; — to Actegeton; 4 to Kurrimia; 4 to Microtropis; and 1 to Tralliana. Twenty-two inhabit the Himalayas; 12 the Khassya and Morung Mountains; 4 the Neelgherries; and the rest Ceylon, Malabar, Mysore, Travancore, Singapore, Penang, Prome, Tavoy, &c. Properties unimportant.

- EUONYMUS, L. (DC. pr. 2, p. 3;—W. and A. pr. 1, p. 160.) Spindle-Tree.
  - Hamiltonianus, Wall. (Cat.—E. atropurpurens, Rozb. fl. ind. 1, p. 627; ed. Carey, 2, p. 402;—not Jacq.)
     Deyrah Dhoon. Fl. small, greenish-white, March and April; fr. 0.
  - 2. glaber, Roxb. (fl. ind. 1, p. 628; ed. Carey, 2, p. 403.) 5 Chittagong. Fl. small, greenish-white, May; fr. 0.
  - 3. grossus, Wall. (Rosb. fl. ind.; ed. Carey, 2, p. 408.) 5 Nepal. Fl. small, greenish, June; fr. 0.
  - 4. echinatus, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 410;—B. M. 54, t. 2767;—Royle ill. t. 21.) 5 Nepal. 5-7000 ft. alt. Fl. small, green. In H. C. G. Fl.?

- 5. bullatus, Wall. (Cat.) Khassya Mountains. In H. C. G. Fl.?
- ? 6. grandiflorus, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 404;—pl. as. rar. 3, t. 254;—tent. fl. nep. t. 30.) 5 Deyrah Dhoon. Fl. large, white, Has been introduced into H. C. G. Fl.?
- CRLASTRUS, L. (DC. pr. 2, p. 5; -W. and A. pr. 1, p. 158.) Staff Tree.
  - 1. paniculata, Willd. (Roxb. fl. ind. 1, p. 621; ed. Carey, 2, p. 388;—DC. pr. 2, p. 6;—W. and A. pr. 1, p. 158;—J. Grah. Cat. B. pl. p. 38.—C. nutans, Roxb. fl. ind. 1, p. 623; ed. Carey, 2, p. 390;—DC. l. c.—C. Rothiana, Schult;—DC. pr. 2, p. 8.) 5 Neelgherries. The Ghauts. Hilly parts of the Concan. Mahableshwur. Rajmahl Hills. Shrinagur, Nathpur, Deyra Dhoon, Kheree Pass. Fl. small, greenish, March, April, and May; fr. July and August. An empyreumatic oil is extracted from the seeds, which, owing to a resinous principle, have a very hot and biting taste. This oil (oleum nigrum) has been employed successfully in Berriberri. (Herklots. Malcolmson.)
  - Wallichiana, Spreng. (syst. 5, index p. 150, under C. rigida, Wall.
     —W. and A. pr. 1, p. 159.—C. rigida, Wall.;—Rosb. fl. ind. ed Carey,
     p. 396.—C. buxifolia, Rosb. H. B. p. 18; not L.) 5 Travancore.
     Fl. small, yellowish-green, March and April; fr. Aug.
  - montana, Roxb. (fl. ind. 1, p. 620; ed. Carey, 2, p. 387;—DC. pr. 2, p. 9;—W. and A. pr. 1, p. 159;—J. Grah. Cat. B. pl. p. 38;—Wight icon. 2, t. 382.)
     Coromandel. Hills of the Deccan. Fl. small, greenish-white, March; fr. 0. Wood hard and durable. (Roxb.)
  - 4. emarginata, Willd. (DC. pr. 2, p. 8;—Roxb. ft. ind. 1, p. 620;—ed. Carey, 2, p. 387;—W. and A. pr. 1, p. 160.) 5 Coromandel. Fl. small, whitish-yellow, C. S.; fr. H. S. Makes good fences and fuel. (Roxb.)
  - dependens, Wall. (C. multiflora, Roxb. ft. ind. 1, p. 622; ed. Carey,
     p. 389;—not Lam.)
     Nepal. Fl. small, whitish-yellow, July and Aug.; fr. Jan.
  - trigyna, Lam. (DC. pr. 2, p. 6.—C. obtusifolia, Rosb. fl. ind. 1, p. 625; ed. Carey, 2, p. 393.)
     Mauritius. Fl. small, white, faintly sweet-scented, May and June; fr. 0.
  - 7. monosperma, Roxb. (fl. ind. 1, p. 625; ed. Carey, 2, p. 394.) 5 Silhet. Fl. small, greenish yellow.—In H. C. G. fl. April; fr. Oct. (Roxb.)
  - 8. robusta, Roxb. (fl. ind. 1, p. 626; ed. Carey. 2, p. 395.) L. 5 Silhet, Assam. Fl. small, greenish yellow.—In H. C. G. fl. Aug.; fr. April.
  - 9. rufa, Wall. (Rosb. fl. ind.; ed. Carey, 2, p. 397.) L. 5 Nepal, Kemaon. Fl. small, white. Introduced in 1841.
  - 10. stylosa, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 401.) 5 \( \subseteq \text{Nepal. Fl.} \) small, greenish white. Introduced in 1841.
  - buxifolia, L. (DC. pr. 2, p. 8;—B. M. 47, t. 2114;—not Roxb.)
     C. G. H. Fl. small, white, April and May; fr. 0.
  - 12. pyracantha, L. (DC. pr. 2, p. 8;—B. M. 29, t. 1167.) 5 C. G. H. Fl. smallish, white, April; fr. 0.

- 13. oblonga, Wall. 5 U Silhet. Fl. Dec.
- 14. pallida, Wall. Singapore. Fl. H. S.
- 15. tristyla, (C. trigyna, Roxb. fl. ind. 1, p. 624; ed. Carey, 2, p. 391; —not Lam.) 5 Moluccas. In H. C. G.?

  - 1. olivina, Gmel. (syst. 408.—Elæodendron orientale, Jacq. icon. rar. 1, t. 48;—DC. pr. 2, p. 10.—E. indicum, Gärtn. fr. 1, p. 274, t. 57, f. 5;—Lam. ill. t. 132;—Roxb. fl. ind. 1, p. 640; ed. Carey, 2, p. 433.) 5 Madagascar, Mauritius, where it is called Bois rouge, Bois d'olive. Has been fourteen years in the garden, without fl.
- Kurrimia, Wall. (Cat.—Lindl. Nat. Syst. p. 119.)
- ? 1. macrophylla, Wall. (Cat.—Itea macrophylla, Roxb. fl. ind.; ed. Carey, 2, p. 419.) 5 Khassya Mountains. Fl. smallish, yellow, fragrant. Has been introduced into H. C. G. Fl.?
- MICROTROPIS, Wall. (Cat.—Lindl. Nat. Syst. p. 119.)
- 1. garcinifolia, (M. discolor, Wall. Cat.—Euonymus garcinifolius, Roxb. H. B. p. 18;—fl. ind. 1, p. 628; ed. Carey, 2, p. 403.—E. lacer, Buch.; DC. pr. 2, p. 5.—Cassine discolor, Wall.;—Roxb. fl. ind.; ed. Carey, 2, p. 378.) 5 Khassya Mountains. Fl. small, yellow; and fr. the whole year. (Roxb.)
  - \* Euonymus dichotomus, Heyne. Courtallum, Colemala.—E. Goughii, Wight icon. 1, t. 215. 5 Neelgherries.—E. acutangulus, Wight. Neelgherries.—Lophopetalum Wightianum, Arn. 5 Malabar.—L. fimbriatum, Wight. Mergui.—Celastrus pyrea, Telf. Mauritius.—C. myrtifolia, L. 5 Jamaica.—C. quadrangularis, Schr. 5 Brazil.—C. mexicana, M. and S. 5 Mexico.—Elæodendron Roxburghii, W. and A.; Wight ill. 1, t. 71. 5 Courtallum, Deyra Dhoon.—Pleurostylia Wightii, W. and A. Peninsula of India.—P. Heynii, W. and A. Peninsula of India.—Cyrilla Antillarum, Michx. 5 W. Indies.—Ptelidium ovatum, Pet. Th. 5 Madagascar.

## SUB-ORDER. —HIPPOCRATEËÆ, Lindl. Nat. Syst. p. 120.

Arborescent or climbing shrubs, referred to 6 genera. Of their species, DC. pr. and Spreng. syst. assign 31 to S. America, Mexico and the W.

Indies; 3 to Guinea; 1 to Senegal; 2 to Madagascar; 2 to Timor; and 1 to China. The E. Indian forms amount to 27; 8 of *Hippocratea*; and 19 of *Salacia*. Eight of these inhabit Nepal, Assam, the Khassya, Morung, and Monghir Hills; the rest are found in Java, Cochin-China, Penang, Singapore, Tavoy, Ceylon and Malabar.

"The fruit of Salacia (Tonsella) pyriformis, a native of Sierra Leona, is eatable. It is about the size of a Bergamot Pear; its flavour is rich and sweet. (Hort. trans.) The nuts of Hippocratea comosa are oily and sweet. Swartz. (Lindl.)

HIPPOCRATRA, L. (DC. pr. 1, p. 567; -W. and A. pr. 1, p. 103.)

- 1. indica, L. (DC. o. c. p. 568;—W. and A. pr. 1, p. 104;—Roxb. Corom. 2, t. 130;—A. ind. 1, p. 165; ed. Carey, 1, p. 169;—J. Grah. Cat. B. pl. p. 27.) L. 5 Pathucottah. Gingie-Hills. Banks of the Quoina river, above Parr bridge. Along the Ghauts. Monghir. Fl. minute, greenish, April; fr. March.
- obtusifolia, Roxb. (fl. ind. 1, p. 166; ed. Carey. 1, p. 170;—DC. pr. 1, p. 569;—W. and A. pr. 1, p. 104.—Salacia lævigata, Wight; in Hook. Bot. Misc. 3, p. 295, suppl. t. 36. not DC.)
   L. 5 

  Madura, Tanjore. Fl. small, green, Feb., March and April; fr. March.
- arborea, Roxb. (Corom. 3, t. 205; fl. ind. 1, p. 167; ed. Carey, 1, p. 171;—DC. pr. 1, p. 569.)
   Chittagong, Tippera. Morung. Assam. Fl. small, greenish-yellow, May, June and July; fr. March and April.
- 4. viminea, Wall. (Salacia? viminea, Wall. Cat.) Penang. Introduced in 1840.
- SALACIA, L. (DC. pr. 1, p. 570; -W. and A. pr. 1, p. 104.)
  - prinoïdes, DC. (o. c. p. 571; —W. and A. o. c. p. 105; —J. Grah. Cat. B. pl. p. 27; —Wight. icon. 2, t. 321.—Johnia coromandeliana, Roxb. fl. ind. 1, p. 169; ed. Carey. 1, p. 173; —DC. l. c.) 5 Amherst, Moulmein, Attran and Irawaddi river-banks. Coromandel. The Corinda side of the Hill above Kandalla tank. Common about Malabar and Amboolee, Salsette. Assam. Fl. greenish, small, C. S.; fr. H. S.
  - Roxburgii, Wall. (Cat.—W. and A. pr. 1, p. 105.—Johnia salacioïdes, Roxb. fl. ind. 1, p. 168; ed. Carey. 1, p. 172;—DC. pr. 1, p. 571.)
     L. 5 Chittagong, Tippera. Assam. Fl. small, greenish-orange, H. S; fr. R. S.
  - 3. longifolia, Wall. (pl. as. rar. 3, t. 278.) L. 5 Khassya Mountains. Nepal. Fl. small, greenish, H. S; fr. 0.
  - 4. celastrifolia, Wall. (Rept.) In H. C. G. Fl.?
  - \* Hippocratea Arnottiana, Wight. ill. 1, t. 46, f. 1, t. 47. A. 5 Malabar.

    —H. Grahamii, Wight. 5 Bombay.—H. lanceolata, Buch. Goalpara.

    —H. obcordata, Lam. 5 W. Indies.—H. ovata, Lam. 5 S. America.—Salacia Brunoniana, W. and A. Peninsula of India.—S. reticulata, Wight. 5 Ceylon.—S. verrucosa, Wight. 5 Mergui.—

S. multiflora, Wight. 5 Mergui. S. pomifera, Wall.; Wight. icon. 1, t. 55. Peninsula of India.—S. oblonga, Wall.; Wight. ill. 1, t. 47. B.; icon. 1, t. 97. Peninsula of India. Trincomalee.—Anthodox paniculatus, Mart. 5 Rio Janeiro.—A. ellipticus, Mart. 5 Rio Janeiro. —Tonsella scandens, Vahl. 5 - Guiana.

## SUB-ORDER.—TRIGONIEÆ, Lindl. Nat. Syst. p. 120.

Sarmentose climbing shrubs, all natives of S. America, referred to one genus containing 5 species.—Properties unknown.

\* Trigonia villosa, Aubl. 5 Cayenne.—T. mollis, DC. 5 Brazil.—T. lævis, Aubl. 5 Guiana.

## ORDER LXXXVII.—STAPHYLEACEÆ, Lindl. Nat. Syst. p. 121.

#### THE BLADDER-NUT TRIBE.

Trees or shrubs, referred to 2 genera, containing 12 species: 4 from S. America, Mexico and the W. Indies; 1 from N. America; 1 from Japan; and 1 from Europe. Five are from the B. Indies; viz. 1 (Staphylea) from the Himalayas; and 4 (Turpinia) from Nepal, Silhet, Singapore, and Martaban .- Properties unknown.

Turpinia, Vent. (DC. 2, p. 3;—W. and A. pr. 1, p. 156.)

- 1. pomifera, DC. (l. c.—Dalrymplea pomifera, Rosb. fl. ind. 1, p. 633; ed. Carey, 2, p. 422;—Corom. 3, t. 279.—Canarium? Sajiga, Buck. Herb.) L. 5 Assam. Fl. small, vellowish-white, March and April; fr. Sept. and Oct.
  - \* T. nepalensis, Wall. 5 Mountains of the Peninsula and Nepal.—T. paniculata, Vent. 5 St. Domingo. Mexico.

ORDER LXXXVIII.—MALPIGHIACEÆ, Juss.—Lindl. Nat. Syst. p. 121.

#### THE BARBADOES CHERRY TRIBE.

Small trees or shrubs, sometimes climbing, referred by Lindl. to 27 genera. Of species DC. pr., Spreng. syst. and B. Reg. enumerate 175 for S. America, Mexico and the W. Indies; I for Sierra Leona; I for S. Africa; I for Madagascar; 1 for Arabia; 1 for China, and 1 for Timor. In the E. Indies have been found 20 species; 3 of Hiptage; 11 of Hirea; - of Tarrietia; 5 of Ancistrocladus; and 1 of Platynema. To these Wight adds Malpighia? heteranthera, (Ill. 1, p. 138, t. 49.) China? Two have been found in Nepal; 3 on the Khassya Mountains; 2 in Bengal; 2 in Ceylon, and the rest in the two Peninsulas of India and Java. Properties almost unknown.

MALPIGHIA, L. (DC. pr. 1, p. 577.)

- 1. coccifera, L. (DC. pr. 1, p. 578;—B. Reg. 7, t. 568;—Jacq. icon. rar. 3, t. 470;—J. Grah. Cat. B. pl. p. 28.) 5 W. Indies. Fl. smallish, white, with a faint tinge of rose. H. and R. S.; fr. C. S.
- 2. punicifolia, DC. (pr. 1, p. 578.) 5 W. Indies. Introduced in 1840.
- 3. glabra. L. (DC. pr. 1, p. 578;—B. M. 21, t. 813;—B. Cab. 6.533.) W. Indies. Fl. C. S.

BYRSONIMA, Rich. (DC. pr. 1, p. 579.)

- lucida, DC. (l. c. p. 580.—Malpighia lucida, Swz.—B. M. 51, t. 2462;—Rosb. H. B. p. 34.)
   W. Indies. Fl. smallish, white, then rose-coloured, at last scarlet, March, April and May; fr. C. S.
- 2. pulcherrima, Wall. L. 5 In H. C. G.—S. America?

GAUDICHAUDIA, H. B. and Kth. (DC. pr. 1, p. 584.)

- 1. guaranitica, St. Hil. (DC. l. c.) 5 UBrazil. Introduced in 1841. Hiptage, Gärtn. (DC. pr. 1, p. 583;—W. and A. pr. 1, p. 107.)
  - 1. Madablota, Gärtn. (fr. 2, p. 169. t. 116. f. 4;—DC. l. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 28;—Wight ill. 1, t. 50.—Gärtnera racemosa, Rosb. ## SUB-ORDER.—ERYTHROXYLEÆ, Kth.—Lindl. Nat. Syst. p. 122.

Shrubs or trees, of 1 genus, and 81 species: 19 natives of S. America, Mexico and the W. Indies; 6 of Madagascar, Bourbon, and Mauritius; and 6 of the E. Indies. Of the latter, 1 has been found in Ceylon, 1 on the Khassya Mountains; and the rest in Courtallum.

"Erythroxylon Coca is a plant much used by the miners of Peru for its remarkable power in stimulating the nervous system, in which respect it much resembles opium. Its leaves are chewed with a small mixture of finely powdered chalk. No effects that have been ascribed to the immoderate use of opium are exceeded by what seems the consequence of chewing the Coca-leaf." (Lindl.)

ERYTHROXYLON, L. (DC. pr. 1, p. 573.)

- 1. monogynum, Roxb. (Corom. 1, t. 88; fl. ind. 2, p. 449.—E. sideroxyloïdes, Roxb. fl. ind. 1. c. excl. ## ORDER LXXXIX.—PORTULACACEÆ, Lindl. Syst. 1, p. 123.

## THE PURSLANE TRIBE.

Succulent herbs, sometimes shrubs or under-shubs, referred by Lindl. to 11 genera. Of the species according to DC. pr., Spreng syst., B. M. and B. Reg. 43 are from S. America, Mexico and the W. Indies; 8 from N. America; 4 from Arabia; 4 from Siberia; 2 from Europe; 1 from Guinea; 1 from the Society Islands; and 1 from St. George's Island. Twenty species inhabit S. Africa, (Harvey.) and 13 the E. Indies. Of the latter, 7 belong to Portulaca; 5 to Trianthema; and 1 to Talinum;—3, however, are common to other parts of the world. They are all found in the Peninsula of India, Java, and Bengal, with the exception of 2, discovered at Monghir and Delhi. Talinum Strictum, Wall. Cat. is perhaps not different from T. cuneifolium, Willd.

Properties of no importance. The use of the common Purslane is well known. Portulacaria afra, Jacq. is greedily eaten by the Elephants in S. Africa.

ORDER XC.—SILENACEÆ, Lindl. Nat. Syst. p. 124.

#### THE DIANTHUS TRIBE.

Herbs, sometimes undershrubs, referred by Lindl. to 12 genera. According to DC. pr. Spreng. syst, B. M. and B. Reg. about 200 species are natives of Europe; 32 of the Levant; 32 of Tauria and Caucasus; 20 of N. Africa; 14 of Siberia; 12 of N. America; 5 of China and Japan; 5 of Mexico; 4 of Tartary; 2 of Persia; 2 of Arabia; 2 of Altai; 1 of the Canaries; and 1 of the Straits of Magellan. Thirty species (including some Cerastia) have been found in S. Africa, (Harvey,) and 23 in the E. Indies. Of the latter, 1 belongs to Dianthus; 1 to Gypsophila; 1 to Acosmia; 1 to Cucubalus; 9 to Silene; and 10 to Lychnis; but of these, 7 are common to other parts of the world. With the exception of Gypsophila Vaccaria, Sm.,

also growing in the plains, they are all natives of the Himalayas, Kunawur, and Cashmere.—Properties unimportant.

DIANTHUS, L. (DC. pr. 1, p. 355.) Pink.

## ORDER XCI.—ALSINACEÆ,—Lindl. Nat. Syst. p. 125.

#### THE CHICKWEED TRIBE.

Herbs, annual or perennial, by Lindl. referred to 32 genera. Of these, according to DC. pr. and Spreng. syst. about 140 species inhabit Europe; 44 Siberia; 30 S. America, Mexico and the W. Indies; 30 N. America; 30 Tauria, Caucasus and Dahuria; 12 the Levant; 8 N. Africa; 4 Persia; 4 Greenland; 2 the Straits of Magellan; 1 Madeira; 1 Bourbon; 1 Altai; 1 Arabia; 1 Japan; 1 the Sandwich Islands; and 1 Melville Island. S. Africa contains several species of Cerastium, all of which are common to Europe, and probably introduced from thence, (Harvey.) In the E. Indies 24 have been discovered; viz. 1 of Alsinella, 2 of Cherleria, (D. Don.); 7 of Arenaria; 4 of Cerastium; 1 of Brachystemma; 7 of Stellaria; 2 of Leucostemma; and 1 of Larbrea;—four of these are common to Europe. Excepting Stellaria tetragona, Bl., (Java) and Cerastium cordifolium, Roxb. (Bengal,) all the rest are natives of the Himalayas and the

Neelgherries. One species, (Brachystemma calycinum, D. Don.) has also been found on the Khassya Mountains.—" Properties of the order none." (Lindl.)

BUFFONIA, L. (DC. pr. 1. p. 388.)

1. annua, DC. (l. c.—B. tenuifolia, Lam.;—E. B. 19, t. 1313.) ⊙ England. France. Fl. minute, white, Feb. and March; fr. March and April.

     t. 789.) ⊙ Europe.—Fl. small, white, Feb. and March.
  - 3. cordifolium, Roxb. (fl. ind. 2, p. 458.) ⊙ Bengal.—Fl. and fr. C. S. (Roxb.)

STELLARIA, L. (DC. pr. 1, p. 396; -W. and A. pr. 1, p. 42.)

- 1. media, Sm. (DC. l. c.;—W. and A. l. c.;—E. B. 8, t. 537.) ⊙ Europe, Neelgherries.—Fl. small, white, C. S.
- 2. triandra, Wall. O Nepal.

## ORDER XCII.—TAMARICACEÆ.—Lindl. Nat. Syst. p. 126.

#### THE TAMARISK TRIBE.

Shrubs, occasionally perennial herbs, referred to 3 genera. Of these, 3 species are natives of Dahuria; 4 of Siberia; 2 of Astrachan; 2 of Arabia; 3 of Europe; 1 of N. Africa; 1 of the Canaries; 1 of Senegal; 1 of Persia; and 1 of China. In S. Africa only Tamarix orientalis, Forsk. which also is a native of Arabia and Persia, has been found. The E. Indies exhibit 6 species, (one of which is a variety of Tamarix gallica, L.) viz. 3 of Tamarix; 1 of Trichaurus; and 2 of Myricaria. Four of these inhabit the plains of the Peninsula and Hindoosthan, the latter 2 were found near Cashmere, and in Kunawur.

Bark slightly bitter and astringent. (DC.) Ehrenberg found that the Manna of Mount Sinai is produced by a variety of Tamarix gallica.

This substance being analysed by Mitscherlich, was found to contain no crystallisable Mannite, but to consist wholly of pure mucilaginous sugar. Lindl. from Ann. des scien. 12,68. (1827.)

TAMARIX, L. (DC. pr. 3, p. 95; W. and A. pr. 1, p. 40.)

ORDER XCIII.—ILLECEBRACEÆ.—Lindl. Nat. Syst. p. 127.

#### THE KNOT-GRASS TRIBE.

Herbs or half-shrubby plants, by Lindl. referred to 39 genera. Of these, DC. pr. and Spreng. syst. assign about 40 species to Europe; 22 to S. America, Mexico and the W. Indies; 10 to N. America; 8 to N. Africa; 6 to the Canaries; 3 to Guinea; 3 to Arabia; 1 to Abyssinia; 1 to Senegal; 1 to Madagascar; 1 to Persia; 1 to Dahuria; 1 to Siberia; 1 to China; 2 to New Holland; and 1 to Van Diemen's Land. Excluding Scleranthus annuus, S. Africa exhibits 49 species. In the E. Indies about 17 forms have been discovered; viz. 1 of Herniaria. (Cashmere.) 1 of Hapalosia; (common;) 1 of Illecebrum; (Kunawur;) 4 of Polycarpæa; (Ceylon, Peninsula of India, Silhet;) 2 of Drymaria; (Himalayas, Khassya Mountains, Dindigul, Taong-Dong, Java;) and 8 of Mollugo; (Ceylon, both Peninsulas, Bengal, Nepal, Cochin\*China.) A few of them are common to other parts of the world.

"A trace of astringency pervades the order, and is the only sensible property that it is known to possess." (Lindl.)

HAPALOSIA, Wall. (W. and A. pr. 1, p. 358.)

ORDER XCVI.—RUTACEÆ, DC.—Lindl. Nat. Syst. p. 130.

#### THE RUE TRIBE.

Trees or shrubs, very rarely herbaceous plants, by Lindl. referred to 44 genera. Of these, DC. pr. and Spreng. syst., assign about 48 to New Holland and the South Sea Islands; 44 to S. America, Mexico and the W. Indies; 12 to Europe; 3 to the Levant; 2 to Tauria and Caucasus; 2 to Dahuria; 1 to Siberia; 2 to Persia; 1 to the Canaries; 2 to N. Africa; and 1 to Mauritius. One hundred and ten species inhabit S. Africa, (Harvey.) In the E. Indies have been found 1 Ruta; 1 Aplophyllum; 2 Cyminosma; 1 Evodia; (Moluccas, DC.) and 1 Dictamnus. One Cyminosma stretches from China, Cochin China, Java and Ceylon, through both Peninsulas of India, up to the Khassya Mountains. The rest are natives of Nepal and the Himalayas.

This order in general, possesses sharp, aromatic, bitterish, tonic or intensely stimulant properties. The common Rue is well known on account of its very strong and unpleasant smell. It is a powerful stimulant in diseases of the uterus. "Ruta angustifolia, Pers., said to be common in Persia, Cabul, and Tinkaboon, is given in India as a substitute for R. graveolens, L., and considered emenagogue. R. albiflora is employed as a stimulant in the hills." (Royle.) Dictamnus albus, L., whose bitter aromatic root was formerly used as a sudorific, is now nearly obsolete. Its abundance of volatile oil is so great, that in hot weather the surrounding atmosphere may be lighted by a candle. The Diosmeæ of S. Africa are remarkable for their powerful and offensive smell, more especially Barosma crenulata, Willd. (Bucku,) whose leaves have been much extolled in wounds, rheumatism, spasms, and diseases of the bladder. The American species are in many instances powerfully febrifugal, f. ex. Galipea Cusparia, St. Hil.; Evodia febrifuga, St. Hil.; Ticorea febrifuga, St. Hil.; Hortia brasiliana, Vand, &c.

RUTA, L. (DC. pr. p 709; -W. and A. pr. 1, p. 146.) Rue.

## ORDER XCVII.—ZYGOPHYLLACEÆ.—Lindl. Nat. Syst. p. 133.

#### THE BEAN-CAPER TRIBE.

Herbs, under-shrubs, shrubs, or trees, referred by Lindl., (including Aitonia) to 18 genera. Of these, DC. pr. and Spreng. syst., enumerate 13 species for S. America, Mexico and the W. Indies; 1 for N. America; 4 for Europe; 10 for N. Africa; 1 for Senegal; 1 for Sierra Leona; 1 for Arabia; 1 for Persia; 1 for Siberia; 3 for the Levant; and 3 for New Holland and the South Sea Islands. The S. African forms amount to 40, (Harvey); and the E. Indian ones to 6. Of the latter, 1 belongs to Tribulus, (both Peninsulas of India, Bengal, Monghir.) 1 to Biebersteinia, (Kunawur;) 1 to Peganum, (Peninsula of India, Agra;) 1 to Zygophyllum? (Taong-Dong;) and 1 to Melianthus? (Kemaon.)—Biebersteinia odora is also common to Altai, and Peganum Harmala to Europe and the Levant.

"The woody plants of the order are remarkable for the extreme hardness of their wood. All the Guaiacums are well known for their exciting properties; the bark and wood of Guaiacum sanctum and officinale have a somewhat bitter and acrid flavour, and are principally employed as sudorifics or alteratives; they contain a particular matter, often designated as

resin or gum-resin, but which is now considered a distinct substance, called Guaiacine." (DC. Lindl.)

TRIBULUS, L. (DC. pr. 1, p. 703;—W. and A. pr. 1, p. 144.) Caltrops.

America.—Guaiacum sanctum, L. 5 Equinoctial America.

## ORDER XCVIII.—XANTHOXYLACEÆ.—Lindl. Nat. Syst. p. 135.

Trees or shrubs, sometimes climbing, by Lindl. referred to 15 genera. Of these, DC. pr. and Spreng. syst. assign 22 species to S. America, Mexico and the W. Indies; 4 to N. America; 2 to Senegal; 1 to Madagascar; 6 to Mauritius and Bourbon; 1 to Abyssinia; 4 to China; 2 to Japan; and 2 to New Holland. S. Africa exhibits 4 species, (Harvey.) and the E. Indies 37. Of the latter 2-3 belong to Brucea; 22 to Xanthoxylum; 1 to Blackburnia? (Roxb.); 1 to Lacuris; 3-4 to Toddalia; 4 to Ailantus; 1 to Eurycoma; and 1 to Ptelea? (Lour.); but two are also natives of China. With the exception of 11 which inhabit Nepal, the Khassya and Morung Mountains, the rest are nearly all natives of the Peninsulas of India, the Moluccas and Cochin China. The Javanese species, including Ruteæ, are stated by Blume to be 14, (Wight;) but we are not acquainted with their generic distribution.—To the Mauritius and Bourbon Xanthoxylaceæ, Wall. Cat. adds 2 species of Xanthoxylon.

" Nearly all the species of this order are aromatic and pungent—Xanthoxylon Clava Herculis and fraxineum are powerful sudorifics; they are remarkable, according to Barton, for their extraordinary power in exciting salivation, whether applied immediately to the gums or taken internally; two plants are reputed to have been used successfully in paralysis of the muscles of the mouth and in rheumatic affections. (DC.)—Xanthoxylon hyemale is employed as a remedy for pain in the ear, for which purpose the powder of its bark is made use of.—Brucea antidysenterica contains a poisonous principle, called Brucia, which is similar in its effects to Strychnia, but 12 or 16 times less energetic than that alkali. Turner. (Lindl.) Brucea, J. S. Mill. (DC. pr. 2, p. 88.)

ORDER XCIX.—GERANIACEÆ, DC.—Lindl. Nat. Syst. p. 137.

#### THE GERANIUM TRIBE.

Herbs, under-shrubs or shrubs, by Lindl. referred to 10 genera. Of these, according to DC. about 50 species (Geraniums and Erodiums) in-

habit Europe; 4 Siberia; 5 Caucasus and Tauria; 2 Iberia; 5 Dahuria; 2 the Levant; 9 N. Africa; 2 Teneriffe and Madeira; (1 Geranium; 1 Pelargorium) 2 St. Helena; (P.) 11 New Holland and Van Diemen's Land; (9 G. and E.; 2 P.) 1 Arabia; (E.) 2 N. America (E.); 14 S. America; (2 Rhynchothecas; the rest G. and E.) and 1 Tristan d'Acunha. (P.) In S. Africa have been found 350 species; viz. 8 Monsonias, and a few Geraniums and Erodiums, the rest all Pelargoniums. (Harvey.) The E. Indian forms amount to about 14, (13 of Geranium, and 1 of Erodium.) With the exception of one species from the Peninsula of India, they are all natives of the Himalayas. One of them, Geranium eriostemon, Fisch, is also an inhabitant of Dahuria.

"An astringent principle and an aromatic or resinous flavour are the characteristics of this order.—Some of the Pelargoniums are acidulous, but this genus is chiefly known as an object of garden culture, for which its great beauty, and the facility with which the species or supposed species intermix, render it well adapted. (Lindl.) This intermixture, so unpleasant to those who wish to see plants distinct in their characters, has fully justified W. Curtis's prophecy (in 1797), "that in a few years, from the multiplication of seminal varieties, springing from seeds casually or perhaps purposely impregnated with the pollen of different sorts, such a crop will be produced as will baffle all our attempts to reduce to species, or even regular varieties."

Monsonia, L. fil. (DC. pr. 1, p. 638, sect. 3.)

- 1. pilosa, Willd. (DC. l. c.—M. speciosa, Swt. ger. t. 77.) 4. C. G. H. Fl. large, greenish-white, with a red eye, March.

## ORDER C.—BALSAMINACEÆ.—Lindl. Nat. Syst. p. 138.

#### THE BALSAM TRIBE.

Succulent, herbaceous, generally annual plants, sometimes under-shrubby, referred to 2 or 3 genera. Of these DC. pr. mentions; 1 species for Europe; 1 for Siberia; 2 for N. America; 1 for Madagascar; 2 for China; and Harvey, 2 for S. Africa. The rest have all been found in the E. Indies, where, according to our materials, they amount to 74 species of *Impatiens*; and 2 of *Hydrocera*. Several have, however, been found lately in Ceylon, Courtallum, and the Shevagery Hills.—They are eminently alpine plants, luxuriating in moisture and a moderate temperature, especially during the rainy season, and they, therefore, chiefly inhabit mountains and hills from the Himalayas down to Ceylon, and the Malacca Peninsula—Excepting Hydrocera angustifolia, Bl. we are unacquainted with the Javanese forms of the order. (See Wight. ill. 1, p 156, 160.)

"Chiefly remarkable for the elastic force with which the valves of the fruit separate at maturity, expelling the seeds." (*Lindl.*)

SUB-ORDER.—TROPÆOLEÆ, Juss.—Lindl. Nat. Syst. p. 139.

#### THE NASTURTIUM TRIBE.

Trailing or twining herbs, of 3 genera, and according to DC. pr., B. M. and B. Reg., 16 species, all Natives of Peru, Chili, New Granada, and Brazil.—Properties unimportant.

TROPEOLUM, L. (DC. pr. 1, p. 683.) Nasturtium.

- majus, L. (DC. l. c.;—B. M. 1, t. 23;—Rosb. H. B. p. 32;—J. Grah. Cat. B. pl. p. 247.) Great Indian Gress. ⊙ Peru. Fl. large, orange, crimson-streaked, fragrant, C. S; fr. 0.—Fleshy fruit acrid, possessing the properties of Cress.
- \* T. minus, L.; B. M. 3, t. 98. © Peru.—T. aduncum, Sm.; B. Reg. 9, t. 718. (T. peregrinum, B. M. 33, t. 1351.) © Peru, Mexico.—T. pentaphyllum, Lam.; B. Reg. 18, t. 1547; B. M. 59, t. 3190. 4. Buenos Ayres.—T. Moritzianum, Klotzch.; B. M. 67, t. 3844. © Cumana.—Magallana aparrifolia, Cav. © S. America. Tuberous roots, in excellent condition, of Tropseolum tricolor, Swt.; and tuberosum, Ruiz. and Pav.; have been tried here, but without success.

ORDER CI.—OXALIDACEÆ.—Lindl. Nat. Syst. p. 140.

#### THE WOODSORREL TRIBE.

Herbs, under-shrubs, rarely trees, by Lindl. referred to 5 genera. Of these, DC. pr. and Spreng. syst. enumerate about 100 species for S. America; 5 for N. America; 2 for Europe; 1 for Iberia; 1 for Bourbon;

2 for New Holland; 1 for Terra del Fuego; and 1 for the Falkland Islands. S. Africa is inhabited by 110 species, (*Harvey*.) In the E. Indies have only been found 2 forms of *Averrhoa*; (Moluccas, Peninsulas of India, Bengal, Assam, &c.) 2—4 of *Biophytum*; (All India, but especially Courtallum, the Neelgherries, Ceylon, and Monghir,) and 1 of *Osalis*, which is a native of most parts of the world.

"Acidity is the predominating characteristic of this order. "Averrhoa Bilimbi and the pinnated Oxalis called Biophytum have sensitive leaves. Their foliage is generally acid, so that they are fit to supply the place of sorrel.—Oxalis Acetosella, (Common Woodsorrel,) contains pure oxalic acid." (Lindl.)

AVERRHOA, L. (DC. pr. 1, p. 689; W. and A. pr. 1, p. 141.)

- Carambola, L. (DC. l. c.; W. and A. l. c.; Rosb. fl. ind. 2, p. 450; J. Grah. Cat. B. pl. p. 34; Rheed. 3, t. 43, 44; Rumph. 1, t. 35.) 5 Moluccas. Cultivated. Fl. small, purplish-red, H. and R. S.; fl. C. S.
  - a. acida; কর্মার Kumurunga. Ripe fruit cooling, used in fevers. β. dulcis; মিঠা কামরলা Mita-Kamrunga. Ripe fruit sweet.
- 2. Bilimbi, L. (DC. pr. 1, p. 689;—W. and A. pr. 1, p. 142;—Rosb. fl. ind. 2, p. 451;—J. Grah. Cat. B. pl. p. 34;—Rheed. 3, t. 45, 46;
  —Rumph. 1, t. 36.) [All Bilimbi. 5 Moluccas. Cultivated. Fl. small, reddish-brown, H. S.; fr. R. S. Fruit pickled, or preserved with sugar.

# ORDER CII.—CORIARIACEÆ.—Lindl. Nat. Syst. p. 141.

Shrubs of 2 genera; one (Coriaria) containing, according to DC. pr., 7 species: 1 from Europe and N. Africa; 4 from Peru; 1 from Mexico; and 1 from New Zealand. The other genus, Ercilla, Ad. Juss. we are not acquainted with. The E. Indies exhibit but one species.

- "Coriaria myrtifolia is used by dyers for staining black. Its fruit is poisonous. (DC.) Its leaves have been used to adulterate Senna, and have produced fatal consequences." (Fee. Lindl.)
- CORIARIA, L. (DC. pr. 1, p. 739.)
  - 1. nepalensis, Wall. (pl. as. rar. 3, t. 289.) 5 Mountains near Deyra Dhoon, Kemaon, Mussooree. alt. 5-7000 f. Has been cultivated

here for more than fourteen years, without fl. Fruit eaten in the hills. (Royle.)

\* C. atropurpurea, Moç. and Sessé. 5 Mexico.

ORDER CIII.-SURIANACEÆ.-Lindl. Nat. Syst. p. 142.

The only true species of this order is

\* Suriana maritima, L. 5 Sea-coasts of India.—Properties unknown.

ORDER CIV.—LIMNANTHACEÆ.—Lindl. Nat. Syst. p. 142.

The only species of this order, besides Flörkea palustris, Nutt. a N. American plant, is

\* Limnanthes Douglassii, R. Br.; B. Reg. 20, t. 1673. O California.

ORDER CV.—ROSACEÆ.—Lindl. Nat. Syst. p. 143.

THE ROSE TRIBE.

Herbs or shrubs, excluding Rhinanthera, and adding Hotelia, by Lindl. referred to 35 genera. Of these, DC. pr. and Spreng. syst. assign about 154 species for Europe; 100 for N. America; 44 for Siberia; 30 for S. America, Mexico and the W. Indies; 30 for China and Japan; 12 for Tauria and Caucasus; 9 for the Levant; 8 for Dahuria; 5 for Greenland; 5 for the Straits of Magellan; 4 for Bourbon and Mauritius; 3 for New Holland and the Society Islands; 3 for Java; 8 for Melville Island; 2 for Persia; 1 for Iberia; 2 for Abyssinia; 1 for St. Helena; 1 for Luzon; and 1 for Terra Nova Island.—In S. Africa have been found I Geum; 1 Potentilla; 1 Agrimonia, and several species of Rubus, (Harvey.)—According to our materials, which, in general, do not touch Java, 117 Rosaceæ inhabit the E. Indies; viz. of Rose, 12 (Nepal; a few from the Khassya Mountains, the Neelgherries and the banks of the Irrawaddy); of Rubus 38, (Himalayas, Khassya Mountains, Neelgherries, Moluccas); of Dalibarda 1, (Nepal); of Fragaria 4, (Gosain Than. Deyra Dhoon. Oude. Java. Penang); of Potentilla 38; (Nepal. Khassya Mountains. Neelgherries. and 1 Ceylonese; 3 also common to Siberia, P. cataclines, multifida and bifurca); of Sibbaldia 2; (Himalayas, 1 of them, S. procumbens, L. also a

native of Europe and Siberia); of Geum 3, (Himalayas); of Sieversia 1, (Himalayas); of Agrimonia 2; (one Nepal; the other, a variety of A. Eupatorium, Ceylon); of Spiræa 11; (Himalayas. Two of them common to Kamtschatka and Japan); of Hotelia 1, (Himalayas, Japan); of Schizonotus 1, (Himalayas); and of Neillia 3, (Nepal, Khassya Mountains.)

"No Rosaceous plants are unwholesome; they are chiefly remarkable for the presence of an astringent principle, which has caused some of them to be reckoned febrifuges.—One of the most powerful anthelmintics in the world, an Abyssinian plant, known to botanists by the name of Brayera anthelminthica, Kth. belongs to this family. Upon the authority of Brayer, after whom is it named, two or three doses of the infusion are sufficient to cure the most obstinate cases of tænia." (Lindl.)

Rosa, L. (DC. pr. 2, p. 597; -W. and pr. 1, p. 301.)

- involucrata, Roxb. (f. ind. 2, p. 513;—DC. pr. 2, p. 602;—B. Reg. 6, t. 739;—Wight. icon. 1, t: 234.)

SUB-ORDER.—POMEÆ, Lindl. Nat. Syst. p. 145.

#### THE APPLE TRIBE.

Trees and ahrubs, referred (including Hesperomeles and Stranvæsia) by Lindley to 18 genera. Of these, according to DC. pr. and B. Reg., about 30 species have been found in Europe; 30 in N. America; 12 in China and Japan; 7 in S. America and Mexico; 5 in Siberia; 5 in the

Levant; 3 in N. Africa; 2 in Tauria and Caucasus; 2 in Persia; 1 about Astrachan; 1 in Madeira; and 1 in the Sandwich Islands. In the E. Indies, excluding Java, 29 species have been discovered, viz. 1 of Cratagus; (Nepal.) 1 of Stranvæsia; (Nepal.) 1 of Rhaphiolepis; (China; scarcely found in India,) 6 of Photinia; (Nepal. Khassya Mountains, Neelgherries,) 1 of Eriobotrya; (Nepal.) 8 of Cotoneaster; (Nepal, 1 from the Neelgherries,) 10 of Pyrus; (Himalayas, Khassya Mountains, Taong-Dong, Assam.) and 1 of Cydonia, (Nepal.) Cydonia vulgaris, Pers. is only cultivated in Hindoosthan.

"The fruit is an article of food, and the flowers for their beauty, are the chief peculiarities of this order, which consists exclusively of trees and bushes, without any herbaceous plant." (Lindl.)

CRATEGUS, L. (DC. pr. 2, p. 626.)

- 1. crenulata, Roxb. (f. ind. 2, p. 509;—DC. l. c.) 5 Nepal, Kemaon. Fl. largish, white, April and May; fr. Aug.
- RHAPHIOLEPIS, Lindl. (DC. pr. 2, p. 680;—Lindl. B. Reg. under t. 1956.
  - 1. indica, Lindl. (DC. l. c.—Cratægus indica, L.? B. M. 42, t. 1726; —Rosb. H. B. p. 38.) 5 China. Fl. small, white, March and April; fr. 0.
- PHOTINIA, Lindl. (DC. pr. 2, p. 631;—W. and A. pr. 1, p. 302;—Lindl. B. Beg. under t. 1956.)

Reg. 20, t. 1655. 5 Nepal.—P. baccata, L. 5 Kamaon.—P. foliolosa, Wall. pl. as. rar. 2, t. 189. 5 Nepal.—Cydonia sinensis, Thouin.; B. Reg. 11, t. 905. 5 China.

# SUB-ORDER.—AMYGDALEÆ, Lindl. Nat. Syst. p. 146.

#### THE ALMOND TRIBE.

Trees or shrubs, by Lindl. referred to 6 genera. Of these, DC. pr. assigns about 16 to N. America; 14 to Europe; 7 to S. America, Mexico and the W. Indies; 7 to Japan; 3 to the Levant; 1 to Siberia; 1 to Kalmukia; 1 to Caucasus; 1 to Arabia; 1 to Persia; 1 to China; and 1 to N. Africa. In the E. Indies, (mostly exclusive of Java) have been dis-

covered 20 species: 1 of *Prunus*; (P. bokharensis, Royl.) 12 of *Cerasus*; (Nepal, one a native of Moulmein, another also common to China.); 3 of *Amygdalus*; (Kemaon. Cochin-China. One [Persica saligna, Royl.,] a native of the Bissehur district.) 3 of *Polyodontis*; (I Javanese; 2 Ceylonese,) and 1 of *Pygeum*, (Khassya Mountains.)

The kernels and leaves of several species, f. ex. Cerasus capricida, C. virginiana, C. Laurocerasus, &c., contain the deadly prussic acid, but the fruit is in many instances delicious, f. ex. peaches, nectarines, cherries, plums, apricots, almonds. The leaves of the sloe (Prunus spinosa) have been employed as a substitute for tea, and are still used in Europe for adulterating the black tea of China. Kirshengeist (l'eau de cerises) is a spirit prepared from the kernels of a variety of Cerasus avium in the Vosges, the Black Forest, and Switzerland. The well known liqueur, Noyau, is flavoured by the kernels of Cerasus occidentalis, and the Marsskino, it is said by those of C. Mahaleb.

PRUNUS, L. (DC. pr. 2, p. 532.)

1. domestica, L. (DC. o. c. p. 533;—E. B. 25, t. 1783.) Common PlumTree. 5 S. Europe. England. Fl. small, white, Febr.; fr. 0, or
rare and sour.

CREASUS, Juss. (DC. pr. 2, p. 535.) Cherry.

- Puddum, Wall. (pl. as. rar. 2, t. 143;—DC. o. c. p. 537.)—Prunus Puddum, Rosb. MSS.—P. sylvatica, Rosb. fl. ind. p. 501.)
   Deyra Dhoon. Sirmore. Mountains of Hindoosthan. Has not fl. here.
- 2. triflora, Wall. (Prunus triflora, Rosb. H. B. p. 38, by a mistake trifloia, in Rosb. fl. ind. 2, p. 501.) 5 China. Nepal. Fl. small, white, Feb.; fr. May and June.
- 3. nepalensis, Ser. (DC. pr. 2, p. 540.—C. glaucifolia, Wall. Cat.) 5
  Nepal, Kemaon. Has been introduced into H. C. G. Fl.?
- 4. carolinians, Michx. (DC. pr. 2, p. 540,—Prunus carolinians, Ait.) 5
  From Carolina to Florida. Has been introduced into H. C. G. Fl.?
  Armeniaca, Tournef. (DC. pr. 2, p. 581.)
  - 1. vulgaris, Lam. (DC. o. c. p. 532.—Prunus Armeniaca, L.;—Rosb. fl. ind. 2, p. 501;—J. Grah. Cat. B. pl. p. 66.) Common Apricot. 5
    Armenia. Fl. small, white, fragrant, Jan. and Feb.; fr. H. S., but rare and bad.

AMYGDALUS, L. (DC. pr. 2, p. 530.)

- 1. Persica, L. (Roxb. fl. ind. 2, p. 500;—J. Grah. Cat. B. pl. p. 66.—
  Persica vulgaris, Mill.;—DC. pr. 2, p. 531.) Peach Tree. 5 Persia.
  Cultivated in gardens. Fl. largish, pale rose, Jan. and Febr; fr. May.

  \$\beta\$. nectarina; (Amygdalus Persica nectarina, Ait.—Persica lævis, DC.

  1. c.) 5 Native place unknown. Fl. and fr. with \$a\$.
- cordifolia, Roxb. (f. ind. 2, p. 500.) L. 5 China. In H. C. G. fl. C. S; fr. H. S. Of this tree, which, according to Roxb. was very common about Calcutta in 1814, we know nothing, nor is it mentioned in Wall. Cat.

The common Almond and Cherry Tree has been tried here repeatedly, but without success.

\* Prunus insititia, L.; E. B. 12, t. 841. 5 England, Germany, S. France.—P. Cocomilla, Ten. 5 Calabria.—P. japonica, Thunb. 5 China, Japan.—a. simples, B. Reg. 21, t. 1801.—\$\beta\$. plena, B. Reg. 1, t. 27. (Amygdalus pumila, B. M. 47, t. 2176.)—Cerasus acuminata, Wall. pl. as. rar. 2, t. 181. Nepal.—C. cornuta, Wall.; Royle. ill. t. 38, f. 2. Sirmore.—C. Pseudocerasus, Lindl. B. Reg. 10, t. 800. 5 China.—C. Laurocerasus, Lois. 5 Levant.—Armeniaca dasycarpa, Pers.; B. Reg 15, t. 1243. 5 Country unknown.

## SUB-ORDER.—SANGUISORBEÆ, Lindl. Nat. Syst. p. 148.

#### THE BURNET TRIBE.

Herbs or under-shrubs, by Lindl. referred to 10 genera. Of these, DC. pr. enumerates 24 species for S. America and Mexico; 12 for Europe; 4 for the Straits of Magellan; 2 for N. Africa; 1 for N. America; 1 for Falkland Islands; 1 for the Levant; 2 for Caucasus; 1 for Dahuria; 1 for the Canaries; 1 for New Zealand; and 1 for Tristan d'Acunha. In S. Africa have been found more than 30 species. In India we have Sanguisorba diandra, from Gossain Than; and Alchemilla vulgaris, from the Neelgherries. The latter is also common to Europe. Properties unimportant. The common Burnet (Sanguisorba officinalis, L.) is greedily eaten by cattle. (Hornem.)

POTERIUM, L. (DC. pr. 2, p. 594.)

- caudatum, Ait. (DC. l. c.;—B. M. 49, t. 2341.)
   Canaries. Fl. minute, crimson, C. S; extremely rare.
- Sanguisorba, L. (DC. l. c.;—E. B. 12, t. 860;—Roxb. H. B. p. 68.)
   Europe. Fl. green, with purple filaments and yellow anthers. H. S.
- \* Alchemilla arvensis. L. E. B. 15, t. 1011. © Europe.—Sanguisorba officinalis, L.; E. B. 19, t. 1312. 4. Europe.

ORDER CVI.—FABACEÆ, Lindl. Nat. Syst. p. 148. LEGUMINOSÆ, of others.

### THE BEAN TRIBE.

Herbs, under-shrubs, shrubs, or trees, arranged under about 362 genera. Of these, according to DC. pr., B. M. and B. Reg., about 1220 species belong to S. America, Mexico and the W. Indies; (620 Curvembriæ, 600 Rect-

Digitized by Google

202 FABACEA.

embriæ,) 578 to Europe (1 Rect.); 224 to N. America (12 R.); 284 to New Holland and the South Sea Islands (94 R.); 118 to Siberia; 118 to N. Africa (6 R.); 115 to the Levant (3 R.); 78 to Tauria and Caucasus; 80 to tropical Africa (20 R.); 42 to China and Japan (4 R.); 25 to Iberia; 25 to Dahuria (2 R.); 18 to the Canaries; 20 to Bourbon and Mauritius; (3 R.); 14 to Persia; 22 to Madagascar (11 R.); 20 to Arabia (11 R.); 11 to Abyssinia (6 R.); 12 to Timor (7 R.); 3 to Madeira; 2 to Manilla; 1 to the Marianne Islands; and 1 to Melville Island. S. Africa contains 700 species, referred to 80 genera, of which with the exception of Arachia and Voandzeia, all the papilionaceous ones belong to Curvembriæ, and those with regular or subregular flowers to Rectembriæ. (Harvey.) In the E. Indies, excluding almost entirely Java, have been discovered 891 species, arranged under 133 genera, viz.—

Properties under the several species, as far as India is concerned. :--

- A. CURVEMBRIE. Radicle back upon || the cotyledons.
- A. PAPILIONEE. Lobes of the calyx distinct. Stamens perigynous. Corol papilionaceous.
- B. SWARTZIER. Calvx bladdershaped, with indistinct lobes. Stamens hypogynous. Corol none, or of one or two petals.
- B. RECTEMBRIE. Radicle bent straight.
- A. CESALPINEE. B. MIMOSEÆ.

before | Sepals and petals Petals opening imbricat- before opening ed. Stamens pe- valvate. Stamens rigynous. hypogynous.

a. Geoffreæ. Filaly connected.

6. Detarieæ. ments various- Petals none. Fruit drupaceous.

b. Cassieæ. Filaments distinct.

### A. PAPILIONES.

a. Phyllolobæ.

Cotyledons pushed above ground, becoming green and resembling leaves. Very few bear seeds eaten by man or animals.

- a. Sophoreæ. Legume continuous. Stamens distinct.
- β. Loteæ. Legume continuous. Filaments grown together.
- γ. Hedysareæ. Legume transversely jointed. Filaments nearly always grown together.

b. Sarcolcbæ.

Germinate with their cotyledons under ground. Among these only pulse is found.

- a. Vicieæ. Legume many-seeded, opening. Leaves cirrhiferous; primordial ones alternate.
- β. Phaseoleæ. Legume many seeded, opening. Leaves not cirrhiferous, primordial ones opposite.
- y. Dalbergieæ. Legume one or two-seeded, not opening. Leaves not cirrhiferous.

## A. SOPHOBER, Spreng.

(DC. pr. 2, p. 74.—W. and A. pr. 1, p. 179.)

SOPHORA, L. (DC. o. c. p. 95; -W. and A. l. c.)

- 1. glauca, Leschen. (DC. l. c.; -W. and A. l. c.) 5 Neelgherries. Fl. middle-sized, white, tinged with rose, - H. and R. S.
- 2. tomentosa, L. (DC. pr. 2, p. 95; -W. and A. pr. 1, p 179; -Rosb. fl. ind. 2, p. 316; -J. Grah. Cat. B. pl. p. 44; -Lam. ill, t. 325. f. 2;—Rumph. 4, t. 22.) 5 Moluccas. Mauritius. Ceylon. Both Peninsulas of India. Cultivated in Gardens.—Fl. largish, bright yellow, fragrant, and fr. nearly the whole year.—Seeds very bitter, and according to Rumphius, considered a specific in cholera: dose-three or four rubbed up with water. A cold infusion of the root praised in spurious pleuritis, and against all poisons produced from the sea.

β. occidentalis; (B. M. 62, t. 3390.—S. occidentalis, L.) 5 W. Indies. In H. C. G.

EDWARDSIA, Salisb. (DC. pr. 2, p. 97.)

1. mollis, Royle. (ill. t. 32, f. 2.—Sophora mollis, Wall. Cat.—S. Houghiana, Wall. Cat.) 5 Hills in the Deyra Dhoon. Sahunsadhara. Sirmore. Fl. middle-sized, yellow, R. S.

- 2. maderaspatana, Wight. 5 Madras. Introduced in 1841.
  - E. microphylla, Salisb. has been cultivated here, but without success.

    The same is to be said of Virgilia capensis, Lam; and Baptisia australis, R. Br.

Ormosia, Jacks. (DC. pr. 2, p. 97.)

  - 1. Siliqua, L. (DC. l. c.; -B. Repos. 9, t. 567; -Gärtn. fr. 2, p. 310, t. 146, f. 1.) Carob Tree. 5 S. Europe. N. Africa. Levant. Fl. small, brownish yellowish, C. S.; fr. 0. Flesh of the pod of a mild sugary taste, nourishing, gently aperient, and much eaten by the people where the tree grows. In Egypt a syrup is prepared from it, and used to preserve other fruits. (A. Richard.) Prof. Lindley has recommended, through Dr. Royle, the introduction of this tree into the northern parts of India, especially into such places as are occasionally visited by famine. The plant seeking its nourishment under ground, is so independent of surface irrigation and so retentive of life, that according to M. Bové, a tree supposed to be 300 years old, which was cut down during the French invasion of Egypt, sprang up again thirty years after on wells being sunk in its neighbourhood. The crop of the Carob trees is very abundant, some of them yielding from 800 to 900 pounds of pods, Prof. Lindley adds, that during, the Peninsula war, the horses of the British cavalry often thrived upon the seeds of the Carob trees. The same is the case with cattle, mules, and asses in Egypt, Syria, and S. Europe. (Loud. encycl. of pl. p. 868.)

1. Courbaril, L. (DC. l. c.; —G. Don's Mill. dict. l. c.; —Lam. ill. t. 330, f. 1; DC. leg. mem. 12, t. 26, f. 120, germ.; Jacq. amer. pict. p. 63, t. 264, f. 65;—Roxb. H. B. p. 31;—J. Grah. Cat. B. pl. p. 63.) Gum Anime Tree. Courbaril Locust Tree.—L. 5 S. America. Petals an inch long, here pure white. Filaments here pure white. Fl. June and July; fr. 0. The filamentose, white substance contained in the pods is sweet as honey, and greedily eaten by the Indians, while fresh purgative, but afterwards losing this quality. Between the principal roots of the tree exudes a fine transparent resin, white, yellowish or red, which is collected in large lumps, and called by the English Gum Anime, though, according to Martius, "the genuine Anime is the produce of a species of Icica, and very nearly allied to Elemi." The Courbaril resin (American Copal, Mart.) makes the finest varnish that is known, superior even to the Chinese lac. "For this latter use it is dissolved in the highest rectified spirits of wine. It burns readily, and with a clear flame, emitting a grateful and fragrant smell, for which reason it is sometimes ordered by way of fumigation in the chambers of persons labouring with asthmas or suffocative catarrhs. Its vapours not only strengthen the head, but all parts of the body affected with cold. Some apply it outwardly, dissolved in oil or spirits of wine, to strengthen the nerves. An oil may be distilled from it, useful in palsies, and contractions of the sinews. The inner bark is an excellent vermifuge in spirit or decoction. The timber of old trees is reckoned excellent, and is in great request for wheel-work in sugar mills, particularly for cogs to the wheels, being extremely hard and tough. It is so heavy that a cubic foot weighs a hundred pounds. It also takes a fine polish." (G. Don.)

- TRACHYLOBIUM, Hayne. (G. Don's. Mill. dict. p. 158.)
  - Lamarckianum, Hayne. (G. Don. o. c. p. 159.—Hymenæa verrucosa, Lam. ill. t. 330, f. 2; not Gärtn. nor Lam. dict.) 5 Madagascar. Fl. an inch long, pure-white, R. S.; fr. C. S.

  f. ind. 2, p. 546.—M. marginata, Lam.—Rheed. 6, t. 5.) L. 5

  Coromandel. The Concans and Neelgherries. Moulmein. Tavoy.

  Monghir Mountains. Assam. Fl. pale, yellowish, fragrant, May and

  June; fr. C. S. Timber hard, strong.
- 18. elata, Grah. (Wall. Cat.—Mimosa elata, Rosb. fl. ind. 2, p. 546.) L. 5 Banks of the Irawaddi, and the Attran. Tavoy. Assam. Deyra-Dhoon. Fl. small, white, May and June; fr. C. S. Timber of good quality. (Royle.)
- 19. Kalkora, (Mimosa Kalkora, Roxb. fl. ind. 2, p. 547.) L. 5 Assam. In H. C. G. fl. May and June; fr. C. S.
- 20. Sirissa, Buch. (A. speciosa, Willd.;—DC. pr. 2, p. 467;—W. and A. pr. 1, p. 275;—J. Grah. Cat. B. pl. p. 58.—Mimosa speciosa, Jacq. ic. rar. 1, p. 198.—M. Sirissa, Roxb. fl. ind. 2, p. 544.) Siressha. L. b Coromandel. Bombay. Paghamew. Chittagong. Bengal, (Serampore.) Soonderbuns. Silhet. Assam. Monghir. Deyra-Dhoon. Fl. small, white, fragrant, H. and R. S.; fr. C. S. Timber large, dark coloured, very hard, close-enough-grained for furniture. Large masses of very pure gam are often seen on this tree. (Roxb.)
- 21. frondosa, Willd. (DC, pr. 2, p. 468;—W. and A. pr. 1, p. 275.—A. Coranja, Buch. in Wall. Cat.) 5 Patna. (Buch.) Fl. small, white,

- R. S.; fr. C. S. Pods three to five inches long, 7 lines broad, 10-20 seeded.
- glauca, Willd. (DC. pr. 2, p. 467;—J. Grah. Cat. B. pl. p. 58.—Mimosa glauca, L.;—Rosb. H. B. p. 41.)
   S. America. FL small, white, R. S.; fr. C. S. Common in gardens.
- 23. tomentosa, Willd. (DC. pr. 2, p. 462;—W. and A. pr. 1, p. 276;—
  J. Grak. Cat. B. pl. p. 59.—Mimosa tomentosa, Rosb. fl. ind. 2, p.
  558; Rottl.—M. Kleinii, Poir.) William Salsain-babula. 5
  Coromandel. Common in Deccan and Kandesh jungles, also in the
  Sholapore districts. Bengal, (Serampore.) Fl. small, white, rather
  offensive, C. and H. S.; fr. R. S.
- 24. horrida, Willd. (DC. pr. 2, p. 460.—M. horrida, L.—M. leucacantha, Jacq. Schönb. t. 393.—M. eburnea, Lam. not Willd.—Acacia capensis. Burch.—Mimosa capensis, Burm.; Rosb. H. B. p. 41.) 5 S. Africa. Arabia. Fl. small, yellow. Introduced into H. C. G. in 1799, but had not fl. up to 1814.
- 25. tortuosa, Willd. (DC. pr. 2, p. 461.—Mimosa tortuosa, L.;—Roxb. H. B. p. 41.) 5 Sandy fields of Jamaica. St. Thomas. Fl. small, yellow. Introduced into H. C. G. in 1807, but had not fl. up to 1814.
- 26. arabica, Willd. (DC. pr. 2, p. 461;—W. and A. pr. 1, p. 277;—J. Grah. Cat. B. pl. p. 59.—Mimosa arabica, Lam.;—Rosb. Corom. 2, t. 149;—fl. ind. 2, p. 557.) ATAM Babula. 5 Peninsula of India. Bengal, (Serampore.) Sukanaghur. Saharunpore. Fl. small, bright-yellow, fragrant, May and Oct.; fr. March. Produces, with A. speciosa, and Vachellia Farnesiana, a gum, which is used as a substitute for Gum Senegal, and Gum Arabic. Wood strong, tough, durable, making excellent knees and crooked timber in ahip-building. Bark astriagent, used for tanning leather, and to dye various shades of brown. A decoction of the bark employed as a substitute for soap. (Roxb.) Seeds and pods of great value to the shepherd in the hot season, as food for his flock, when grass is scarce. (Dr. Gibson.) This officer suggested some years ago to plant the waste part of the Deccan with this tree, as it grows rapidly and requires no water.
- 27. vera, J. Bauh. (DC. pr. 2, p. 461.—Mimosa nilotica, L.) True Acacia or Gum Arabic-tree. Egyptian thorn. 5 Africa, from Senegal to Egypt. Fl. small, yellow. Has been introduced into H. C. G. Fl.?
- 28. leucophlæa, Willd. (DC. pr. 2, p. 462;—W. and A. pr. 1, p. 277;—J. Grah. Cat. B. pl. p. 59.—A. alba, Willd. DC. l. c.—Mimosa leucophlæa, Roxb. Corom. 2, t. 150;—fl. ind. 2, p. 558.—M. alba, Rottl.) 5 Coromandel. Common in some parts of the South Mahratta country, and in the Sholapore districts between the Bheema and Krishna. Delhi. Fl. small, pale yellowish, R. S.; fr. C. S. Bark astringent. The natives distil an ardent spirit from it, mixed with

- palm-wine and a little coarse sugar. On this account, the trees are farmed in some places from Government. (Rosb. Law.)
- 29. pennata, Willd. (DC. pr. 2, p. 464?—W. and A. pr. 1, p. 277;—J. Grah. Cat. B. pl. p. 59.—A. megaladena, Desv.;—DC. o. c. p. 465.—Mimosa pennata, L.; excl. syn.—M. torta, Rosb. fl. ind. 2, p. 566.—M. ferruginea, Rottl.;—DC. pr. 2, p. 431.) L. 5 Courtallum. Neelgherries. Ceylon. Gutpurba, near Duddi. Paghamew. Fl. small, yellow, R. S.; fr. H. S.

## ORDER CVII.—CONNARACEÆ, R. Br.—Lindl. Nat. Syst. p. 157.

Trees or shrubs of 5 genera. Of these, DC. pr. enumerates 7 species for S. America; 8 for Sierra Leona and Owaree; 2 for Madagascar; and 1 for Mauritius. In the E. Indies, our materials mention 6 species of Connarus; (Peninsula of India, Chittagong. Silhet.) 1 of Omphalobium; (Moluccas.) 5 of Rourea; (Ceylon. Silhet. Nicobar Islands,) and 3 of Tetradium. (Silhet? Cochin China.) Two species of Connarus, (Roxburghii and microphyllus, Hook. and Arn.) have been found in China. They belong, however, both to Rourea, according to W. and A. Properties unknown.

- CONNARUS, L. (DC. pr. 2, p. 84; -W. and A. pr. 1, p. 143.)
  - 1. paniculatus, Roxb. (fl. ind. 3, p. 139.) L. 5 Chittagong. Fl. small, yellow. In H. C. G. fl. June. (Roxb.) A large timber-tree.
  - 2. nitidus, Roxb. (H. B. p. 49.) 5 Silhet. Fl. small, whitish, H. S.; fr. Sept. and Oct.
- 3. igneus, Wall. MSS. 5 Native place? Introduced in 1840. ROURBA, Aubl. (W. and A. pr. 1, p. 143.)
  - 1. Sookurthoontee, (Cnestis monadelpha, Roxb. fl. ind. 2, p. 454.)

    \*\*Top Sookur-toontee. 5 Chittagong. Silhet. Fl. small, white, fragrant, June and July; fr. Oct.
  - \* Connarus monocarpus, L.; Rheed. 7, t. 26. 5 Travancore.—C. pinnatus, Lam.; Wight. ill. 1, t. 64. 5 Coromandel. Concan. Goa jungles.—C. pubescens, DC. 5 Guiana.—Omphalobium Lamberti, DC. 5 Guiana.—O. Perrottetii, DC. 5 Guiana.—Rourea santaloïdes, W. and A. 5 Ceylon.—R. emarginata, W. and A. (Cnestis emarginata, Jack.)—R. florida, W. and A. (Cnestis florida, Jack.)—R. mimosoïdes, W. and A. (Cnestis mimosoïdes, Jack.) 5 Nicobar Islands.—Cnestis glabra, Lam. 5 Mauritius. Bourbon.

## ORDER CVIII.—CHRYSOBALANACEÆ, Lindl. Nat. Syst. p. 158.

#### THE COCOA-PLUM TRIBE.

Trees or shrubs, referred by Lindl. to 11 genera. Of these, DC. pr. and Spreng. syst. assign 33 species to S. America, Mexico and the W. Indies; I to Georgia in N. America; 2 to Sierra Leone; I to Senegal; I to Bourbon; — to Madagascar; and I to New Holland. Two species have been found in India: Prinsepia utilis, in the Himalayas, and a Parinarium? at Singapore. Fruit of several species of Chrysobalanus and Parinarium eatable.

CHRYSOBALANUS, L. (DC. pr. 2, p. 525.)

- 1. Icaco, L. (DC. l. c.—Jacq. am. 154, t. 94.) 5 S. America, and the W. Indies; by the sea-side. Southern parts of N. America. Fl. white. Fruit eatable. Introduced into H. C. G. before 1814. Fl.? Prinsepia, Royle. (Ill. p. 206.)
  - 1. utilis, Royle. (o. c. t. 38, f. 1.) 5 Common on the driest and most barren rocks of the Himalayas, as in the neighbourhood of Muttiana, in N. lat. 31\frac{1}{2}\sigma, and at elevations of 5-6000 feet, where its seeds yield by expression a useful oil. Fl. nearly middle-sized, whitish. Has been in the garden here several years without flowering.
  - \* Chrysobalanus oblongifolius, Schott. 5 Brazil.—C. macrophyllus, Schott. 5 Brazil.—Moguilea guianensis, Aubl. 5 Guiana.—M. ca-

nomensis, Mart. 5 Brazil.—Conepia guianensis, Aubl. 5 Guiana.—C. Parillo, DC. 5 Guiana,—Acioa guianensis, Aubl. 5 Guiana.—Parinarium campestre, Aubl. 5 Guiana.—P. senegalense, Perr. 5 Senegal.—P. excelsum, Hort. Trans. 5 Sierra Leone. Introduced at Goa.—Grangeria borbonica, Lam. 5 Bourbon.—Licania incana, Aubl. 5 Guiana.—L. humilis, Cham. 5 Brazil.—Hirtella triandra, Swz. 5 W. Indies. New-Spain.—H. rugosa, Pers. 5 St. Domingo. St. Thomas.—H. hirsuta, Lam. 5 Cayenne.—H. racemosa, Lam. 5 Guiana.

## ORDER CIX.—CALYCANTHACEÆ, Lindl. Nat. Syst. p. 159.

#### THE CAROLINA ALLSPICE TRIBE.

Shrubs, referred by Lindl. to 2 genera: Calycanthus, with 3 N. American species; and Chimonanthus, with a Japanese one. Properties unimportant.

CALYCANTHUS, L. (DC. pr. 3, p. 2.)

floridus, L. (DC. l. c.;—B. M. 14, t. 503;—Roxb. H. B. 39.)
 Shady banks of rivulets of Carolina. Fl. large, dark red-brown, sweetly apple-scented. Wood and roots strongly smelling of Camphor. Introduced into H. C. G. in 1804, but had not fl. up to 1814.

## CHIMONANTHUS, Lindl. (DC. pr. 3, p. 2.)

- præcoz, Lindl. (in Wall. Cat.—C. fragrans, Lindl.; B. Reg. 5, t. 404.—Calycanthus præcox, L.;—B. M. 13, t. 466;—Roxb. fl. ind. 2, p. 672.)
   Japan. Fl. large, greenish-white, inside crimson spotted, fragrant, Dec., Jan. and Feb.; fr. 0.
- \* Chimonanthus præcox, β. grandiflorus, Lindl. (C. fragrans, β. grandiflorus, Lindl.; B. Reg. 6, t. 451.) 5 Japan.

# ORDER CX.—CUNONIACEÆ, R. Br.—Lindl. Nat. Syst. p. 161.

Trees or shrubs, by Lindl. referred to 13 or 14 genera. Of these, DC. pr. enumerates 31 species for S. America and the W. Indies; 6 for New Holland and the South Sea Islands; 1 for Madagascar; 1 for Bourbon; 2 for S. Africa; and 4 for Java. Of the latter, 2 belong to Cunonia; and 2 to Arnoldia. Properties little known.

<sup>\*</sup> Weinmannia glabra, L. fil. 5 W. Indies.

ORDER CXI.—SAXIFRAGACEÆ, DC.—Lindl. Nat. Syst. p. 162.

#### THE SAXIFRAGE TRIBE.

Shrubs or undershrubs, seldom trees, most frequently little elegant herbs, exclusive of Parnassia, referred by Lindl. to 28 genera. Of these, DC. pr. assigns about 75 species to Europe; 42 to N. America; 20 to Siberia; 6 to S. America; 5 to Japan; 3 to Caucasus; 3 to Melville Island; 3 to Greenland; 2 to the Levant; 2 to N. Africa; 2 to the Straits of Magellan; 1 to China; 1 to Senegal; 1 to Nubia; 1 to S. Africa; 2 to N. W. Africa; 1 to Madeira; 1 to Iceland; 1 to Spitzbergen; 1 to Dahuria; 1 to Altaï; and 1 to the Sandwich Islands. In the E. Indies have been discovered about 34 species, viz. 6 of Hydrangea, (Nepal, Java, Assam,) 1 of Ciamitis, (Java,) 1 of Adamia, (Nepal,) 21 of Saxifraga, (Nepal, Khassya Mountains, Peer Punjal, Kunawar,) 1 of Chrysosplenium, (Nepal,) 1 of Tiarella, (Nepal,) 1 of Astilbe, (Nepal,) and 2 of Vahlia, (Coast of Coromandel.) Properties of no importance.

HYDRANGEA, L. (DC. 3, p. 13.)

1. Hortensia, DC. (l. c.; -J. Grah. Cat. B. pl. p. 84.-H. opuloïdes, Lam.—H. hortensis, Sm.;—B. M. 13, t. 438;—Roxb. H. B. p. 34.) 5 China. Japan. Fl. largish, rose-coloured, C. S.; fr. 0.

ADAMIA, Wall. (DC. pr. 3, p. 16.)

1. cyanea, Wall. (tent. fl. nep. 46, t. 36;—pl. as. rar. 3, p. 213;—B. M. 58, t. 3046.) 5 Nepal. Fl. middle-sized, blue. Has been ten years in the garden here, without flowering.

SAXIFRAGA, L. (DC. pr. 3, p. 17.)

- 1. ligulata, Wall. (DC. o. c. p. 38; -B. M. 62, t. 3406.) 4. Deyrah-Dhoon. Kemaon. Fl. large, white with a tinge of rose. Has been cultivated here for more than five years, without flowering.
  - \* Vahlia oldenlandioïdes, Roxb. @ Tranquebar.—V. viscosa, Roxb. @ Tranquebar.—Hydrangea quercifolia, Bartr.; B. M. 25, t. 975. 5 Florida.

ORDER CXII.—CRASSULACEÆ, DC.—Lindl. Nat. Syst. p. 163.

#### THE HOUSE-LEEK TRIBE.

Succulent herbs and shrubs, by Lindl. referred to 22 genera. Of these DC. pr. ascribes to S. America and Mexico 9 species; to N. America 9; to Europe 63; to Siberia 9; to Cafacasus 9; to Iberia 2; to Dahuria 2; to the Levant 2; to China 3; to Japan 1; to New Holland 2; to Arabia 3; to Sierra Leone 1; to Madeira 6; to the Canaries 14; to N. Africa 8; and to the Straits of Magellan 1. Adding 4 Köllerias, S. Africa exhibits 304 species, (Harvey); the E. Indies 27; viz. 1 of Tillea? (Kemaon, Museooree,) 1 of *Umbilicus*, (Mussooree,) 7 of *Kalanchoe*, (Neelgherries, Nundydroog, Mysore, Bengal, Moluccas, Deyra-Dhoon, Taong-Dong.) 1 of *Bryophyllum*, (Moluccas,) and 17 of *Sedum*, (Himalayas.) Properties unimportant.

SEPTAS, L. (DC. pr. 3, p. 383.)

- 1. capensis, L. (DC. l. c.) 4. C. G. H. Introduced in 1841.
- KALANCHOH, Adans. (DC. pr. 2, p. 394; -W. and A. pr. 1, p. 359.)
  - 1. acutiflora, Haw. (DC. o. c. p. 395.—Vereia acutiflora, Andr.;—B. Repos. 10, t. 610.) 5 India. Fl. smallish, white, C. S.
  - 2. laciniata, DC. (pl. grass. t. 100;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 81.—Cotyledon laciniata, L.—Rosb. fl. ind. 2, p. 456.—Rumph. 5, t. 95.) 限期刊制度 Himsagur. 5 Moluccas. Java. Mauritius. Bourbon. Hills about Dharwar. Pandooghur Fort, near Wye. Bengal, (Serampore, Patna.) Fl. smallish, bright-yellow, R. S.; fr. C. S.
  - 3. heterophylla, W. and A. (pr. 1, p. 360.—Cotyledon heterophylla, Roxb. fl. ind. 2, p. 456.) 5 Mysore. In H. C. G. fl. C. S.; fr. H. S. (Roxb.)
  - 4. teretifolia, Wall. (pl. as. rar. 2, t. 166.) 5 Taong-Dong. Fl. smallish, yellow, C. S.; fr. H. S.
  - 5. varians, Haw. (K. subamplectens, Wall. pl. as. rar. 2, t. 167.) Fl. smallish, yellow, C. S.; Deyra-Dhoon. Sirmore.
- BRYOPHYLLUM, Salisb. (DC. pr. 3, p. 395;— W. and A. pr. 1, p. 360.)
  - 1. calycinum, Salisb. (DC. o. c. p. 396;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 82;—B. M. 34, t. 1409;—Wight. in Hook. bot. misc. 3, p. 100, suppl. t. 31.—Kalanchoe pinnata, Pers.—Cotyledon pinnata, Lam.—C. calyculata, Soland.—C. calycina, Roth.—C. rhizophylla, Roxb. fl. ind. 2, p. 456.) 5 Moluccas. Introduced into H. C. G. by Lady Clive, in 1799, and thence spread all over Bengal; about Serampore, it now forms a dense jungle. Fl. large, purplish-green, C. S.; fr. H. S.
  - \* Tillæa muscosa, L.; E. M. 43, t. 1809.) © Madeira.

ORDER CXIII.—AMYRIDACEÆ, Lindl. Nat. Syst. p. 165.

Fragrant resinous trees or shrubs, by Lindl. referred to 6 genera. Of these, according to DC. pr. and Spreng. syst., 36 species have been found in S. America, Mexico and the W. Indies; 1 in Florida; and 1 in Guinea. Only one species (Amyris alata, Spreng.) has been found in S. Africa, (Harvey); and 4 species of Sabia in Nepal and the Khassya Mountains.

"All the species of the genus Copaifera yield the Balsam of Copaiva; but it is not in all of them of equal quality. Myrospermum peruiferum, produces a fragrant resin in much use for burning as a perfume, and for medicinal purposes, called the Balsam of Tolu. Both it and the Balsam of Peru are also yielded, according to Ach. Richard, by M. toluiferum." (Lindl.)

Sabia, Colebr. (Ross. fl. ind. ed. Carey 2, p. 308;—G. Don's Mill. dict. 2, p. 69.)

- 1. lanceolata, Colebr. (Roxb. o. c. p. 309;—Trans. Linn. soc. 12, p. 355, t. 14;—G. Don's Mill. dict. l. c.) L. 5 

  Khassya Mountains. Fl. small, greenish, purple dotted, very fragrant, May.
- limoniacea, Wall. (Cat.) 5 

  Khassya Mountains. Introduced here in 1840.

L

\* Amyris maritima, Jacq. 5 Jamaica. Cuba.—A. sylvatica, Jacq. 5 S. America. St. Domingo. St. Thomas.—A. brasiliensis, Spreng. 5 Brazil.—A. Plumieri, DC. 5 W. Indies. Produces a sort of Gum-elemi.—A. pinnata, H. B. and Kth. 5 Tropical S. America.—A. bipinnata, Moç. and Sessé. 5 Mexico.—Spathelia simplex, L.; B. Reg. 8, t. 670. 5 Jamaica.—Tapiria guianensis, Aubl. 5 Guiana.—Myrospermum frutescens, Jacq. 5 Bushy places at Carthagena and St. Martha.—M. pubescens, DC. 5 Carthagena. Bark filled with resin, of a very grateful smell and taste.—M. peruiferum, DC. 5 Peru. New Granada. Mexico.—M. toluiferum, A. Rich. 5 S. America, on the banks of the river Magdalena.—Copaifera Beyrichii, Hayne. 5 Brazil.—C. guianensis, Desf. 5 Guiana.—C. Martii, Hayne. 5 Brazil.—C. Jacquiniana, Hayne. 5 Trinidad. Martinique.—C. multijuga, Hayne. 5 Brazil. Produces Copaiva-balsam in the greatest abundance. (Mart.)

ORDER CXIV.—ANACARDIACEÆ.—Lindl. Nat. Syst. p. 166.

THE CASHEW TRIBE.

Trees or shrubs, rarely climbing, abounding in a resinous, sometimes highly poisonous juice and by Lindl. placed under 36 genera. excluding Lunanea, DC. which according to Hooker, is a species of Sterculia. Of

ţ

these, according to DC. pr. Spreng. Syst. and B. Reg., 46 species have been discovered in S. America, Mexico and the W. Indies; 9 in N. America: 5 in S. Europe; 3 in China and Japan; 3 in Mogador; 2 in Syria; 2 in N. Africa; 1 in the Canaries; 1 in Arabia; 1 in Mauritius; and 2 in the South Sea Islands. Exclusive of 6 species, belonging to other orders, S. Africa exhibits 44 species, (Harvey.) In the E. Indies our materials only mention 53 Anacardiacese; viz. 2 species of Anacardium; 7 of Semecarpus; 2 of Holigarna; 6 of Mangifera; 7 of Buchanania; 2 of Melanorrhea; 2 of Stagmaria; 1 of Gluta, (Java,) 2 of Syndesmis, (Penang, Tavoy.) 1 of Cambessedea, W. and A. (Burma,) 1 of Pistacia? (Lour.) 1 of Pegia (Shevaggery Hills,) 1 of Solenocarpus, (Courtallum,) 1 of Coniogeton, (Java,) 13 of Rhus, (Nepal, Tavoy, Peninsula of India,) 1 of Phlebochiton (Khassya Mountains,) 1 of Odina, (all over India,) 1 of? Triceros, (Lour.) 1 of? Rumphia, L. (Malabar,) and 1 of? Thysanus, (Lour.) "Wallich's list is very imperfect as regards this order, including only about 25 species. Blume has 23 for Java, excluding Zanthoxylaceæ which he includes in the order." (Wight.) Properties under the several species.

A. Anacardiez, R. Br. (DC. pr. 2, p. 62.)

Anacardium, Rottb. (DC. l. c. ;- W. and A. pr. 1, p. 168.)

1. occidentale, L. (DC. l. c.; W. and A. l. c.; Roxb. fl. ind. 2, p. 312; J. Grah. Cat. B. pl. p. 40.—Acajuba occidentalis, Gärtn. fr. 1, p. 192, t. 40, f. 2.—Cassuvium pomiferum, Lam.;—Rheed. 3, t. 54.—Rumph. 1, t. 69.) हिकिनि बॉफॉम Hijili-badam. 5 W. Indies. Mexico. S. America. Moluccas. Malabar and Parell Hills. Bombay. Salsette. Penang. Tavoy. Chittagong. Fl. smallish, greenish-red, Feb. and March; fr. R. S. The Cashew-tree annually exudes from 5-12 pounds weight of a fine semitransparent gum, like gum-arabic, and not inferior to it in virtue or quality. From the body of the tree is procured by tapping or incision a milky juice, which will stain linen of a deep black that cannot be washed out again. The receptacle of the fruit has an agreeable, acidulous, subastringent flavour, and is eaten like an apple. The juice expressed from it and fermented, yields a pleasant wine, and distilled, affords a spirit, far exceeding arrack or rum. The Cashew-nut springs from one end of the receptable, and has two shells, between which there is a thick inflammable oil. This is very caustic, will raise blisters on the skin, and has often been very troublesome to those who have incautiously put the nuts into their mouths to break the shell. It has been used successfully in eating off ring-worms, cancerous, ulcers and corns, but it The kernel, when fresh, has a ought to be applied with caution. most delicious taste, and abounds with a sweet milky-juice. When older, it is usually roasted and then eaten as a moderately good substitute for almonds. (G. Don.)

SEMECARPUS, L. (DC. pr. 2, p. 62; W. and A. 1, p. 168.)

- 1. Anacardium, L. (DC. l. c.; -y. W. and A. l. c.; -Roxb. fl. ind. 2, p. 83; - Corom. 1, t. 12; -J. Grah. Cat. B. pl. p. 41. - Anacardium latisolium, Lam. ill. t. 208.—A. officinarum, Gärtn. fr. 1, p. 191, t. 40, f. 1.) Common throughout the Concans, and in Goozerat, (whence, according to Dr. Gibson, a considerable quantity of nuts is exported.) Berar. Silhet. Assam, extending to Deyra-Dhoon and Kyarda. Fl. small, green, May, June and July; fr. Jan. and Feb. The wood of the Marking-nut Tree is of no use, partly on account of its softness, and partly because its abundance of acrid juice renders it dangerous to work. Bark mildly astringent, giving out in decoction a deep colour, which dyes brown of various shades. Wounded, it yields a dirty looking, brownish, soft gum, slowly dissolving in the mouth without much taste. The receptacle of the fruit roasted in ashes, is eaten by the natives, and tastes like roasted apples, whereas raw, it is astringent and acrid, leaving a painful sensation for some time on the tongue. green nuts, well-pounded into a paste, make good bird-lime. pure black, acrid juice of the nuts is employed by the natives to remove rheumatic pains, aches and sprains, though in tender constitutions it often produces inflammation, doing much more harm than good; but in general the rubbing on of the oil has not this effect, and is then an efficacious remedy. It is generally employed to mark all sorts of cotton-cloth. By a mixture of quick lime and water, the colour is improved, prevented from running, and fixed. (Rosb.)
- Cassuvium, Roxb. (fl. ind. 2. p. 85.—Cassuvium silvestre, Rumph. 1, t. 70.)
   Moluccas. Fl. small, greenish-yellow. In H. C. G. fl. H. S.; fr. R. S. (Roxb.) Tender leaves eaten at Amboina. The acrid juice of the stem employed to varnish shields, canes, &c. (Rumph.)
- cuneifolius, Roxb. (fl. ind. 2, p. 86;—J. Grah. Cat. B. pl. p. 41.)
   L. 5 Lanowlee Grove, Kandalla. Jungles about Parr. Hindoosthan.
   Nepal. Introduced into H. C. G. in 1808, but had not fl. up to 1814.
- 4. acuminatus, Wall. (Cat.) 5 Chittagong. Introduced here five years ago, but has not fl.
- 5. odoratus, Wall. Royal garden at Ceylon.
- 6. kumilis, Wall. Prome.

Holigarna, Roxb. (DC. pr. 2, p. 63;—W. and A. pr. 1, p. 169.)

- longifolia, Rexb. (Corom. 3, t. 282;—fl. ind. 2, p. 80;—DC. l. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 41.—Rheed. 4, t. 9.)
   Travancore. Malabar. Hilly wooded parts of the Concan. Chittagong. Assam. Fl. small, whitish, January; fr. May and June. Juice of the wood, very acrid, employed in Malabar for varnishing shields. (Buch.)
- racemosa, Roxb. (fl. ind. 2, p. 82;—W. and A. pr. 1, p. 169, annot.)
   L. 5 Chittagong. Silhet. Assam. Fl. small, green, Feb. and March;
   fr. June and July. Juice of the wood acrid.

L

C

MANGIFERA, L. (DC. pr. 2, p. 63;-W. and A. pr. 1, p. 169.)

- 1. indica, L. (DC. l. c.; W. and A. o. c. p. 170; —Roxb. fl. ind. 1, p. 641; ed. Carey. 2, p. 435; —J. Grah. Cat. B. pl. p. 41.—M. montana, Heyne.—M. domestica, Gärin. fr. 2, p. 95, t. 100.—Rheed. 4, t. 1, 2.—Rumph. 1, t. 25.) The Am. L. 5 All over India, thriving northwards up to Nahn, alt. 4000 f., but its fruit does not ripen there. Fl. small, greenish-yellowish, Feb. and March; fr. May, June and July. Wood dull grey, porous, pretty durable if kept dry, but soon decaying by exposure to wet. In very large old trees, it acquires a light chocolate colour towards the centre of the trunk and larger branches, and is there hard, closer grained, and much more durable. From wounds in the bark issues a soft, reddish-brown gum-resin, hardening by age, and then much resembling Bdellium. Fruit too well known to require more than to be mentioned. Kernels large, seemingly containing much nourishment, but only used during times of scarcity and famine, when they are boiled in the steam of water and eaten. (Rosb.)
- 2. sylvatica, Roxb. (fl. ind. 1, p. 644;—ed. Carey. 2, p. 438;—J. Grah. B. pl. p. 41.) L 5 Khassya Mountains. Assam. Near Kennery Caves. Bombay. Fl. small, white, tinged with rose, Sept. and Oct.; fr. Feb. and March. (Roxb.) Fruit eaten by the natives, where the tree grows, though by no means so palatable as even a bad domestic mango; also dried and kept for medicinal purposes. (Roxb.)
- 3. Gandaria, Roxb. (H. B. p. 18.) Moluccas. Introduced into H. C. G. in 1803, but had not fl. up to 1814.

CAMBESSEDEA, W. and A. (pr. 1, p. 170, annot.;—not Kth.)

- 1. oppositifolia, W. and A. (Mangifera oppositifolia, Roxb. fl. ind. 1, p. 640;—ed. Carey. 2, p. 434;—J. Grah. Cat. B. pl. p. 41.) 5 Rangoon. Fl. small, greenish sulphur, Feb. and March; fr. June and July. Wood reddish, hard, close-grained, and said to be durable. Fruit universally eaten in Burma. (Roxb.)
- Buchanania, Roxb. (DC. pr. 2, p. 63; -W. and A. pr. 1, p. 169.)
  - latifolia, Roxb. (fl. ind. 2, p. 385;—DC. o. c. p. 64;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 41.—Spondias elliptica, Röttl.) L. 5 Mountains of Coromandel. Common in the Barria jungles, east of Baroda. Jungles near Belgaum. Salsette. Moulmein. Hurdwar. Oude. Valleys of Deyra and Kyarda. Fl. small, greenish-white, Feb. and March; fr. R. S. Wood used for various purposes. Kernels a general substitute for almonds amongst the natives, and sold in the bazars. (Roxb.)
  - angustifolia, Roxb. (fl. ind. 2, p. 386;—Corom. 3, t. 262;—DC. pr.
     p. 64;—W. and A. pr. 1, p. 169;—Wight. icon. 1, t. 101;—J.
     Grah. Cat. B. pl. p. 41.—Spondias simplicifolia, Röttl.—Mangifera axillaris, Lam.—Cambessedea, Kth.)
     Mountains of Coromandel. Adjunta jungles. Fl. small, greenish, May and June; fr. Feb. and March.

- lanceæfolia, Roxb. (H. B. p. 32.—B. lancifolia, Roxb. fl. ind. 2, p. 386;—not B. lanceolata, Wight.)
   L. 5 Chittagong. Introduced into H. C. G. in 1810, but had not fl. up to 1814. Fruit eaten by the natives. (Roxb.)
- Мецанованска, Wall, (pl. as. rar. 1, p. 9;—G. Don's Mill. dict. 2, p. 67.)
- 1. usitatissima, Wall. (o. c. t. 11, 12; —G. Don. l. c.) L. 5 Varnishingtree of the Burmese. Prome. Martaban. Moulmein. Tavoy. Has been in the garden here for five years, but has not flowered yet. This is identical with the majestic Khen or varnish-tree of Munipur, which perhaps does not differ from the varnish-tree of the Chinese. The varnish is procurable in great quantities from Munipur, where it is used for painting river-craft, and for varnishing vessels destined to contain liquid. The drug is conveyed to Silhet by the merchants. On being handled it occasions extensive crysipelatous swellings, attended with pain and fever, but never of long duration. In the neighbourhood of Prome, a considerable quantity of varnish is extracted from the tree, but very little at Martaban. Short joints of a thin sort of bamboo, sharpened at one end, and shut up at the other, are inserted in a slanting direction into holes made in the trunk and principal branches, and left there for 24 or 48 hours; after which they are removed, and their contents emptied into a basket previously varnished over. Sometimes a hundred bamboos may be seen sticking into the tree at once during the collecting season, which lasts as long as the tree is destitute of leaves, namely from January until April, and they are renewed as long as the juice will flow. Every article of household destined to contain liquid food is lacquered over with this juice in its pure state or variously coloured, after having previously been prepared with calcined bones. The process of drying is the most difficult part, being effected in a very slow and gradual manner by the varnished articles being placed in subterranean vaults for several months. The drug is also used as size-glue in the process of gilding; nothing more being required than to besmear the surface of the article to be gilded with it, and immediately to apply the gold leaf. The beautiful Pali writing of the religious order of the Burmese on ivory, palm leaves, or metal, is entirely done with this varnish in its native and pure state. (Wall.)

PISTACIA, L. (DC. pr. 2, p. 64.)

- 1. vera, L. (DC. l. c.) 5 Syria, from whence it was introduced into Italy by the emperor Vitellius, when he was legate in that province. It is now found throughout the whole region of the Mediterranean. Fl. small, brownish green. Has been introduced into H. C. G. Fl.? Produces the Pistachia or Pistach nuts.
- 2. Terebinthus, L. (DC. pr. 2, p. 64.) Venetian or Chian Turpentinetree. 5 S. Europe. N. Africa. The resin of this tree is the Chian or

Cyprus-turpentine, generally preferred for medical use to what is obtained from the fir-tribe. Has been introduced into H. C. G. Fl.?

3. Lentiscus, L. (DC. pr. 2, p. 65;—B. M. 45, t. 1967.) কুমু ক্রমা Koondoo-roomee. ক্রমা মতাক Roomee-mastuki. Mastick-tree. 5 S. Europe. N. Africa. Fl. small, green. Produces the resin, usually called Gum Mastick. Has been introduced into H. C. G. Fl.?

The first of these three species, under the name of P. officinarum, was introduced into H. C. G. in 1806, but had not fl. up to 1814.

ORDER CXV.—QUERCACEÆ, (Corylaceæ, Mirb.—Lindl. Nat. Syst. p. 170.)

#### THE NUT TRIBE.

Trees or shrubs, containing among them the Oak, the Hazel Nut, the Beech, the Hornbeam and the Spanish Chestnut, and by Lindl. referred to 8 genera. Of these, Spreng. syst. enumerates 37 species from N. America; 34 from S. America and Mexico; 21 from Europe; 6 from Japan; 3 from the Levant; 2 from Caucasus and Tauria; 2 from China; 1 from N. Africa, with several others common to Europe and the Orient; and 1 from Terra del Fuego. In the E. Indies, according to our materials, have been discovered 60 species, viz. 2 of Carpinus; 2 of Corylus; 9 of Castanea; 46 of Quercus; and 1 of Lithocarpus;—most of them from Nepal, Kemaon, the Khassya Mountains, Rungpore, Chittagong, Assam, Darjeeling, Amherst, Penang, Singapore, and Taong-Dong. With Blume's plants of this order we are not acquainted.

- CASTANBA, Tournef. (Spreng. syst. 3, p. 761, No. 3123;—Endl. gen. pl. 1, p. 275.) Chestnut.
  - indica, Roxb. (fl. ind. 3, p. 643;—Wall. pl. as. rar. 2, p. 105;—Wight. icon. 2, t. 417.)
     Chittagong. Khassya and Nepal Mountains. In H. C. G. fl. Dec.; fr. Sept. Kernels eaten by Europeans and Natives, and may be compared to indifferent filberts. (Rest.)
- 2. vesca, Gärtn. (fr. 1, p. 181, t. 352;—Spreng. syst. 3, p. 856.—Fagus Castanea, L.; E. B. 13, t. 886;—Rozb. H. B. p. 68.) Common Chestnut Tree. S. Europe. N. America. Introduced into H. C. G. in 1799, but had not fl. up to 1814.

- chinensis, Spreng. (syst. 3, p. 856.—C. pumila, Rosb. fl. ind. 3, p. 644.—Fagus Castanea, Lour.; not L.)
   5 China. Cochin China. Introduced into H. C. G. in 1807, but had not fl. up to 1814.
- 4. Roxburghii, Lindl. (Wall. pl. as. rar. 2, p. 106.—Quercus castanicarpa, Roxb. fl. ind. 3, p. 640.) L. 5 In H. C. G. fl. July and Aug.; fr. Nov. and Dec. (Roxb.)
- 5. tribuloïdes, Lindl. (Quercus tribuloïdes, Sm.—Q. ferox, Rosb. fl. ind. 3, p. 639;—Wight. icon. 1, t. 218.) L. 5 Khassya and Nepal Mountains. Has been introduced into H. C. G. Fl.?
- Quercus, L. (Spreng. syst. 3, p. 761, No. 3124;—Endl. gen. pl. p. 274.)

  Oak.
  - Phellos, L. (Spreng. o. c. p. 857;—Catesb. car. 1, p. 16, t. 16;— Roxb. H. B. p. 68.) 5 N. America. Introduced into H. C. G. in 1800, but had not fl. up to 1814.
  - fenestrata, Roxb. (fl. ind. 3, p. 633;—Wight. icon. 1, t. 219.)
     Khassya Mountains. In H. C. G. fl. April and May; fr. Sept. and Oct. (Roxb.)
     Wood of good quality.
  - 3. lanceæfolia, Roxb. (fl. ind. 3, p. 634;—Wight. icon. 1, t. 212.) L. 5 Garrow-hills. Assam. In H. C. G. fl, Dec.; fr. Oct. (Roxb.) Wood light coloured, like the English oak, but harder, and reckoned one of the most durable timbers where it grows. (Roxb.)
  - 4. lappacea, Roxb. (fl. ind. 3, p. 637;—Wight. icon. 1, t. 220.) Khassya Mountains. L. 5. In H. C. G. fl. Dec. and January; fr. Aug. and Sept. (Roxb.) Wood strong, in colour like that of the common oak, but harder and more close-grained. (Roxb.)
  - turbinata, Roxb. (fl. ind. 3, p. 636;—Wight. icon. 1, t. 221, f. 1.)
     L. 5 Chittagong. In H. C. G. fl. April and May; fr. Sept. and Oct. (Roxb.) Wood only used for fuel. (Roxb.)
- 6. spicata, Buch. (in Rees. cyclop.; —Wall. pl. as. rar. 1, t. 46; —not Humb.—Q. squamata, Rosb. fl. ind. 3, p. 638; —Wight. icon. 1, t. 213.) L. 5 Garrow-hills. Khassya Mountains. Nepal. Chittagong. In H. C. G. fl. Feb.; fr. Oct. (Rosb.) Wood lighter-coloured than English oak, but equally close-grained, and apparently as strong. (Rosb.)
  - semiserrata, Roxb. (fl. ind. 3, p. 641;—Wight. icon. 1, t. 211.)
     Garrow-hills, Khassya Mountains. In H. C. G. fl. Jan., Feb. and March; fr. Aug. and Sept. (Roxb.)
  - prinodes, (Q. serrata, Roxb. fl. ind. 3, p. 641;—not Thunb. fl. jap. p. 176.)
     L. 5 Garrow-hills. In H. C. G. fl. Sept. and Oct. Timber useful. (Rosb.)
  - pedunculata, Willd. (Spreng. syst. 3, p. 864.—Q. Robur, L.;—E. B.
     19, t. 1342;—Rosb. H. B. p. 68.) Common British Oak. L. 5 Europe. Introduced into H. C. G. in 1798, but had not fl. up to 1814.

ORDER CXVI.—BETULACEÆ.—Lindl. Nat. Syst. p. 171.

#### THE BIRCH TRIBE.

Fine timber trees, or shrubs, referred to 2 genera. Of these, Spreng. syst. assigns 12 species to N. America; 8 to Europe; 2 to Siberia; 2 to S. America and Mexico; and 1 to Terra del Fuego. In the E. Indies have been discovered 11 forms, viz. 8 of Betula; and 3 of Alsus; all natives of Nepal. 1 (or perhaps 2) species of Alnus has been found in S. Africa. (Harvey.)

"Their bark is astringent, and sometimes employed as a febrifuge; but they are chiefly valued for their importance as ornaments of a landscape. Their wood is often light, and of inferior quality, but that of the Black Birch of N. America is one of the hardest we know." (Lindl.)

\* Betula nitida, Don. Nepal.—B. alnoïdes, Buch. Nepal.—B. utilis, Don. Nepal.—B. accuminata, Wall. Silhet.—Alnus jorullensis, Kth. Mexico.—A. ferruginea, Kth. New Granada.

ORDER CXVII.—SCEPACEÆ,—Lindl. Nat. Syst. 1. p. 171.

Trees, of the following 3 genera containing 4 species. Properties nearly unknown.

LEPIDOSTACHYS, Wall. (Cat.—Lindl. Nat. Syst. p. 441. No. 21;—Endl. gen. pl. 1, p. 288.)

- Rozburghii, Wall. (Cat.—Lindl. l. c.—Alnus dioica, Rozb. fl. ind. 3, p. 580.)
   L. 5 Khassya Mountains. In H. C. G. fl. March and April; fr. Sept. and Oct. (Rozb.) Timber hard, and used for various economical purposes. (Rozb.)
- \* Scepa villosa, Lindl. Moulmein. Banks of the Saluen.—S. stipulacea, Lindl. Burma.—Hymenocardia punctata, Wall. Cat. Moulmein.

ORDER CXVIII.—HENSLOVIACEÆ,—Lindl. Nat. Syst. p. 173.

Two trees, natives of tropical India, of unknown properties form this family.

\* Henslovia pubescens, Wall. pl. as. rar. 3, t. 221. Penang.—H. glabra, Wall. Cat. Silhet.

## ORDER CXIX.—TREWIACEÆ, Lindl. Nat. Syst. p. 174.

Consists of a couple of trees, natives of tropical India. TREWIA, L. (Spreng. syst. 3, p. 895, No. 3195.)

- 1. nudiflora, Spreng. (syst. 3, p. 906;—Rosb. fl. ind. 3, p. 837;—J. Grah. Cat. B. pl. p. 185.—Tetragastris ossea, Gärta. fr. 2, p. 130, t. 109, f. 5.—Rottlera indica, Willd. Gott. diar. hist. nat. 1, p. 8, t. 3.—Rheed. 1, t. 42.) [Pital] Pitulee. L. 5 Coromandel. Parell Hill, Bombay. Common in the jungle between Nagotnah and the Pass leading to Judapore. Bengal, (Serampore.) Fl. small, whitish-greenish, H. S.; fr. R. S. Wood soft and of little value.
- 2. atroviridis, Wall. 5 Penang.

## ORDER CXX.-URTICACEÆ, Endl.-Lindl. Nat. Syst. p. 175.

#### THE NETTLE TRIBE.

Trees, shrubs or herbs, often lactescent, by Gaudichaud referred (adding Lepurandra, Nimmo.) to 66 genera. Of these, Spreng. syst enumerates 142 species from S. America, Mexico and the W. Indies; 20 from New Holland and the South Sea Islands; 18 from N. America; 18 from Mauritius and Bourbon; 12 from Arabia; 13 from Europe; 5 from China; 5 from Japan; 5 from Guinea; 4 from the Canaries; 3 from N. Africa; 3 from the Straits of Magellan; 2 from the Levant; 1 from Persia; 1 from Siberia; 1 from Madagascar; and 1 from Patagonia. Adding 1 Laurophyllus, 21 species have been discovered in S. Africa, (Harvey,) and in the E. Indies, according to Spreng. syst, Roxb. fl. ind, Wall. Cat. and Royl. ill. 298, viz. of Urtica 59; Böhmeria 11; Prooris 21; Parietaria 1; Canzabis 1; Antiaris 1; Conocephalus 2; Morus 13; Broussonetia 1; Ficus 167; Lepurandra 1; Dorstenia? 1; Artocarpus 14; Batis 2; Epicarpurus 1; and Trophis 2. Properties under the different species.

A. UREBEZ, Gaudich.

(Lindl. Nat. Syst. p. 177.)

- URTICA, L. (Spreng. syst. 3, p. 760. No. 3099;—Endl. gen. pl. 1, p. 283.)
  Nettle.
  - 1. smilacifolia, Wall. MSS. 5 Native place? Fl. minute, greenish, C. S.

- scabrella, Roxb. (fl. ind. 3, p. 581;—Spreng. syst. 3, p. 837.)
   Chittagong. Silhet. Assam. Fl. small, greenish, Aug. and Sept.; fr. Nov. and Dec. Harsh to the touch, but does not sting. (Roxb.)
- 3. macrostachya, Wall. (Cat.) 5 Nepal. Fl. small, greenish, C. S.; fr. H. S.
- 4. pendulifora, Wall. (Cat.) 5 Nepal. Fl. small, pale-greenish, C. S.; fr. H. S.
- viminea, Wall. (Cat.) 5 Assam. Nepal. Fl. small, greenish, C. S.; fr. H. S.
- blanda, Wall. M\$S. 5 Native place? Fl. small, greenish, C. S.; fr. H. S.
- parvifora, Roxb. (fl. ind. 3, p. 581.)
   Rohilkund. Fl. minute, green, H. S.
- 8. tuberosa, Roxb. (fl. ind. 3, p. 583.—Rumph. 6, t. 12, f. 2.) हेन्स ब्री Chundur-moolee. भ. Moluccas. Bengal, (Serampore.) Fl. very small, greenish, R. S.; fr. C. S. Roots nutritious, eaten by the natives raw, boiled, or roasted. (Roxb.)
- dioeca, L. (Spreng. syst. 3, p. 839;—E. B. 25, t. 1750;—Roxb. H. B. p. 67.)
   Europe. Asia. N. America. Fl. small, green, C. S.; fr. H. S.
- urens, L. (Spreng. syst. 3, p. 840;—E. B. 18, t. 1236;—Roxb. H. B. p. 67.) ⊙ Europe. Asia. N. America. Fl. small, whitish, C. S.; fr. H. S.
- pilulifera, L. (Spreng. syst. 3, p, 840;—E. B. 3, t. 148.) ⊙ England.
   S. Europe. Middle Asia. Fl. small, whitish, C. S.; fr. H. S.
- 12. suffruticosa, Roxb. (fl. ind. 3, p. 584.) 5 Sumatra. Fl. small, greenish-yellow, R. S.; fr. C. S.
- 13. decumana, Rumph. (Amb. 6, t. 20, f. 1;—Roxb. fl. ind. 3, p. 587.)
  5 Moluccas. Fl. small, greenish, R. and C. S. (Roxb.)
- 14. pulcherrima, Roxb. (f. ind. 3, p. 588.) 5 Chittagong. Silhet. Goalpara. Fl. small, greenish, R. S.; fr. C. S.
- bicolor, Roxb. (fl. ind. 3, p. 589.)
   Mountains of Bareilly. In H. C. G. fl. R. S. (Roxb.)
- 16. nivea, L. (Spreng. syst. 3, p. 843.—U. tenacissima, Roxb. fl. ind. 3, p. 590.—Rumph. 5, t. 79, f. 1.) 5 Sumatra. Moluccas. China. Cochin China. Japan. Mauritius. Silhet. Assam. Fl. small, greenish-yellow, Oct. and Nov. Bark abounding in fibres of very great strength and fineness. (Roxb.) To procure them the young shoots are cut down, dried and beaten, after which the rind is stripped off. (Marsden.)
- 17. crenulata, Roxb. (fl. ind. 3, p. 591; not Pers.) 5 Khassya Mountains. Fl. small, greenish, latter part of R. S. This plant stings dreadfully. Leschenault de la Tour (Mem. Mus. 6, p. 362,) happened slightly to touch with his fingers one of its leaves in H. C. G. The consequence was intolerable pain, without any swelling, extending to the armpit, and subsequently producing frequent sneezing, copious

running from the nose, and a contraction of the jaws. The pain abated somewhat after the lapse of two days, but returned in full force when the hand was put into water, and at last disappeared on the ninth day. A similar circumstance occurred, with precisely the same symptoms, to a workman in the Calcutta Garden. This man described the sensation, when water was applied to the stung part, as if boiling oil was poured over him. (Lindl.)

- involucrata, Roxb. (H. B. p. 67;—ft. ind. 3, p. 592; not Sims,
   B. M. vol. 51, t. 2481.)
   Malay Islands. In H. C. G. ft. R. S. (Roxb.)
- 19. heterophylla, Roxb. (fl. ind. 3, p. 586;—J. Grah. Cat. B. pl. p. 187; not Vahl., which, excluding syn. Rheed., is the same with U. palmata, Forsk.—Rheed. 2, t. 41.) ⊙ Concans. Coromandel. Prome. Taong-Dong. Nepal. Fl. small, green, R. S.; fr. C. S. A very ferocious-looking plant, the least touch of which produces a most acute, though quickly subsiding pain. Bark abounding in fine, white, glossy, silk-like, strong fibres. (Roxb.)
- 20. photeinophylla, Cunnigh. 5 Morton Bay, 1839.

B. Bönmeriës, Gaudich.

(Lindl. Nat. Syst. p. 177.)

Böhmeria, Jacq. (Spreng. syst. 3, p. 760, No. 3100.)

- 1. salicifolia, D. Don. (Spreng. syst. 3, p. 845.—Urtica salicifolia, Rosb. H. B. p. 67.) 5 Moluccas. Foot of the Himalayas, as far as Deyra-Dhoon. Introduced into H. C. G. in 1798, but had not fl. up to 1814. Its aggregated small berries yield an edible fruit. (Royle.)
- 2. interrupta, Willd. (excl. syn. Burm.—Spreng. syst. 3, p. 846.—Urtica interrupta, L.;—Rosb. fl. ind. 3, p. 585;—J. Grah. Cat. B. pl. p. 187.—Rheed. 2, t. 40.) win factor Lal-bichhutee. © Bombay. Bengal, (Serampore.) Fl. small, pale greenish-yellowish, R. S.; fr. C. S. The hairs of this plant sting like those of the common English nettle.

PROCRIS, Commers. (Spreng. syst. 3, p. 760, No. 3101.)

1. punctata, Buch. (Spreng. syst. 3, p. 846.) 4 Khassya Mountains. Nepal. Fl. minute, greenish, C. S.

C. PARIETARIEZ, Gaud.

(Lindl. l. c.)

- 1. pentandra, Bennett. (Horsf. o. c. p. 66, t. 14.—Urtica pentandra, Roxb. fl. ind. 3, p. 583.—Memorialis ciliaris, Buch.) পিনির সারা Pipiri-sara. 4. Fl. very small, greenish, R. S.; fr. C. S. Bengal, (Serampore.) Nepal. Assam. Java.
- 2. zeylanica, Bennett. (Horsf. o. c. p. 67.—Urtica alienata, L.; Rosb. 3, p. 582.—Parietaria zeylanica, L.) © Ceylon. Fl. minute, brownish, R. S.; fr. C. S.

D. CANNABIËÆ, (Cannabineæ, Bl.) (Lindl. Nat. Syst. p. 177.)

Cannabib, L. (Spreng. syst. 3, p. 894, No. 3178;—Endl. gen. pl. 1, p. 286.) Hemp.

1. sativa, L. (Spreng. syst. 3, p. 903;—Rosb. fl. ind. 3, p. 772;—J. Grah. Cat. B. pl. p. 187; - Rheed. 10, t. 60. (male,) t. 61. (female.) Cannabis indica, Rumph. 5, t. 77.) 🦋 Gunja. ⊙ Siberia. Tauria. Scythia. Thracia. (Herod. 4. 74.) whence the Hemp-plant was introduced into the West by the inhabitants of Marseilles; at least Hiero, the Syracusan, is said (Athen. 5. 40.) to have received it from the river Rhodus for ropes. Fl. small, greenish-white, and fr. the whole year. In India cultivated every where in the plains, near villages, for the sake of the intoxicating liquor called bhang, which is prepared from it, also for the leaves which are smoked to cause intoxication. "In the Himalayas it is indigenous, extremely abundant at elevations of 6-7000 feet, and of very luxuriant growth, rising sometimes to a height of ten and twelve feet. Here though it likewise affords an intoxicating drug, it is also known for the tenacity of its fibre, which is employed by the mountaineers in Ghurwal and Sirmore for making a coarse sackcloth, and strong ropes for crossing their rivers." (Royle.) After so many experiments have been made to discover an efficient substitute for hemp, it is not a little remarkable that no attempts have been made to obtain the plant for commercial purposes, especially as its abundance and use in the North of India were fully known to Dr. Roxburgh, some twenty-six years ago, and by him placed before the public. The Grass-cloth of China would seem to be made of hemp, which the Malays use for sewing-thread and twine, and for making fishing-nets. That the hemp plant is highly narcotic. producing giddiness, symptoms of incipient intoxication, rush of blood to the head, bleeding from the nose, strangury, aphrodisiacal sensations, &c. is well known. Lately, however, it appears, from Dr. O'Shaughnessy's experiments with the churrus or hempresin, that this substance is an efficient remedy against traumatic tetanus. (On the preparations of the Indian Hemp, or Gunjah, their effects on the animal system in health, and their utility in the treatment of tetanus, and other convulsive disorders. Calcutta, 1839.)

E. Chlorophorez, Gaudich. (Lindl. Nat. Syst. p. 177.)

Antiaris, Leschen. (Spreng. syst. 1, p. 374, No. 550;—Endl. gen. pl. p. 280.)

1. tosicaria, Leschen. (Spreng. syst. 1, p. 492;—Rumph. 2, t. 87;—Bl. Rumph. p. 56, t. 22, 23.) The Upas-tree of Java. L. 5 Contains a most deadly poison that depends on the presence of Strychnia. Has been introduced in H. C. G. Fl.?

- CONOCRPHALUS, Bl. (Bijdrag. p. 484;—Lindl. in B. Reg. 14, t. 1203;— Endl. gen. pl. 1, p. 281.)

     12.—Urtica naucliflora, Roxb. (H. B. 1814.) p. 67;—fl. ind. 3, p. 592.)
     Chittagong. Silhet. Assam. Fl. minute, yellowish, fragrant, H. and R. S.; fr. May and June.
  - 2. globulifer, Bennett. (Urtica globulifera, Roxb. fl. ind. 3, p. 593.) 5 Silhet. Assam. In H. C. G. fl. H. and R. S.; fr. May and June.

    F. Morez, Gaudich.

(Lindl. Nat. Syst. p. 178.)

- MORUS, L. (Spreng. syst. 1, p. 374, No. 551;—Endl. gen. pl. 1, p. 278.)

  Mulberry.
  - 1. alba, L. (Spreng. syst. 1, p. 492;—Roxb. fl. ind. 3, p. 594;—J. Grah. Cat. B. pl. p. 194.) সকেন বুড Suphed-toot. 5 Persia. Asia Minor. Found in gardens in several parts of India. Fl. small, greenish, end of C. S.; fr. March. Much cultivated in S. Europe, for its leaves to feed the silk-worm "Mr. Mutti, an Italian, commenced a plantation of standard trees at the Heera Baugh, near Poona, six or seven years ago, on the principle that as soon as they attained a certain size, their roots would strike beyond the sun's influence, and render little irrigation necessary, at the same time that an equal quantity of leaves would be obtained from an equal space of ground, with the further advantage of growing annual crops between the rows of trees. The experiment has been successful, and small plantations under his direction are now gradually extending over the Deccan. One was made in Bombay, near Parell, of about 2000 trees, by Mr. De Ramos, in 1838. It bids fair to answer expectations. The plants are chiefly of the white St. Helena mulberry, to which Mr. Mutti gives the preference from its rapid growth, the small quantity of water required, and the nourishing qualities of its leaves." (J. Grah.) Morus alba contains moroxylic acid in combination with lime. (Turner.)
  - nigra, L. (Spreng. syst. 1, p. 492;—Roxb. H. B. p. 67;—J. Grah. Cat. B. pl. p. 194.)
     Persia. Introduced into H. C. G. in 1795, but had not fl. up to 1814. It is grown in Egypt for feeding silkworms. (Maccullough.)
  - 3. atropurpurea, Roxb. (fl. ind. 3, p. 595;—J. Grah. Cat. B. pl. p. 194?—M. rubra, Lour.) 5 China. Fl. small, greenish, Feb.; fr. March and April. Attempts to feed the silk-worm with the leaves of this species have not succeeded. (Roxb.)
  - 4. rubra, L. (Spreng. syst. 1, p. 492;—Rosb. H. B. p. 67.) 5 N. America, from Canada to Florida. Fl. small, greenish, Oct. and Nov.
  - 5. indica, L. (Spreng. syst. 1, p. 492;—Roxb. ft. ind. 3, p. 596;—J. Grah. Cat. B. pl. p. 194;—Rumph. auct. t. 5.) Toot. 5 Native place unknown. Extensively cultivated in Bengal to feed silk-worms;

- the way in which this is done may be learnt from Roxb. l. c. Fl. small, greenish, Feb.; fr. April.
- 6. tatarica, Pall. (Pers. syn. 2, p. 557;—Pall. ross. 2, p. 9, t. 52;—Rossb. H. B. p. 67;—A. ind. 3, p. 598.) 5 Banks of the Wolga and Dnieper. Cultivated in gardens. In H. C. G. fl. Feb. (Rossb.)
- paniculata, Roxb. (fl. ind. 3, p. 599.—Urtica fruticosa, Bks. Herb.
   —Rumph. 4, t. 56.)

   Moluccas. Fl. small, greenish, July; fr. Sept. Taste of the ripe fruit sweetish. (Roxb.)
- 8. serrata, Roxb, (fl. ind 3, p. 596.—M. cuspidata, Wall. Cat.) 5
  Kamaon. Sirmore, below Mussooree, and at Simla. Has been in the
  garden here more than fourteen years without flowering.
- 9. multicaulis, Perottet. (M. cucullata, Bonafons.) 5 China. Philippine Islands. In H. C. G. Fl.? This species will probably entirely supersede the common white Mulberry for feeding silk-worms. (Proceedings of Agric. and Hortic. Soc. Calcutta. 1840, January, p. 9-13.)
- ? 10. scandens, Wall. (Cat.—J. Grak. Cat. B. pl. p. 194.) 5 China. Fl. small, pale-green, C. S.
- 11. bifaria, Wall. (Cat.) In H. C. G. Fl.?

AMPALIS, Bojer.

- madagascariensis, Bojer. (Morus mauritiana, Jacq. icon. rar. 3, t. 617.
   —Spreng. syst. 1, p. 492;—Rosb. fl. ind. 3, p. 599.—M. Ampalis, Poir.) 5 Madagascar. Fl. small, green, June and July; fr. Sept. and Oct.
- BROUSSONETIA, Vent. (Spreng. syst. 3, p. 893, No. 8170;—Endl. gen. pl. p. 278.)
  - papyrifera, Vent. (Spreng. syst. 3, p. 901;—B. Repos. 8, t. 488;—B. M. 50, t. 2358.—Papyrius japonica, Lam.; Poir.—Morus papyrifera, L.) Paper mulberry tree. 5 Japan. Society Islands. New Zealand. Has been in the garden here more than twelve years without flowering. A kind of paper is manufactured from its bark by reducing it to a pulp, which is afterwards spread into sheets of greater or less thickness. (Kümpf.)

G. FICEE, Gaudich.

(Lindl. Nat. Syst. p. 178.)

- Ficus, L. (Spreng. syst. 3, p. 758, No. 3075;—Endl. gen. pl. 1, p. 278.)

    Toomoor. Common cultivated Fig.tree. L. 5 5 S. Europe. N. Africa. Asia Minor. Cultivated in Arabia, Persia, and India. Fruit-receptacles solitary, sessile, turbinate, umbilicated, smooth, appearing March, April and May, ripening in June and July.
  - triloba, Buch. (F. hirsuta, Roxb. H. B. p. 65;—fl. ind. 3, p. 528;
     not Schott.—F. hirta, Roxb. fl. ind. 3, p. 531; not Vahl.)

- Assam. Fruit-receptacles in pairs, axillary, sessile, oval, very hairy, appearing H. S.; ripening R. S. Fruit eaten by the natives where the tree is indigenous. (Ross.)
- 3. cericoïdes, Roxb. (fl. ind. 3, p. 529.) 5 Patna. Gya. Rohilcund. Fruit-receptacles axillary, solitary, long-peduncled, turbinate, umbilicate, wrinkled, appearing and ripening the whole year. Fruit not eatable. (Roxb.)
- 4. virgata, Roxb. (fl. ind. 3, p. 530; not Reinwardt.) 5 Rohilcund. Kemaon. Sirmore. Fruit-receptacles axillary, solitary, ovate, the size of a pea, longish-peduncled, appearing and ripening the whole year.
- 5. urophylla, Wall. N. E. Bengal.
- 6. denticulata, Vahl. (symb. 1, 83.—enum. 2. 202; not Bl.—F. quercifolia, Rosb. A. ind. 3, p. 534.) 5 creeping. Sumatra. Fruit-receptacles axillary, solitary, peduncled, short-oval, warty, the size of a pea, appearing and ripening the whole year.
- 7. rubescene, Vahl. (F. heterophylla, Lam. Spreng. syst. 3, 785; not L. fil. ex. Vahl. l. c.;—Roxb. fl. ind. 3, p. 532;—Rheed. 3, t. 62.

  —F. aquatica, Kön. excl. F. heterophylla, L. fil.—Rheed. 3, t. 62.)

  \*\*Teal Goori-shiora. 5 Coromandel. Malabar Hill, Bombay. The Ghants. Bengal, (Serampore.) Silhet. Assam. Fruit-receptacles axillary, paired, peduncled, round-turbinate, the size of a large gooseberry, scabrous, appearing and ripening the whole year. Bark of the root very bitter, given to remove pains in the bowels. (Roxb.)
- 8. humilis, Roxb. (fl. ind. 3, p. 535.) 5 creeping. Sumatra. Fruit-receptacles paired, axillary, peduncled, the size of a pea, oblong, elevatedly-umbilicate. In H. C. G. appearing and ripening the whole year. (Roxb.)
- 9. repens, Roxb. (A. ind. 3, p. 535;—Spreng. syst. 3, p. 783.—F. morifolia, Vahl. enum. 2, 203? not Forsk, quæ F. Forskählii, Vahl. 196; nor Lam. quæ lateriflora, Vahl. p. 197, ideoq. hd. Willd. p. 1150.)

  \*\*E \*\*E \*\*Bhool-doomoor\*\*. 5 Creeping. Bengal, (Serampore.) Fruit-receptacles axillary, solitary, peduncled, obovate, roughish, the size of the point of the little finger, appearing and ripening the whole year.
- pisifera, Wall. 5 Penang. Fruit-receptacles axillary, solitary, sessile, smooth, the size of a pea, ripening H. S.
- 11. radicans, Roxb. (fl. ind. 3, p. 536.) 5 condicant. Silhet. Fruit-receptacles axillary, solitary or paired, long-peduncled, globular, the size of a black current; in H. C. G. appearing and ripening the whole year. (Roxb.)
- 12. diadena. (F. biglandulosa, Wall, not biglandula, Bl.) 5 China. C. S.
- 13. albinervis, Wall. Mauritius. H. S.
- 14. scabrida, Wall, Penang. R. S.
- 15. mangifolia, Wall. Penang. R. S.

- 16. anabatos, (Ficus scandens, Roxb. fl. ind. 3, p. 536; not Lam.) 5 Silhet. Fruit-receptacles axillary, paired, longish-peduncled, globular, rough, the size of a black current; in H. C. G. appearing and ripening the whole year. (Roxb.)
- 17. Goolereea, Roxb. (fl. ind. 3, p. 538.) 5 Hindoosthan. Fruit-receptacles axillary, paired, long-peduncled, nearly globose, downy. Introduced into H. C. G. before 1814. Fl.?
- 18. Wassa, Roxb. (fl. ind. 3, p. 539;—Rumph. 3, t. 94,) 5 Moluccas. Fruit-receptacles axillary, solitary or paired, peduncled, compressedly turnip-shaped, smooth, the size of a gooseberry, appearing in H. C. G. in H. S.; ripening, R. S. (Rosb.)
- 19. indica, L. (Amoen. acad. 1, p. 27;-Rosb. fl. ind. 3, p. 539;-J. Grah. Cat. B. pl. p. 189; not Forsk, nor Lam. or Vahl.—F. bengalensis, L. syst;—Rheed. 1, t. 28.) ab But. Banyan-tree. L. b radicant. Fruit-receptacles axillary, paired, sessile, as large as a middle-sized cherry, appearing and ripening H. S. Common all over India, in some places of an immense size. Lieut. Colonel Sykes mentions one at the village of Mhow, in the Poonah Collectorate, with 68 stems descending from the branches, and capable of affording shade, under a vertical sun, to 20,000 men. (Madr. Journ. of Science, No. 22.) Kabir Bur, near Broach, now the gloomy recess of superstitions, and the haunt of its hateful birds, the owls and flying foxes. (Nimmo.) Bark smooth, light ash-coloured. Wood light, white, and porous. Leaves used by the Brahmins to eat off, for which purpose they are joined together by inkles. Birdline is prepared from the tenacious milky juice, which every part of the tree yields in abundance on being wounded. Birds eat the fruit, and the seeds grow the better for having passed through them. If they drop in the axils of the leaves of the Palmyra-tree, (Borasus flabelliformis, L.) they grow, and extend their descending parts so as in time to embrace entirely the Palmyra, except its upper parts. In very old ones the top thereof is just seen issuing from the trunk of the Banyan itself, as if it grew from thence, whereas it runs down through its centre, and has its roots in the ground, the Palm being the oldest. (Roxb.)
- 20. elastica, Roxb. (fl. ind. 3, p. 541;—Spreng. syst. 3, p. 781;—J. Grah. Cat. B. pl. p. 190.) Indian Rubber-tree. L. 5 radicant. Khassya Mountains. Assam. Friut-receptacles axillary, paired, sessile, oval, smooth, the size of an olive, appearing, H. S.; ripening, R. S. Every part of this tree abounds in a rich milky juice which furnishes about one-third of its weight of Caoutchouc, a substance also discovered by Dr. Roxburgh in Urceola elastica, Roxb., Willoughbeia edulis, Roxb., and Melodinus monogynus, Forst. With the milky juice the natives paint the insides of their vessels and baskets, and the Caoutchouc furnishes them with candles and flambeaux. (Roxb.) For a circumstantial account of this tree, see Roxb. 1, c.

- 21. laccifera, Roxb. (fl. ind. 3, p. 545.) L. 5 Silhet. Fruit-receptacles axillary, sessile, oval, smooth, the size of a gooseberry, appearing H. S.; ripening R. S. (Roxb.)
- 22. religiosa, L. (Spreng. syst. 3, p. 778; not Forsk.;—Roxb. fl. ind. 3, p. 547;—J. Grah. Cat. B. pl. p. 190;—Rheed. 1, t. 27;—Rumph. 3, t. 91.) Ashwuth. Pippul. L. 5 Common all over India. Fruit-receptacles axillary, paired, sessile, depressed, the size of a small cherry, appearing H. S.; ripening R. S. Birds are very fond of the fruit, eat it greedily, and often drop the seeds in cracks of buildings, where they vegetate, occasioning great damage if not removed in time. Wood light and of little use.
- 23. Rumphii, Bl. (p. 437;—Roxb. H. B. p. 66;—fl. ind. 3, p. 548; not Bl;—Rumph. 3, t. 91 and 92.) L. 5 Moluccas. Bengal, (Serampore.) Assam. Kemaon. INTEL Guyashwuth. Fruit-receptacles axillary, sessile, paired, globular, smooth, the size of a cherry, appearing H. S.; ripening R. S.
- 24. Tsiela, Roxb. (fl. ind. 3, p. 849;—J. Grah. Cat. B. pl. p. 191;— Rheed. 3, t. 63.) L. 5 Mountains and Plains of Coromandel. The Ghauts. Fruit-receptacles axillary, paired, sessile, round-turbinate, smooth, the size of a cherry, in H. C. G. appearing H. S.; ripening R. S. (Roxb.)
- 25. venosa, Ait. (Spreng. syst. 3, p. 779; not Willd.—F. infectoria, Willd.;—Roxb. fl. ind. 3, p. 551;—J. Grah. Cat. B. pl. p. 191;—Rheed. 3, t. 64.) \*\*Pakoor. L. 5 The Concans. Bengal, (Serampore.) Fruit-receptacles paired, axillary, sessile, globular, smooth, the size of a pea, appearing H. S.; ripening R. S.
- 26. racemifera, Roxb. (f. ind. 3, p. 560;—Rumph. 3, t. 93.) 5 Sumatra. Fruit receptacles solitary, short-peduncled, shortly turbinate, flattish, on compound glomerate racemes, from the woody part of the tree below the leaves, in H. C. G. appearing and ripening throughout the year.
- 27. rapiformis, Roxb. (fl. ind. 3, p. 551.) 5 Moluccas. Fruit-receptacles axillary, solitary, short-peduncled, turnip-shaped, the size of a small medlar, appearing in H. C. G. in Sept. and Oct. (Roxb.)
- 28. excelsa, Vahl. (Spreng. syst. 3, p. 783;—Roxb. fl. ind. 3, p. 552;— J. Grah. Cat. B. pl. p. 191;—Rheed. 3, t. 58.) 5 Moluccas. Peninsula of India. Fruit-receptacles axillary, solitary or paired, peduncled, somewhat turbinate, smooth, the size of a cherry, appearing in June and July; ripening C. S.
- 29. vagans, Roxb. (fl. ind. 3, p. 537.) 5 cradicant. Chittagong. Silhet. Fruit-receptacles axillary, paired or solitary, long peduncled, nearly globular, the size of a nutmeg, in H. C. G. appearing, H. S.; ripening R. S. (Roxb.)
- 30. Blumii, Wall. (F. exasperata, Roxb. fl. ind. 3, p. 555; not Vahl.—Rumph. 4, t. 63?) 5 Moluccas. Fruit-receptacles axillary, solitary,

- or paired, peduncled, globular, size of a pea, rough, appearing in Sept.; ripening in Dec. (Ross.)
- 31. nitida, Thunb. (Spreng. syst. 3, p. 781;—J. Grah. Cat. B. pl. p. 190;—Rheed. 3, t. 55.) 5 China. Lower Nepal. Khassya Mountains. Penang. Coromandel. Fruit receptacles lateral, fascicled, globular, sessile, the size of a large pea, smooth, appearing C. S.; ripening H. S. Fruit eaten by birds.
- 32. polycarpa, Roxb. (A. ind. 3, p. 556.) 5 Moluccas. Penang. Singapore. Fruit-receptacles in fascicles from the trunk, and large branches, peduncled, globular, scabrous, the size of a large pea, in H. C. G. appearing and ripening R. S. (Roxb.)
- 33. Rosburghii, Wall. (Cat.—F. macrophylla, Rosb. A. ind. 3, p. 556;—not Desf. nor Decaisne.) 5 Chittagong. Silhet. Nepal. Fruit-receptacles collected in bundles near the root of the stem, and on the lower parts of the branches, turnip-shaped, 8-12 ribbed, hairy, as large as the common fig. or larger, when ripe diffusing a strong scent of Russia leather, appearing and ripening throughout the year. Fruit eaten by the natives, where the tree is indigenous. (Rosb.)
- 34. lanceolata, Roxb. (fl. ind. 3, p. 557.) 5 Chittagong. Fruit-receptacles in bundles near the root of the trunk and larger branches, peduncled, warty, compressedly turbinate, deeply umbilicate, the size of a small common fig, appearing and ripening more or less throughout the year.
- 35. glomerata, Roxb. (Corom. 2, t. 123;—fl. ind. 3, p. 558;—Spreng. syst. 3, p. 781;—J. Grah. Cat. B. pl. p. 190. excl. syn. L. and Rheed.
  —Rumph. 3, t. 94.) The LTA Juguya-doomoor. L. 5 Coromandel. Common about Vear on Salsette, and generally by the banks of water-courses throughout the Concans. Table-land of Mahableshwur. Bengal, (Serampore.) Fruit-receptacles short-peduncled, turbinate, nearly as large as a common fig, downy, umbilicated, appearing and ripening throughout the year. The fruit disagreeable, but eaten by the natives. (Roxb.)
- 36. Cunia, Buch. (Rosb. fl. ind. 3, p. 561.—F. conglomerata, Rosb. o. c. p. 559; —J. Grah. Cat. B. pl. p. 190, excl. syn. Rumph.—Rheed. 3, t. 61.) 5 Coromandel. The Concans. Taong-Dong. Moulmein. Rajmahl. Oude. Nepal. Fruit-receptacles turbinate, ribbed, pedicelled, the size of a large filbert, hairy, umbilicated, generally in pairs or in threes, on long, procumbent, radical and cauline, compound, leafless branches, appearing and ripening throughout the year.
- 37. congests, Roxb. (f. ind. 3, p. 560.) 5 Moluccas. Fruit-receptacles short-peduncled, roundish-turbinate, smooth, the size of a filbert, heaped on radical and cauline, short, leafless, ramous branchlets, appearing and ripening throughout the year. (Ross.)
- 38. oppositifolia, Roxb. (Corom. 2, t. 124;—A. ind. 3, p. 561; excl. syn. Rheed.—Spreng. syst. 3, p. 784; excl. syn. Dæmonum.—J.

- Grah, Cat. B. pl. p. 191.) The May Kaku-doomoor. 5 Coromandel. Hills east of Panwell. Kandella. Bengal, (Serampore.) Fruit-receptacles in axillary pairs, peduncled, globular, umbilicated, hairy, the size of a large nutmeg, or on cauline racemes, appearing and ripening throughout the year. This species is, from its being sown by birds, a great destroyer of houses and walls.
- 39. Demonup, Kön. MSS. (Vahl. enum. 2, p. 198; not Roth.;—Rosb. fl. ind. 3, p. 562;—Spreng. syst. 3, p. 784.) 5 Coast of the Tanjore Country. Fruit-receptacles in pairs, on long radical racemes, often under ground, or single or in pairs on the trunk and branches, obovate, very hairy, umbilicated, the size of a large nutmeg, in H. C. G. appearing and ripening throughout the year. (Rosb.)
- 40. Ampelos, Burm. (ind. p. 226.—F. asperrima, Roxb.;—Rheed. 3, t. 60.) Hilly parts of the Concan.
- 41. Benjamina, L. (Mant.—Roxb. fl. ind. 3, p. 550;—Rheed. 1. t. 26.) Kamrup. Peninsula of India.
- 42. artocarpifolia, Wall. Penang. Dec. 1883.

G. Dorsteniëz, Gaudich.

(Lindl. Nat. syst. p. 178.)

- DORSTENIA, L. (Spreng. syst. 3, p. 758. No. 3074;—Endl. gen. pl. 1, p. 278.)
  - Contrayerva, L. (Spreng. syst. 3, p. 777.—Plum. ed. Burm. t. 119;—
    Jacq. icon. rar. 4, t. 614.)
     Peru, Mexico, and some of the W. India
    Islands. Fl. most minute, green, on a fleshy receptacle, R. S.; fr.
    C. S. but not often. Root bitterish, somewhat pungent, with a
    remarkable overpowering odour, sudorific, formerly used as an antidote to the bites of venomous animals. (Feé.)

H. ARTOCARPEE, Gaudich. (Lindl. Nat. Syst. p. 178.)

- ARTOCARPUS, L. (Spreng. syst. 3, p. 758. No. 3082;—Endl. gen. pl. 1, p. 281.
  - 1. integrifolius, L. (Suppl.;—Spreng. syst. 3, p. 804;—Roxb. Corom. 3, t. 250;—ft. ind. 3, p. 522;—B. M. 55, t. 2833-34;—J. Grah. Cat. B. pl. p. 192.—A. heterophylla, Lam.—Rademachia integra, Thunb. act. holm. 36, p. 252.—Polyphema Jaca, Lour.—Sitodium cauliflorum, Gärtn. fr. 1, p. 345, t. 71, 72;—Rheed. 3, t. 26, 27, 28;—Rumph. 1, t. 30, 31.) IN Kantal. Jack-fruit. Entire-leaved Breadfruit. 5 Moluccas. Both Peninsulas of India. Ceylon. Bengal, (Serampore.) Much cultivated. Fl. very minute, greenish or (the male) white, crowded on a large receptacle, so as to form an amentum, Jan. and Feb.; fr. May, June and July. Wood hard, approaching in appearance to mahogany, much used for furniture in Ceylon, and some other parts of India. The natives prepare their best birdlime from the tenacious white juice, which abounds in all the uneatable parts

- of the fruit, and the young tender parts of the tree, and flows freely from recent wounds. The large fruit, which grows from the trunk and larger branches, forms to the natives, f. ex. in Ceylon, a considerable article of diet. Seeds, when roasted, not inferior to the best chestnuts. (Roxb.)
- 2. Lacoocha, Roxb. (f. ind. 3, p. 524;—J. Grah. Cat. B. pl. p. 193.)
  Continued Déphal. Bengal, (Serampore.) Not uncommon in gardens.
  Fl. minute, internally rose-coloured; aments appearing in March, April and May.; fr. R. S. Whole tree, and unripe fruit containing much tenacious, milky juice. The roots dye yellow. Male spadis acid, astringent, eaten by the natives in their curries. Fruit eaten by the natives. (Roxb.)
- 3. Chaplasha, Roxb. (fl. ind. 3, p. 525.) L. 5 Chittagong. Tipperah. Assam. Aments appearing from Feb. to May; fr. R. S. From this immense tree canoes are made for the Fennee and Gomootee rivers. The wood is also useful for many other purposes, particularly when it is to be employed under water. (Roxb.)
- 4. echinatus, Roxb. (fl. ind. 3, p. 527.) Tampooni. 5 Malay Islands. In H. C. G. fl. H. S. (Roxb.)
- 5. incisus, L. fil. (B. M. 55, t. 2869, 70, 71. a. and β.—Roxb. fl. ind. 3, p. 527;—J. Grah. Cat. B. pl. p. 192.)
  - a. fruit seed-bearing. (Bread-nut.—Artocarpus incisus, L. fil. Spreng. syst. 3, p. 804.—Rademachia incisa, Thunb. act. holm. p. 250, t. 36.—Rima ou Fruit au Pain, Sonn. it. t. 57-60.—Soccus granosus, Rumph. 1, t. 33.) Fruit muricated.
  - B. without seeds. (Bread-fruit.—Artocarpus communis, Forst. gen. pl. p. 102, t. 51.—Soccus lanosus, Rumph. 1, t. 32.) Fruit not muricated, but marked with reticulations, whose areolæ are flat, or but slightly prominent.
  - b South Sea Islands, especially Otaheite. Molucca Islands. Java. Sumatra. Mauritius. Bourbon. Now domesticated, or at least much cultivated in the W. Indies, and on the American Continent, from Spanish Guiana to New-Granada. Thus, as Humboldt says, the western coast of America, washed by the Pacific Ocean, receives from a British settlement in the W. Indies, a production of the Friendly Islands. Introduced into H. C. G. before 1794, but had not fl. there up to 1814, the winters of Bengal being too cold for it.
- 6. hirsutus, Lam. (Roxb. fl. ind. 3, p. 521;—Rheed. 3, t. 32.) Malabar.
- serratus, Roxb. (H. B. p. 66.)
   Travancore. Introduced into H. C.
   G. in 1808, but had not fl. up to 1814.
- 8. angustifolius, Roxb. (l. c.) 5 Malay Islands. Introduced into H. C. G. in 1800, but had not fl. up to 1814.

MACLURA, Nutt. (Endl. gen. pl. 1, p. 278.)

1. tinctoria, D. Don. (Loud. hort. brit. p. 380, No. 23179.—Broussonetia tinctoria, Kth.;—Spreng. syst. 3, p. 901; excl. syn. Nutt.—Morus

- tinctoria, L.) Fustick. 5 W. Indies. New-Granada. Brazil. Has not fl. here. Fustick, a yellow dye, is the wood of this tree.
- 2. Calcar galli, Lodd. MSS. 5 Native place? Has not fl. here.

    1. Alicastrum, Swz. (fl. ind. occ. 1, t. 1, f. 1;—Spreng. syst. 1, p. 22;—
    Rosb. H. B. p. 71.) Jamaica Bread-nut Tree. 5 Jamaica. Introduced into H. C. G. in 1804, but had not fl. up to 1814. Abounds in a tenacious, gummy milk. Its leaves and young shoots are much eaten by cattle, but when they become old, they cease to be innocuous. The roasted nuts are used instead of bread, and have much the taste of Hazel nuts. (Swz.)
    - 2. utile, Endl. (l. c.—Galactodendron utile, Humb.—B. M. 66, t. 3723-24.—Palo de Vaca, Humb.) Cow Tree of the Caracas. 5 Stem more than twenty feet in circumference at about five feet from the root, running up to a height of sixty feet, perfectly uninterrupted by either leaf or branch, when its vast arms and minor branches, most luxuriantly clothed with foliage, spread on every side, fully twenty-five or thirty feet from the trunk, and rise to an additional elevation of forty feet, so that this stupendous tree is upwards of a hundred feet high. Native place Caracas, more peculiarly on the Cordillera of the shore, at an elevation of about 4000 feet, in dense forests where the thermometer in May is 70°. Incisions made in the trunk of the tree are followed by a profuse flow of gluey, thickish milk, destitute of acridity, of an agreeable balsamic odour, and very nutritious. The negroes and free people, who work in the plantations, soak in it bread made of Maize, Cassava, &c. and generally grow stouter during the season when the Palo de Vaca yields most milk. (Humb.) In H. C. G. where, however, it does not thrive.

### SUB-ORDER.—CERATOPHYLLEÆ, DC.—Lindl. Nat. Syst. p. 178.

Floating herbs, of 1 genus, and 5-6 species: 2 natives of Europe and 3-4 of the Peninsula of India. One of the latter also common to Eygpt. Properties unknown.

CERATOPHYLLUM, L. (Spreng. syst. 3, p. 762, No. 3131;—Endl. gen. pl. p. 268.)

1. verticillatum, Roxb. (Fl. ind. 3, p. 624.) ⊙ Bengal, (Scrampore.) Fl. Feb. and March, most minute; fr. H. S.

#### ORDER CXXI.—ULMACEÆ, Mirb.—Lindl. Nat. Syst. p. 178.

#### THE ELM TRIBE.

Trees or shrubs, by Lindl. referred to 6 genera. Of these Spreng. syst. assigns 9 species to S. America, Mexico and the W. Indies; 9 to N. America; 5 to Europe; 2 to Caucasus; 1 to Dahuria; 1 to Siberia; and 1 to Senegambia. In the E. Indies have been discovered according to Spreng. Wall. Cat. and Royl. ill. 5 species of *Ulmus*; (Nepal, Kemaon, Kunawur, Hurdwar, Chittagong,) and 13 of *Celtis*; (Nepal, Khassia Mountains, Circars, Penang, Singapore,) How many of the latter must be referred to *Sponia*, we have no means to ascertain.

The Elms are well known in Europe as good timber-trees. The same may be said of those found in India and its mountains. (Royle.)

ULMUS, L. (Spreng. syst. 1, p. 532, No. 1099;—Endl. gen. pl. 1, p. 276.)

- integrifolia, Roxb. (Corom. 1, t. 78;—fl. ind. 2, p. 68;—Spreng. syst.
   p. 931;—J. Grah. Cat. B. pl. p. 188.)
   L. 5 Circar Mountains.
   Hurdwar. Foot of the Himalayas. Malabar Hill, Bombay. Salsette.
   Ghauts, near Arcot. In H. C. G. fl. C. S. Wood of good quality, and employed for a variety of uses, f. ex. for making carts, door-frames, &c. Forks of the branches used by the natives to protect their straw against cattle.
- 2. virgata, Roxb. (ft. ind. 2, p. 67;—Wall. pl. as. rar. 3, t. 290.) 5 China. Nepal. Kemaon. Mussooree. Fl. small, orange, Nov.; fr. Feb. Celtis, Tourn. (Spreng. syst. 1, p. 532, No. 1101;—Endl. gen. pl. 1, p. 276.)
  - australis, L. (Spreng. syst. 1, p. 932.)
     L. 5 S. Europe. Barbary. In H. C. G. Fl.?
  - occidentalis, L. (Spreng. l. c.—Gärtn, fr. 1, p. 374, t. 77, f. 3;— Roxb. H. B. p. 21.) L. 5 Tropical and North America. Fl. small, green, C. S.

SPONIA, Commers. (Endl. gen. pl. 1, p. 276.)

- 1. orientalis, (Celtis orientalis, L.;—Roxb. f. ind. 2, p. 65;—J. Grah. Cat. B. pl. p. 189;—Buch. Trans. Linn. Soc. 17, p. 207, No. 1, 2, 3, 4, 5.—Rheed. 4, t. 40.) The Jeebun. 5 Ceylon. Coromandel. Common along the foot of the Ghauts; Kennery forests, Salsette, &c. Bengal, (Serampore.) Silhet. Assam. Nepal. Fl. very small, green; and fr. the whole year. The inner bark of this tree, consisting of numerous reticulated fibres, forms a kind of natural cloth, used by the Garos for covering their nakedness. Leaves used by the Natives for polishing horn. (Buch.)
- tetrandra, (Celtis tetrandra, Roxb. fl. ind. 2, p. 63.—C. Akata, Buch.;
   Trans. Linn. Soc. 17, p. 211.)
   Coromandel. Assam. Oude. Nepal.
   Kemaon. Fl. very small, green, March; fr. Sept.
- \* Ulmus erosa, Roth. 5 Kemaon.—U. lanceæfolia, Roxb.; Wall. pl. as. rar. 2, t. 200. L. 5 Chittagong.—Celtis Roxburghii, (C. trinervia, Roxb.; not Lam.) 5 Chittagong.—C. tomentosa, Roxb. 5 Chittagong.—C. amboinensis, Vent. 5 Silhet. Penang. Singapore.—C. angustifolia, Lindl. # ORDER CXXII.—ANTIDESMACEÆ,—Stilaginaceæ, Lindl. Nat. Syst. p. 179.

Trees or shrubs, referred to 2 genera, Antidesma and Falconeria. Of the former, one species has been found in Madagascar, and 13 in the E. Indies, (Nepal. Khassya Mountains. Circars. Penang.) The latter includes but 2 species, both from the Himalayas. Properties almost unknown.

Antidesma, L. (Spreng. syst. 1, p. 523, No. 940;—Endl. gen. pl. 1, p.

- 1. tomentosum, (Stilago tomentosa, Roxb. fl. ind. 3, p. 757.) 5 Silhet. Fl. minute, green, May and June; fr. Sept. and Oct.
- Bunius, Spreng. (syst. 1, p. 826.—A. alexiterium, Spreng. l. c.;—J. Grah. Cat. B. pl. p. 186.—Stilago Bunius, L.;—Rosb. fl. ind. 3, p. 758;—Rheed. 4, t. 56;—Rumph. 3, t. 131, excl. A.) 5 Moluccas. Penang. Coromandel. Kandalla Ghaut. Assam. Nepal. Fl. minute, greenish, March and April; fr. Sept. Fruit acidulous, palatable.
- diandrum, Spreng. (syst. 1, p. 826.—Stilago diandra, Roxb. Corom.
   t. 166;—fl. ind. 3, p. 759.)
   Circar Mountains. Assam. Nepal.
   Fl. very small, greenish, June; fr. C. S. Wood used for various purposes. Ripe berries eaten by the natives. (Roxb.)

- 4. lanceolarium, Wall. (Cat.-Stilago lanceolaria, Roxb. fl. ind. 3, p. 760.) L. 5 Chittagong. Fl. minute, greenish, May and June; fr. C. S.
- 5. pubescens, Roxb. (Corom. 2, t. 167;—fl. ind. 3, p. 770;—Spreng. syst. p. 826; -J. Grak. Cat. B. pl. p. 186; -Rheed. 5, t. 11.) 5 Circar Mountains. S. Concan. Fl. minute, greenish-yellow, H. S.; fr. R. S. Berries eaten by the natives. (Roxb.)
- 6. paniculatum, Roxb. (fl. ind. 3, p. 770; Spreng. syst. 1, p. 826; J. Grah. Cat. B. pl. p. 186.) The Khoodi-jam. 5 S. Concan. Penang. Bengal, (Serampore.) Silhet. Nepal. Fl. minute, pale greenish, April and May; fr. July. Berries acidulous, of a pleasant taste.
- 7. macrophyllum, Wall. MSS. Silhet. In H. C. G. Fl.
- 9. rugosum,

FALCONBRIA, Royle, (ill. p. 354.)

- 1. Wallichiana, Royle. (o. c. t. 98, f. 3.) 5 Nepal. Lately introduced.
- \* Antidesma sylvestre, Lam. Rheed. 5, t. 26. 5 S. Concan.—Falconeria insignis, Royle, ill. t. 98, f. 2, 5 Deyra-Dhoon.

# ORDER CXXIII.—MYRICACEÆ,—Lindl. Nat. Syst. p. 179.

#### THE GALE TRIBE.

Aromatic shrubs or trees, by Lindl. referred to 4 genera. Of these, according to Spreng. syst. 10 species are natives of S. America; 3 of N. America; 4 of S. Africa; 1 of the Azores; 1 of Europe; 4-5 are found in the E. Indies. The latter are 3-4 Myricas; (Nepal Mountains. Singapore. Peninsula of India.) and 1 Putranjiva, (Assam, and Khassya Mountains, Oude, Coromandel.) Royle observes that Myrica sapida is in his opinion not distinct from M. integrifolia.—M. esculenta and octandra, Buch. we find only in Spreng. c. p. pag. 47 and 48. Are they really distinct from Roxburgh's plant? Properties of no great importance. "Comptonia asplenifolia, Ait. posesses astringent and tonic properties, and is much used in the domestic medicine of the United States in cases of diarrhoea. Barton. 1, p. 224. The root of Myrica cerifera, L. is a powerful astringent, and wax is obtained in great abundance from its berries." (Lindl.)

- MYRICA, L. (Spreng. syst. 1, p. 374, No. 554;—Endl. gen. pl. 1, 271.)
  - 1. integrifolia, Roxb. (fl. ind. 3, p. 765.) L. 5 Khassya Mountains. In H. C. G. fl. December and January; fr. May. Fruit pickled by the natives, and used as a condiment. (Rosb.)
  - 2. sapida, Wall. (tent. A. nep. t. 45.) Himalayas, from the Sutlej to Silhet. Fruit agreeably flavoured. Introduced in 1840.

Putranjiva, Wall. (Endl. gen. pl. 1, p. 287.)

- Rosburghii, Wall. (Cat.;—Royle. ill. t. 100;—Endl. ichnogr. t. 19.
   —Nageia Putranjiva, Rosb. fl. ind. 3, p. 766;—J. Grah. Cat. B. pl. p.
   196;—Rheed. 7, t. 59.) L. 5 Coromandel Mountains. Ravines at
   Nagotnah and Kandalla. Kennery jungles, Salsette. Jungles to the
   N. and E. of Belgaum. Concans. Silhet. Assam. Oude. Common along
   the foot of the Himalayas. Fl. minute, yellow, March and April; fr.
   January. Wood white, close grained, and very hard. Nuts strung
   by parents round the necks of their children to keep them in health.
   (Rosb.)
- \* M. mesicana, Willd. Mexico.—M. salapensis, Humb. Mexico.—M. arguta, Humb. Mexico.—M. segregata, Jacq. Brazil.

# ORDER CXXIV.—JUGLANDACEÆ, Lindl. Nat. Syst. p. 180.

#### THE WALNUT TRIBE.

Trees, referred to 4 genera. Of these Spreng. syst. enumerates 14 species from N. America; 1 from Greece, Asia Minor and Persia; 1 from Caucasus; and 1 from Jamaica and St. Domingo. In the E. Indies Wall. Cat. mentions 6 species: 3 of Juglans, (Nepal, &c. Taong-Dong. Tavoy. one of them the common Walnut, and 3 of Engelhardtia, (Nepal, Khassya Mountains. Penang. Singapore.) All valuable timber-trees. Juglans, L. (Spreng. syst. 3, p. 762, No. 3127.) Walnut.

1. regia, L. (Spreng. syst. 3, p. 865;—Lam. ill. t. 781;—Roxb. fl. ind. 3, p. 631.) weight Akurot. 5 Extends from Greece and Asia Minor, over Lebanon and Persia, probably all along the Hindoo Koosh to the Himalayas. Abundant in Cashmere. Sirmore. Kemaon. Nepal. Assam, and the Khassya Mountains. Introduced into H. C. G. in 1795, but had not fl. up to 1814. Walnuts are imported into Bengal from Cashmere, the Himalayas, the Khassya Mountains, &c.

Engelhardtia, Leschen.

L

- 1. Roxburghiana, Lindl. (Wall. pl. as. rar. 2, t. 199.—Juglans pterococca, Roxb. fl. ind. 3, p. 631.) L. 5 Khassya Mountains. Kamrup forests. Nepal. Tenasserim Coast, &c. Fl. minute, yellowish. In H. C. G. fr. July and Aug. Wood light-coloured, used by turners. Bark thick, dark brown, containing much tannin. (Roxb.)
  - \* Juglans baccata, L. Jamaica.—J. arguta, Wall. Taong-Dong.—Engel-hardtia Colebrookiana, Lindl.; Wall. pl. as. rar. 3, t. 208. Nepal.— E. Wallichiana, Lindl. Penang. Singapore.

# ORDER CXXV.—CASUARINACEÆ, (Casuaraceæ, Lindl. Nat. Syst. p. 181.)

Weeping trees, referred to a single genus, which according to Spreng. syst. contains 13 species: 10 from New Holland and the South Sea Islands; 1 from the Mascarenhas; 1 from E. Africa; and 2 from the E. Indies, one of which is also a native of the South Sea Islands. Timber excellent.

- CASUABINA, L. (Spreng. syst. 3, p. 758, No. 3081;—Endl. gen. pl. 1, p. 271.)

  1. equisetifolia, Forst. (Spreng. syst. 3, p. 803;—Lam. ill. t. 746;—Rosb.
  - H. B. p. 66;—Rumph. 3, t. 57.) 5 Islands of the Pacific Sea. Moluccas. Introduced into H. C. G. before 1814. Here it has not fl. Wood reddish-grey, very heavy, hard. (Rumph.)
  - 2. nodifiora, Forst. (Spreng. syst. l. c.) 5 South Sea Islands. Introduced into H. C. G. in 1810. Fl.?
  - 3. muricata, Roxb. (fl. ind. 3, p. 519;—Spreng. syst. 3, p. 804;—J. Grah. Cat. B. pl. p. 196.—C. equisetifolia, L. suppl. excl. syn. Forst.)
    L. 5 Coast along the Malayan Peninsula up to Chittagong. Now introduced into every part of the plains of India, where in some places it is completely domesticated, f. ex. in Lower Bengal, about Calcutta, Barrackpore, Serampore, &c. Fl. minute, greenish, Feb. and March; fr. C. S. Wood reddish, of a texture like Toon, but held in no estimation. (Roxb.)
  - 4. torulosa, Ait. (Spreng. syst. l. c.) 5 New Holland. Introduced into H. C. G. in 1811. Fl.?
  - 5. distyla, Vent. (Spreng. syst. 3, p. 804.) 5 New Holland. Introduced into H. C. G. in 1811. Fl.?

### ORDER CXXVI.—DATISCACEÆ, Lindl. Nat. Syst. p. 182.

Herbs, by Lindl. referred to 3 genera: Datisca, L.; Tetrameles, R. Br.; and Tricerastes, Presl. The first has one species in S. Europe, Asia Minor, Iberia, Cashmere and Nepal; and another in Pennsylvania. The second is a Javanese genus. With the third we are not acquainted. Properties unimportant.

DATISCA, L. (Spreng. syst. 3, p. 895, No. 3191.)

- 1. cannabina, L. (Spreng. syst. 3, p. 906;—Lam. ill. t. 823.—D. Nepalensis, Don.?) 24. S. Europe. Asia Minor. Iberia. Kunawar. Cashmeer. Nepal. Has been introduced into H. C. G. Fl.?
- \* Tetrameles nudiflora, R. Br. Horsf. pl. as. rar. 1, p. 79, t. 17. L. 5 Java.

<sup>\*</sup> Casuarina lateriflora, Lam. 5 Mascarenhas Islands.

ORDER CXXVII.—LACISTEMACEÆ, Lindl. Nat. Syst. p. 183.

Small trees or shrubs, of I genus, and according to Spreng. syst. 5 species, all natives of Brazil and the W. Indies Properties unknown.

\* Lacistema serrulatum, Mart. nov. gen. t. 95. 5 Brazil.—L. Berterianum, Mart. 5 Cuba. St. Domingo.—L. pubescens, Mart; nov. gen. t. 94. 5 Brazil.—L. myricoïdes, Swz. 5 Jamaica.

## ORDER CXXVIII.—CHLORANTHACEÆ, Lindl. Nat. Syst. p. 183.

Herbs or undershrubs, by Lindl. referred to 3 genera: Ascarina, Forst. with 1 species from the Society Islands: Chloranthus, Swz., with 3 from China and Japan, and 3 from the Khassya Mountains, Java, and Penang; and Hedyosmum, Swz. with 5 from the W. Indies and New Granada. The roots of Chloranthus officinalis have a fragrant camphorated smell, and an aromatic, somewhat bitter flavour. There seems no doubt that it is a stimulant of the highest order. (Lindl. from Blum. A. Jav.)

- CHLOBANTHUS, Swz. (Spreng. syst. 3, p. 683, No. 3408;—Endl. gen. pl. 1, p. 265.)
  - 1. inconspicuus, Swz. (Spreng. syst. 3, p. 750;—Rosb. H. B. p. 11.— Nigrina plicata, Thunb.—Creodus odorifer, Lour.) 5 China. Japan. Fl. small, R. S.; fr. 0.
  - 2. erectus, Wall. (Cat.) 5 Khassya Mountains. Assam. In H. C. G. Fl.?
  - \* Chloranthus monostachys, R. Br.; B. M. 48, t. 2190. 5 China.—C. brachystachys, Bl. 5 Penang.—Hedyosmum nutans, Swz. 5 Jamaica.

    —H. arborescens, Swz. 5 Jamaica.—H. hirsutum, Kth. New Granada.

#### ORDER CXXIX.—SAURURACEÆ, Lindl. Nat. Syst. p. 184.

Herbs, excluding Spathium and Aponogeton? referred to 2 genera: Houttuynia, with one species from Japan, Nepal, the Khassya Mountains and Cochin China; and Saururus, L. with 2 from N. America. Properties unknown.

HOUTTUYNIA, Thunb. (Spreng. syst. 1, p. 138, No. 371;—Endl. gen. pl. 1, p. 267.)

1. cordata, Thunb. (Spreng. syst. 1, p. 364;—Thunb. jap. t. 26;—B. M. 54, p. 2731;—Roxb. fl. ind.; ed. Carey, 1, p. 360.—Polypara Cochin-

chinensis, Lour.) 4. Japan. Nepal. Assam. Khassya Mountains. Cochin China. Has not fl. here. The plant, while young, is used as a potherb by the inhabitants of Nepal, as well as those of Cochin China.

## ORDER CXXX.—PIPERACEÆ, Rich.—Lindl. Nat. Syst. p. 185.

#### THE PEPPER TRIBE.

Herbs, undershrubs or shrubs, by Lindl. referred to 4 genera. Of these, according to Spreng. syst. 188 are natives of S. America, Mexico and the W. Indies; 5 of the Mascarenhas Islands; 3 of the South Sea Islands; 1 of Guinea; and 1 of Carolina. 3-4 species have been discovered in S. Africa, (Harvey,) and 48 of Piper (Spreng; Roxb. Wall.) in the E. Indies, Moluccas, Sunda Islands, Ceylon, both Peninsulas of India, the Khassya Mountains, Assam, Nepal, Kemaon. Only a few herbaceous forms belong to the plains. Common Pepper, Cubebs and Betle are well known to every one. Piper inebrians is narcotic, and used by the South Sea islanders for preparing an intoxicating drink.

PIPER, L. (Spreng. syst. 1, p. 28, No. 130;—Endl. gen. pl. 1, p. 265.)

- 1. Chaba, W. Hunt. (Roxb. fl. ind. 1, p. 156; ed. Carey, 1, p. 158;—
  Spreng. syst. 1, p. 112.—P. Chuvya, Roxb. H. B. p. 4;—Rumph. 5,
  t. 116, f. 1.) Chui. 5 Moluccas. Singapore. Penang. Introduced into H. C. G. in 1808, but had not fl. up to 1814, nor has it fl. here during the last twelve years.
- 2. nigrum, L. (Spreng. syst. 1, p. 112;—Roxb, fl. ind. 1, p. 150; ed. Carey, 1, p. 153;—J. Grah. Cat. B. pl. p. 198;—B. M. 59, t. 3139;—Rheed. 7, t. 12.) (গাৰ মার্চ Gol-murich. Black-pepper. 5 Usumatra. Courtallum, &c. Introduced into H. C. G. before 1793, but had not fl. up to 1814, nor, do I think, it has ever fl. in Bengal.
- 3. trioecum, Roxb. (fl. ind. 1, p. 151; ed. Carey, 1, p. 153;—J. Grah. Cat. B. pl. p. 199;—Spreng. syst. 1, p. 112.) 5 Cajamundri Circar. In abundance at Lanowlee, near Kandalla, clothing the trunks of high trees. Aments appearing R. and C. S.; fr. March.
  - 4. longum, L. (Spreng. syst. 1, p. 413;—Roxb. fl. ind. 1, p. 154; ed. Carey, 1, p. 156;—J. Grah. Cat. B. pl. p. 199;—Rheed. 7, t. 14.)

    Pigg Pipool. Long-pepper. 5 w Banks of water-courses towards the Circar Mountains. S. Concan. Banks of the Irawaddi. Bengal, (Serampore.) Silhet. Aments appearing R. S.; fr. C. S.

4

5. Betle, L. (Spreng. syst. 1, p. 413;—Roxb. fl. ind. 1, p. 158; ed. Carey, 1, p! 160;—J. Grah. Cat. B. pl. p. 198;—B. M. 59, t. 3132;—Rheed. 7, t. 15;—Rumph. 5, t. 116, f. 2;—Burm. zeyl. t. 82, f. 2,)
 974 Pan. Betle-leaf. 5 or creeping. Native place unknown. Cultivated all over India. Aments appearing R. and C. S.

- sylvaticum, Roxb. (fl. ind. 1, p. 156; ed. Carey, 1, p. 158;—Spreng. syst. 1, p. 413.)
   w Khassya Mountains. Assam. Aments appearing, and fr. R. S.
- cuncifolium, Jacq. (icon. rar. 2, t. 214;—Spreng. syst. 1, p. 115.—Peperomia cuneifolia, Willd. en.)
   Caracas. Introduced here a year ago. Has not fl. yet.
- 8. reptane, Roxb. (H. B. p. 4.) Moluccas. 5 Rooting. In H. C. G. Aments appear and ripen R. and C. S. (Roxb.)
- 9. sarmentosum, Roxb. (fl. ind. 1, p. 160; ed. Carey, 1, p. 162;—Spreng. syst. I, p. 117.—P. latifolium, Hunt; As. Res. 9, p. 392; not Forst.)

  5 Penang. Aments appearing, and ripening R. S.
- peepuloïdes, Roxb. (fl. ind. 1, p. 157; ed. Carey, 1, p. 159;—Spreng. syst. 1, p. 117.) Silhet Long-pepper. 5 Rooting. Khaesya Mountains. Silhet. Introduced into H. C. G. in 1811, but had not fl. up to 1814.
- 11. clusiæfolium, Jacq. (icon. rar. 2, t. 213.—Peperomia clusiæfolia, Hook; B. M. 56, t. 2943.) 4. W. Indies. Introduced in 1840.
- pereskiæfolium, Jacq. (collect. 4, p. 126;—Pers. syn. 1, p. 84.—P. peiresciæfolium, Spreng. syst. 1, p. 119.—Peperomia pereskiæfolia, Humb.;—Hook. esot. fl. t. 67.)
   Caracas. Introduced in 1841.
- 13. magneliæfolium, Jacq. (coll. 3, p. 210; ic. rar. 2, t. 213.) 4.
  - \* Piper Malamiri, L. Rheed. 7, t. 16. S. Concan. Goalpara.—P. lonchites, Röm. and Sch. (P. lanceolatum, Roxb. not Ruiz. and Pav.) Moluccas. Penaing.—P. stenophyllum, (P. angustifolium, Roxb. not Lam.) Moluccas.—P. saxatile, Wall. Nepal. Khassya Mountains.—P. ribesioides, Wall.; pl. as. rar. 1, t. 91. Chappedong.—P. subpettatum, Willd. Penang. Mauritius.—P. plantagineum, Buch. Goalpara.—P. colubrinum, Lk. 5 Brazil.—P. nitidum, Swz. 5 Jamaica.—P. acuminatum, L.; B. M. 44, t. 1882. 4. W. Indies.—P. reniforme, Poir. (Peperomia reniformis, Hook. exot. fl. t. 164.) 5 St. Vincent.—Laurea tiliafolia, Gaudich, 5 Guiana.—Ottonia Anisum, Spreng. 5 Brazil.

#### ORDER CXXXI.—SALICACEÆ, Lindl. Nat. Syst. p. 186.

#### THE WILLOW TRIBE.

Trees or shrubs, of 2 genera: Salix and Populus. Of these, Spreng. syst. enumerates 75 species from Europe; 36 from N. America; 6 from S. America and Mexico; 8 from Dahuria; 1 from Iberia; 1 from Spitzbergen; 1 from Siberia; 1 from Melville Island; 1 from Japan; 1 from Patagonia; and 1 from Egypt. In the eastern and northern districts of S. Africa have been found several species of Salix. That of the Gariep (S.

Gariepina, Burch,) is, according to Burchell, one of the greatest ornaments of the noble river whose name it bears, (*Harvey*.) The E. Indies present, according to Wall. Cat. and Royle. ill. 2 species of *Populus*, (Himalayas); and 15 of *Salis*; 2 from Oude; 3 from the Peninsula of India; 1 from Lower Bengal; and the rest from the Himalayas.

The willows and poplars are valuable trees for their timber, or for economical purposes.

- Salix, L. (Spreng. syst. 1, p. 28, No. 129;—Endl. gen. pl. 1, p. 290.)
  Willow.
  - babylonica, L. (Spreng. syst. 1, p. 99;—Rosb. fl. ind. 3, p. 754;—J. Grah. Cat. B. pl. p. 195.) Weeping Willow. 5 Greece. Asia Minor. Nepal. Cultivated in gardens. Fl. March.
  - 2. tetrasperma, Roxb. (Corom. 1, t. 97;—ft. ind. 3, p. 753;—Spreng. syst. 1, p. 100;—J. Grah. Cat. B. pl. p. 195.) And Pance-juma. 5 Kheree Pass, along the foot of the Mountains, and in other hot parts of India, as Bengal and the Peninsula. In the Presidency of Bombay, the vale of Yena, and other moist places, Mahableshwur; various places of the Southern Mahratta Country. Fl. H. and R. S.
  - \* Saliz glabrescens, Lindl. Oude. Rohilcund.—S. urophylla, Lindl. Oude.—S. Bonplandiana, Humb. Mexico.—S. ægyptiaca, L. Egypt.—S. paradoxa, Humb. Mexico.—Populus græca, Ait. Greece.

ORDER CXXXII.-PLATANACEÆ, Lindl. Nat. Syst. p. 187.

Trees or shrubs of one genus, of which Spreng. syst. enumerates 4 species: 1 from Europe and Asia Minor; 2 from Asia Minor; and 1 from N. America. Wood very valuable.

\* Platanus orientalis, L. 5 S. Europe. Asia Minor. Caucasus. Cashmere.

ORDER CXXXIII.—BALSAMACEÆ, Lindl. Nat. Syst. p. 188.

#### BALSAMIFLUÆ, BL.

Tall trees yielding balsam, (Bl.) contained in one genus, Liquidambar, of which Spreng. syst. enumerates 2 species, one from the warmer parts of N. America; the other from the neighbourhood of Smyrna. A third Liquidambar cerasifolia, Griff. (Sedgwickia cerasifolia Wall. et Griff.) is found in the E. Himalayas and Assam. "The fragrant resin Storax is yielded by several species of Liquidambar." (Lindl.)

#### ORDER CXXXIV.—MONIMIACEÆ, Lindl. Nat. Syst. p. 188.

Aromatic trees or shrubs, by Lindl. referred to 6 genera, of which Spreng. syst. enumerates 3 species from Madagascar and the Mascarenhas Islands; and 6 from S. America.

- "All the parts of the bark and leaves exhale an aromatic odour, which is compared by travellers to that of Laurels or Myrtles. (DC.) Ruizia, the Bolds of Chili produces a succulent fruit which is eaten by the natives. Both the wood and leaves are very fragrant; the former makes a kind of charcoal, which is preferred beyond all other kinds by smiths, (Bridges.)" (Lindl.) Ambora, Juss. (Endl. gen. pl. 1, p. 313.)
  - Tambourissa, Lam. (ill. t. 784.—Mithridatea quadrifida, Willd.— Rosb. H. B. p. 2.) 5 Madagascar. Mascarenhas Islands. Introduced into H. C. G. in 1810, but had not fl. up to 1814.
  - \* Monimia rotundifolia, Pet. Th. Mascarenhas Islands.—M. ovalifolia, Pet. Th. Mascarenhas Islands.

### ORDER CXXXV.—ATHEROSPERMACEÆ, Lindl. Nat. Syst. p. 189.

Trees, referred by Lindl. to 3 genera: Atherosperma, Labill. with 1 species from N. Holland; Laurelia, Juss. with 1 from Chili; and Citrosma, Ruiz. and Pav., of which Spreng. syst. enumerates 18 species from S. America. Aromatic plants.

\* Atherosperma moschata, Lindl. 5 New Holland.

## ORDER CXXXVI.—PODOSTEMACEÆ, Lindl. Nat. Syst. p. 190.

Herbaceous floating plants, referred by Lindl. to 8 genera, of which Spreng. syst. enumerates 5 species from S. America; 1 from N. America; 2 from Madagascar; and 1 from Etruria, Chili and N. America; 2 species of *Podostemon*, (Wallichii R. Br. et Griffithii, Wall.) have been found on the Khassya Mountains.

\* Mniopsis scaturiginum, Mart. Brazil.

#### ORDER CXXXVII.—CALLITRICHACEÆ, Lindl. Nat. Syst. p. 191.

Small annual aquatic herbs of 1 genus, containing, according to DC. 4 species from Europe and N. America. One species has been found on the Neelgherries. Properties unknown.

\* Callitriche verna, L.; E. B. 11, t. 722. © Europe.

ORDER CXXXVIII.—SANTALACEÆ, R. Br.—Lindl. Nat. Syst. p. 193.

#### THE SANDERS-WOOD TRIBE.

Herbs, shrubs or trees, referred to 18-20 genera. Of these Spreng. syst. enumerates 21 species for New Holland; 9 for Europe; 8 for N. America; 2-4 for Chili and Peru; 1 for Patagonia; and 1 for Japan. In S. Africa have been found 40 species, (Harvey,) and in the E. Indies, according to our materials, 10; viz. 1-2 of Thesium, (Peninsula, Himalayas); 1-2 of Santalum; 2 of Osyris, (Nepal, Peninsula); 1-2 of Sphærocarya, (Nepal, Khassya Mountains); 1 of Scleropyrum, (Malabar); and 1 of Octarillum. (Lour.) Properties under Santalum album. Santalum, L. (Spreng. syst. 1, p. 373, No. 538.)

- 1. album, L. (Rosb. fl. ind. 1, p. 442; ed. Carey, 1, p. 462;—J. Grah. Cat. B. pl. p. 177;—B. M. 60, t. 3235;—Buch. journ. Mysore, 1, p. 186 and 202—2, p. 117 and 132—3, p. 192;—W. Griffith. On the ovulum of Santalum album, in Linn. soc. trans. 18 vol. page 59-71.—Sandalum album, Rumph. 2, t. 11.) The Chundun. Sandal-Wood. 5 China. Cochin China. Both Peninsulas of India, Assam. Fl. small, first straw-coloured, afterwards deep ferrugineous-purple, inodorous, and fr. nearly the whole year. Yields the Sandal-wood of commerce, which is usually cut into billets, and disposed of in that state. It is burnt to perfume temples and dwelling houses, both in China and India. Reduced to powder, it enters into a composition for marking the forehead. (J.
- \* Osyris nepalensis, Don. (O. arborea, Wall. Cat.) Nepal. Sirmore. Hurdwar.—O. Wightiana, J. Grah. Kandalla. Mahableshwur.—Sphærocarya edulis, Wall.; Wight. icon. 1, t. 255. Nepal.—Scleropyrum Wallichianum, Arn. Wight. icon. 1, t. 241.

Grah. l. c.)

ORDER CXXXIX.—ELÆAGNACEÆ, Lindl. Nat. Syst. p. 194.

### THE OLEASTER TRIBE.

Trees or shrubs, by Lindl. referred to 4 genera, of which Spreng. syst. assigns 5 species to Japan; 3 to N. America; and 2 to Europe, Asia Minor, Tauria and Egypt. In the E. Indies have, according to Roxb. Wall. Cat. and Royle. ill. been discovered 8 species of *Elæagnus*, (Himalayas, Khassya Mountains, Garrow Hills, Ludak, Neelgherries, Travancore, Ceylon, Sumatra, Java, (one also a native of Japan,) and *Hippophaë conferta*, Wall. a native of the Himalayas. Properties unimportant.

ELEAGNUS, L. (Spreng. syst. 1, p. 373, No. 535.)

- 1. triflora, Roxb. (fl. ind. 1, p. 439; ed. Carey, 1, p. 459;—Spreng. syst. 1, p. 489;—Burm. fl. zeyl. t. 39, f. 1.) 5 Ceylon. Sumatra. Fl. small, white, C. S.; fr. H. S.
- conferta, Roxb. (f. ind. l, p. 440; ed. Carey, l, p. 450;—Spreng. syst. l, p. 489;—J. Grah. Cat. B. pl. p. 178.)
   Kandalla, Mahableshwur. Along the Ghauts. S. Concan. Cochin. Prome. Segaen. Khassya Mountains. Nepal. Fl. small, straw-coloured, C. S.; fr. March. Fruit eaten by the natives, of an agreeable flavour. (J. Grah. l. c.)
- dulcis, Roxb. (H. B. p. 11; —J. Grah. Cat. B. pl. p. 178.—E. arborea, Roxb. fl. ind. 1, p. 441?; ed. Carey, 1, p. 461; —Spreng. syst. 1. p. 489?)
   L. 5 Silhet. Has not fl. here.
- parvifolia, Wall. (Royl. ill. p. 323, t. 81, f. 1.) Nepal. Sirmore.
   Kemaon. 5 fl. small, white. In H. C. G. Fl.
- ferruginea, Rich. (Spreng. l. c.)
   Java. Neelgherries. Has not fl. here.
  - \* Elæagnus latifolia, L. Ceylon. Travancore.

## ORDER CXL. THYMELACEÆ, Lindl. Nat. Syst. p. 194,

#### THE MEZERRUM TRIBE.

Shrubs, seldom herbs, by Lindl. referred to 22 genera. Of these Spreng. syst. enumerates for New Holland and the South Sea Islands 46 species; for Europe 22; for S. America, Mexico and the W. Indies 9; for China 3; for Japan 1; for Siberia 2; for Caucasus 2; for Peraia 1; for N. Africa 2, exclusive of those common with Europe; for the Levant 2, exclusive of those common with Europe; for N. America 1; and for the Straits of Magellan 1. In S. Africa have been discovered 80 species, (Harvey,) and in the E. Indies, according to Wall. Cat. and Royl. ill. 17. viz. 14 of Daphne, (Nepal, Khassya Mountains, Darjeeling, South Mahratta Country,) 1 of Linostoma, (Khassya Mountains), and 2 of Cansjera, (Malabar, Amherat,) to these Spreng. adds Dais octandra, L. with which we are not acquainted. For China Wall. Cat. has a new species, Daphne viridiflora.

A caustic, skin-blistering, tenacious bark characterises the order. A soft, smooth and tough paper is manufactured in Cochin China and Nepal from the inner bark of Daphne cannabina, Lour. The lace bark-tree of Jamaica is of this family.

DAPHNE, L. (Spreng. syst. 2, p. 174, No. 1477.)

1. viridiflora, Wall. (Cat.) 5 China, Fl. small, pale green and fr. the whole year.

- 2. indica, L. (Pers. syn. 1, p. 435;—Spreng. syst. 2, p. 236.) 5 China. New Holland. Has been introduced into H. C. G. Fl.?
- LINOSTOMA, Wall. (Cat.)
  - decandrum, Wall. (Cat.—Nectandra decandra, Roxb. fl. ind. 2, p. 425.)
     L. 5 Silhet. Fl. largish, greenish-white, fragrant. In H. C. G. Fl.?
  - \* Daphne mesicana, Spreng. Mexico.—D. tinifolia, Swz. Jamaica.—D. occidentalis, Swz. Jamaica.—D. involucrata, Wall. Khassya Mountains.—D. eriocephala, Wall. Neelgherries. Hilly parts of S. Mahratta Country. Mahableshwur.—Cansjera Rheedii, Gmel. (C. scandens, Roxb. Corom. 2, t. 103.) 5 Malabar Hill, Bombay. Elephanta. Salsette. The Ghauts. Circars.—Lagetta lintearia, Juss. (Lace-bark-tree.) 5 Jamaica.

### ORDER CXLI.—HERNANDIACEÆ, Lindl. Nat. Syst. p. 195.

Trees of 2 genera and 4 species: 3 from Moluccas and South Sea Islands and 1 from Guiana. Properties under the species.

HERNANDIA, L. (Spreng. syst. 3, p. 759, No. 3097.)

1. ovigera, L. (Spreng. syst. 3, p. 835. excl. syn. Aubl. and Lam.;—Gärtn. fr. 1, p. 193, t. 40. f. 3;—Roxb. fl. ind. 3, p. 577.—Arbor ovigera, Rumph. 3, t. 123, as to flowers and fruit.) 5 Moluccas. Fl. small, white, Aug. Sept. and Oct.; fr. H. S.

INOCARPUS, Forst. (Spreng. syst. 2, p. 274, No. 1538)

- 1. edulis, Forst. (Spreng. syst. 2, p. 285;—Roxb. fl. ind. 2, p. 416;—
  J. Grah. Cat. B. pl. p. 106;—Rumph. 1, t. 65.) Otaheyte Chestnuttree. L. 5 Society and Friendly Islands. New Hebrides. Amboyna. Java. Fl. small, very pale yellow, fragrant, H. S.; fr. Aug. and
  Sept. Kernels edible, but by no means pleasant to the taste. Bark
  astringent, used in dysentery. The inhabitants of New Guinea smear
  the heads of their arrows with the expressed resinous juice.
- \* Hernandia sonora, L. (Rumph. 2, t. 85.) 5 Moluccas.—H. guianensis, Aubl. 5 Guiana.

# ORDER CXLII.—AQUILARIACEÆ, Lindl. Nat. Syst. p. 196.

#### THE AGALLOCHUM TRIBE.

Trees containing the following 2 genera and 4 species.

AQUILARIA, Lam. (Spreng. syst. 2, p. 281, No. 1669;—Arn. in Lind. Nat. Syst. p. 442, No. 24.)

1. Agallocha, Roxb. (fl. ind. 2, p. 422;—DC. pr. 2, p. 59;—Royle ill. t. 36, f. 1.) Add Ugoor. Agallochum. Aloe's wood. Agila wood. Eagle

wood. L. 5 Mountainous tracts E. and S. E. of Silhet. Fl. small, green, March and April; fr. R. S. Contains a fragrant resinous substance of a dark colour. It is considered a cordial by some Asiatic nations, and has been prescribed in Europe in gout and rheumatism. (Ainslie.)

\* Aquilaria malaccensis, Lam. 5 Malacca.—A. sinensis, Spreng. L. 5 China.—Gyrinops Walla, Gärtn. 5 Ceylon.

#### ORDER CXLIII.—PROTEACEÆ, Juss.—Lindl. Nat. Syst. p. 197.

Shrubs or trees, by Lindl. referred to 42 or 43 genera. Of these, Spreng. syst. enumerates 219 species for New Holland and the South Islands; 20 for S. America; I for Abyssinia; and I for the Straits of Magellan. In S. Africa have been found 200 species (*Harvey*,); and in the E. Indies, according to Bennett 11 of *Helicia*, (Khassya Mountains, Java, Singapore, Penang, Tavoy, Martaban.) To these may, perhaps, be added *Cylindria rubra*, Lour. (Cochin China.)

- "Of no known use, except as fire wood, for which they are commonly employed at C. G. H. The fruit of Guevina Asellana, Mol. is sold like nuts in the markets of Chili." (*Lindl.*) At least 2 of the Indian species, Helicia robusta and excelsa, R. Br. are large timber trees.

  Guevina, Molin.
- 1. Avellana, Mol. (Spreng. syst. 1, 472.) 5 Chili. 1840. GREVILLEA, R. Br.
  - 1. robusta, Cunningh. 5 B. M. 59, 3184. New Holland.
  - \* Helicia excelsa, R. Br. L. 5 Chittagong. Coast of Martaban.—H. attenuata, R. Br. Penang. Khassya Mountains.—H. glabrata, R. Br. Tavoy.—H. robusta, Wall. Khassya Mountains.—Rhopala sessilifolia, Rich. Guiana.—R. nitida, Rudg. Guiana.

#### ORDER CXLIV.—LAURACEÆ, Lindl. Nat. Syst. p. 200.

#### THE CINNAMON TRIBE.

Trees, often of great size, seldom shrubs, by Lindl. referred to 45 or perhaps 46 genera. Of these, Spreng. syst. enumerates about 50 for S. America, Mexico, and the W. Indies; 12 for N. America; 7 for Japan; 7 for China, including those of Nees; 7 of New Holland; 3 of the Canaries; 2 of Madagascar; 1 of Mauritius; and 1 of S. Europe. In S. Africa has

been found only one species, Laurus bullata, a tall forest tree, whose fine grained, dark coloured wood is much used in cabinet work, under the unpromising name of 'Stinkwood,' so called from the offensive smell of the fresh sawn timber. When made into furniture, the better specimens have much the appearance of Rose-wood, and take a fine polish, (Harvey.) the E. Indies alone, according to Nees, (Systema Laurinarum) we find 86 species: viz. 2 of Polyadenia; 6 of Daphnidium; 1 of Benzoin; 1 of Dodecadenia; 6 of Litsæa; 25 of Tetranthera; 1 of Cylicodaphne; 1 of Actinodaphne; 1 of Endiandra; 2 of Cryptocarya; 2 of Beilschmiedia; 1 of Cecidodaphne; 4 of Machilus; 8 of Ocotea; 3 of Alseodaphne; 2 of Camphora; and 20 of Cinnamomum. The greater part of these inhabit Nepal, the Khassya Mountains, Assam, the Circars, the Neelgherries, the Peninsula of Malacca with the adjacent Islands, the Moluccas, and Java. But few species have been found in the plains. Cinnamon, Camphor, Sassafras, Benzoin, the Avocado Pear, and Laurel-leaves are the most important products of this order, and are too well known to require details.

CINNAMOMUM, Burm. (Nees. in Wall. pl. as. rar. 2, p. 73.)

- obtusifolium, Nees. (l. c.—Laurus obtusifolia, Rosb. fl. ind. 2, p. 302.
   L. Bejolgota, Buch. trans. Linn. Soc. 13, 2. p. 559; excl. Laurus malabathrica, Roxb.)
   L. 5 Mountainous countries immediately east of Bengal. Fl. small, greenish-yellow, Jan. and Feb.; fr. July and Aug. Timber very useful for various purposes. (Rosb.)
- 2. iners, Reinw. (Nees. l. c.—Wight. icon. 1, t. 122, et t. 130;—J. Grah. Cat. B. pl. p. 173.—Rheed. 1, t. 57.) Wild Cinnamon. L. 5
  Along the great range of the Ghauts, and in the hilly parts of the Concans and Malabar. Java. Penang. Moulmein. Attran. Chappedong. Fl. small, greenish-yellow, C. S. The leaves on being bruised have a strong spicy smell. Billets of this tree are often sold together with other kinds of firewood, by the wood-cutters. (Nimmo.) In H. C. G.? Fl.?
- 3. eucalyptoïdes, Nees. (l. c.—Laurus malabathrica, Soland MSS.;—Roxb. fl. ind. 2, p. 297.) 5 Malabar Mountains. Introduced into H. C. G. before 1794, but had not fl. up to 1814. It must, however, have fl. afterwards, since the dried specimens, examined by Prof. Nees. v. Essenbeck, had been gathered there. The leaves have a strong, acrid, clove-like taste and odour, somewhat tinctured with camphor. (Nees.)
- nitidum, Nees. (l. c.; Hook. exot. fl. t. 176, excl. syn. Cinnamomum Cassia, Nees, Disput. Wight. icon. 1, t. 124. Laurus nitida, Roxb. fl. ind. 2, p. 300.)
   Sumatra. Fl. small, pale yellowish, Feb. and March; fr. May and June. Taste and odour of the bark cinnamon-like. (Nees.)
- 5. zeylanicum, Nees. (l. c. p. 74.) 5 Ceylon. Fl. small, greenish-white, Jan. and Feb.; fr. May and June.—True Cinnamon-tree, দাৰ্চিনি গাছ Dalchini-gachk.

- β. latifolium, Roxb. (H. B. p. 30.—C. zeylanicum, Wight. icon. 1, t. 123.)
- y. angustifolium, Roxb. (l. c.—Wight. icon. 1, t. 128.—Laurus Cassia,
   B. M. 40, t. 1636.—Cinnamomum perpetue florens, Burm. zeyl.
   p. 63, t. 28.—Rheed. 1, t. 57.)
- 6. albiforum, Nees. (o. c. p. 75.—Wight. icon. 1, t. 140.—C. camphoratum, Bl.—Laurus Cassia, Roxb. fl. ind. 2, p. 297. excl. syn. Willd. and Rheed.) 5 Nepal. Tipperah. Fl. small, white, Feb. March and April; fr. June and July. Bark smelling and tasting strongly of camphor and cinnamon.
- 7. dulce, Nees. (l. c.—C. chinense, Bl.—Laurus dulcis, Roxb. fl. ind. 2, p. 303;—Wight. icon. 1, t. 138.) 5 China. Fl. small, pale yellowish, March and April; fr. R. S.—Leaves and bark of a sweet aromatic taste and odour. (Roxb.)
- 8. Culitlawan, Nees. (l. c.—Wight. icon. 1, t. 137.—Laurus Culitlawan, Roxb. fl. ind. 3, p. 299;—Laurus Caryophyllus, Lour.—Cortex caryophylloïdes, Rumph. 2, t. 14.) 5 Moluccas. Cochin China. Fl. small, white, inodorous. In H. C. G. fl. March and April. (Roxb.) Bark smelling like a mixture of sassafras and cloves, yielding by distillation an essential oil which the inhabitants of Amboyna esteem an excellent remedy in retention of urine, when given in a dose of six drops twice a day. (Roxb.)
- ? recurvatum, Wight. (icon. 1, t. 133.—Laurus recurvata, Roxb. fl. ind. 2, p. 301.)
   China. In H. C. G. fl. April and May. (Roxb.)
   caudatum, Nees. (o. c. p. 76.)
   Nepal. Has not fl. here.
- CAMPHORA, Nees, (Wall. pl. as. rar. 2, p. 72.)
  - 1. officinarum, Bauh. (Nees. l. c.—Laurus Camphora, L.; B. M. 53, t. 2658.—L. camphorifera, Kämf. amoen. t. 771;—Roxb. fl. ind. 2, p. 304.) \*\*Eq. Kurpoor. Officinal Camphor-tree. 5 China. Japan. Fl. small, pale greenish-yellow, March and April.
  - 2. glandulifera, Nees. (l. c.—Laurus glandulifera, Wall.; trans. med. and phys. soc. Calcutta, 1, p. 45, with a plate.) L. 5 Nepal Mountains. Fl. small, odoriferous, yellowish-greenish. Has not fl. here. Wood pale yellow, very light, possessing little strength, while fresh strongly smelling of camphor, unfit for furniture. (Wall.)
  - 3. porrecta, (C. Parthenoxylon, Nees. l. e.—Laurus Parthenoxylon, Jack. mal. misc. 1, p. 28.—L. porrecta, H. B. p. 30;—Rozb. fl. ind. 2, p. 308.—L. Pseudo-sassafras, Bl.) L. 5 Penang. Sumatra. Java. Fl. small, pale yellow. In H. C. G. fl. C. S.; fr. May. (Rosb.) Wood strong and durable, if not exposed to wet. (Jack.)
- OCOTEA, Aubl. (Nees. o. c. p. 70.)

Ļ

glaucescens, Nees. (o. c. p. 71.—Laurus glaucescens, Roxb. fl. ind. 2, p. 307.—L. sylvestris. Bks. Herb.) L. 5 Silhet. Northern Circars. Fl. small, greenish-yellowish, Feb. March and April; fr. May and June. Timber used by the natives for many economical purposes. (Roxb.)

- 2. lanceolaria, (O. lanceolata, Nees. l. c.—Laurus lanceolaria, Rosb. fl. ind. 2, p. 309.) 5 Khassya Mountains. Nepal. Fl. small, pale yellowish, Feb. March and April; fr. May and June. Wood employed by the natives for many useful purposes. (Rosb.)
- 3. mollis, Wall. 5 Burma.
- PRESEA, Gärtn. (Nees. in Wall. pl. as. rar. 3, p. 32.)
  - 1. gratissima, Gärtn. (Nees. l. c.—Gürtn. fil. fr. 3, p. 222;—Bl. Bijd. p. 567;—J. Grah. Cat. B. pl. p. 174;—B. Reg. 15, t. 1258.—Laurus Persea, Jacq. obs. fasc. 1, p. 37;—Roxb. H. B. p. 30.) Avocado, and Subaltern's butter-tree of the W. Indies. Alligator pear. 5 Tropical America. Cultivated in India. Fl. small, pale-greenish, Feb. and March; fr. July and August.
- Britschmiedia, Nees. (Wall. pl. as. rar. 2, p. 69.)
  - 1. Roxburghiana, Nees. (l. c.—Laurus bilocularis, Roxb. fl. ind. 2, p. 311.)
    5 Tipperah. Fl. small, yellow, March and April; fr. June.
- AGATHOPHYLLUM, Juss. (Spreng. syst. 2, p. 444;—Endl. gen. pl. 1, p. 318.)
  - 1. aromaticum, Willd. (Spreng. syst. 2, p. 460;—Roxb. H. B. p. 36.—Ravensara aromatica, Sonner. it. 2, t. 127.—Evodia Ravensara, Gärtn. fr. 2, p. 101, t. 103, f. 2.) L. 5 Madagascar. Introduced into H. C. G. in 1802, but had not fl. up to 1814.
- CHYPTOCARYA, R. Br. (Nees. in Wall. pl. as. rar. 2, p. 69.)
  - 1. floribunda, Nees. (l. c.) 5 Silhet. Has been introduced into H. C. G. Fl.?
- SASSAFRAS, Nees. (Wall. pl. as rar. 2, p. 68.)
  - I. officinarum, (Laurus Sassafras, L.;—Pers. syn. 1, p. 450;—Roxb. H. B. p. 30;—Catesb. car. 1, p. 55, t. 55.—Persea Sassafras, Spreng. syst. 2, p. 270.) 5 N. America. Introduced into H. C. G. in 1809, but had not fl. in 1814. Produces the bark and root in commerce called Sassafras.
- Benzoin, Nees. (Wall. pl. as. rar. 2, p. 63.)
  - odoriferum, Nees. (l. c.—Laurus Benzoin, L.; Pers. syn. 1, p. 450;
     —Commel. hort. 1, p. 189, t. 27;—Rosb. H. B. p. 30;—Spreng.
     syst. 2, p. 265.) 5 N. America. Introduced into H. C. G. before
     1814. Fl.?
- THERANTHERA, Jacq. (Nees. in Wall. pl. as. rar. 2, p. 64.)
- 1. lanceæfolia, Roxb. (fl. ind. 3, p. 822;—Nees. o. c. p. 65.) 5 Silhet.
  In H. C. G. fl. Feb. March and April; fr. R. S. (Roxb.)
  - 2. Rozburghii, Nees. (l. c.—Litsæa sebifera, Pers. syn. 2, p. 4.—Tomex sebifera, Willd.—Laurus involucrata, Retz.—Tetranthera apetala, Gärta. fr. 3, p. 225, t. 222, f. 2.)
    - a. T. apetala, Roxb. (Corom. 2, p. 147;—fl. ind. 3, p. 819 excl. syn. Lour.—Litsæa apetala, Pers. syn. 2, p. 4.—Tetranthera citrifolia, Juss.;—Spreng. syst. 2, p. 266.) \*\* \*\*Tobi Kookoor-chita. 5 Peninsula of India. Bengal, (Serampore.) Assam. Tropical

- New Holland. Fl. small, greenish-yellowish, May and June; fr. R. S.
- laurifolia, Jacq. (Hort. schönb. 1, t. 113;—Nees. o. c. p. 66;—Spreng. syst. 2, p. 66. excl. syn. Lour.—Rosb. fl. ind. 3, p. 823;—B. Reg. 11, t. 893.—Tomex Tetranthera, Willd.—Litsæa Tetranthera, Pers. syn. 2, p. 4.) 5 China. Bengal, (Serampore.) Fl. small, yellowish-greenish, May and June; fr. at the end of the rains.
- 4. monopetala, Roxb. (fl. ind. 3, p. 821;—Corom. 2, t. 148;—Nees. l. c.) বড় কুকুর চিতা Buro-Kookoor-chita. 5 Peninsula of India. Bengal, (Serampore.) Oude. Assam. Silhet. Nepal. Fl. small, yellowish-greenish, May and June; fr. R. S.
- 5. glauca, Wall. (Nees. l. c.) 5 Khassya Hills, 1828. In H. C. G. Fl.?
- nitida, Roxb. (A. ind. 3, p. 818;—Nees. o. c. p. 67.)
   Assam. Garrow-hills. Fl. small, greenish-yellowish, July and Aug.; fr. April. A useful timber tree, from which are made canoes full fifty feet long. (Roxb.)
- 7. macrophylla, Roxb. (fl. ind. 3, p. 822.) 5 Silhet. In H. C. G. fl. April; fr. Aug. (Roxb.)
- quadriflora, Roxb. (fl. ind. 3, p. 821.)
   Garrow-hills. In H. C. G. fl. Feb. and March; fr. R. S. (Roxb.)
- 9. fruticosa, Roxb. (fl. ind. 3, p. 823.) 5 Silhet. In H. C. G. fl. June and July; fr. C. S. (Roxb.)
- glabra, Roxb. (H. B. p. 73.)
   Goromandel. In H. C. G. fl. H. S.;
   fr. R. S. (Roxb.)
- 11. foliosa, Wall. (Cat.—Tetradenia foliosa, Nees. 5 Silhet Has not fl. here yet.
- LAURUS, Plin. (Nees in Wall. pl. as. rar. 2, p. 62.)
  - 1. nobilis, L. (Spreng. syst. 2, p. 65;—Nees l. c.;—Blacw. t. 175;—Plenck. t. 315;—Rosb. H. B. p. 30.) Sweet Bay. 5 S. Europe. Levant. Introduced into H. C. G. in 1794, but had not fl. up to 1814.

## ORDER CXLV.—ILLIGERACEÆ, Lindl. Nat. Syst. p. 202.

Trees or shrubs, referred by Lindl. to 2 genera: *Illigera*, Bl. and *Gyrocurpus*, Jacq. with the first we are unacquainted. The second has 1 species in S. America; 1 in the E. Indies; and 2 in New Holland. Properties nearly unknown.

GYROCARPUS, Jacq. (Nees. in Wall. pl. as. rar. 2, p. 68.)

1. asiaticus, Willd. (Nees. l. c.—Gyrocarpus Jacquini, Roxb. Corom. 1, t. 1;—fl. ind. 1, p. 445; ed. Carey. 1, p. 465;—Spreng. syst. 1, p. 489;—Pers. syn. 1, p. 145, excl. syn.—G. americanus;—J. Grah. Cat. B. pl. p. 250.) 5 Coromandel Mountains. Banks of the Krishna, near Nalutwar. Fl. very small, greenish-yellowish, C. S. Wood white, very light, when procurable, used in preference to others to make Catamarans. (Roxb.)

\* G. americanus, Jacq. 5 New Granada.—G. sphenopterus, R. Br. Endl. ichnogn, t. 43. 5 Tropical N. Holland.—G. rugosus, R. Br. 5 Tropical New Holland.

## ORDER CXLVI.—CASSYTHACEÆ, Lindl. Nat. Syst. p. 202.

Parasitical, leafless, twining herbs or undershrubs, of one genus and six species; 4 from New Holland; 1 from St. Vincent; and 1 from the E. Indies. Properties unknown.

CASSYTA, L. (Nees. in Wall. pl. as. rar. 2, p. 69.)

  Rheed. 7, t. 44;—Rumph. 5, t. 184, f. 4.) আকাৰ আমি Akash-bullee.

  2. Moluccas. Ceylon. Both Peninsulas of India. Arabia. Bengal, (Serampore.) Fl. small, white, C. S.; fr. Feb.
- \* C. americana, Nees. (C. filiformis, Hook. exot. t. 167.) St. Vincent.

ORDER CXLVII.—PENÆACEÆ, R. Br.—Lindl. Nat. Syst. p. 203.

Much branched, small shrubs, referred to 3 genera containing 20 species, all natives of S. Africa, (*Harvey*.) Several plants, belonging to this order, have been introduced from C. G. H. but none have lived through the R. S.

ORDER CXLVIII.—NEPENTHACEÆ, Lindl. Nat. Syst. p. 205.

#### THE PITCHER-PLANT TRIBE.

Herbaceous or half-shrubby caulescent plants, of 1 genus, and 6 species: 1 from Madagascar; 1 from Cochin China; 1 from Java; and at least 2-3 from Singapore and Malacca. Properties unknown.

NEPENTHES, L. (Spreng. syst. 3, p. 9, No. 2423.)

- distillatoria, Ait. (L.?—Lodd. Cab. t. 1017;—B. M. 55, t. 2798, (male.)
   N. indica, Lam.—N. Phyllamphora, (female.)
   B. M. 53, t. 2629, excl. syn. Willd. Poir. Lour. and Rumph.)
   Fl. small, male, green with a red column of stamens, C. S. Khassya Mountains.
- \* N. Rafflesiana, Jack. Singapore.—N. ampullacea, Jack. Singapore.

ORDER CXLIX.—ARISTOLOCHIACEÆ, Lindl. Nat. Syst. p. 205.

#### THE BIRTHWORT TRIBE.

Herbs or shrubs, often twining or trailing, by Lindl. referred to 8 genera. Of these, Spreng. syst. enumerates 38 species from S. America, Mexico and the W. Indies; 13 from Europe and N. Africa; 7 from N. Ame-

rica; 3 from Syria and Asia Minor; 2 from Japan; (1 of them Heterotropa asaroïdes, Morr. and Decaisne); 2 from the Mascarenhas Islands; and 1 from New Holland. Of Indian species, have been discovered 4 of Bragantia; (Cochin China, Ceylon, the Concans,) and 5 of Aristolochia, (Java, Peninsulas of India, Bengal, Hindoostan, Khassya Mountains.) Aristolochia rotunda, longa and Clematitis are like the order in general, tonic and stimulating. A. fragrantissima of Peru possesses antidysenteric properties. A. Serpentaria is considered a powerful stimulant in the so-called adynamic fevers.

ORDER CL.—AMARANTACEÆ, R. Br.—Lindl. Nat. Syst. p. 207.

### THE AMARANT-TRIBE.

Herbs or shrubs, sometimes climbing, by Lindl. excluding Cyathula and Leiospermum, referred to about 40 genera. Of these Spreng. syst. enumerates about 100 species for S. America, Mexico, and the W. Indies; 29 for N. Holland and Van Diemen's Land; 10 for N. America; 5 for Europe; 4 for Arabia; 2 for China and Japan; 1 for Middle Asia; 1 for Iberia; 1 for Tauria; 1 for E. Africa; 1 for Madagascar; 1 for the Mascarenhas Islands; and 1 for Guinea. In S. Africa, including Blepharolepis, Nees, have been discovered 11 species, (Harvey); and in the E. Indies, according to Martius, Roxb. flor. and Wall. Cat., about 70; viz. 2 of Digera; 3 of Deeringia; 3 of Allmannia; 20 of Amarantus; 5 of Ærua;? 1 of Polychroa, (Lour.); 8 of Celosia; 1 of Cladostachys; 2 of Gomphrena; 2 of Alternanthera; 2 of Psilotrichum; 2 of Centrostachys; 8 of Achyranthes; 8 of Desmochæta; 1 of Pupalia; and 2 of Polyscalis. Properties under the species.

- DIGERA, Forsk. (Spreng, syst. 1, p. 519, No. 874;—Endl. gen. pl. 1, p. 303.)
  - 1. muricata, Mart. (Desmochæta alternifolia, DC.—Cladostachys alternifolia, Swt.—Achyranthes alternifolia, L.;—Hb. Banks;—Roxb. fl. ind. 1, p. 674; ed. Carey, 2, p. 500. Achyranthes muricata, Lam.; not L.) ■ ■ Luta-muhoori. ⊙ Both Peninsulas of India. Bengal, (Serampore.) Fl. small, red, R. S.; fr. C. S. Leaves and tender tops used by the natives in their curries. # ORDER CLI.—CHENOPODIACEÆ,—Lind. Nat. Syst. p. 208.

#### THE GOOSEFOOT TRIBE.

Herbs or undershrubs, by Lindl. referred to 51 genera. Of these, Spreng. syst. assigns about 85 species to Europe; 36 to New Holland and Van Diemen's Land; 16 to N. America; 15 to Siberia; 15 to S. America;

- 18 to N. Africa; 10 to Dahuria; 10 to Caucasus; 7 to Tauria; 4 to Arabia; 2 to the Levant; 2 to Japan; 1 to China; 1 to Tartary; 1 to Madeira; and 1 to the Canaries. In S. Africa, including two Galenias, have been found 22 species, (Harvey); and in the E. Indies, according to Wall. Cat and Roxb. flor. 18, viz. 2 of Salicornia; 5 of Salicola; 1 of Spinacia; 1 of Axyris; 1 of Atriplex; 6 of Chenopodium; and 2 of Basella.—Properties under the species.
- Saliconnia, L. (Spreng. syst. 1, p. 5, No. 29; —Endl. gen. pl. 1, p. 293.)
  Glasswort.
  - 1. brachiata, Roxb. (Fl. ind. 1, p. 84; ed. Carey, 1, p. 82.) 5 Coromandel. Soonderbuns.—Fl. small, greenish, C. S; fr. H. S.—This species, as well as the next, and Salsola nudiflora, grow so abundantly on the coasts of India, that by incineration they would be able to supply barilla enough to make soap and glass for the whole world. (Rosb.)—The 'sejjee muttee' of the bazars, a coarse kind of barilla, is procured by the incineration of unknown plants, growing on the shores of the salt lakes which are scattered through the Indian deserts. (Royle.)
  - 2. indica, Willd. (Spreng. syst. 1, p. 18;—Roxb. fl. ind. 1, p. 85; ed. Carey. 1, p. 83;—J. Grah. Cat. B. pl. p. 171.) (The other Judoc-palung. 5 Coromandel. Bombay. Soonderbuns. New Holland. Fl. very small, greenish, C. S.; fr. H. S. It is pickled by the natives. (J. Grah.)

   Fl. minute, rose-coloured, and fr. Jan., Feb. and March.
- 13. aviculare, L. (Spreng. syst. 2, p. 255;—E. B. 18, t. 1252;—Roxb. H. B. p. 29.) ⊙ Europe. Asia. N. America. Fl. very small, greenish-white-red, May and June.
- AMPRLYGONUM, Lindl. (B. Reg. 1838, app. p. 62.)
  - chinense, Lindl. (l. c.—Polygonum chinense, L.;—Spreng. syst. 2, p. 254;—Meisn. in Wall. pl. as. rar. p. 60;—Roxb. fl. ind. 2, p. 289;
     J. Grah. Cat. B. pl. p. 172;—Burm. ind. t. 30, f. 3.) 5 Japan. China. Java. Nepal. Kemaon. Khassya Mountains. Assam. Burma. Neel-gherry. Dindygul. Courtallum. Bangalore. Mahableshwar. Hills about Parr. Fl. small, white, nearly the whole year, but especially H. S.

- FAGOPYRUM, Tournef. (Meisn. in Wall. pl. as. rar. p. 63;—Endl. gen. pl. 1, p. 307.)
  - esculentum, Mönch. (Meisn. l. c.—Polygonum Fagopyrum, L.;—Spreng. syst. 2, p. 254;—Roxb. ft. ind. 2, p. 292;—E. B. 15, t. 1044.) Common Buck-wheat. © Fl. small, pale rose, C. S.; fr. H. S. Central Asia. Cultivated all over the mountainous countries N. of Bengal. This like the following species, is used as food:—
  - 2. tataricum, Gärtn. (fr. 2, p. 182, t. 119, f. 6.—Polygonum tataricum, L.;—Spreng. syst. 2, p. 254;—Gmel. sib. 3, p. 64, t. 13, f. 1.) ⊙ Tartary. Fl. small, pale rose, C. S.; fr. H. S.
  - 3. cymosum, Meisn. (Wall. pl. as. rar. 3, p. 63.) 4. Assam. Nepal. Has been introduced into H. C. G. by Mr. Webb. Fl.?
- CERATOGONUM, Meisn. (Wall. pl. as. rar. 3, p. 63;—Endl. gen. pl. 1, p. 308.)
- 1. atriplicifolium, Meisn. (l. c.) 4.? Native place uncertain. In H. C. G. Coccoloba, L. (Spreng. syst. 2, p. 175, No. 1509;—Endl. gen. pl. 1. p. 308.) Sea-side Grape.
  - wvifera, L. (Spreng. syst. 2, p. 252;—B. M. 59, t. 3130;—Roxb. H. B. p. 29.)
     W. Indies. S. America. Fl. small, whitish, fragrant, April; fr. Oct. Fruit sweetish-acid, rather agreeable, but not much esteemed, though generally sold in the markets.—Wood, when boiled in water, gives out a red colour; it is also employed for Cabinet-work. (Hook.)
  - crispata, Buch. (Roxb. fl. ind. 2, p. 292.)
     Nepal. In H. C. G. fl. C. S. (Roxb.)
  - 3. pubescens, Linn. (B. M. 59, t. 3166.) 5 W. Indies.
  - 4. excoriata, L. (excl. syn. Pluk.) 5 W. Indies.
- Rumex, L. (Spreng. syst. 2, p. 15, No. 1385.—Meisn. in Wall. pl. as. rar. 3, p. 63;—Endl. gen. pl. 1, p. 308.) Dock.
  - sanguineus, L. (Pers. syn. 1, p. 394;—E. B. 22, t. 1533.)
     Europe. Virginia. Fl. small, greenish-yellowish. Has not fl. here, though cultivated for many years.
  - pulcher, L. (Spreng. syst. 2, p. 160;—Pers. syn. 1, p. 395;—E. B. 22, t. 1576.)
     Europe. Fl. small, pale-yellow. Has not fl. here, though cultivated for many years.
  - 3. Wallichianus, Meisn. (Wall. pl. as. rar. 3, p. 64; not Röm. and Sch.—R. acutus, Roxb. fl. ind. 2, p. 208, not L.; nor R. Roxburghianus, Röm. and Sch. which is R. tuberosus, Roxb. in Willd. Hb.) ◄ পাজ Bun-palung. ⑤ Bengal. (Serampore.) Assam. Oude. Fl. small, yellowish, Jan., Feb. and March; fr. April. Every part of this plant possesses a considerable degree of astringency and bitterness, but no acidity. (Roxb.)
  - 4. vesicarius, L. (Spreng. syst. 2, p. 160:—Meisn. in Wall. pl. as. rar. 3, p. 64;—Roxb. fl. ind. 2, p. 209;—J. Grah. Cat. B. pl. p. 172.)

    7 107 Chook-palung. Country Sorrel. Fl. small, reddish, R. S.;

- fr. C. S. 

  Africa. Cultivated in gardens all over Asia for culinary and medicinal purposes.
- Acetosa, L. (Spreng. syst. 2, p. 461;—E. B. 2, t. 127;—Roxb. H. B. p. 26.) Common Sorrel. 4. Europe. Has not fl. here.
- Acetosella, L. (Spreng. syst. 2, p. 461;—E. B. 24, t. 1674;—Roxb.
   H. B. p. 26.)
   Europe. Fl. small, red, Feb. and March, but seldom; fr. 0.
- Emex, Neck. (Spreng. syst. 2, p. 162;—Endl. gen. pl. 1, p. 308.)
  - spinosus, Campd. (Spreng. l. c.—Rumex spinosus, L.) 

     Portugal.

     Sicily. Greece. N. Africa. Fl. small, greenish, Feb. and March; fr. April.
  - \* Fagopyrum emarginatum, Meisn. (Polygonum emarginatum, Roth; B. Reg. 13, t. 1065.) Nepal.—Coccoloba longifolia, L. 5 W. Indies.—C. tenuifolia, L. 5 Jamaica.—C. diversifolia, Jacq.; Hook exot. fl. t. 102. 5 St. Domingo.—C. punctata, L. 5 W. Indies.—C. nivea, Jacq. 5 Jamaica.—Triplaris americana, L. 5 S. America.—Podopterus mexicanus, H. and B. 5 Mexico.

### ORDER CLV.—PETIVERIACEÆ, Lindl. Nat. Syst. p. 212.

Herbs or undershrubs, of 2-3 genera and as many species, natives of S. America and the W. Indies. Seguiera asiatica, Lour. most likely does not belong to the order. Properties unknown.

Petiveria, L. (Spreng. syst. 2, p. 164, No. 1402.)

- 1. alliacea, L. (Spreng. syst. 2, p. 168.) 5 Jamaica. Yields a strong smell of garlic. Introduced into H. C. G. before 1814. Fl.?
  - \* Seguiera americana, L. S. America.

# ORDER CLVI.—SCLERANTHACEÆ, Lindl. Nat. Syst. p. 213.

Small herbs, referred to 3 genera containing 8 species: 4 from N. Holland and the South Sea Islands; 3 from Europe; and 1 from S. America. They are of no known use.

Scleranthus, L. (DC. pr. 3, p. 378.)

- 1. annus, L. (DC. l. c.;—E. B. 5, t. 351.) ⊙ Europe. Levant. N. America. Fl. small, pale green, Feb. and March.
  - \* Guilleminea illecebroïdes, H. B. and Kth. 4. Quito.

#### ORDER CLVII.—NYCTAGINACEÆ, Lindl. Nat. Syst. p. 213.

#### THE MARVEL-OF-PERU TRIBE.

Herbs, shrubs or small trees, by Lindl. referred to 16 genera. Of these, Spreng, syst. assigns 42 species to S. America, Mexico and the W. Indies; 4 to N. America; 2 to New Holland; 1 to the Society Islands; 1 to Madagascar; 1 to Europe, and 1 to Egypt. 1 species of Boerhaavia has been found in S. Africa, according to Burchell. In the E. Indies have been discovered 5 species of Boerhaavia; 4 of Pisonia; 1 of Osia, (Lour.) and — of Epilithes, Bl. Properties unimportant.

- MIRABILIS, L. (Spreng. syst. 1, p. 501, No. 570;—Endl. gen. pl. 1, p. 311.) Marvel-of-Peru.
  - 1. Jalapa, L. (Spreng. syst. 1, p. 536;—B. M. 11, t. 371;—Rosb. H. B. p. 16;—J. Grah. Cat. B. pl. p. 167.—Nyctago hortensis, Juss.—Rheed. 10, t. 75;—Rumph. 5, t. 89.) 

    Cold Kishno-keli. 4. Peru. Domesticated in our gardens; fl. and fr. whole year. Root purgative, whence the plant was formerly supposed to be the true Jalap-plant. Flowers large.
    - a. kermesina; Flowers crimson.
    - β. kermesino-alba; ditto, crimson-white.
    - y. alba; ditto white.
    - S. flava; ditto yellow.
    - E. flavo-alba; ditto yellow-white.
  - longiflora, L. (Spreng. syst. 1, p. 536;—Sm. exot. bot. 1, t. 23;—Roxb. H. B. p. 16.)
     Mexico. Introduced into H. C. G. in 1807, but had not flowered up to 1814.
- OXYBAPHUS, L'Herit. (Spreng. syst. 1, p. 128, No. 199;—Endl. gen. pl. 1, p. 311.) Umbrella-wort.
  - 1. viscosus, L'Herit. (Spreng. syst. 1, p. 180;—B. M. 13, t. 434.—Mirabilis viscosa, Cav.) 4. Peru. Fl. middle-sized, deep-rose. C. S.
- BORRHAAVIA, L. (Spreng. syst. 1, p. 24, No. 65;—Endl. gen. pl. 1, p. 311.)
  - 1. erecta, L. (Spreng. syst. 1, p. 36, excl. syn.—B. procumbens, Hb. Banks;—Roxb. fl. ind. 1, p. 146; ed Carey 1, p. 148;—J. Grah. Cat. B. pl. p. 167;—Rheed. 7, 56;—Burm. ind. 1,) 4. A very troublesome Weed common all over India. Fl. minute, and fr. whole year.
    - a. rosea; গাদা আমা Gada-poorna. Fl. deep-rose.
    - β. alba; (43 Ctil Shoet-poorna. Fl. white.
  - repanda, Willd. (Pers. syn. 1, p. 36;—Roxb. H. B. p. 2.)
     St. Helena. Fl. minute, C. S; fr. H. S.
- PISONIA, Plum. (Spreng. syst. 2, p. 164, No. 1401;—Endl. gen. pl. 1, p. 312.)
  - 1. villosa, Poir. (Spreng. syst. 2, p. 168.—P. aculeata, Rosb. fl. ind. 2, p. 217; —J. Grah. Cat. B. pl. p. 167; not L.) ৰাষ্ট্ৰাটড়া Baghachura.

- **5** → Peninsula of India. Bengal, (Serampore.) Fl. small, greenishwhite, March and April; fr. C. S. Makes impenetrable hedges.
- aculeata, L. (Spreng. l. c.—Lam. ill. t. 861;—Gärtn. fr. 1, p. 367.
   t. 76, f. 4.) 5 W. Indies. Fl. small, greenish-whitish, March and April.
- 3. mitis, Willd. H. C. G. in 1814.

#### BUGINVILLEA, JUSS.

- 1. spectabilis, Willd. sp. 2, p. 348;—Lam. ill. suppl. 5, p. 359.—Tricycla spectabilis, Poir. 5 Rio Janeiro. August 1839.
- \* Mirabilis dichotoma, L. 4. Mexico.—M. suaveolens, Humb. 4. Mexico.
  Already introduced into Bombay.—M. hybrida, Lepel. 4. New Granada.—Oxybaphus aggregatus, Cav. 4. New Spain.—O. glabrifolius, Vahl. 4. New Spain.—Allionia violacea, L. © Cumana.—A. incarnata, L. © Cumana.—Tricycla spinosa, Cav. 5 Buenos Ayres.—Reichenbachia hirsuta, Spreng. 5 Brazil.—Salpianthus arenarius, Humb. 5 Mexico.

# ORDER CLVIII.-MENISPERMACEÆ, DC.-Lindl. Nat. Syst. p. 214.

#### THE COCCULUS TRIBE.

Twining shrubs, rarely trees, excluding Brannea, Bagalatta and Tiliacora, and adding Cyclea, Arn., referred by Lindl. to 20 genera. Of these, DC. pr. and Spreng. syst., enumerate 26 species for S. America, Mexico and the W. Indies; 4 for N. America; 3 for Madagascar; 3 for Japan; 3 for Timor; 1 for Senegal; 1 for Owaree; 1 for Arabia; 1 for Egypt; 1 for Mozambique; 1 for Mauritius; 1 for Dahuria; and 1 for the South Sea Islands. In S. Africa have been discovered 4 species, (Harvey.); and in the E. Indies about 60; viz. 1 of Anamirta; 3 of Clypea; 1 of Cyclea; 35 of Cocculus; 1 of Epibaterium, (Nephroia, Lour.); 1 of Pselium, (Lour.); 2 of Gynostemma, (Bl.); 8 of Cissampelos; 1 of Stephania, (Lour.); 4 of Phytocrene; 1 of Natsiatum; 1 of Coscinium; Cocculus hexagynus, Colebr. belongs to South China. — Properties under the species.

Anamirta, Colebr. (W. and A. pr. 1, p. 446.)

1. Cocculus, W. and A. (l. c.;—J. Grah. Cat. B. pl. p. 4.—A. paniculata, Colebr. Linn. soc. trans. 13, p. 52 and 66.—Menispermum Cocculus, L.; Gärtn. fr. 1, p. 219, t. 70, f. 7.—M. heteroclitum, Roxb. fl. ind. 3, p. 817.—Cocculus suberosus, W. and A. pr. 1, p. 11;—DC. pr. 1, p. 97.—C. orbiculatus, DC. o. c. p. 98; excl. syn. Pluk.—C. lacunosus, DC. o. c. p. 97.) 5 Circar Mountains. The Concans. Fl. small, greenish. In H. C. G. Fl.? Seeds ascertained to be an irritating poison to quadrupeds and fishes, owing to the Picrotoxine

L

Ċ

they contain, and which is so active, that twelve grains given to a dog killed it in five minutes, notwithstanding the copious vomiting the dose excited. Seeds (Cocculus indicus of the shops) used to adulterate beer, though prohibited under a penalty of from £200 to 500 on the seller. (Wight.)

#### CLYPEA, Bl. (W. and A. pr. 1, p. 14.)

- 1. hernandifolia, W. and A. (l. c.—Cissampelos hernandifolia, Willd.;—DC. pr. 1, p. 100;—Roxb. fl. ind. 3, p. 842.—C. hexandra, Roxb.—o. c. p. 841, excl. syn?) [AND Nimooka 5 Peninsula of India. Bengal, (Serampore.) Assam. Fl. minute, greenish, R. S.
- glabra, W. and A. (pr. 1, p. 450, annot.—Cissampelos glabra, Roxb. fl. ind. 3, p. 840.—Cocculus Roxburghianus, DC. 1, p. 96.)
   Silhet. Fl. minute, yellowish, May; fr. Oct. and Nov. Root very large, acrid, used medicinally by the natives of Silhet.

## CYCLEA, Arn. (Wight. ill. 1, p. 22.)

- 1. Burmanni, Arn. (l. c.—Clypea Burmanni, W. and A. pr. 1, p. 14.—
  J. Grah. Cat. B. pl. p. 5.—Cocculus Burmanni, DC. pr. 1, p. 96;—C.
  peltatus, DC. l. c.—Menispermum peltatum, Lam.—Wal-tjedde, Gärtn.
  fr. 2, p. 488, t. 180, f. 12;—Rheed. 7, t. 49;—Burm. zeyl. t. 101.)
  5 Coromandel. The Concans. Ceylon. Has been introduced into H. C. G.? Fl.?
- CISSAMPELOS, L. (DC. pr. 1, p. 100; -W. and A. pr. 1, p. 14.)
  - convolvulacea, Willd. (W. and A. l. c.;—Roxb. fl. ind. 3, p. 842, excl. syn. Rheed.—J. Grah. Cat. B. pl. p. 5.)
     Dindygul. Rajmahl. Nepal. Fl. small, greenish, R. S.
  - 2. mauritiana, Pet. Th. 5 Mauritius.
- Cocculus, Bauh. (DC. pr. 1, p. 96; -W. and A. pr. 1, p. 11.)
  - 1. cordifolius, DC. (o. c. p. 97;—W. and A. o. c. p. 12;—J. Grah. Cat. B. pl. p. 4.—c. Wight. icon. 2, t. 485, 2 ibid. t. 486.—C. convolvulaceus, DC. l. c.—Menispermum cordifolium, Willd.;—Roxb. fl. ind. 3, p. 81.—M. glabrum, Klein; not Kön.) The Gooluncha. The Peninsula of India. Bengal, (Serampore.) Assam. Fl. small, yellowish. H. and R. S.; fr. C. S. Used extensively in a variety of diseases by the native practitioners of India, especially in such as are attended by febrile symptoms not of a high inflammatory kind, and in fevers of debility. The parts used are the root, stems, and leaves, from which a decoction called Pachuna is prepared. A sort of extract called Palo is obtained from the stem, and considered an excellent remedy in urinary affections and gonorrhosa. (Trans. med. and phys. soc. Calc. 3, p. 298.) From fifteen to thirty grains of the powdered root constitute a good emetic. (Wight.)
  - crispus, DC. (pr. 1, p. 97.—Menispermum crispum, L.—M. verrucosum, Fleming; Roxb. fl. ind. 3, p. 808;—Rumph. 5, t. 44, f. 1.)
     Moluccas. Sumatra. Java. Fl. small, greenish, Feb. and March. Used against intermittent fevers among the Malays.

- 3. acuminatus, DC. (pr. 1, p. 99;—W. and A. pr. 1, p. 12;—Deless. icon. sel. 1, t. 95;—J. Grah. Cat. B. pl. p. 5.—C. radiatus, DC. l. c.—Menispermum acuminatum, Lam.—M. radiatum, Lam.—M. polycarpon, Roxb. fl. ind. 3, p. 816.—Tiliacora racemosa, Colebr.; Linn. soc. trans. 13, p. 67.—Braunea menispermoides, Willd.; as to the leaves and male flowers.—Rheed. 7, t. 3.) বাৰ্ত্তা Baghaluta. ভিনিয়াকা Tiliyakura. 5 Both Peninsulas of India. Bengal, (Serampore.) Oude. Assam. Fl. small, cream-coloured, sweet-scented, H. and R. S; fr. C. S.
- 4. villosus, DC. (pr. 1, p. 98;—W. and A. pr. 1, p. 13.—C. sepium, Colebr.—Menispermum villosum, Lam.; not Roxb.—M. hirsutum, L. Roxb. fl. ind. 3, p. 814; excl. syn. Gärtn.—M. myosotoides, L.) 

  1. The property of the ripe berries makes a good, durable, bluish-purple ink. A decoction of the fresh roots, with a few heads of long pepper, in goat's milk, is administered by the natives for rheumatic pains, half a pint every morning. It is considered heating, laxative, and sudorific. Curry is made of the leaves for patients who are under a course of the roots. (Roxb.)
- 5. incasus, Colebr. (Menispermum villosum, Roxb. fl. ind. 3, p. 812; —not Lam.) 5 Chittagong. Silhet. In H. C. G. fl. R. S. (Roxb.)
- 6. tomentosus, Wall. (Cat.—Menispermum tomentosum, Roxb. fl. ind. 3, p. 813.) 어떤 생각은 Pudmo-gooluncha. 5 Bengal, (Serampore.) Fl. small, green, C. S.; fr. H. S.
- 7. kezagynus, Colebr. (Menispermum hexagynum, Rozb. fl. ind. 3, p. 816;—Spreng. syst. 2, p. 155.) 5 South of China. In H. C. G. fl. whole year. (Rosb.)
- 8. triendrus, Wall. (Cat.—Menispermum triandrum, Roxb. fl. ind. 3, p. 816.) 5 Penang. In H. C. G. fl. R. S. (Roxb.)
- 9. palmatus, DC. (pr. 1, p. 98;—B. M. 57, t. 2970, 71.—Menispermum palmatum, Lam.—M. Columba, Roxb. fl. ind. 3, p. 807.) 本程 Kulumbo. 4. 一 Forests on the coast of Mozambique. Fl. small, green, R. S. much cultivated in the Mauritius. This plant produces the well known Calumba root, so much esteemed for its powerful antiseptic, tonic, and astringent properties.
- leurifolius, DC. (pr. 1, p. 100; Deless. icon. select. 1, t. 97.)
   Nepal, Kemaon. Fl. small, yellowish-greenish, H. S.; fr. 0.
- 11. calophyllus, Wall. MSS. In H. C. G. Fl.?
- 12. megaspermus, (Menispermum megaspermum, Rosb. H. B. p. 72.)

  5 ~ Silhet. In H. C. G. fl. H. S. (Rosb.)
- MENISPERMUM, L. (DC. 1, p. 102.)
  - 1. canadense, L. (DC. l. c.; —B. M. 44, t. 1910.) 5 ~ N. America. Has not fl. here.

Coscinium, Colebr. (Lindl. nat. syst. p. 216.)

Penang.—P. oblonga, Wall. Penang.—Natsiatum herpeticum, Buch. Bagduyar.

### ORDER CLIX.-LARDIZABALACEÆ.

(Sub-Order? Lardizabaleæ,—Lindl. Nat. Syst. p. 216.)

Twining shrubs, seldom trees, (Burasaia) of 3 genera. DC. pr. enumerates 3 species for Chili and Peru; 1 for Madagascar; and 1 for China. The published Indian species are the following:—

- STAUNTONIA, DC. (pr. 1, p. 96.—Hollböllia, Wall.)
  - 1. latifolia, R. Br. (Hollböllia latifolia, Wall. tent. fl. nep. t. 16.) 5 Nepal. Kemaon. Has not fl. here.
  - \* S. angustifolia, R. Br. (Hollböllia angustifolia, Wall. tent. fl. nep. t. 17.) 5 ~ Nepal.

ORDER CLX.—BREXIACEÆ, Lindl. Nat. Syst. p. 218.

The following are the only published species of this order, the properties of which are unknown.

Brexia, Pet. Thouars. (Spreng. syst. 1, p. 520, No. 879.)

- 1. madagascariensis, Ker. (B. Reg. 9, t. 730;—Spreng. syst. 1, p. 792;—c. p. p. 94.—Venana madagascariensis, Lam.;—Rosb. fl. ind. ed. Carey, 2, p. 312.) 5 Madagascar. Fl. large, pale green, H. S.; fr. R. S.
- spinosa, Lindl. (B. Reg. 11, t. 872;—Spreng. syst. c. p. p. 94;—B. heterophylla, Bojer.—Theophrasta serratifolia, Hortul.) 5 Madagascar. In H. C. G.
  - \* B. chrysophylla, Swt. 5 Madagascar.

ORDER CLXI.—ERICACEÆ, DC.—Lindl. Nat. Syst. p. 220.

#### THE HEATH TRIBE.

Undershrubs, shrubs or trees, by Lindl. referred to 43 genera. Of these, Spreng. syst. enumerates about 50 species from N. America; 46 from S. America, Mexico and the W. Indies; 26 from Europe; 9 from Siberia; 6 from the Mascarenhas Islands; 4 from the Straits of Magellan; 2 from the Levant, 1 from Caucasus; 1 from Dahuria; 1 from Madeira; 1 from the Canaries; 1 from Greenland; 2 from New Zealand; 3 from China; and 1 from Japan. In S. Africa, have been discovered 450 species, (Harvey); and in the E. Indies, according to Wall Cat. and Royl. ill, 22; viz. 8 of Andromeda; 1 of Cassiope; 3 of Gaultheria; and 10 of Rhododendron.—To the E. Indian Ericacese must be added the Javanese species of Diplecosia, Vireya, and Hymenanthus, Bl. Exclusive of Java, all the Indian plants of this order have been found on the Himalayas, the Khassya Hills, and the Neelgherries ones excepted.—General properties astringent and diuretic. Rhododendron, L. (Spreng. syst. 2, p. 275, No. 1548.)

- arboreum, Sm. (exot. bot. t. 9;—B. Reg. 11, t. 890;—Spreng. syst.
   p. 292;—Hook. exot. fl. t. 168;—Swt. fl. gard. 3, t. 250.—R. puniceum, Roxb. fl. ind. 2, p. 409.—R. purpureum, Buch. MSS.) 5 Nepal. Kemaoon. Fl. large, dark scarlet. In H. C. G. fl. April and May, (Roxb. H. B. p. 33.)—Wood used for making gun-stocks. (Hardwicke.)
  - \* Gaultheria fragrantissima, Wall. 5 Nepal.

ORDER CLXII.-VACCINIACEÆ, Lindl. Nat. Syst. p. 221.

### THE BILBERRY TRIBE.

Shrubs or small trees, by Lindl. referred to 8 genera. Of these, Spreng. syst. assigns 30 species to S. America, Mexico, and the W. Indies; 30 to N. America; 3 to Europe; 3 to Japan; 1 to the Society Islands; 1 to Madagascar; 1 to Armenia; and 1 to Madeira. In the E. Indies, according to Wall. Cat. and Royl. ill., have been discovered 10 species; viz. 3 of Vaccinium; 2 of Gaylusaccia; and 6 of Thibaudia;—all natives of the Khassya Mountains, except 1 from the Neelgherries; 1 from Tavoy, and 1 from Java.—Properties unimportant.

VACCINIUM, L. (Spreng. syst. 2, p. 171, No. 1421.)

- 1. Sprengelii, Wall. (Cat.) 5 Khassya Mountains.—Has not fl. here.
- 2. secundum, Wall. 5 Neelgherries.
- 3. Schmidianum, Wall. 5 Neelgherries.

THIBAUDIA, Pav. (Spreng. syst. 2, p. 275, No. 1553.)

- 1. variegata, Wall. (Cat.;—Royle. t. 79, f. 1.—Ceratostema variegatum, Roxb. fl. ind. 2, p. 413.—Agapetes variegata, D. Don.; in G. Don's Mill. dict. 3, p. 862.) 5 Garrow Hills. Khassya Mountains. Fl. large, red and rose-coloured, with the mouth greenish, C. S.; fr. June and July. (Roxb.)
- vaccinacea, Wall. (Cat.—Ceratostema vaccinaceum, Rosb. fl. ind. 2, p. 412.)
   Garrow Hills. Khassya Mountains. Fl. small, white, tinged with green, March and April; fr. June and July. (Rosb.)
- 3. setigera, Wall. (Cat.—Agapetes setigera, D. Don.; in G. Don's Mill. dict. 3, p. 862.) 5 Khassya Mountains. Fl. largish, red, internally pale red, Feb. fr. 0.
- \* Thibaudia loranthiflora, Wall. Tavoy.—T. acuminata, Wall. Khassya Mountains.—Gaylussacia serrata, Lindl. Khassya Mountains.

ORDER CLXIII.—EPACRIDACEÆ,—Lindl. Nat. Syst. p. 222.

Shrubs or small trees, by Lindl. referred to 26 genera, containing more than 150 species, all natives of N. Holland and South Sea Islands. Properties unimportant.

\* Leucopogon malayanus, Jack. 5 Singapore, the only Indian species yet discovered.

ORDER CLXIV.—PRIMULACEÆ, Vent.—Lindl. Nat. Syst. p. 223.

### THE PRIMROSE TRIBE.

Herbs, by Lindl. referred to 24 genera. Of these, Spreng. syst. enumerates about 65 species for Europe; 20 for N. America; 14 for S. America; 12 for Siberia; 10 for New Holland and the South Sea Islands; 6 for Caucasus; 5 for the Levant; 3 for N. Persia; 2 for Dahuria; 2 for China; 1 for Japan; 2 for Altai; 1 for N. Africa; 1 for Tauria; 1 for Arabia; 1 for Bourbon; 2 for Greenland; 1 for Patagonia; 1 for the Straits of Magellan. Five species have been found in S. Africa, (Harvey.); and about 47 in the Himalayas; viz. 8 of Androsace; 22 of Primula; 14 of Lysimachia; 1 of Anagallis; 1 of Centunculus; and 1 of Samolus. (D. Don. Wall. Cat. Royle. ill.) Properties of no importance.

PRIMULA, L. (Spreng. syst. 1, p. 504, No. 616.)

1. denticulata, Sm. (exot. bot. 2, t. 114; Roxb. fl. ind. ed. Carey, 2,

- p. 17; Spreng. syst. 1, p. 574, c. p. p. 56.) 24. Khassya Mountains. Nepal.—Fl. in H. C. G., C. S.
- 2. prolifera, Wall, (Roxb. fl. ind. ed. Carey, 2, p. 18;—Spreng. syst. 1, p. 574.) 4. Khassya Mountains. In H. C. G. fl. C. S.
- CYCLAMEN, L. (Spreng. syst. 1, p. 504, No. 613.)
  - 1. persicum, Mill. (Spreng. syst. 1, p. 572;—B. M. 2, t. 44.) 4. Greece. Has been introduced into H. C. G. Fl.?
- ANDROSACE, L. (Spreng. syst. 1, p. 504, No. 617.)
  - nana, Horn. (Loud. hort. brit. p. 56, No. 3756.) 

    Fl. small, white,
     C. S. Denmark.
- CENTUNCULUS, L. (Spreng. syst. 1, p. 369, No. 457.)
  - 1. minimus, L. (Spreng. syst. 1, p. 440;—E. B. 8, t. 531.) ⊙ Europe. Fl. very small, rose-coloured, Feb.
- Anagallis, L. (Spreng. syst. 1, p. 503, No. 610.)
  - arvensis, L. (Pers. syn. 1, p. 173;—E. B. 8, t. 529.—A. phœnicea,
     Lam.—Spreng. syst. 1, p. 570.) ⊙ Europe. Middle Asia. N. America.
     Fl. smallish, scarlet, C. S.; fr. March.
    - β coerulca; (A. arvensis, Roxb. fl. ind. ed. Carey, 2, p. 24; excl. syn.) ⊙ Kemaon. Nepal. Khassya Mountains. Fl. light blue, C. S.
  - coerulea, Schreb. (Pers. syn. 1, p. 173;—Spreng. syst. 1, p. 570;—E. B. 26, t. 1823.) ⊙ Europe. Middle Asia. Fl. smallish, blue, Feb.

# ORDER CLXV.—MYRSINACEÆ,—Lindl. Nat. Syst. p. 224.

Shrubs, rarely climbing, or trees, by Lindl. referred to 20 genera. Of these, Spreng. syst. and Alph. DC. enumerate 59 species for S. America, Mexico and the W. Indies; 4 for Japan; 5 for New Holland and the South Sea Islands; 6 for Bourbon and Mauritius; 3 for Madagascar; 1 for N. America; 1 for the Canaries; 1 for the Azores; and 1 for China. Harvey assigns 15 species to S. Africa. In the E. Indies have, according to Alph. DC., (including Oncinus) been discovered 102 species; viz. 2 of Ægiceras; 13 of Myrsine; (including M. acuminata, Royl.); 1 of Badula, (Ceylon,); 54 of Ardisia; 13 of Embelia; 2 of Choripetalum; 2 of Samara, (Roxb.); 14 of Mæsa; and 1 of Oncinus. (Lour.) To these must be added 6 species uncertain as to their genus. Most of them inhabit the Himalayas, Assam, the Khassya Mountains, the Circars, Neelgherries, and the Mountains of the ultra-gangetic Peninsula of India, and of Java. But few species have been found in the plains. Properties almost unknown.

- BADULA, Juss.
  - 1. Barthesia, Alph. DC. 5 Bourbon. Mauritius. Sept. 1839.

ŀ

- ÆGICEBAS, Gärtn; Kön; R. Br. (Spreng. syst. 1, p. 509, No. 699;—G. Don. in Mill. dict. 4, p. 7, 8.)
  - 1. fragrans, Kön. (Ann. bot. 1, p. 129;—Spreng. syst. 1, p. 641;—G. Don. l. c. p. 8; excl. syn. Rumph.—Hook. bot. misc. 3, p. 84, t. 21;—J. Grah. Cat. B. pl. p. 104.—Æ. majus, Gürtn. fr. 1, p. 216, t. 46, f. 1, excl. syn. ORDER CLXVI.—SAPOTACEÆ, Endl.—Lindl. Nat. Syst. p. 225.

#### THE SAPPODILLA TRIBE.

Trees and ahrubs, referred by Lindl. (excluding Hunteria and Acosta, and adding Isonandra, Wight.) to 14 genera. Of these, Spreng. syst. enumerates 38 species for S. America, Mexico, and the W. Indies; 3 for Mauritius, (including 2 from Wall. Cat.); 6 from New Holland and the Friendly Islands; 4 from N. America; 1 from Arabia; 1 from N. Africa; and 1 from Guinea. In S. Africa, have been found 10 species, (Harvey.); and in the E. Indies 22; viz. 2 of Chrysophyllum; 5 of Mimusops; 7 of Bassia; 6 of Siderosylon; and 2 of Isonandra;—nearly all natives of Nepal, Assam, the Khassya Mountains, the Circars, the Concans, the Mountains of India east of the Ganges, Ceylon, the Moluccas, and Java. Properties under the species.

Achras, L. (Spreng. syst. 2, p. 12, No. 1316; -G. Don's Mill. dict. 4, p. 33.)

Sapota, L. (Spreng. syst. 2, p. 132;—G. Don. l. c.;—Roxb. fl. ind. 2, p. 181;—J. Grah. Cat. B. pl. p. 106;—B. M. 58, t. 3111 and 3112.)
 Common Sapota. Bully-tree. L. 5 W. Indies. Abundantly cultivated,

throughout all the hot parts of South America for the sake of its fruit. Not uncommon in our gardens. Fl. smallish, whitish, H. S.; fr. R. S. Timber considered of great service in the making of shingles for corn houses. Bark astringent, and commonly known by the name of Cortex jamaicensis, according to Browne, being frequently administered to the Negroes in lieu of Jesuit's Bark, and found to answer all the purposes of that medicine. From every part of the tree a tenacious, viscid, white juice issues. Fruit in appearance like an old, decayed potato, yet one of the most luscious in the W. Indies; but so abounding in an acrid milk, that it cannot be eaten until it is completely ripe; or, according to French authors, until it almost begins to be putrid. Seeds aperient, diuretic. (Hook. l. c.)

- a. Fruit elliptic or ovate. (Jacq. am. p. 57, t. 41.—Browne, jam. p. 200, t. 19, f. 3.)
- β. Fruit roundish, somewhat depressed. (Jacq. am. l. c. t. 41. β. Achras Zapotilla, Browne, jam. p. 200.—Sloane, jam. 2, p. 171, t. 230;—ibid. p. 172, t. 169, f. 2.)
- LUCUMA, Juss. (Spreng. syst. 1, p. 510, No. 723;—G. Don's Mill. dict. 4, p. 33.)
  - 1. mammosa, Juss. (Gen. pl. p. 152;—Gärtn. fil. fr. 3, p. 129;—Spreng. syst. 1, p. 667; G. Don. l. c.—Achras mammosa, L.; Roxb. H. B. p. 25.—A. Sapota major, Jacq. am. 56, t. 182, f. 19; ed. pict. p. 32, t. 59.)—Sapota mammosa, Mill. dict. No. 2;—Gärtn. fr. 2, p. 104.—Sloane, jam. 2, p. 124, t. 218.) L. 5 S. America. W. Indies.—Common Mammee Sapota. Fl. small, whitish. Fruit, (American Marmalade,) large, oval or top-shaped, covered with a brownish rough skin, under which is a soft pulp, of a russet colour, very luscious, which is called natural marmalade, from its likeness to marmalade of quinces. Was introduced from China into H. C. G. in 1807, but had not fl. up to 1814.
- Chrysophyllum, L. (Spreng. syst. 1, p. 510, No. 722;—G. Don's Mill. dict. 4, p. 31.)
  - 1. Cainito, L. (Spreng. syst. 1, p. 666;—G. Don. l. c.;—Jacq. am. p. 51, t. 37, f. 1; ed. pict. p. 30, t. 51;—Lam. ill. t. 120;—Gärtn. fr. 3, p. 120, t. 201;—B. M. 58, t. 3072;—Roxb. H. B. p. 17;—Browne, jam. p. 171, t. 14, f. 2;—Sloane, jam. 2, p. 170, t. 229.) Star-apple. L. 5 W. Indies. S. America. Fl. small, yellowish-white, H. S.; fr. R. S. The Star-apple is a well known fruit in the W. Indies, where, however, it appears to be more esteemed by the natives, than it is by Europeans. (Hook.)
  - 2. macrophyllum, G. Don.? (Mill. dict. 4, p. 32.) L. 5 Sierra Leona. In H. C. G. Fl.?
  - 3. Roxburghii, G. Don. (Mill. dict. 4, p. 33.—C. acuminatum, Roxb. fl. ind. 1, p. 599; ed. Carey, 2, p. 345;—J. Grah. Cat. B. pl. p. 105; not, Lam.) 5 Khassya Mountains. Assam. Fl. minute, pale yellow,

- April and May; fr. Oct. Fruit greedily eaten by the natives, though the pulp is nearly insipid, and uncommonly clammy, adhering to the lips and knife with great tenacity. (Roxb.)
- 4. oblongum, Wall. 5 Khassya Hills, 1828.

     Southern part of the Coast of Coromandel. Malabar. Ceylon. Fl. middle-sized, whitish, May; fr. Aug. and Sept. Wood as hard and durable as teak, but not so easily worked, nor is it procurable of such length. The leaves are

boiled in water, and given as a medicine in several diseases. The bark is a cure for the itch. The flowers, which fall in May, are gathered by the common people, dried in the sun, roasted, and eaten as food. They are also bruised and boiled to a jelly, and made into small balls, which are sold, or exchanged for fish, rice, &c. The milk of the green fruit, and of the tender bark is given as a medicine. The oil pressed from the fruit is used for lamps. It is the principal ingredient in making country soap, and to the common people a substitute for ghee and cocoa-nut in their curries and other dishes. Cakes are made of it, and many of the poor get their livelihood by selling these sweet oilcakes. The cake, left after the oil is expressed, is used for washing the head, and carried as a small article of trade to those countries where the tree is not to be found. (Roxb.)

- 2. latifolia, Roxb. (Corom. 1, t. 19; fl. ind. 2, p. 526;—Spreng. syst. 2, p. 447, excl. syn. Forst.;—G. Don's Mill. dict. 4, p. 36;—J. Grah. Cat. B. pl. p. 107.) NEN Muhooa. 5 Mountainous parts of the Circars. Bengal. Malabar Hill. Bombay. Throughout the Concans. Guzerat. Malwa. Fl. middle-sized, white, with a tinge of green and cream-colour, March and April; fr. July and Aug. Wood hard, very strong, and proper for naves of wheel-carriages. Flowers eaten raw by the natives. An ardent spirit is distilled from them by the hill-people. The seeds yield by expression a large quantity of concrete oil, which is used to adulterate ghee, for frying cakes, and by the poorer people to burn. There is frequently to be found a drop of whitish, soft, tasteless resin on the apices of the flowers, before they open. (Roxb.)
- 3. butyracea, Roxb. (As. Res. 8, p. 477;—fl. ind. 2, p. 527;—Spreng. syst. c. p. p. 189;—G. Don's Mill. dict. 4, p. 36;—D. Don. pr. fl. nep. p. 146.) 5 Almora Hills. Nepal. Fl. smallish, white. Has not fl. here as yet. This tree produces a vegetable butter. The Kernels are bruised into the consistence of cream, and then put into a cloth bag, with a moderate weight laid upon them, and left to stand till the oil or fat is expressed. This becomes immediately of the consistence of hog's lard, and is of a delicate white colour. It is much esteemed in rheumatism and contractions of the limbs. It is also used by the natives of rank perfumed as an unction. The pulp of the fruit is eaten by some. (Roxb.)

ORDER CLXVII.—DIOSPYRACEÆ.—EBENACEÆ, Vent.—Lindl.
Nat. Syst. p. 226.

#### THE EBONY TRIBE.

Trees or shrubs, by Lindl. referred (adding Euclea) to 8 genera. Of these, Spreng. syst. assigns 1 I species to New Holland and the Friendly lahands; 7 to S. America, Mexico, and the W. Indies; 6 to the Mascarenhas; 2 to N. America, and 1 to N. Africa, and S. Europe. Diospyros vaccinoïdes, Hook. belongs to China. In S. Africa have been found 30 species. (Harvey.) and in the E. Indies, according to Spreng., Roxb. and Wall. Cat., 42 species of Diospyros; and 2 of Maba. They are all discovered in the islands of the Indian Archipelago and in both Peninsulas of India; Diospyros extending from the Khassya Mountains to the Himalayas.

"Remarkable only for the hardness and blackness of the wood of some species, and for the eatable quality of the fruit. The former is well known under the name of Ebony and Ironwood; the latter is occasionally introduced from China as a dry sweetmeat. It is noted for extreme acerbity before arriving at maturity." (Lindl.)

ı

scabra, Burm. pr. 13.) 5 C. G. H. Has been cultivated here for many years, without flowering.

- MABA, Forst. (Spreng. syst. 2, p. 11, No. 1303;—G. Don's Mill. dict. 4, p. 43.)
  - buxifolia, Pers. (Spreng. syst. 2, p. 125;—G. Don. l. c.—Ferreola buxifolia, Roxb. Corom. 1, t. 45;—fl. ind. 3, p. 790.)
     Circar Mountains. Fl. small, yellowish, H. S.; fr. C. S. Wood dark-coloured, remarkably hard, and durable. Berries universally eaten, when ripe of a pleasant taste. (Roxb.)
  - \* Diospyros salicifolia, Willd. 5 S. America.—D. macrophylla, Bl. 5 Java.—D. obtusifolia, Willd. L. 5 Mexico.—D. serrata, Buch. L. 5 Nepal.—D. cerasifolia, D. Don. 5 Nepal.—D. frutescens, Bl. 5 Java.—D. obovata, Jacq. 5 Jamaica.—D. bracteata, Roxb. 5 Doab.—Pouteria quianensis, Aubl. 5 Gujana.

# SUB-ORDER? STYRACEÆ, Rich.—Lindl. Nat. Syst. p. 227.

A very unsettled order, requiring a complete re-examination.—Trees or shrubs, (excluding Hopea, L.) by Lindl. referred to 8 or 9 genera. Of these, Spreng. syst. enumerates 24 species for S. America, Mexico and the W. Indies; 4 for N. America; 1 for Asia Minor and S. Europe; and 1 for China. In the E. Indies have been found according to Spreng., Roxb. and Wall. Cat., 27 species of Symplocos; 5 of Styrax; and 1 of Decadia. (Lour.) all natives of the mountains of India. Only one has been discovered in the plains of Bengal. Styrax Benzoin is a native of Sumatra, and Decadia of Cochin China. Properties unimportant.

- SYMPLOCOS, L. (Spreng. syst. 3, p. 331, No. 2626;—G. Don's Mill. dict. 4, p. 1.)
  - 1. ferruginea, Roxb. (fl. ind. 2, p. 542;—G. Don's Mill. dict. 4, p. 2.)
    5 Khassya Mountains. Fl. middle-sized, yellow, Sept. and Oct.
  - spicata, Roxb. (fl. ind. 2, p. 541;—G. Don's Mill. dict. 4, p. 2.)
     Khassya Mountains. Assam. Fl. small, yellow, R. S.; fr. C. S.
     Nuts hard, about the size of a pea, strung like beads, by the natives and hung round the necks of their children to prevent evil. (Roxb.)
  - 3. racemosa, Roxb. (fl. ind. 2, p. 539;—G. Don's Mill. dict. 4, p. 3.)

    Contact Lodh. 5 Burdwan. Midnapore. Nepal. Kemaon. Fl. small, lively yellow, Dec.; fr. May. Bark much in request as a mordant in dyeing red with Rubia cordifolia, L. The red powder (Abeer) used by the natives during the Hoolee holidays is made of the bark of this tree. (Roxb.)
  - 4. pulcherrima, Wall. 5 Nepal.

- STYRAX, L. (Spreng. syst. 2, p. 274, No. 1539;—G. Don's Mill. dict. 4, p. 4.)

  1. serrulatus, Roxb. (fl. ind. 2, p. 415;—G. Don. o. c. p. 5.) 5 Chittagong. Fl. largish. In H. C. G. fl. H. S.; fr. R. S. (Roxb.)
  - Benzoin, Dryand. (philos. trans. 77. p. 808, t. 12;—Spreng. syst.
     p. 285;—G. Don's Mill. dict. 4, p. 6;—Rosb. fl. ind. 2, p. 416;—Bl. bijdr. p. 671.)
     b Sumatra. Introduced into H. C. G. in 1812.
     This tree produces the gum-resin called Benzoin, of which the only preparation is flores benzoes, a medicine now nearly out of use.
  - \* Symplocos Alstonia, L'Herit. 5 New Granada.—S. coccinea, H. and B. 5 Mexico.—S. serrulata, H. and B. 5 New Granada.—S. mucronata, H. and B. 5 Mexico.—S. martinicensis, L. 5 Martinique.—S. ORDER CLXVIII.—ILICIACEÆ, AQUIFOLIACEÆ, DC.—Lindl. Nat. Syst. p. 228.

### THE HOLLY TRIBE.

Trees or shrubs, by Lindl. referred to 14 genera. Of these, DC. pr. and Spreng. syst. enumerate 28 for S. America, Mexico, and the W. Indies; 20 for N. America; 9 for Japan; 2 for Europe; 2 for Madagascar; 1 for Mauritius; 1 for the Canaries; 1 for Madeira; 1 for China; 1 for the Straits of Magellan; 1 for N. Africa; and about 10 for S. Africa. In the East Indies have, according to Spreng. and Wall. Cat. been discovered about 14 species of Ilex or Prinos; and 2 of Monetia. With the exception of Monetia tetracantha, an inhabitant of the plains of India, all the Indian forms of this order have been found in the Himalayas, the Khassya Mountains, the Neelgherries, and the mountains about Penang, Singapore and Moulmein. Properties unimportant.

Cassine, L. (Spreng. syst. 1, p. 533, No. 1110;—G. Don's Mill. dict. 2, p. 12;—DC. pr. 2, p. 11.)

barbara, L. (Spreng. syst. 1, p. 939;—G. Don. o. c. p. 13;—DC. o. c. p. 12.)
 C. B. S. Introduced in 1840.

ORDER CLXXI.—CONVOLVULACEÆ, R. Br.—Lindl. Nat. Syst. p. 231.

#### THE BINDWRED TRIBE.

Herbs or shrubs, usually twining, rarely creeping, or erect, by Lindl. referred to 28 genera. Of these, though much underrating, Spreng. syst. enumerates about 150 for S. America, Mexico and the W. Indies; 18 for Europe; 16 for N. America; 8 for N. Africa; 6 for Guinea; 7 for the Canaries; 5 for Siberia; 4 for E. Africa; 4 for the Mascarenhas Islands; 2 for Madagascar; 4 for Arabia; 4 for China; 3 for Japan; 3 for Tauria; 2 for the Orient; 1 for Dahuria; 1 for Persia; and 1 for the Azores. Many are common to several parts of the world. In S. Africa, excluding Falkia, Retzia, Lonchostoma and Cuscuta, have been found 23 species. (Harvey); in N. Holland and the South Sea Islands more than 50; (R. Br.) and in the E. Indies, according to Choisy, 130; viz. 5 of Rives; 31 of Argyreia, (including A. floribunda, Wall.); 1 of Blinkworthia; 2 of Moorcroftia; 2 of Quamoclit; 3 of Batatas; 3 of Pharbitis; 3-4 of Calonyction; 2 of Lepistemon; 53 of Ipomoea; 6 of Convolvulus; 4 of Aniseia; 1 of Calystegia; 1 of Hewittia; 1 of Skinnera; 4 of Porana; 2 of Neuropeltis; 4 of Breweria; 1 of Cressa; and 2 of Evolvulus. They are to be found everywhere both in the mountains and plains, but most abundantly on the latter.

"Their roots abound in an acrid milky juice, which is strongly purgative; this quality depends upon a peculiar resin, which is the active principle of the Jalap, the Scammony, and the others whose roots possess similar qualities." (*Lindl.*)

RIVEA, Choisy. (G. Don's Mill. dict. 4, p. 253.)

1. tiliæfolia, Choisy. (G. Don. l. c.; —J. Grah. Cat. B. pl. p. 127.—Convolvulus tiliæfolius, Desrouss. in Lam. dict. 3. p. 544.—C. gangeticus, Roxb. fl. ind. 1, p. 467; ed. Carey, 2, p. 46.—Ipomoea tiliæfolia. Röm. and Sch.—I. gangetica, Swt.—I. campanulata, L.; not Lour.)

5 Philippine Islands. Both Peninsulas of India. Bengal, (Serampore.) Mauritius. C. G. H. W. Indies. Peru. Fl. very large, pale rose-coloured, tinged with purple, with a dark purple eye. C. S.; fr. H. S.  $\beta$ . leucantha. Flowers white.

- ornata, Choisy. (G. Don's Mill. dict. 4, p. 254.—Lettsomia ornata, Roxb. fl. ind. 1, p. 496; ed. Carey, 2, p. 86.—Argyreia ornata, Swt.—Convolvulus candicans. Roth.; not hb. Willd.)
   Coromandel. Monghir. Cawnpore. Nepal. Fl. very large, pure white, with a pale greenish eye, R. S.; fr. C. S.
- 3. Bona nos, Choisy. (G. Don's Mill. dict. 4, p. 254.—Lettsomia Bona nox, Rosb. fl. ind. 1, p. 494; ed. Carey, 2, p. 84.—Argyreia Bona nox, Swt.—Rivea fragrans, Nimmo;—J. Grah. Cat. B. pl. p. 127.) কলমা বৰা Kulmee-luta. Clove-scented creeper. Midnapore creeper.

  5 . The Concans. Guzerat. Bengal, (Serampore, Midnapore.) Fl. large, pure white, expanding at sun-set, and perfurming the air to a considerable distance with a fragrance resembling that of the finest cloves, R. S.; fr. C. S. Leaves used by the natives in their curries.

  Argyreia, Lour. (G. Don's Mill. dict. 4, p. 254.)
  - 1. speciosa, Swt. (G. Don. l. c.; —J. Grah. Cat. B. pl. p. 128.—Convolvulus speciosus, L. suppl. p. 137, excl. the country.—C. nervosus, Burm. ind. t. 20, f. l.—Ipomoea speciosa, Pers.; —B. M. 51, t. 2446.

    —Lettsomia nervosa, Rosb. fl. ind. 1, p. 488; ed. Carey, 2, p. 78.—L. speciosa, Rosb. H. B. p. 13; —Rheed. 11, t. 61.) 

    The styre Bichtaruka 5 Coromandel. Malabar-hill, Malabar. Deccan. Bengal, (Serampore.) Hindoosthan. Deyra Dhoon. Java. Isle of France. Fl. large, deep rose-coloured, R. and. C. S.; fr. March. The upper side of the leaves is used by natives to act as a discutient; the under, or white side, as a maturant. (Dr. Gibson.)
  - 2. zeylanica, (A. pomacea, Choisy. G. Don's Mill. dict. 4, p. 255, excl. Lettsomia strigosa, Rosb., Ipomoca strigosa, Roth. and Convolvulus capitatus, Vahl.—Lettsomia pomacea, Rosb. H. B. p. 13;—fl. ind. 1, p. 493; ed. Carey, 2, p. 83.—Ipomoca zeylanica, Gärtn. fr. 2, p. 482, t. 178, f. 1.) 5 Mysore. Ceylon. Dindygul. Fl. large, rose-coloured. In H. C. G. fl. from May till Nov., fr. C. S. (Rosb.)

  Banks of the Arkansas. Fl. largish, white, with a purplish rim, C. S.
- 30. macrorrhiza, Michx. (G. Don's Mill. dict. 4, p. 277.—I. Jalapa, Pursh.; B. Reg. 4, t. 342.—I. Michauxii, Sweet.) 5 Georgia and Florida, near the sea-shore. Fl. very large, white.

- β. rubra. (Convolvulus Jalapa, Lam.;—B. M. 38, t. 1572.—C. Jalapa, β. rosea, Ker. B. Reg. 8, t. 521.) 5 Mexico, about Vera Cruz. Fl. very large, deep rose-coloured, R. and C. S. This variety, has been introduced into Bengal by Lord Auckland. It is not the true Jalap Plant, nor does it, according to Dr. O'Shaughnessy's chemical analysis, contain any resin. The above-mentioned white-flowered variety, a. the Jalap of N. America, (Convolvulus macrorrhizos, Rosb. H. B. p. 14.) was introduced into H. C. G. in 1801, but had not flowered up to 1814.
- The true Jalap of the shops is the product of I. Jalapa, Schiede and Deppe. (G. Don's Mill. dict. 4, p. 271;—I. Purga, Wenderoth.—Convolvulus Jalapa, Houst. MSS. in Mill. dict. ed. 8, No. 31;—Lian. Mant. 1, p. 43; not of others.—Ipomoea Schiedeana, Zucc.) It is a native of Mexico, in the woods of Chiconquiaco, from whence it is brought to Vera Cruz by the inhabitants of Jalapa or Xalapa. The plant is called Purga and Laschachne in Mexico, it abounds also on the eastern slope of the Cordillera of Anahuac, in the same latitude with the Vanilla aromatica, Swz, and Smilax Sarsaparilla, L., and in its wild state delighting in a dry sandy soil.
- 32. coptica, Roth. (G. Don's Mill. dict. 4, p. 278;—J. Grah. Cat. B, pl. p. 132.—I. Brunetii, Perr. cat. MSS. No. 150.—Convolvulus copticus, L. Mant. p. 559;—Roxb. fl. ind. 1, p. 477; ed. # ORDER CLXXII.—POLEMONIACEÆ,—Lindl. Nat. Syst. p. 232.

### THE GREEK VALERIAN TRIBE.

Herbs, with an occasionally climbing stem, by Lindl. referred to 16 genera. Of these, according to Spreng. syst. B. Reg. (19, t. 1622, app.) B. M., and Royl, ill., about 60 species have been found in N. America, especially California; 22 in S. America and Mexico; 2 in Siberia; 1 in Europe and N. Asia; and 3-4 in the Himalayas. The latter are Polemonium coeruleum and gracile, if both really are distinct; and? Cyananthus integer and lobatus.—" Properties none, or unknown." (Lindl.)

Polemonium, L. (G. Don's Mill dict. 4, p. 238.)

- cæruleum, L. (G. Don. l. c.; —E. B. 1, p. 14; —Roxb. fl. ind.; ed. Carey, 2, p. 24.) Greek Valerian. Jacob's Ladder. 4 N. Europe. Siberia. Kemaon. Fl. large, sky-blue, C. S. but very rarely.

ORDER CLXXV.-LOBELIACEÆ, Juss.-Lindl. Nat. Syst. p. 235.

Herbs and shrubs, by Lindl. referred to 20 genera. Of these, Spreng. syst. enumerates for S. America, Mexico, and the W. Indies, about 68 species; for S. Africa, 34; for N. Holland, and the South Sea Islands 20; for N. America 12; for Europe 7; for the Mascarenhas Islands 3; for Japan 2; for China and for Kamtschatka 1. In the E. Indies have been found 1 species of *Piddingtonia*; and, according to Spreng. and Wall. Cat. and MSS. 14 of *Lobelia*, mostly mountain-plants, from the Himalayas down to Ceylon and the Peninsula of Malacca.

"All dangerous or suspicious, in consequence of the excessive acridity of their milk." (Lind.)

ORDER CLXXVI.—CAMPANULACEÆ, R. Br.—Lindl. Nat. Syst. p. 237.

### THE CAMPANULA TRIBE.

Herbs or undershrubs, sometimes climbing, by Lindl. referred to 21 genera. Of the 311 species belonging to this order, only 19 are found in intratropical countries. Alph. DC. remarks, that "it is within the 36° and 47° N. lat. that in our hemisphere the greatest number of species is found; the chain of the Alps, Italy, Greece, Caucasus, the Altai range are their true country. In whatever direction we leave these limits, the number of species rapidly decreases. In the southern hemisphere, the Cape of Good Hope, (lat. 34° S.) is another centre of habitation, containing not fewer than 63 species." (Lindl.) In the E. Indies, have, according to Wall. Cat. and Royl. ill., been found 36 species, viz. 1 of Cephalostigma, (Banks of the Irrawaddi,) 8 of Codonopsis, (Himalayas, one from the rocks of Pingee, on the banks of Irrawaddi,) 2 of Wahlenbergia, (one from Nepal; the other from the plains of India,) 24 of Campanuls, (Himalayas, 1 from the Neelgherries; another from Prome,) and 1 of

Symphiandra. (Himalayas.) In these are included Codonopsis lurida, Lindl; Campanula pallida, Wall. C. lanceæfolia, Roxb. C. integerrima, Buch. and C.? repens, Lour.

- "Their milky juice is rather acrid, but nevertheless the roots and young shoots of some, particularly of Campanula Rapunculus, L. or Rampion, of Phyteuma spicatum, L., of Canarina Campanula, Lam. &c. are an occasional article of food. The chief value of the order, however, is its beauty." (Lindl.) Wahlenbergia, Schrad. (G. Don's Mill. dict. 3, p. 737.)
  - capensis, Alph. DC. (G. Don. o. c. p. 738.—Campanula capensis, L.;—B. M. 20, t. 782.—Roella decurrens, Andr.; Bot. repos. t. 238.) ⊙ C. G. H. Fl. large, externally bluish-green, internally darkblue at the bottom, greenish just under the lobes, black-spotted within the lobes at the recesses, and the lobes violaceous, Feb. and March.

ORDER CLXXVII.—SPHENOCLEACEÆ, Martius.—Lindl. Nat. Syst. p. 238.

Comprehends only one genus, and the following marshy herb, whose properties are unknown.

Pongatium, Juas. (Gen. pl. p. 423.)

1. indicum, Lam. (Sphenoclea zeylanica, Gärtn.; fr. 1, p. 113, t. 24, f. 5;—Rosb. fl. ind. 1, p. 507; ed. Carey, 2, p. 116;—J. Grah. Cat. B. pl. p. 248;—Spreng. syst. 1, p. 622.—Rapania herbacea, Lour.—Gartnera Pongati, Retz. obs. 6, p. 24;—Rheed. 2, t. 24.) 氧甲基乙基 Jeelmurich. ② Ceylon. Both Peninsulas of India. Bengal, (Serampore.) Hindoosthan. Fl. very small, white; R. and C. S.; fr. C. S.

ORDER CLXXVIII.—STYLIDIACEÆ, Lindl. Nat. Syst. p. 240.

Herbs or undershrubs, by Lindl. referred to 3 genera. Of these 47 species belong to N. Holland and the South Sea Islands, and 1 to Terra del Fuego; 4 species have been found in India, viz. Stylidium tenellum, Swz. (Malacca.) S. uliginosum, Swz. (Ceylon.) S. Wightianum, Wall.; (Peninsula of India,) and S. Kunthii, Wall. (Silhet.) Properties unknown.

STYLIDIUM, Swz. (G. Don's Mill. dict. 3, p. 719.)

- 1. tenellum, R. Br.? (pr. p. 571.—Swz.?) ⊙ Ditches about Serampore. Fl. small, greenish-lilac, R. S.; fr. C. S.
- \* Stylidium eriorrhizon, R. Br. 4. Tropical New Holland.—S. floribundum, R. Br. 4. Tropical New Holland.—S. capillare, R. Br. Tropical New Holland.—S. rotundifolium, R. Br. 4. Tropical New Holland.—S. pedunculatum, R. Br. 4. Tropical New Holland.

## ORDER CLXXIX.—GOODENIACEÆ, Lindl. Nat. Syst. p. 241.

Herbs, rarely shrubs, by Lindl. referred to 9 genera. Of these, 45 species have been found in New Holland and the South Sea Islands; 24 (Cyphia) in S. Africa. (*Hervey*.) and 1 (*Pentaphragma begonifolium*, Wall.) in Penang. Properties unknown.

Сурніа, Berg. (G. Don's Mill. dict. 3, p. 718.)

- bulbosa, Berg. (G. Don. l. c.—C. capensis, Gmel.—Lobelia bulbosa, L.—L. Cyphia, Gmel.)
   C. G. H. Introduced in 1841.
- \* Pentaphragma begonifolium, Wall. 4. Penang.—Velleia spathulata, R. Br. 4. Tropical New Holland.—V. pubescens, R. Br. 4. Tropical N. Holland.—Leschenaultia filiformis, R. Br. 4. Tropical N. Holland.

### ORDER CLXXX.—SCÆVOLACEÆ, Lindl. Nat. Syst. p. 242.

Herbs or shrubs, by Lindl. referred to 4 genera. Of these, 36 species have been discovered in New Holland, and in the South Sea Islands; 1 in the W. Indies; 1 in S. Africa, which is also common to New Holland and Cochin China; and 3 (Scavola) in the E. Indies, one also common to Mauritius; another to New Holland, and Cochin China. Properties unknown. Scavola, L. (G. Don's Mill. dict. 3, p. 727.)

- Taccada, Roxb. (fl. ind. 1, p. 527; ed. Carey, 2, p. 146;—G. Don's o. c. p. 728;—J. Grah. Cat. B. pl. p. 103, excl. syn. Bot. Mag.—Lobelia Taccada, Gärtn. fr. 1, p. 119, t. 25, f. 5;—Rheed. 4, t. 59?—Rumph. 4, t. 54.) 5 Sea shores of the Moluccas. Malay Islands. Penang. Mauritius, &c. Fl. middle-sized, white, sweet-scented, and fr. whole year.
- \* Scævola Königii, Vahl.; B. M. 54, t. 2732. 5 Tropical New Holland. Cochin China.—S. Plumieri, Vahl. 5 W. Indies.—S. sericea, Forst.

5 Tropical New Holland.—S. oppositifolia, Roxb. 5 Moluccas—S. ovalifolia, R. Br. 5 Tropical N. Holland.—S. revoluta, R. Br. 5 Tropical N. Holland.—S. angulata, R. Br. 5 Tropical New Holland.—Dampiera ferruginea, R. Br. 5 Tropical N. Holland.

## ORDER CLXXXI.—CINCHONACEÆ,—Lindl. Nat. Syst. p. 243.

#### THE COFFEE TRIBE.

Trees, shrubs, or herbs, by Lindl. (excluding Uncaria, Tarenna and Cenotheca, and adding Neurocalyx, Oxystoma and Psilospermum,) referred to 233 genera. Of these, DC. pr. enumerates about 870 species for S. America, Mexico, and the W. Indies; 54 for Guinea; 52 for New Holland and the South Sea Islands; 40 for the Mascarenhas Islands; 24 for Senegal; 22 for Madagascar; 18 for China; 14 for N. America, especially its southern provinces; 4 for Arabia; 3 for Zanguebar; 3 for Timor; 3 for Persia; 3 for Japan; 2 for the Canaries; 1 for S. Europe; 1 for St. Helena; 1 for Ascension; and 1 for Tristan d'Acunha. In S. Africa, excluding one Rubia, and several Galiums, have been found about 52 species; and in the E. Indies, according to DC., W. and A., and Wall. Cat., 695, viz.

Of Nauclea, 51. Of Adenosacme, 3. - Hymenopogon, 1. - Xanthophytum, 1. - Luculia, 1. - Ophiorrhiza, 26. - Argostemma, 8. — Hymenodictyon, 4. - Exostemma, 1. (Röm. and Sch.) - Spiradiclis, 1. - Zuccarinia, 1. - Neurocalyx, 2. - Lucinæa, 1. – Dentella, 1. - Mussænda, 20. - Hedyotis, 95. - Gynopachys, 3. - Kohautia, 2. - Stylocoryne, 14. — Metabolos, 10. - Gardenia, 22. - Axanthes, 5. --- Randia, 17. - Urophyllum, 2. - Griffithia, 1. - Morinda, 21. - Menestoria, 4. — Myrmecodia, 2. - Heliospora, 1. . — Hydnophytum, 2. - Hyptianthera, 1. - Hypobathrum, 1. — Bertiera, 3. - Mephitidia, 20. - Petesia, 4. (Bartl., Lour.) - Vangueria, 2. - Petunga, 4. - Guettarda, 7. — Macrocnemum? 2. (Roxb.) - Timonius, 2. - Hamiltonia, 3. - Wendlandia, 16. - Lerchea, 1. - Leptodermis, 1.

- Greenia, 2.

— Myonima? 1. (Bartl.)

CINCHONACEM.
Of Coffea, 8.
— Antherura, 1. (Lour.)
- Psychotria, 38.
— Cephaelis? 1. (Bl.)
— Geophila, 1-2.
— Cephalanthus, 3. (Lour., Roxb.)
) — Borreria, 4
— Santia, 1.
Eupyrena, 1.
- Spermacoce, 24.
- Knoxia, 12.
— Mytracarpum, 1. (Cham. & Schl.)
— Cuncea, 1. (Buch.)
Hydrophylax, 1.
- Scyphiphora, 1. (Gärtn.)
ufficiently known as to their place.
Jackia, 1.
Myrioneuron, 1.
Pleotheca, 2.

Species to be re-examined as to their section and genus.

Cupia auriculata. DC.	Randia polysperma, Roxb.
truncata, DC.	Pæderia recurva, Roxb.
scandens, DC.	erecta, Roxb.
Genipa bufalina, Lour.	ternata, Wall.
flava, Lour.	— Wallikara, Juss.
Gardenia? pubescens, Roth.	Polyozus barbatus, Sm.
Randia parviflora, Lam.	Cephalanthus procumbens, Lour.
drupacea, DC.	montanus, Lour.

As that part of Wall. Cat., which contains the greatest part of his Cinchonaceæ, remains in R. Brown's hands unpublished, the number of Indian species cannot be exactly ascertained.

Properties, as far as India is concerned, under the species.

A. CINCHONER, A. Rich.

(Cinchonacese, DC. pr. 4, p. 343, W. and A. pr. 1, p. 390.)

NAUCLEA, L. (DC. pr. 4, p. 343; W. and A. pr. 1, p. 390.)

- sendulata, Roxb. (fl. ind. 1, p. 508; ed. Carey, 2, p. 117;—DC. l. c.;
   G. Don's Mill. dict. 3, p. 466.)
   Moluccas. Fl. small, orange, fragrant, May and June; fr. March and April.
- coadunata, Roxb. (Rees' cycl. 24, No. 6;—DC. pr. 4, p. 344;—G. Don's Mill. dict. 3, p. 467.—N. cordata, Roxb. A. ind. 1, p. 509;
   ed. Carey, 2, p. 118.)
   b Ceylon. Fl. small, bright yellow, fragrant. In H. C. G. fl. May and June; fr. C. S. (Roxb.)

- 3. macrophylla, Roxb. (fl. ind. 1, p. 511; ed. Carey, 2, p. 120;—DC. pr. 4, p. 344;—G. Don's Mill. dict. 3, p. 467.) L. 5 Amboyna. Fl. small, pale yellow, sweet smelling. In H. C. G. fl. June and July. (Roxb.)
- 4. ovalifolia, Roxb. (fl. ind. 1, p. 516; ed. Carey, 2, p. 124;—DC. pr. 4, p. 344;—G. Don's Mill. dict. 3, p. 467.) 5 Silhet. Introduced into H. C. G. in 1811, but had not fl. up to 1814. (Roxb.)
- - parvifolia, Roxb. (Corom. 1, t. 52; fl. ind. 1, p. 513; ed. Carey, 2, p. 122;—DC. pr. 4, p. 344;—G. Don's Mill. dict. 3, p. 467;—W. and A. pr. 1, p. 391;—J. Grah. Cat. B. pl. p. 87;—Wight's ill. 2, t. 123.—N. parviflora, Pers. syn. 1, p. 202.—Cephalanthus pilulifer, Lam.;—DC. o. c. p. 539.—Nauclea orientalis, Gärtn. fr. 1, p. 151, t. 30, f. 8, excl. syn.) L. 5 Coromandel. The Concans. Common in the Mawul districts. Bengal, (Serampore.) Monghir. Morung. Rajmahl Hills. Hurdwar. Deyra-Dhoon. Kheree Pass. Kemaon. Fl. small, yellow, H. and R. S.; fr. C. S.—Wood light chestnut-coloured, firm, close-grained, used for various purposes connected with gunnery, but soon rotting, if exposed to wet. (Roxb. J. Graham.)
- 7. cordifolia, Roxb. (Corom. 1, t. 53; fl. ind. 1, p. 514; ed. Carey, 2, p. 122; —DC. pr. 4, p. 346; —G. Don's Mill. dict. 3, p. 468; —W. and A. pr. 1, p. 391; —J. Grah. Cat. B. pl. p. 87.) Coronandel Mountains. Common throughout the Concans. Banks of the Irawaddi. Taong-Dong. Bengal, (Serampore.) Hurdwar. Deyra-Dhoon. Kheree Pass. Kemaon. Fl. small, yellow, R. S; fr. April. Wood coloured like that of the Box-tree, but much lighter, and at the same time very close-grained. It answers well for furniture; exposed to wet, it soon decays. (Rosb.)
  - 8. sessilifructus, (Uncaria sessilifructus, Roxb. fl. ind. 1, p. 520; ed., Carey, 2, p. 130;—DC. pr. 4, p. 349;—G. Don's Mill. dict. 3, p. 471.) 5 Chittagong. Khassya Mountains. Assam. In H. C. G. Fl.?
  - scandens, Sm. (Rees' cycl. 24, No. 9, excl. syn. Rumph.—Uncaria pilosa, Roxb, fl. ind. 1, p. 520; ed. Carey, 2, p. 130;—DC. pr. 4, p. 348;—G. Don's Mill. dict. 3, p. 470;—Wall. pl. as. rar. 2, t. 170.)
     Chittagong. Nepal. Kemaon. In H. C. G. Fl. small, whitish.
     capitellata, (Nauclea microcephala, Wall. MSS.; not Delil.) In H.
  - C. G.
    Luculia, Sweet. (DC. pr. 4, p. 357;—G. Don's Mill. dict. 3, p. 480.)
    - 1. gratissima, Sweet. (Brit. fl. gard. t. 145;—DC. o. c. p. 358;—G. Don. l. c.—Cinchona gratissma, Wall. Roxb. fl. ind.; ed. Carey, 2,

- p. 154;—tent. fl. nep. 1, t. 21.—Mussænda Luculia, Buch.;—D. Don. pr. fl. nep. p. 139.) 5 Khassya Mountains. Nepal. Fl. large, rose-coloured, fragrant. Has been introduced in H. C. G. Fl.?

Willd.; not Ait.; -DC. pr. 4, p. 380. and G. Don's Mill. dict. 3, p. 497, excl. syn. Ait.) 5 Hills in the Circars and Carnatic. Tull Ghaut. Guzerat. Jungles in Kandesh. very large, in the morning pure white, in the evening yellow, fragrant. April; fr. C. S.
- 6. latifolia, Ait. (Hort. Kew. 1, p. 294; Willd.; Gärtn. fr. 3, p. 78, t. 193, f. 3; -W. and A. pr. 1, p. 395; -J. Grah. Cat. B. pl. p. 88.) 5 Southern Peninsula of India. Duddi on the Gutpurba. Fl. like those of No. 5, April and May; fr. C. S.
- 7. lucida, Roxb. (fl. ind. 1, p. 707; ed. Carey, 2, p. 553; -DC. pr. 4, p. 381;—G. Don's Mill. dict. 3, p. 497;—W. and A. pr. 1, p. 395;—J. Grah. Cat. B. pl. p. 88.—G. resinifera, Roth.) 5 Circars. Columala. Elephanta. Kennery jungles. South Mahratta Country. Chittagong. Fl. large, pure white, fragrant, March and April; fr. C. S. Furnishes the gum called Decamalee. (J. Grah.)
- 8. yummifera, L. (fil. suppl. p. 164; -DC. pr. 4, p. 381; -G. Don's Mill. dict. 3, p. 497;—Roxb. fl. ind. 1, p. 709; ed. Carey, 2, p. 555; -W. and A. pr. 1, p. 395; -J. Grah. Cat. B. pl. p. 88.-G. arborea, Rosb. fl. ind. 1, p. 708; ed. Carey, 2, p. 554; DC. l. c.; Q. Don. l. c.) 5 Circars. Gingie Hills. Ceylon. Very common about Duddi, on the Gutpurba. Fl. large, white, in the evening becoming yellow, fragrant, March and April; fr. C. S. From the buds, and wounds made in the bark exudes a beautiful yellow resin. (Roxb.)

- 9. chinensis, Carey MSS. 5 China. Fl. small, white, in the evening becoming yellow, March and April; fr. C. S.—Unarmed; young shoots densely pubescent; leaves opposite, one smaller than the other, cuneate-obovate, shortly apiculate, acute, membranous, along the nerves puberulous, otherwise glabrous, (1-3 inches by ½-1½ inch.) petioles 1-3 lines; flowers axillary, solitary, short peduncled; calyx adpressedly hirtulous, tube cylindric, ecostate, as long as the tube of the corol, lobes 4-5, oval, acute, nearly the size of the lobes of the corol; limb of the corol sericeous, 5-parted, with the lobes oval, obtuse, equal; anthers subsessile in the fissures of the corol, recurved; stigma exsert, equally bilamellate; berry oval, (about 1 inch) slightly puberulous, 10-11 sulcate, 1-celled, many-seeded.
- Thunbergia, L. (fil. supp. p. 162;—B. M. 25, t. 1004;—Roxb. H. B. p. 15;—DC. pr. 4, p. 382;—G. Don's Mill. dict. 3, p. 498.—Thunbergia capensis, Montin.—Gardenia verticillata, Lam.—G. crassicallis, Salisb. Lond. t. 46.—Bergkias, Sonner. it. nov. guin. t. 17, 18; journ. phys. 3, p. 299, t. 3.) 5 C. G. H. Manilla. Fl. large, white, fragrant, June, but very seldom; fr. 0.
- Rothmannia, L. (fil. suppl. p. 165;—DC. pr. 1, p. 382;—G. Don's Mill. dict. 3, p. 498;—B. M. 18, t. 690;—Rosb. H. B. p. 15.—Rothmannia capensis, Thunb.)
   C. G. H. Fl. very large, white, crimson-spotted, fragrant. Introduced into H. C. G. in 1799, but had not fl. up to 1814.
- 12. macrocarpa, Carey MSS. 5 Seeds received from Messrs. Loddiges and Co., in 1822. Flowers very large, white, in the evening becoming yellow, fragrant, April and May; fr. C. S. Branches rigid, ash-coloured, powdery; branchlets tern, conform; leaves at the end of the branchlets, tern or quatern, very short-petioled, from oblong to cuneate obovate, obtuse, undulate, firm, coriaceous, puberulous; (11-31inches, by \frac{1}{2} inch); flowers solitary and sessile at the ends of the branchlets, and at base surrounded with three, patent, elliptic, obtuse glabrous, equal small floral leaflets; calyx cylindric, rigid, (6 lines) 6 lineolate, puberulous, within adpressedly villous and glandularly dotted, at the mouth 6-8 toothed; the teeth rigid, laterally compressed, patent, obliquely ovate, sharply mucronate, (2 lines;) tube of the corol incurvedly erect, rigid, terete, thick fleshy, within 6 lineolate and villous, without obscurely 6-culcate and puberulous, from a narrowish base widening gradually till its mouth is 7 lines in diameter, very long, (3 inches); limb in 5-7 recurved, oblong, obtuse, fleshy, glabrous, equal lacinize (1-11 inch long, by 7-9 lines wide); filaments 6, pubescent, (1 line) inserted into the base of 6 oval foveolæ on the inside of the uppermost part of the corol-tube; anthers inserted by the middle of their back, erect, reaching to the mouth of the corol-tube; stigma clavate, at apex contortedly 6-lobulate, subexsert. Drupe oval, (21-3 inches, by 1-12 inch) at apex deeply umbilicated, externally ash-coloured,

- rugose and powdery, tough, thick, (6-8 lines) fibrous, ligneous, internally cream-coloured, glabrous, nitid, 5-costate. Seeds 00 immersed in a fleshy, viscid, yellowish substance, ovate, biconvex. (2-2\frac{1}{2} lines long.) Seems nearest allied to G. ternifolia, Thonn.
- 13. amoena, Sims. (B. M. 44, t. 1904;—B. Reg. 9, t. 785;—DC. pr.: 4, p. 382;—G. Don's Mill. dict. 3, p. 498.) 5 China. Fl. large, white, having the lobes crimson on the outside during sestivation, March and April.
- turgida, Roxb. (fl. ind. 1, p. 711; ed. Carey, 2, p. 557;—DC. pr. 4, p. 382;—G. Don's Mill. dict. 3, p. 498.)
   Bhootan. Fl. largish, white, fragrant, March and April; fr. 0.
- 15. campanulata, (fl. ind. 1, p. 710; ed. Carey, 2, p. 556;—DC. pr. 4, p. 383;—G. Don's Mill. dict. 3, p. 498.) 5 Chittagong. Fl. largish, white, pale yellowish in the evening, March and April; fr. Nov. The fruit is used by the natives as a cathartic and anthelmintic, and also to wash out stains in silk. (Rosb.)
- ? 16. densa, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 559;—DC. pr. 4, p. 383;—G. Don's Mill. dict. 3, p. 499.) 5 Sheopoor in Nepal. Fl. small, yellowish-white, fragrant. Has been introduced into H. C. G. Fl. ?
  - obtusifolia, Roxb. (H. B. p. 15.) 5 Pegu. Introduced into H. C. G. in 1809, but had not fl. up to 1814.

ORDER CLXXXII.—LYGODYSODEACEÆ, Bartl.—Lindl. Nat. Syst. p. 247.

Twining shrubs, of one genus, Lygodysodea, Ruiz. and Pav. and 2 species, one Peruvian, the other Mexican. Properties unknown.

<sup>\*</sup> Lygodysodea ciliata, Bartl. 5 - Mexico.

# ORDER CLXXXIII.—LONICERACEÆ (CAPRIFOLIACEÆ, Lindl. Nat. Syst. p. 247.)

#### THE HONEYSUCKLE TRIBE.

Herbs or shrubs, often twining, seldom arborescent, by Lindl. referred to 15 genera. Of these, DC. pr. enumerates 32 species from N. America; 15 from Europe; 14 from S. America, Mexico, and the W. Indies; 9 from Japan; 5 or more from China; 4 from Siberia; 3 from N. Holland and the South Sea Islands; 3 from Iberia; 2 from N. Africa; 2 from the Canaries; 1 from Abyssinia; 1 from Terra Nova; 1 from Dahuria; and 1 from Tartary. In the E. Indies have been discovered, according to DC., Wall. Cat. and Royl. ill., 62 species; viz., 1 of Triosteum; 25 of Lonicera; 1 of Leycesteria; 1 of Abelia; 1 of Aidia, (Lour.); 2 of Mastizia; 1 of Diacicarpium; 3 of Polyosma; 6 of Sambucus; and 22 of Viburnum; all natives of the Himalayas, the Khassya Mountains, the Neelgherries, the Mountains of Penang, Java and Cochin China, and several of them also common to China and Japan. The Elders and Honeysuckles are well known. Properties in general unimportant.

### ORDER CLXXXIV.—GALIACEÆ, Lindl. Nat. Syst. p. 249.

### THE MADDER TRIBE.

Herbs, by Lindl. referred to 7 genera, of these, DC. assigns 112 species to Europe; 43 to S. America, Mexico, and the W. Indies; 16 to N. America; 12 to the Levant; 10 to Tauria; 10 to S. Africa; 8 to Persia; 8 to N. Africa; 3 to Caucasus; 3 to Iberia; 3 to the Canaries; 2 to New Holland; 1 to Japan; 1 to Arabia; and 1 to Tartary. In the E. Indies have been discovered, according to DC., W. and A., Wall. Cat., and Royl. ill., 17 species, viz., 5 of Rubia; 1 of Asperula; and 11 of Galium, mostly natives of the Himalayas, the Khassya Mountains and Kunawur; two from Java, 1 from Dindygul-hills and 1 from Cochin China. Madder is the only product of the order.

- SHERARDIA, Dill. (DC. pr. 4, p. 581; -G. Don's Mill. dict. 3, p. 637.)
  - 1. arvensis, L. (DC. l. c.;—G. Don. l. c.;—E. B. 13, t. 891.) © Europe. Tauria. Fl. small, purplish-blue, Feb.; fr. March.

The E. Indian Compositæ are distributed among the following genera thus:—

thus:	<b></b>
	Vernonië.
Oiospermum ?	1. (Peninsula of India.)
Ethulia,	1. (Bengal, &c.)
Vernonia,	46. (Java. Neelgherries. Nepal, &c.)
Decaneurum,	11. (Java. Neelgherries. Dindygul. Khassya Mountains. Moluccas.)
Cyanopis,	3. (Java. Burma. Moluccas.)
Monosis,	1. (Neelgherries.)
Elephantopus,	1. (All India.)
- · ·	Eupatoriës.
Ageratum,	1. (Bengal, &c.)
	Colon Malanas Carles Dindaud Barrel
Adenostemma,	19. { (Java. Moluccas. Ceylon. Dindygui. Bengal. Khassya Mountains. Nepal.)
Pomatanion	(Nanal Khaseva Mountains Rurma Penang
Eupatorium,	9. (Nepai: Massya Mountains: Burma: Fenang.
Mikania,	2. (Java. Penang. Singapore. Nepal.)
Tussilago,	l. (Himalayas.)
· ·	Asteriëa.
Aster ?	1. (Neelgherries?)
Galatella,	1. (Himalayas.)
Calimeris,	1. (Mussooree.)
Callistephus,	2. (Dindygul.)
Diplopappus,	4. (Nepal. Kemaon.)
Leptocoma,	l. (Nepal.)
Fullartonia,	1. (Kemaon.)
Heterochæta,	3. (Himalayas.)
	(Alexa) December Medalahania (Tanian
Erigeron,	13. Bengal. (2 uncertain; Retz. and Lour.)
Rhynchospermum,	l. (Java.)
Stenactis,	2. (Nepal.)
Asteromæa,	1. (Java?)
Myriactis,	5. (Nepal. Java. Neelgherries.)
Microglossa,	1. (Java. Penang. Moluccas.)
Amphirrapis,	7. (Nepal. Khassya Mountains. Ceylon.)
Blepharispermum,	2. (Peninsula of India.)
Athroisma,	1. (Martaban, at Trogla.)
2200 000000,	(Java. Luçon. Penang. Travancore. Bengal.
Sphæranthus,	5. Khassya Mountains. Negapatam. 1 uncer-
-p	tain, Lour.)
Dicrocephala,	4. (Himalayas. Java.)
Grangea,	1. (Peninsula of India. Bengal, &c.)
Cyathocline,	2. (Nepal. Prome. Madras.)
Thespis,	2. (Khassya Mountains.)
* 1008 pts ,	e. (12Hassya Michilianis.)

3 F

Berthelotia,	1. (Banks of the Jumna.)
	(Nepal. Khassya Mountains. Oude. Hurdwar.
Conyza,	24. Martaban. Travancore. (9 uncertain. Lam.
	(Roxb.)
Blumea,	78. (All over the E. Indies.)
Pluchea,	6. (Luçon. Martaban. Mysore. Shrinagur.)
Epaltes,	5. (Peninsula of India, Prome.)
Inula,	12. (Himalayas. Khassya Mountains. Prome.)
Vicoa,	4. (Ceylon. Both Peninsulas of India.)
Francoeuria,	1. (Banks of the Ganges, in Behar.)
Pulicaria,	3. (Seringapatam. Patna. Himalayas.)
Cæsulia,	1. (Tanjore. Nepal.)
Buphthalmum?	1. (Cochin China. Lour.)
Eclipta,	4. { (Moluccas. Java. Peninsula of India. Bengal, &c.)
Blainvillea,	1. (Dindygul. Monghir.)
Siegesbeckia,	2. (Dindygul. Circars.)
? Placus,	2. (Cochin China. Lour.)
	Senecioniës.
Melampodium,	1. (Luçon.)
Xanthium,	2. (India. Java.)
Moonia,	1. (Ceylon.)
Wedelia,	2. (All over India.)
Wollastonia,	5. (Both Peninsulas of India. Khassya Moun-
Tr Ostationia,	tains. Java. Moluccas.)
Guizotia,	1. (Lower Bengal.)
Sclerocarpus,	1. (Mussooree.)
Helianthus ?	1. (Cochin China. Lour.)
Bidens,	5. (Coenn China, Lour.) gal.) (Nepal. Both Peninsulas of India, Java. Bengal.)
Verbesina?	1. (Cochin China. Lour.)
Spilanthes,	5. (Java. Martaban. Mysore. Moluccas. Bengal.)
Chrysanthellum,	l. (Sukanaghur.)
Neuractis,	1. (Java.)
Glossocardia,	1. (Madras. Carnatic.)
Glossogyne,	1. (Gorukpur.)
Enhydra,	4. (Cochin China, Java, Bengal, Assam.)
Porophyllum,	3. (Luçon. Nepal.)
Calea ?	1. (Cochin China. Lour.)
Achillea,	1. (Kemaon.)
Matricaria,	1. (Cashmere. Scarcely Indian.)
Pyrethrum,	2. (One all over India; the other from Cashmere.)
Chrysanthemum,	1. (Bengal.)
Artemisia,	28. { (Himalayas. Khassya Mountains. Prome. Moluccas. Cashmere. 3 uncertain.)

Chrysostephium,	l. (Luçon.)
Tanacetum,	5. (Himalayas.)
Myriogyne,	1. (Java. Peninsula of India. Bengal.)
Sphæromorphæa,	2. (Cochin China. Peninsula of India.)
Machlis,	1. (Nepal. Khassya Mountains. Bengal.)
Helichrysum,	4. (Shrinagur. Neelgherries. Ceylon. Cochin China. 2 uncertain.)
Gnaphalium,	9. (Himalayas. Khassya Mountains. Hurdwar. Neelgherries. Java. Bengal. Cochin China. 1 uncertain.)
Filago,	1. (Negapatam. Patna.)
Antennaria,	7. (Himalayas. Java.)
Anaphalis,	21. { (Himalayas. Khassya Mountains. Neelgherries. Ceylon. Java.
Leontopodium,	1. (Himalayas.)
Carpesium,	7. (Himalayas. 1 from Travancore.)
	(Himalayas. Khassya Mountains. Peninsula
Gynura,	17. of India, Irrawaddy, Java, Moluccas, 1 uncertain.)
Emilia,	5. (Khassya Mountains. Bengal. Peninsula of India. Philippines.)
Ligularia,	7. (Himalayas.)
Doronicum,	7. { (Himalayas. Khassya Mountains, Neelgher- ries. Travançore. Ceylon.)
Cacalia ?	l. (Java.)
Senecio,	46. (Himalayas. Kunawur. Cashmere. Khassya Mountains. Neelgherries. Ceylon. Taong-
	Dong. Java. Madras. 1 uncertain.)
Madaractis,	4. (Peninsula of India.)
Notonia,	3. (Neelgherries. Travancore. Dindygul. Ava.)
	Cynarë <i>æ.</i>
Echinops,	3. (Himalayas. Benares. Mysore.)
Saussurea,	2. (Himalayas.)
Aplotaxis,	21. { (Himalayas. Khassya Mountains. l from Lower Bengal.)
Dolomiæa,	1. (Himalayas.)
Amberboa,	4. (Two from the Himalayas. 2 from the Peninsula of India.)
Microlonchus,	1. (Himalayas.)
Tricholepis,	5. (Himalayas. Mysore. Travancore. Bombay.)
-	(One cultivated in Indian gardens; the other
Centaurea,	2. ( Lour.)
Kentrophyllum,	1. (Banks of the Jumna.)
Onobroma,	1. (West of India.)
•	

Carthamus,	1. (Moluccas, &c.)
Carduus,	1. (Choor.)
Cirsium,	6. (Himalayas. Neelgherries. 1 uncertain.)
Lappa,	1. (Himalayas.)
Echenais,	1. (Himalayas.)
9	3. (Two from the Himalayas, 1 from Cochin
Serratula,	China, 2 of these uncertain.)
Jurinea ?	1. (Himalayas.)
	Mutisiëæ.
Ainsliëa,	2. (Himalayas.)
Gerbera,	1. (Himalayas.)
Oreoseris,	3. (Himalayas.)
Berniera,	1. (Himalayas.)
Leucomeris,	2. (Himalayas.)
Dicoma	l. (Madras. Yenangheun.)
	CICHORIES.
Cichorium,	1. (Himalayas. Patna.)
Tragopogon,	1. (Himalayas.)
Scorzonera,	3. (Himalayas.)
Picris	2. (Himalayas.)
	(/Vimelance Wheen Manutaine Maslahar
Lactuca,	ries. Negapatam. Java.)
Chondrilla ?	1. (Himalayas.)
Taraxacum,	3. (Himalayas. Oude.)
Ixeris,	2. (Himalayas.)
Barkhausia,	2. (Himalayas.)
Brachyramphus,	3. (N. India. Peninsula of India.)
Microrrhynchus,	3. (Coromandel. Bengal. Oude. Kemaon.)
Sonchus,	· · · · · · · · · · · · · · · · · · ·
50%C/A45,	
Youngia,	8. (Himalayas. Silhet. Bengal. Peninsula of India. Java. 2 uncertain.)
Description	,
Prenanthes,	7. (Himalayas. Java. 1 uncertain.)
Hieracium,	2. (Himalayas. Khassya Mountains. 1 uncertain.)
Dubya,	1. (Himalayas.)
Mulgedium,	7. (Himalayas.)
It we add to these E	Indian Composite the following species: Eups-

If we add to these E. Indian Composits the following species: Eupstorium divergens, Roxb. (Mysore); Verbesina scandens, Roxb. (Bengal);
Gnaphalium albo-luteum, Roxb. (Bhootan); Senecio moluccanus, Roxb.
(Moluccas); Chrysanthemum cuneatum, Roxb. (Moluccas); Cardinus ramosus, Roxb.; Apargia Hamones, Buch, (Nepal); and Prenanthes linifolia, Roxb. (Bengal); their exact number will be 655.

Few of the E. Indian plants of this order are possessed of properties of much medical or dietetical importance. Whatever little is remarkable will be adverted to under the species.

ORDER CLXXXVII.—DIPSACEÆ, Juss.—Lindl. Nat. Syst. p. 264.

#### THE SCABIOUS TRIBE.

Herbs or undershrubs, by Lindl. referred to 7 genera. Of these, DC. pr. enumerates 59 species from Europe; 11 from the Orient; 8 from S. Africa or 10 (Harvey); 7 from Dahuria, Tauria, and Caucasus; 6 from N. Africa; 4 from Siberia; 3 from the Azores and Canaries; 2 from Persia; and 1 from Arabia. In the E. Indies have been found, according to DC. Wall. Cat. and Royl. ill. 16 species; viz. 7 of Dipsacus; 4 of Scabiosa; and 5 of Morina;—one of these from the Neelgherries, one from Cochin China, (uncertain,) one from Taong-Dong, one from the Khassya Mountains, and the rest from the Himalayas. Properties unimportant,

ORDER CLXXXVIII.—VALERIANACEÆ, Lindl. Nat. Syst. p. 265.

#### THE VALERIAN TRIBR.

Herbs, by DC. pr. referred to 11 genera. Of these according to the same author, 53 species belong to S. America, Mexico, and the W. Indies; 41 to Europe; 6 to N. America; 6 to Iberia, Dahuria, Tauria, and Caucasus; 3 to the Levant; 3 to Siberia; 2 to the Straits of Magellan; 1 to Falkland Islands; 1 to N. Africa; 1 to S. Africa; and 1 to Japan. In the E. Indies, according to DC. and Royl. ill. have been discovered 16 species; viz. 2 of Nardostachys; 13 of Valeriana; and 1 of Triplostegia;—of which

3 are from the Mountains of the Peninsula of India, and the rest from the Himalayas and Khassya Mountains.

The roots of several species of Valeriana (officinalis, celtica, Phu, &c.) have a bitter taste and an offensive penetrating smell. They (specially V. officinalis, L.) increase in a high degree the action of several organs, and are upon the whole a very powerful remedy against nervousness, spasms and worms. "The young leaves of the species of Valerianella are eaten as salad under the French name of Mache, or the English one of Lamb's Lettuce. Red Valerian is also eaten in the same way in Sicily." (Lindl.)

- NARDOSTACHYS, DC. (pr. 4, p. 624.—G. Don's Mill. dict. 3, p. 666.)
  - 1. Jatamansi, DC. (l. c.;—G. Don. o. c. p. 667;—Royl. ill. t. 54.—Valeriana Jatamansi, W. Jones;—Roxb. fl. ind. 1. p. 163; ed. Carey, 1, p. 166.—V. Spica, Vahl.—Patrinia Jatamansi, D. ORDER CLXXXIX.—BRUNONIACEÆ, Lindl. Nat. Syst. p. 266.

Herbs, referred by Lindl. to one genus, with 2 species, both natives of N. Holland. Properties unknown.

\* Brunonia sericea, Sm. 4. Tropical New Holland.

ORDER CXC.—PLANTAGINACEÆ, Lindl. Nat. Syst. p. 267.

#### THE RIB GRASS TRIBE.

Herbs, by Lindl. referred to 2 genera. Of these, 38 species have, according to Spreng. syst. been discovered in Europe; 20 in S. America, and Mexico; 7 in N. America; 6 in N. Africa; 5 in S. Africa; 4 in Siberia; 4 in N. Holland and the South Sea Islands; 3 in Caucasus and Tauria; 3 in the Canaries; 2 in the Levant; 1 in Patagonia; 1 in Terra del Fuego; and 1 in the Straits of Magellan. About 5 species have been found in the Himalayas, Khassya Mountains, Neelgherries, Philippines, and Cochin China; all belonging to *Plantago*. Properties alightly bitter and astringent; the seeds covered with mucus.

- PLANTAGO, L. (Spreng. syst. 1, p. 369, No 456;—R. Br. pr. fl. Nov. Holl. 1, p. 280.) Plantain.
  - major, L. (Spreng. syst. 1, p. 433;—E. B. 22, t. 1558.—Rosb. H. B. p. 10.)
     Europe. Fl. small, white, R. S.; fr. C. S.

- asiatica, L. (P. erosa, Wall. Roxb. fl. ind.; ed. Carey, 1, p. 423.)
   Khassya Mountains. Nepal. Fl. small, whitish, and fr. C. S.
- media, L. (Spreng. syst. 1, p. 434;—E. B. 22, t. 1559.)
   minute, whitish, with a tinge of red, C. S.
- 4. virginica, L. (Spreng. syst. 1, p. 434;—Moris. hist. 3, s. 8, t. 15, f. 8;—Rosb. H. B. p. 10.) ⊙ Virginia. Fl. small, greenish-white, R. S.
- lanceolata, L. (Spreng. syst. 1, p. 434;—E. B. 8. t. 507;—Rosb. H. B. p. 10.
   Europe. Himalayas.) Fl. small, pale reddish-greenish, R. S.; fr. C. S.
- Lagopus, L. (Spreng. syst. 1, p. 435;—Moris. hist. 3. s. 8, t. 16, f. 13.—Rosb. H. B. p. 10.) ⊙ S. France. Spain. Fl. greenish-white, Feb.; fr. H. S.
- maritima, L. (Spreng. syst. 1, p. 436;—E. B. 3, t. 175.)
   Sea coasts of Europe. Fl. small, greenish-red, C. S.
- 8. Coronopus, L. (Spreng. syst. 1, p. 439;—E. B. 13, t. 892.) © Europe. Barbary. Fl. minute, whitish-green, R. S.; fr. C. S.
- 9. amplexicaulis, Cav. (Spreng. syst. 1, p. 439;—Cav. ic. t. 25.) ⊙ Spain, Fl. small, greenish-white, March; fr. April.

- 13. stricta, Schousb. (Moroc. 1, p. 69, ic. 145;—Spreng. syst. 1, p. 440;
  —Roxb. H. B. p. 11.) ⊙ Mogadore. Fl. small, greenish-white, C. S.; fr. Feb. and March.
- 14. Ispaghula, Roxb. (fl. ind. 1, p. 404; ed. Carey 1, p. 421;—Spreng. syst. 1, p. 440.) 黃河歌黃明 Issufgool. © Persia. Cultivated in India. Fl. small, whitish, and fr. C. S. Seeds of a very cooling nature, and, like those of Plantago Psyllium, L., forming with boiling water, a rich mucilage, which is much used in India in catarrh, blennorrhoea, and affections of the kidnies. They are also deservedly recommended in chronic diarrhoea, two tea-spoonsful of them being given twice a day with a little powdered sugar-candy. (Ainslie. Twining).
- 15. pumila, L. (Spreng. syst. 1, p. 440.—P. exigua, Murr. comm. gött. 1778, p. 94, t. 5.) ⊙ S. Europe. Fl. small, whitish, C. S.; fr. March.
  - \* Plantago mexicana, Lk. 4. Mexico.—P. brasiliensis, Sims.; B. M. 53, t. 2616. 4. Brazil.—P. Serraria, L. 4. Barbary.—P. Gouani, Gmel. 4. S. Europe.

ORDER CXCI.—GLOBULARIACEÆ, Lindl Nat. Syst. p. 268.

Shrubs, undershrubs, or perennial herbs, constituting but one genus. Of these, Spreng. syst. assigns 9 species to Europe; 1 to Asia Minor; and 1 to the E. Indies. With the latter, (Globularia bisnagarica, L.; according to Spreng.) we are not acquainted. "Properties, bitter, tonic, and purgative." (Lindl.)

\* Globularia vulgaris, L. 4. B. M. 48, t. 2256. S. Europe.—G. bellidifolia. Ten. 4. Italy.

## ORDER CXCII.—SALVADORACEÆ, Lindl. Nat. Syst. p. 269.

Shrubs, or small trees, of one genus, and 3 species; one from Arabia, Persia, and the Peninsula of India; and two from Cochin China, according to Lour. "Fruit eatable." (Lindl.)

\* Salvadora persica, L. Roxb. Corom. 1, t. 26. 5 Circars, near the sea.
Both Concans.

#### ORDER CXCIII.—PLUMBAGINACEÆ, Lindl. Nat. Syst. p. 269.

#### THE LEADWORT TRIBE.

Herbs, undershrubs, or shrubs, by Lindl. referred to 6 genera. Of these, Spreng. syst. enumerates 36 species for Europe; 10 for 8. Africa; 7 for N. Africa; 7 for Siberia; 7 for Tauria and Caucasus; 5 for S. America; 3 for the Canaries; 2 for the Levant; 2 for New Holland; and 1 for Arabia. In the E. Indies have been found 3 species of *Plumbago*; (Ceylon, Moluccas, both Peninsulas of India, Bengal;) and 1 of *Ægialitis*, (Soonderbuns, Amherst.)

- "This order contains plants of very opposite qualities; part are tonic and astringent, and part acrid and caustic in the highest degree." (Lindl.) Plumbago, L. (Spreng. syst. 1, p. 501, No. 573;—R. Br. pr. fl. Nov. Holl. 1, p. 425.)
  - 1. zeylanica, L. (Spreng. syst. 1, p. 537;—R. Br. o. c. p. 426;—Rosb. fl. ind. 1, p. 463; ed. Carey, 2, p. 38;—J. Grob. Cat. B. pl. p. 166;—Rheed. 10, t. 8.) For Chita. 5 Ceylon. Segaen. Prome. Penang. Rangoon. Courtallum. Malabar hill, Bombay. Hills throughout the Concans. Guzerat. Bengal, (Serampore.) Kutmandu. New Holland. Fl. middle-sized, pure white, R. and C. S.; fr. H. S. The fresh bruised bark of the root is sometimes applied for raising blisters. (Ainslie.)

- 2. rosea, L. (Spreng. syst. 1, p. 537;—B. M. 7, t. 230;—Roxb. fl. ind. 1, p. 463; ed. Carey, 2, p. 38;—J. Grah. Cat. B. pl. p. 166;—Rheed. 12, t. 9;—Rumph. 5, t. 168.) IF Toll Rukto-chita. 5 Moluccas. Both Peninsulas of India, Common in gardens. Fl. middle-sized, bright red, R. and C. S.; fr. H. S.
- capensis, Thunb. (Spreng. syst. 1, p. 537;—B. Reg. 5, t. 417;—B.
   M. 47, t. 2110;—J. Grah. Cat. B. pl. p. 166.)
   C. G. H. Fl. large, pale blue, more or less the whole year; fr. 0.

ORDER CXCV.—CORDIACEÆ, Link.—Lindl. Nat. Syst. p. 272.

Trees or shrubs, sometimes climbing, by Lindl. referred to 4 genera. Of these Spreng. syst. enumerates 61 species for S. America, Mexico, and the

W. Indies; 2 for New Holland; 1 for Patagonia; 1 for China; and 1 for Senegal. In the E. Indies have been discovered, according to Spreng. syst. Wall. Cat. and Royl. ill. 25 species; viz. 14 or 15 of Cordia; 1 of Cordiopsis; and 9 of Erycibe;—all natives of the Himalayas, the Khassya Mountains, both Peninsulas of India, and the Moluccas. Properties under the species.

CORDIA, L. (R. Br. pr. fl. Nov. Holl. 1, p. 498;—G. Don's Mill. dict. 4, p. 874.)

- 1. orientalis, R. Br. (pr. l. c. (1810.)—C. campanulata, Roxb. H. B. p. 17; fl. ind. 1, p. 593; ed. Carey, 2, p. 336;—Rumph. 2, t. 75.) 5 Moluccas. Tropical New Holland. Fl. largish, reddish-orange. Introduced into H. C. G. in 1839, but had not fl. up to 1814.—R. Brown's specific character of this tree is "(calyx 5-raro 4-dentatus) foliis ovatis, subacuminatis, lævibus, integris; calycibus glabris, exsulcis; drupå incluså." As he quotes as a synonym Rumph. 2, t. 75, with an! there can be no doubt of the correctness of the quotations, although the panicles in the plate quoted, and according to Roxb., are lateral, not terminal.—The calyx in Rumphius's plate is more than 3 dentate, and, adds R. Br., glabrous. His C. orientalis, and Rumph. 2, t. 75, can, therefore, be referred neither to C. Rumphii, Bl., nor to C. subcordata, Lam., the calvx being, in the former tomentose within, and, in both, 3-dentate, not to speak of the pubescence of the leaves underneath.—G. Don's C. subcordata, in Mill. dict. 4, p. 375, is a compound of Lamark's name, and Roxburgh's character of C. campanulata.
- Sebestena, L. (G. Don's Mill. dict. 4, p. 375;—Jacq. amer. 42, ed. 2, t. 44;—B. Repos. 2, t. 157;—B. M. 21, t. 794;—Lam. ill. t. 96, f. 1;—Roxb. fl. ind. 1, p. 593; ed. Carey, 2, p. 336, under C. campanulata.)
   W. Indies. Fl. large, orange scarlet, R. S.; fr. 0. A small piece of the wood of this species put on a pan of lighted coals will perfume the whole house with a most agreeable smell. (G. Don. l. c.)
- 3. latifolia, Roxb. (f. ind. 1, p. 589; ed. Carey, 2, p. 330;—G. Don's Mill. dict. 4, p. 378; not Wall. ibid. p. 375;—J. Grah. Cat. B. pl. p. 136.) IN INDICATE. Buro-buhocari. 5 Hindoosthan. Silhet. Common throughout Guzerat. Fl. small, white, C. S.; fr. June and July. The fruit, (Larger Sepistens, or Sebestens, Roxb. Colebr.) while young and tender, is pickled, and is also eaten as a vegetable by the natives. (Vaupell.)
- Myga, L. (G. Don's Mill. dict. 4, p. 379;—Roxb. fl. ind. 1, p. 590;

## ORDER CXCVI.—BORAGINACEÆ, Lindl. Nat. Syst. p. 272.

#### THE BORAGE TRIBE.

Herbaceous plants, seldomer shrubs or trees, by Lindl. including his Ehretiaceæ, referred to 49 genera. Of these Spreng. syst. enumerates about 120 for S. America, Mexico and the W. Indies; 114 for Europe; for N. Africa 35; for Dahuria, Iberia, Tauria and the Caucasus 26; for the Levant 24; for New Holland and the South Sea Islands 24; for Siberia 22; for N. America 20; for the Canaries and Madeira 14; for the Mascarenhas Islands 5; for Persia 5; for Arabia 2; for Guinea 1; for China 1, and for Japan 1. In S. Africa have been discovered 60 species, (Harvey,) and in the E. Indies, according to Spreng. syst., Wall. Cat., Royl. ill. and B. Reg. 99; viz. 1 of Coldenia; 2 of Tiaridium; 14 of Heliotropium; 4 of Lithospermum; 5 of Echinospermum; 1 of Messerschmidia; 1 of Echium; 7 of Onosma; 1 of Anchusa; 15 of Myosotis; 17 of Cynoglossum; 5 of Trichodesma; 7 of Tournefortia, and 19 of Ehretia. The principal stations of these are Cashmere, the Himalayas, Kunawur, the Khassya Mountains, both Peninsulas of India and Bengal. A few are from Ceylon, Java and the Philippines.

"Soft, mucilaginous, emollient properties are the usual characteristics of this order. Some are also said to contain nitre, a proof of which is shewn by their frequent decrepitation when thrown on the fire." (Lindl.)

# A. Bobagem, Benth. (In Royle's ill. p. 305.)

Borago, Tournef. (G. Don's Mill. dict. 4, p. 309.)

1. efficinalis, L. (G. Don. l. c.; — E. B. 1, t. 36.) Common Borage. of Said to be a native of the Levant, but now naturalized in most parts of Europe, growing on dung-hills and heaps of rubbish. Fl. largish, pale-blue, or purple, C. S.

# ORDER CXCVII.—LAMIACEÆ, Lindl. Nat. Syst. p. 275.— (LABIATÆ, Juss.)

#### THE MINT TRIBE.

Herbs or undershrubs, seldomer shrubs, by Bentham, (Gen. and Spec. Labiatarum 1832-1836,) arranged under 110 genera, in 11 sections. To this work we must refer for the distribution of the order, only adding that the number of E. Indian species, amounts to 299; viz. 80 of Ocimeæ; 38 of Mentheæ; 8 of Monardeæ; 4 of Satureïeæ; 7 of Melisseæ; 12 of Scutellariëæ; 0 of Prostanthereæ; 25 of Nepeteæ; 93 of Stachyëæ; 14 of Prasiëæ; and 18 of Ajugeæ. Many of these have been found in the plains, but the bulk of them consists of Mountain plants, especially from the Northern Provinces.

"Tonic, cordial, and stomachic qualities, due to the presence of an aromatic volatile oil and a bitter principle, are the universal features of Labiatæ, which do not contain a single unwholesome or even suspicious species." (Lindl.)

# A. OCIMER.

ORDER CXCVIII.—VERBENACEÆ, Juss.—Lindl. Nat. Syst. p. 277.

#### THE VERVAIN TRIBE.

Trees or shrubs, sometimes herbs, by Lindl. referred to 52 genera. Of these, Spreng. syst. assigns 180 species to S. America, Mexico, and the W. Indies; 26 to N. Holland and the South Sea Islands; 16 to N. America; 10 to China; 4 to Europe; 3 to Guinea; 3 to Japan; 2 to the Mascarenhas Islands; 2 to Arabia; and 1 to the Falkland Islands. In S. Africa have been discovered about 7 species; (Harvey,) and in the E. Indies, according to Spreng. syst., Wall. Cat., and Royl. ill. 153, viz. 40 of Clerodendron; 1 of Ægiphyla? 14 of Callicarpa; 36 of Premna; 26 of Vitex; 8 of Congea; 1 of Symphorema; 8 of Gmelina; 2 of Tectona; 1 of Phryma; 1 of Streptium; 3 of Verbena; 1 of Stachytarpheta? 2 of Zapania; 5 of Lantana; 1 of Asaphes; 1 of Glossocarya; 1 of Hymenopyramis; and 1 of Avicennia. Most of these are natives of Nepal, Kemaon, the Khassya Mountains, Assam and both Peninsulas of India. Many have

also been found in the Moluccas, Java, Ceylon and the Philippines. We are unacquainted with *Peronema*, Jack. and *Geunsia*, Bl.

Excepting the Teak-tree, the order is not of much importance either in a medicinal or economical point of view.

- GMELINA, L. (Spreng. syst. 2, p. 679, No. 2131.)
  - 1. arborea, Roxb. (Corom. pl. 3, t. 246;—fl. ind. 3, p. 84;—J. Grah. Cat. B. pl. p. 158;—Spreng. syst. 2, p. 765;—Rheed. 1, t. 41.) All Gumbharee. L. 5 Coromandel. Neelgherry. Concans. Bombay Island. Prome. Trogla River. Saluen. Taong-Dong. Gorukpore. Sukanaghur. Oude, &c. Fl. large, sulphur-coloured, slightly tinged with reddish on the outside of the tube, H. S.; fr. C. S. Timber very strong and durable, resisting the influence of water and worms better than teak. (Roxb.)? Roxburgh could not be sure, whether the wood, which he subjected to his experiments, really belonged to this tree. Indeed, he only says, "I conceived it to be this wood." The light wood of this tree is used by the natives of Hindoosthan for making the cylinders of the drums called Dholucks; (Asiat. Res. 6, p. 366,) also for making carriage pannels, as it combines lightness with strength. (Dr. Gibson.)
  - villosa, Roxb. (f. ind. 3, p. 86;—Rumph. 2, t. 39.)

## ORDER CXCIX.-MYOPORACEÆ, Lindl. Nat. Syst. p. 279.

Shrubs, by Lindl., excluding Avicennia, referred to 5 genera, with 21 species, of which 20 are natives of New Holland, and 1 (Bontia) of the W. Indies. "Properties unknown." (Lindl.)

MYOPORUM, Banks. (Spreng. syst. 2, p. 679, No. 2138; -R. Br. pr. p. 515.)

- 1. acuminatum, R. Br. (Spreng. syst. 2, p. 766;—R. Br. l. c.) 5 New Holland, near Port Jackson. Fl. smallish, white, at the bottom purple stained, Feb. and March; fr. 0.
- debile, R. Br. (Spreng. syst. 2, p. 766;—R. Br. pr. p. 516;—B. M. 43.
   1830.—Pogonia (not R. Br.) debilis, Andr. B. Repos. t. 212.)
   N. Holland, near Port Jackson. Fl. smallish, pale rose-coloured with a tinge of purple, more or less the whole year.
- \* Myoporum ellipticum, R. Br. 5 Tropical N. Holland.—M. tenuifolium, R. Br. 5 Tropical New Holland.—Bontia daphnoides, L. 5 W. Indies.

ORDER CC —SELAGINACEÆ, Lindl. Nat. Syst. p. 279.

Herbs or small shrubs, referred by Harvey to 7 genera, containing numerous species, all natives of S. Africa. "Properties unknown." (*Lindl.*) HEBENSTREITIA, *L.*, (*Spreng. syst.* 2, p. 678, No. 2113.)

- 1. fruticosa, Thunb. (Spreng. syst. 2, p. 754;—B. M. 45, t. 1970.) 5 C. G. H. Fl. small, white, C. S.; but very rare; fr. 0.
  - \* H. dentata, L. B. M. 14, t. 483. 5 C. G. H.

ORDER CCI.—PEDALIACEÆ, Lindl. Nat. Syst. p. 281.

### THE OIL-SEED TRIBE.

Herbs, by Lindl. referred to 10 genera, of which Spreng. syst. only enumerates 5 for S. America, Mexico and W. Indies; 2 for New Holland, and 1 for E. Africa. In S. Africa have been found 3 species (*Harvey*); and in the E. Indies as many; viz. I of *Pedalium*; and 2 of *Sesamum*. Properties under the species.

MARTYNIA, Houst. (G. Don's Mill. dict. 4, p. 234.)

diandra, Glox. (G. Don. o. c. p. 235;—B. Repos. 9, t. 575;—B. Reg. 23, t. 2001;—Rosb. H. B. p. 45;—J. Grah. Cat. B. pl. p. 127.—excl. syn. Gärtn. B. M. and G. Don.—M. angulosa, Lam.) ⊙ Mexico. Fl. 2 inches, white-pale rose-coloured, stained with orange below on the inside, and stained on the limb above with 5 central dark purple spots, and fr. R. S. Domesticated about Serampore.

PRDALIUM, L. (G. Don's Mill. dict. 4, p. 235.)

1. Mures, L. (G. Don. o. c. p. 236;—Roxb. fl. ind. 3, p. 114;—J. Grah. Cat. B. pl. p. 127;—Gärtn. fr. 1, p. 276, t. 58, f. 1;—Rheed. 10, t. 72;—Burm. ind. t. 45, f. 2.) © Sea-shores of the Coromandel Coast. At Bombay, in compounds on the Esplanade, near the Marine Lines. Ceylon. Fl. largish, yellow, and fr. R. and C. S. The fresh leaves have the property of thickening water, and rendering it mucilaginous. (J. Grah.)

Smamum, L. (G. Don's Mill. dict. 4, p. 234.)

- 1. indicum, L. (G. Don. l. c.;—B. M. 41, t. 1688;—Endl. ichnogr. t. 70.—S. orientale, L.;—G. Don. l. c.;—Gärtn. fr. 2, p. 132, t. 110, f. 2;—Rozb. fl. ind. 3, p. 100.—S. trifoliatum, Mill. dict. No. 3.—S. luteum, Retz.—S. laciniatum, Willd.;—Rheed. 9, t. 54, 55;—Rumph. 5, t. 76, f. 1;—Burm. zeyl. t. 38, f. 1.) The Til. O All over India. Cultivated in Egypt, S. America, W. Indies, the Levant, &c. Fl. largish, white rose-coloured, H. S.; fr. R. S. Leaves emollient. Seeds contain a fixed oil, as tasteless as Olive oil.
  - β. majus 李棽 で Krishno-til. Of a larger size. Fl. deeper rose-co-loured.

ORDER CCII.—BIGNONIACEÆ, R. Br.—Lindl. Nat. Syst. p. 282.

#### THE TRUMPET-FLOWER TRIBE.

Trees or shrubs, often twining or climbing, by Lindl. referred to 31 genera. Of these, Spreng. syst. enumerates 106 species for S. America, Mexico and the W. Indies; 3 for N. America; 3 for Madagascar; 3 for N. Holland; 2 for Guinea; 1 for Senegal; and 1 for China. In S. Africa have been found 4 species; (Harvey,) and in the E. Indies, according to Spreng. syst. Wall. Cat., about 27; viz. 17 of Bignonia; (both Peninsulas of India, Assam, Morung, Banks of the Jumna, Moluccas), 6 of Spathodea,

(Peninsula of India, One from Pegu); 1 of Calosanthes; (Coromandel, The Concans, Cochin China); 1 of Schrebera; (Circars); 1 of Trigonocarpus; (Amherst, Chappedong); and 1 of Wightia. (Nepal). Wall. Cat., B. M., and B. Reg.; add 2 species for Mauritius; 1 for Madagascar; and 1 for New Holland. "Plants of this order little known, except for the great beauty of the flowers." (Lindl.)
Colea, (Bojer.)

1. mauritiana, Boj. (B. Colei. B. M. 55, 2817.) Madagascar. BIGNONIA, Tournef. (G. Don's. Mill. dict. 4, p. 214.)

- 1. undulata, Roxb. (fl. ind. 3, p. 101;—J. Grah, Cat. B. pl. p. 124.—
  Tecoma undulata, G. Den's Mill. diet. 4, p. 223.) 5 Banks of the
  Jumna and Chumbul. Cawnpore. Abundant in one locality about
  Kandesh, Guzerat. Fl. large, orange-coloured, scentless, Feb. and
  March; fr. June and July.
- capreolata, L. (G. Don's Mill. dict. 4, p. 217;—B. M. 22, t. 864.)
   Virginia. Carolina. Fl. largish, externally red, internally sulphur-red, scentless; March.
- 3. equinoctialis, L. (G. Don. l. c.) 5 Cayenne. Introduced in 1840.
- crucigers, L. (G. Don's Mill. dict. 4, p. 217;—Roxb. H. B. p. 47.)
   Virginia. Mexico. Fl. largish, yellow, whitish beneath. Has not fl. here, though cultivated for many years.
- 5. suaveolens, Roxb. (fl. ind. 3, p. 104;—J. Grah. Cat. B. pl. p. 125.—
  Tecoma suaveolens, G. Don's Mill. dict. 4, p. 224.) The Patules Parool. 5 Deccan. Bengal. Sukanaghur. Gorukpur. Kheree Jungle. Fl. large, dark dull crimson, fragrant, H. S.; fr. C. S.
- 6. chelonoïdes, L. (Roxb. fl. ind. 3, p. 106;—J. Grah. Cat. B. pl. p. 125, excl. syn. G. Don.—Rheed. 6, t. 26.) L. 5 Coromandel. Elephanta. Lanowlee grove, near Kandalla. Jungles in a ravine, near Parr. The Ghauts. Silhet. Assam. Fl. largish, dull yellowish, tinged with brown and orange, May, June and July; fr. Dec. and January.
- multijuga, Wall. (pl. as. rar. 1, t. 95, 96;—G. Don's Mill. dict. 4, p. 221.)
   Silhet. Penang. Fl. very large, greenish-pale, sulphur-coloured, more or less tinged with dark purple, Feb. and March; fr. C. S.
- adenophylla, Wall. (G. Don's Mill. dict. 4, p. 221.)
   Banks of the Irawaddi. Taong-Dong. Ava. Prome. Has been cultivated here for many years, without fl.
- amoena, Wall. (pl. as. rar. 2, t. 183;—G. Don's Mill. dict. 4, p. 222.)
   Mauritius. Fl. large, pale rose-coloured, at the throat inside orange, fragrant, H. S.; fr. C. S.
- ? 10. subcrosa, Roxb. (fl. ind. 3, p. 111;—J. Grah. Cat. B. pl. p. 126.—Millingtonia hortensis, L. fil.;—G. Don's Mill. dict. 4, p. 229;—Roxb. Corom. 3, t. 214.) L. 5 Tanjore. Segaen. Between Ava and Taong Dong. Fl. large, pure white, fragrant, C. S.; fr. March.

- 11. xylocarpa, Roxb. (fl. ind. 3, p. 108;—J. Grah. Cat. B. pl. p. 125.—Tecoma xylocarpa, G. Don's Mill. dict. 4, p. 225.) 5 Neelgherries. Tull Ghaut. Jowar Jungles. Hills about Nagotnah, and on Parr Ghaut. Jungles about Rutnaguiree. Abundant in the Jungles about Daung in Kandesh. Fl. large, white, tinged with yellow, fragrant, March and April; fr. Feb. and March. Tender fruit edible. (Nimmo.)
- 12. fimbriata, Wall. Moulmein.
- 13 cauliflora, Burke. (Maurit. Cat.) 5 Madagascar, R. S. 1840.
- venusta, Ker. (B. Reg. 3, 249.—B. M. 46, 2050.)
   Brazil.
   C. S. 39.
- 15. gracilis, B. Cab. (18, 1705,) S. Amer. C. S. 39.
- 16. viridiflora, B. Cab. (11, 1026.)
- 17. echinata, Jacq. (amer. p. 183, t. 176, f. 52,) C. S. 1840.
- SPATHODEA, Beauv. (G. Don's. Mill. dict. 4, p. 222.)
  - 1. uncinata, Spreng. (syst. 2, p. 835.—Bignonia uncinata, Meyer; —G. Don's Mill. dict. 4, p. 216.) 5 Essequebo. Fl. largish, dull-red, Oct.; fr. 0.
  - Rheedii, Spreng. (S. longifolia, Vent. ex Lam.—B. spathacea, L. fil. suppl. not Roxb. Corom. 2, 24, t. 144.—fl. ind. 3, t. 103, quo teste. B. falcata, Kön. MSS.) H. S.; fr. C. S.
- J. Rozburghii, Spreng. (G. Don's Mill. dict. 4, p. 223.—Bignonia quadrilocularis, Rozb. Corom. 2, t. 145; fl. ind. 3, p. 107;—J. Grah. Cat. B. pl. p. 125.) L. 5 Circar Mountains. Malabar Hill. Bombay. Elephanta. The Ghauts. Very common in Paddashapore Jungles, in South Mahratta Country. Kandesh. Fl. large, rose-coloured, fragrant, Feb. and March. Wood employed for many purposes by the natives. (Rozb.)
  - crispa, Wall. (Cat.—G. Don's Mill. dict. 4, p. 222.—S. atrovirens, Spreng.—Bignonia crispa, Rosb. fl. ind. 3, p. 103;—J. Grah. Cat. B. pl. p. 125.—B. atrovirens, Roth.) 5 Mysore. Duddi on the Gutpurba. Fl. large, pure white, fragrant, opening in the evening, falling the next morning, May and June; fr. Dec.
  - 5. stipulata, Wall. (pl. as. rar. 3, t. 238;—G. Don's Mill. dict. 4, p. 223.—Bignonia stipulata, Roxb. fl. ind. 3, p. 108.) L. 5 Pegu. Fl. large, sulphur-coloured, of an unpleasant smell, Feb.; fr. April.
  - 6. serrulata, Wall. Irawaddi. In H. C. G. Fl.?
  - TECOMA, Juss. (G. Don's Mill. Dict. 4. p. 223.)
    - australis, R. Br. (G. D. l. c.—Bignonia pandorea, Vent. malm. t. 43.
       —B. pandorana, B. Repos. t. 86.—B. Pandoræ, Ker. in. recens. bot. repos. 97.—B. M. 22, t. 865.) 5 ∪ Trop. N. Holland. Fl. largish, white pale-rose, with a dark purple throat. Introduced in 1841.
    - 2. jasminoides, G. Don. (Mill. dict. 4, p. 235;—Lindl. B. Reg. 23, p. 2002.—Bignonia jasminoides, Cunningh.) 5 . N. Holland. Fl. large, white rose-coloured, March and April; fr. 0.

- 3. capensis, Lindl. (B. Reg. 18, t. 1117;—G. Don's Mill. dict. l. c.—Bignonia capensis, Thunb.) Fl. large, orange scarlet. Has been introduced into H. C. G. Fl.?
- 4 grandistora, Swt. (G. Don. l. c.—Bignonia grandistora, Thunb.;—Rosb. fl. ind. 3, p. 105;—Bl.;—B. M. 34, t. 1398;—B. Ropos. 8, t. 493.—B. chinensis, Lam.—Incarvillea grandistora, Spreng.) L. 5 Upan, China. Fl. large, orange-coloured, scentless, June, July and August; fr. C. S.
- 5. radicans, Juss. (G. Don. l. c.—Bignonia radicans, L.;—B. M. 14, t. 485.—Rosb. H. B. p. 47;—J. Grah. Cat. B. pl. p. 126.)
  - β. minor. 5 Carolina. Fl. large,-deep orange, tinged with scarlet, nearly the whole year; fr. 0.
- CATALPA, Juss. (G. Don's Mill. dict. 4, p. 230.)
  - syringæfolia, Sims. (B. M. 27, t. 1094;—G. Don. l. c.—Bignonia Catalpa, L.;—Ross. H. B. p. 47.)
     Banks of the Ohio and Missisippi. Has been cultivated in H. C. G. as well as here, for many years, without fl.
- JACARANDA, Juss. (G. Don's Mill. dict. 4, p. 225.)
  - 1. mimosæfolia, D. Don. (B. Reg. 8, t. 631;—G. Don. l. c.—J. ovalifolia, R. Br. B. M. 49, t. 2327.) 5 Brazil. Fl. large, pale-blue. Introduced in 1841.
- CALOBANTHES, Bl. (Bijdr. p. 760; -G. Don's Mill. dict. 4, p. 229.)
  - indica, Bl. (o. c. p. 761;—G. Don. l. c.—Bignonia indica, L.;—Roxb. fl. ind. 3, p. 110;—J. Grah. Cat. B. pl. p. 125.—B. pentandra, Lour.—Spathodea indica, Pers.;—Rheed. 1, t. 43, 44.)
     L. 5 Coromandel. Bombay Presidency, in Mahim woods; Elephanta; Hills throughout the Concans; Jungles in Kandesh. Fl. very large, outside dark purple, inside yellowish-white, June; fr. Jan. and Feb.
- AMPHILOPHIUM, Humb. Bonpl. and Kth.
  - 1. Mutisii, Kth. Equinoctial America.
- Schrebera, Roxb. (G. Don's Mill. dict. 4, p. 231.)
  - 1. swietenioldes, Roxb. (Corom. 2, t. 101; fl. ind. 1, p. 109; ed. Carey, 1, p 109; —J. Grah. Cat. B. pl. p. 112; —G. Don. l. c.) L. 5 Circar Mountains. Hala hills, W. of the Indus. Tull Ghaut, near Bhewndy. Jowaur. Fl. smallish, variegated with white and brown, during the night very fragrant, Feb. and March. Wood of a grey colour, very close-grained, heavy, and durable. It is employed by weavers in many parts of their looms, particularly the beam. It is also used for a variety of other purposes. (Roxb.)
- ? CRESCENTIA, L. (G. Don's Mill. dict. 4, p. 232.)
  - Cujete, L. (G. Don. l. c.—Jacq. amer. 175, t. 111; ed. pict. p. 86, t. 167;—Rozb. H. B. p. 45.) Common Calabash tree. 5 Equinoctial America. Fl. large, variegated with green, purple, red and yellow, not withering, but becoming putrid, and exhaling a nauseous and in-

tolerable smell, R. S.; fr. O. Shells of the fruit, cleansed and dried, are used by the inhabitants of Tropical America for drinking cups. Those of the long, small-fruited kind, are formed into spoons and ladles. The round ones are cut through the middle and used for chocolate-cups; they are frequently large enough to hold a gallon of fluid, serving to boil water in, as they bear fire well. The thicker parts are frequently used for button-moulds in the W. Indies. The Caribs engrave the outside with a number of grotesque figures, which they sometimes colour black and red. The pulp is now and then eaten by the negroes, but it is not looked upon as either agreeable, or wholesome; it is, however, much used by way of poultice, and a syrup made out of it is much in request among the natives, in disorders of the breast, in contusions, and inward bruises. The wood being very tough and flexible, is fit for the coach-makers, and frequently used for making saddles, stools, and other furniture. (Mill. dict.)

- alata, H. B. and Kth. (G. Don. o. c. p. 233.)
   Mexico. In the Governor General's garden, at Barrackpore, fl. R. S. The flowers are like those of No. 1.

ORDER CCIV.—ACANTHACEÆ, R. Br.—Lindl. Nat. Syst. p. 284.

THE JUSTICIA TRIBE.

Herbs or shrubs, by Nees von Esenbeck and Lindl. Nat. syst. p. 285, referred to 78 genera. Of these, Spreng. syst. and Lindl. l. c. addenda, enumerate about 140 species from S. America, Mexico and Brazil; 24 from

Arabia; 22 from New Holland; 12 from Senegal and Guinea; 9 from the Southern part of N. America; 4 from S. Europe; 4 from Madagascar; 4 from China: 3 from Japan: 2 from the Mascarenhas Islands; 2 from N. Africa: and 1 from the Canaries. In S. Africa have been discovered 50 species, (Har-Of E. Indian ones, Nees. v. Esenb. has described 263; viz. 6 of Thunbergia; 1 of Meyenia; 3 of Hexacentris; 1 of Elytraria; 1 of Nelsonia; 1 of Cardanthera; 4 of Adenosma; 3 of Ebermayera; 1 of Hemiadelphis; 6 of Hygrophila; 3 of Dyschoriste; 9 of Dipteracanthus; 1 of Pealidium; 6 of Ruellia; 1 of Phlebophyllum; 1 of Buteræa; 1 of Adenacanthus; 2 of Stenosiphonium; 26 of Strobilanthes; 2 of Æchmanthera; 14 of Goldfussia; 11 of Asystasia; 1 of Echinacanthus; 1 of Leptacanthus; 1 of Asteracanthus; 24 of Barleria; 1 of Ætheilema; 18 of Lepidagathis; 1 of Neuracanthus; 2 of Blepharis; 1 of Acanthus; 3 of Dilivaria; 3 of Crossandra; 3 of Endopogon; 1 of Loxanthus; 5 of Phlogacanthus; 4 of Cryptophragmium; 10 of Rostellaria; 1 of Hemichoriste; 1 of Graptophyllum; 7 of Adhatoda; 10 of Gendarussa; 2 of Leptostachya; 1 of Gymnostachyum; 14 of Eranthemum; 4 of Justicia; 3 of Rhinacanthus; 1 of Blechum; 7 of Rungia; 8 of Dicliptera; 8 of Peristrophe; 2 of Hypoestes; 1 of Rhaphidospora; 2 of Erianthera; 1 of Haplanthus; and 6 of Andrographis. To these must be added Eranthemum barlerioides, Roxb.; Justicia vetellina, Roxb.; J. alba, Roxb.; J. bivalvis, Roxb.; J. latebrosa, Kön.; J. verticillata, Roxb.; Ruellia comosa, Roxb.; R. flava, Roxb.; R. cernua, Roxb.; R. flagelliformis, Roxb.; R. Pavala, Roxb.; R. hirsuta, Roxb.; and R. suffruticosa, Roxb. Perhaps Staurogyne argentea and angustifolia, Wall. may also belong to the About 60 of these have been found in the Himalayas, the Khassya Mountains, and Assam; the rest are natives chiefly of Mountainous districts of both Peninsulas of India, Java, the Moluccas, Lucon, and Ceylon. But few properties of this order are known.

A. Thunbergiër, Nees.

- 2. pedunculata, Wall. (pl. as. rar. 3, t. 219.—Orobanche pedunculata, Roxb. fl. ind. 3, p. 29;—G. Don. o. c. p. 631.) ©. Parasite, growing upon the roots of the Kuskus grass. (Andropogon muricatus, Retz.) Fl. large, deep purple, with the tube brownish and inside yellow, R. S.; fr. Oct. Bengal, (Serampore.)

# ORDER CCVIII.—SCROPHULARIACEÆ, Lindl. Nat. Syst. p. 288.

#### THE FIGWORT TRIBE.

Herbs, undershrubs, or sometimes shrubs, by Bentham referred to 133 genera. Of these, Spreng. syst. enumerates about 250 for Europe; 230 for S. America, Mexico, and the W. Indies; 75 for N. America; 52 for Siberia; 46 for New Holland and the South Sea Islands; 32 for N. Africa; 30 for the Levant; 30 for Caucasus, Tauria, Dahuria, and Iberia; 7 for Madeira, and the Canaries; 5 for the Mascarenhas Islands; 4 for China; 2 for Japan; 2 for Persia; 1 for Arabia; 1 for Madagascar; 1 for Guinea; and 1 for Melville Island. Harvey assigns to S. Africa 250 species.—Ben-

tham's E. Indian Scrophularinæ comprehend 166 species; viz. 1 of Verbascum; 1 of Celsia; 8 of Scrophularia; 2 of Linaria; 1 of Antirrhinum; 5 of Pterostigma; 5 of Lindenbergia; 12 of Stemcdia; 7 of Linnophila; 3 of Mazus; 3 of Mimulus; 5 of Herpestis; 3 of Dopatrium; 2 of Peplidium; 13 of Bonnaya; 19 of Vandellia; 6 of Torenia; 2 of Artanema; 8 of Striga; 3 of Buchnera; 1 of Sutera; 7 of Buddlea; 1 of Hemiphragma; 1 of Ourisia; 1 of Scoparia; 1 of Picrorrhiza; 12 of Veronica; 1 of Calorrhabdos; 1 of Wulfenia; 2 of Gymnandra; 4 of Gerardia; 1 of Glossostylis; 4 of Centranthera; 1 of Euphrasia; 1 of Siphonostegia; and 18 of Pedicularis. "They are common in the plains, and occur in considerable numbers in the mountains. But the tribes which prevail in the latter are those of which the genera are chiefly found in temperate countries; though of these a few species occur also in the plains, but it is only during the cold weather; while the tropical genera which occur in the mountains spring up entirely in the rainy season." (Royle)-" Scrophulariacese are generally acrid, bitterish, and suspected plants." (Lindl.) Digitalis purpurea, L. (Foxglove) is now almost the only plant of the order, which is usefully employed in medicine. Its use requires, however, great caution.

# ORDER CCIX.—SOLANACEÆ, Lindl. Nat. Syst. p. 293.

#### THE NIGHTSHADE TRIBE.

Herbs or shrubs, by Lindl. (excluding Brugmansia,) referred to 42 genera. Of these, Spreng. syst. enumerates about 280 for S. America, Mexico and the W. Indies; 25 for New Holland and Van Diemen's Land; 15 for North America; 15 for Europe; 10 for N. Africa; 4 for the Mascarenhas Islands; 4 for China; 4 for Madeira and the Canaries; 4 for Guinea; 3 for Madagascar; 2 for Arabia; 2 for Japan; 2 for Siberia; 1 for Caucasus, and 1 for Persia. Several of the European species are also natives of Tauria, Caucasus, the Orient and N. Africa. In S. Africa Harvey enumerates 50 species. According to Nees Von Esenbeck's synopsis of Indian Solaneæ, and

Royle's ill. 44 species have been discovered in the E. Indies; viz. 31 of Solanum; 4 of Physalis; 1 of Anisodus; 4-5 of Datura; 1 of Hyoscyamus; 1 of Atropa; and 1 of Lycium. Of these, Lycium europæum, Atropa acuminata, Hyoscyamus niger, Solanum laxum, lysimachioides, crassipetalum, rubrum, Physalis angulata, Datura ferox, and Anisodus luridus are from the Himalayas; the rest are all tropical.

"At first sight this family would seem to offer a strong exception to the general uniformity of structure and property, containing as it does the Deadly Nightshade and Henbane, and the wholesome Potato and Tomato; but a little inquiry will explain this apparent anomaly. The tubers of the Potato are well known to be perfectly wholesome when cooked, any narcotic property which they possess being wholly dissipated by heat. the case with other succulent underground stems in equally dangerous families, as the Cassava among Euphorbiaceæ; besides which, as DeCandolle justly observes,—' Il ne faut pas perdre de vue que tous nos alimens renferment une petite dose d'un principe excitant, qui, s'il y était en plus grande quantité, pourrait être nuisible, mais qui y est nécessaire pour leur servir de condiment naturel.' The leaves of all are narcotic and exciting, but in different degrees, from the Atropa Belladonna, which causes vertigo. convulsions, and vomiting, the well known Tobacco, which will frequently produce the first and last of these symptoms, the Henbane and Stramonium, down to some of the Solanum tribe, the leaves of which are used as kitchen herbs. It is in the fruit that the greatest diversity of character exists: Atropa Belladonna, Solanum nigrum, and others, are highly dangerous poisons; Stramonium, Henbane, and Physalis are narcotic; the fruit of Physalis Alkekengi is diuretic; that of Capsicum is pungent and even ' acrid; some species of Physalis are subacid, and so wholesome as to be eaten with impunity, (f. ex. the well known Tepariya;) and finally, the Egg plant, (Solanum Melongena, Brinjal,) and all the Tomato tribe of Solanum, yield fruits which are common articles of cookery. It is stated that the poisonous species derive their properties from the presence of a pulpy matter which surrounds the seeds; and that the wholesome kinds are destitute of this pulp, the pulp consisting only of what botanists call the sarcocarp, that is to say, the centre of the rind, in a more or less succulent state. It must also be remembered, that if the fruit of the Eggplant is eatable, it only becomes so after undergoing a peculiar process, by which all its bitter acrid matter is removed, and that the Tomato is always exposed to heat before it is eaten." (Lindl.)

Indies.—Vestia lycioides, Willd. 5 Chili.

ORDER CCXI.—GENTIANACEÆ, Lindl. Nat. Syst. p. 296.

#### THE GENTIAN TRIBE.

Herbs, seldom shrubs, by Lindl. referred to 41, or perhaps, only to 37 genera, "extending over almost all parts of the world, from the regions of perpetual snow upon the summits of the mountains of Europe, to the hottest sands of S. America, and India. They however, do not appear in the Flora of Melville Island, but they form part of that of the Straits of Magellan." (Lindl.) Spreng. syst. enumerates about 100 species for S. America and Mexico; 50 for Europe; 40 for N. America; 26 for New Holland and Van Diemen's Land; 20 for Siberia; 10 for Tauria, Caucasus. and Altai; 2 for Madagascar; 2 for Japan; 1 for Arabia; and 1 for the Azores. In S. Africa have been found 30 species; and in the E. Indies, according to D. Don. and Wall. Cat., about 68, viz. 10 of Gentiana; 2 of Pneumonanthe; 5 of Ericala; 3 of Eurythalia; 2 of Crawfurdia; 9 of Swertia; 3 of Agathotes; 6 of Ophelia; 1 of Halenia; 1 of Erythræa; 8 of Canscora; 9 of Exacum; 1 of Slevogtia; 2 of Mitreola; 1 of Mitrasacme; and 4-5 of Villarsia. Of these by far the greater part inhabit the Himalayas, Khassya Mountains, Neelgheries, and other Mountains of both Peninsulas of India and Ceylon. But few are found in the plains, such as Erythrea centaurioides; Canscora diffusa, decussata, pusilla, sessiliflora; Exacum tetragonum, pedunculatum; Slevogtia verticillata; Villarsia indica, cristata, &c.

"The intense bitterness of the Gentian is a characteristic of the whole order. It resides both in the stems and roots, and renders them tonic, stomachic, and febrifugal; and it is very remarkable that there are no exceptions to these properties in the whole order, as it is now limited." (Lindl.)

AGATHOTES, D. Don. (G. Don's Mill. dict. 4, p. 177.)

 introduced into H. C. G. Fl.? In the garden here it has never succeeded.

## ERYTHERA, Rich. (G. Don's Mill. dict. 4, p. 203.)

ORDER CCXII.—SPIGELIACEÆ, Mart.—Lindl. Nat. Syst. p. 298.

#### THE WORMSERD TRIBE.

Herbs or undershrubs, by Lindl. referred to 2 genera. Of these Spreng. syst. enumerates 11 species, all natives of S. America, Mexico, and the southern part of N. America. "The root of Spigelia marilandica is used in N. America as a vermifuge." (Lindl.)

\* Spigelia fruticulosa, Lam. 5 Cayenne.—S. marilandica, L.; B. M. 3, t. 80. 4. Carolina. Georgia. Maryland.

# ORDER CCXIII.—APOCYNACEÆ, Lindl. Nat. Syst. p. 299.

Trees or shrubs, seldom herbs, by Lindl. (excluding Cryptolepis, and adding Epichysianthus, Pentalinon, Echaltium, Calpicarpum, and Tanghinia) referred to 73 genera. Of these, Spreng. syst. enumerates for S. America. Mexico, and the W. Indies, about 126 species; for New Holland and the South Sea Islands 24; for N. America 8; for Madagascar 6; for the Mascarenhas Islands 6; for Europe 5; for Mozambique 4; for Guinea 3; for Arabia 3; for China 2; for Owaree 1; and for the Canaries 1. Africa have been discovered 12 species; (Harvey) and in the E. Indies about 153, viz. 23 of Echites; 5 of Epichysianthus; 4 of Ichnocarpus; 1 of Beaumontia; 2 of Holarrhena; 3 of Vallaris; 7 of Parsonsia; 5 of Apocynum?; 1 of Nerium; 1 of Echaltium; 4 of Strophanthus; 8 of Wrightia; 11 of Alstonia; 2 of Vinca; 14 of Tabernæmontana; 1 of Phymiera; 1 of Urceola; 1 of Rejona; 8 of Carissa; 2 of Melodinus; 10 of Strychnos; 3 of Cerbera; 1 of Calpicarpum; 1 of Rauwolfia; 7 of Hun. tera; 4 of Alyxia; 1 of Ophioxylon; 5 of Willughbeia; 1 of Leuconotis; 1 of Cercocoma; 1 of Orchipeda; 1 of Copsia; 1 of Heylygia; 2 of Chilocarpus; and 1 of Kitabalia. The greater part of these prevail in Java, Ceylon, both Peninsulas of India, Bengal, and the Khassya Mountains. whence they extend to the forests bounding Nepal. The order abounds in a milky juice, distinguished, like that of Asclepiadaceæ, by its acrid, purgative, febrifugal, and perhaps, more suspicious properties. (Lindl.)

A. ECHITEE, Bartl.

ECHITES, L. (R. Br. in. Wern. soc. 1, p. 59;—G. Don's Mill. dict. 4, p. 72.)

apoxys, (E. acuminata, Rost. A. ind. 2, p. 15. not Ruiz. and Pav.
 —Aganosma acuminata, G. Don. o. c. p. 77; —Wight. icon. 2, t. 424.)
 L. 5 Silhet. Fl. 10 lines, pale greenish white, fragrant, April and May; fr. Jan. and Feb.

Don's Mill. dict 4, p. 92, where it is strangely enough placed as a syn. of Vahea gummifera, Poir.—Tabernæmontana elastica, Spreng. syst. 1, p. 639.) 5 Sumatra. Penang. Fl. minute, dull greenish. Has been introduced into H. C. G. Fl.? The juice issuing from this shrub is one of those which constitutes Caoutchouc.
  - PLUMIERA, Tournef. (G. Don's Mill. dict. 4, p. 93)
    - rubra, Jacq. (Amer. p. 35. pict. p. 23;—L. hort. cliff. p. 76; spec. 306;
       G. Don. l. c.;—B. M. 8, t. 279.)
       Jamaica. Surinam. S. America.
       Fl. large, red, very sweet-scented, so much so, that the women of S. America put them among linen to scent it, as we do lavender. Introduced in 1841.

2. alba, Jacq. (Amer. 36, t. 174, f. 12; ed. pict. t. 38;—L. sp.;—G. Don. l. c.;—Roxb. H. B. p. 20.) 5 West Indies. S. America. Fl. large, white, with a yellowish tube and throat, very fragrant, or, as L. says, "ambrosiacal, exciting cephalalgia," May, June and July; fr. 0. 3. acuminata, Ait. (G. Don. o. c. p. 94; B. Reg. 2, t. 114;—Roxb. fl. ind. 2, p. 20;—J. Grah. Cat. B. pl. p. 115;—Wight. icon. 2, t. 471.—P. acutifolia, Poir.—P. obtusa, Lour., not L.—Rumph. 4, t. 38.)

101 514 Goola-cheen. (Hind.) (114) 5141 Goburiya-champa. 5

Cultivated in China, Cochin-China, India, the Moluccas, &c. where it is thoroughly domesticated. It is, however, no doubt, with the other Plumieras a native of S. America or the W. Indies. Fl. large, reddishyellowish-white, fragrant, especially during the night. H. and R. S.; fr. 0, or very rare.

ALLAMANDA, L. (Mill. dict. ed. G. Don. 4, p. 102.)

cathartica, L. (Mant. 214;—Gürtn. fr. 1, p. 293, t. 61, f. 4;—B. M. 10, t. 338;—Roxb. H. B. p. 19.—A. oenotheræfolia, Pohl.;—G. Don. o. c. p. 103.—A. Schottii, Pohl.;—G. Don. l. c.—A. angustifolia, Pohl.;—G. Don. l. c.—A. Linnæi, Pohl.;—G. Don. l. c.—A. Aubletii, Pohl.;—G. Don. l. c.;—J. Grah. Cat. B. pl. p. 116.—A. verticillata, Desf.;—Pohl.;—G. Don. l. c.) 5 Guiana. Brazil. Surinam. W. Indies. Fl. very large, bright yellow, fragrant, and fr. throughout the year.

This shrub was introduced from Guiana into India in 1803, and is now very common in gardens. 'Stems erect, larger branches hollow in the middle; smaller ones and young shoots filled with thick viscid milk, glabrous. in a dried state fistulous. Leaves mostly 4, sometimes 6, 5 or 3 in a vharl, or only 2, opposite, sub-opposite or alternate; they are oblong. 2-4-5 inches long, 1-1-2 wide across the middle, acuminate, acute, towards base cuneately attenuated, now and then oblong-obovate, acutish, at margins revolutely undulated, above dark green and glabrous, underneath pale green and when badly dried brown-spotted, roughishly hairy along the midrib and primary veins, or only very little so along the first, or over the whole surface.' Of this characteristic there is more than enough to form six such species as Pohl's, which being made exclusively from unimportant leaf-discrepancies, are good for nought. His one climbing species has not been discovered here, but were a specimen of Allamanda placed close to a tree, it might, perhaps, like a Clerodendron phlomoïdes in our garden, take a fancy to ascend a pretty large Coccoloba uvifera.

Apocynaceæ dubiæ.

#### ALAFIA, Thouars.

1. Thouarsii, Rom. and Sch. (Syst. 4, p. 436.) 5 

Madagascar.

ORDER CCXIV.—RETZIACEÆ, Bartl.—Lindl. Nat. Syst. p. 302.

Consists of herbaceous or undershrubby species; 2-3 of Retzia, and 2 of Lonchostoma; all natives of the C. G. H., except the following. Retzia, Thunb. (G. Don's Mill. dict. 4, p. 306.)

1. pilosa, Rottl. (Wall. Cat.) 4. Madura. In H. C. G. Fl.?

ORDER CCXV.—ASCLEPIACEÆ, (ASCLEPIADACEÆ, Lindl. Nat. Syst. p. 302.)

Shrubs or occasionally herbs, generally milky, and often twining; by Lindl. (including Cryptolepis and Vicarya) referred to 85 genera, of these Spreng. syst. enumerates for S. America, Mexico, and the W. Indies about 82 species; 33 for N. America; for N. Holland and Van Diemen's Land 22; for Burope 7; for N. Africa 6; for Arabia 6; for Siberia 3; for China

C

3; for Asia Minor 2; for the Canaries 2; for Madagascar 1; for the Mascarenhas Islands 1; for Senegal 1; and for Japan 1. In S. Africa have been discovered 240 species; (Harvey)—and in the E. Indies, chiefly according to Wight 221, viz. 22 of Ceropegia; 2 of Caralluma; 2 of Boucerosia; 1 of Hitchenia; 3 of Eriopetalum; 30 of Hoya; 1 of Pterostelma; 1 of Physostelma; 8 of Marsdenia; 1 of Cosmostigma; 3 of Heterostemma; 5 of Pergularia; 11 of Dischidia; 14 of Gymnema; 4 of Sarcolobus; 4 of Leptadenia; 1 of Orthanthera; 19 of Tylophora; 1 of Belostemma; 2 of Iphisia; 6 of Calotropis; 5 of Oxystelma; 1 of Rhaphistemma; 6 of Holostemma; 18 of Cynanchum; 1 of Dæmia; 3 of Sarcostemma; 2 of Pentasacme; 8 of Secamone; 4 of Toxicarpus; 1 of Goniostemma; 3 of Hemidesmus; 1 of Brachylepis; 1 of Decalepis; 9 of Streptocaulon; 1 of Gurua (Finlaysonia, Wall.); 1 of Cryptostegia; 2 of Cryptolepis; 1 of Vicarya; 7 of Leptostemma; 1 of Triplospermum; 1 of Conchophyllum; 1 of Phyleanthera; 1 of Leposma; and 1 of Pentatropis.-About 50 of these belong to the Himalayas, the Khassya Mountains, the Mountains of Assam, &c.; the rest are natives of the two Peninsulas of India, Ceylon, the Sunda Islands, the Moluccas, Bengal and the North-Western Provinces.

The roots of Asclepiadaceæ are generally acrid and stimulating, whence some of them act as emetics; others as diaphoretic. Their milk is usually acrid and bitter, and is always to be suspected, although it probably participates in a slight degree only, in the poisonous qualities of that of Apocynaceæ, if we can judge from the use of some species of food. But very little is known about the real qualities of such plants. (Lisal.)

## A. GENUINE, Bartl.

- Chrophegia, L. (R. Br. in mem. Wern. soc. 1, p. 21;—W. and A. contrib. to ind. bot. p. 29;—G. Don's Mill. dict. 4, p. 109.)
  - lucida, Wall. (pl. as. rar. 2, t. 139;—W. and A. l. c.;—G. Don. o. c. p. 110.)

Sch.; -Spreng. -Cynanchum Ipecacuanha, Willd.) To Unto-mool. 5 - Peninsula of India. Bengal, (Serampore.) Segaen, &c. Fl. 51 lines in diameter, externally pale greenish with a faint tinge of purple, internally light-purple, May and June; fr. Aug. Sept. and Oct. The roots are used on the Coast of Coromandel, as a substitute for ipecacuanha. Roxb. often prescribed this remedy himself, and found it answer as well as the latter. Given in a pretty large dose, it answers as an emetic, in smaller, often repeated doses as a cathartic, and in both ways effectually; the natives also employ it as an emetic, by rubbing upon a stone 3-4 inches of the fresh root, and mixing it with a little water for a It generally purges at the same time. Dr. P. Russel was informed by Dr. J. Anderson, the Physician General at Madras, that he had many years before known it used both by the European and Native troops, with great success in the dysentery which happened at that time to be epidemic in the camp. (Roxb.)

Fl. nearly 6 lines, saffron coloured with a light orange-coloured crown, and fr. nearly throughout the year. The juice of this plant, made into a syrup, is said to be a powerful anthelmintic, and is given as such, in the West Indies, to children in doses from a tea to table-spoonful. The juice and pounded plant is said to be an excellent styptic. The root, dried and reduced to a powder, is frequently used by the Negroes as an emetic, and hence its name of Wild, or Bastard Ipecacuanha. (Mill. dict.)

Both Peninsulas of India. Bengal, (Serampore.) Hindoosthan. Assam, &c. Fl. 10-12 lines long, and fr. throughout the year. A large quantity of an acrid, milky juice flows from this plant when wounded. The natives apply it to various medicinal purposes, while they employ the plant itself and its preparations to cure all sorts of nervous disorders. In 1811, it was subjected to a regular set of medical experiments by Dr. G. Playfair, who, with many of his brethren, bears ample testimony of its efficacy in leprosy, lues, tenia, herpes, dropsy, rheumatism, hectic and intermittent fever. The powdered bark is given in doses of 5-6 grains twice a day. It will now and then occasion nausea and vomiting, but such symptoms are easily removed by a dose of castor oil. (On the Madar, and its medical uses, Phys. and med. trans. Calc. 1, p. 77-102.—Account of the use of Akund or Mudar in the leprosy. Phys. and med. trans. Calc. 2, 409-410.)
    - a. lilacina, (Alam Akundo.) Fl. beneath whitish with a tinge of lilac, above whitish light purple, with the crown purplish lilac, inodorous, or nearly so.

Anthocleista nobilis, G. Don. 5 Sierra Leona.—A. macrophylla,
G. Don. 5 Sierra Leona.

## ORDER CCXVIII.—OLEACEÆ, Lindl. Nat. Syst. p. 307.

#### THE OLIVE TRIBE.

Trees or shrubs, by Lindl. referred to 14 genera. Of these, Spreng. syst. assigns 28 species to N. America; 13 to Europe; 7 to New Holland and Van Diemen's Land; 7 to China and Japan; 4 to S. America, and the W. Indies; 3 to Syria, and Asia Minor; 3 to S. Africa; 3 to the Mascarenhas Islands; 1 to the Canaries; 1 to Tauria; and 1 to Persia. In the E. Indies have been discovered 42 species, viz. 20 of Olea; 10 of Linociera; 3 of Ligustrum; 1 of Syringa; 1 of Pachyderma; 1 of Myzopyrum; 1-2 of Chondrospermum; and 4 of Ornus. About 18 of these have been discovered in Nepal, the Himalayas and the Khassya Mountains; the rest are natives of the two Peninsulas of India, Ceylon, Java, and the Moluccas.

"This order (and Aurantiaceæ) offer one of the few instances of oil being contained in the pericarp, from which olive oil is entirely expressed. In most other plants oil is yielded by the seed." (Lindl.)

OLEA, Tournef. (G. Don's Mill. dict. 4, p. 46.) Olive.

- sativa, Hoffmansegg. (G. Don. l. c.;—J. Grah. Cat. B. pl. p. 109.—Olea europæa; L. β. sp. 1, p. 11;—Vahl. enum. 1, p. 39;—Brot. fl. lusit. 1, p. 10;—All. pedem. 1, p. 121, No. 449;—Wood. med. bot. p. 369, t. 136;—Plenck. icon. t. 11;—Roxb. H. B. p. 3.—O. europæa, longifolia,—Lodd. B. Cab. t. 456.—O. longifolia, Mönck.—O. polymorpha, Risso.) Cultivated Olive. 5 Aleppo. Lebanon. Was introduced into H. C. G. in 1800, but had not fl. up to 1814.—J. Grah. l. c. says: "The climate of India seems to suit it, and it may
- lancea, Lam. (Ill. 1, p. 29, n. 78. Ejued. Cyclopædis. p. 4, 544.)
   Mauritius. Bourbon.

possibly hereafter become of some importance."

3. copensis, L. (G. Don. o. c. p. 48; B. Reg. 8, t. 613.—O. buxifolia, Mill. dict.) 5 Has not fl. here, though cultivated for several years.

- γ. undulata, Ait. (O. undulata, Jacq. hort. schönbr. 1, t. 2;—Lodd. B.
   Cab. t. 379;—B. M. 58, t. 309.—O. laurifolia, Lam.) 5 C. G. H.
   Introduced in 1841.
- 4. fragrans, Thanb. (f. jap. p. 18, t. 2;—G. Don. l. c.;—B. M. 38, t. 1552;—Roxb. H. B. p. 3;—J. Grah. Cat. B. pl. p. 109.—Osmanthus fragrans, Lour.) 5 Japan. China. Cochin China. Fl. small, white, delightfully fragrant, C. S.; fr. 0. β. rubra; Fl. red.

Much cultivated in its native country for the sake of its flowers, which are said to be put into teas to give them flavour.

- 5. chrysophylla, Lam. (Ill. p. 29, n. 77. Ejusd. cyclop. 4, 544.) 5 Bourbon.
- 6. grandiflora, Wall. (Cat.; —G. Don. l. c.) 5 Nepal. Has not flowered in the garden, though cultivated for many years.
- 7. attenuata, Wall. (Cat.; —G. Don. l. c.) 5 Banks of the Martaban. Introduced in 1840.
- 8. clavata, G. Don. (l. c.—O. Roxburghii, Spreng; not O. Roxburghiana. Röm and Sch.—Phillyrea paniculata, Roxb. fl. ind 1, p. 100; ed. Carey, 1, p. 100;—J. Grah. Cat. B. pl. p. 108.—not Olea paniculata, Roxb. nor R. Br.) 5 China. Fl. small, pure white, somewhat fragrant, H. S.; fr. 0.
- 9. robusta, Wall. (Cat.—G. Don. o. c. p. 49.—Phillyrea robusta, Rosb. fl. ind. 1, p. 101; ed. Carey, 1, p. 101.) L. 5 Silhet. Fl. small, white, June and July; fr. Jan. and Feb. Furnishes the natives of Silhet with very hard, durable wood. (Rosb.)
- glandulifera, Wall. (Cat.; —G. Don. l. c.) 5 Mountains near Deyra-Dhoon. Kemaon. Has been cultivated for many years in the garden here, without flowering.
- Rosburghiana, Röm. and Sch. (syst. 1, p. 77;—G. Don. l. c.—O. paniculata, Rosb. fl. ind. 1, p. 105; ed. Carey, 1, p. 104; not R. Br.)
   Circar Mountains. Fl. small, white. Has been introduced into H. C. G.?
- 12. dioica, Roxb. (fl. ind. 1, p. 106; ed. Carey, 1, p. 105;—J. Grah. Cat. B. pl. p. 109;—G. Don. l. c.) L. 5 Chittagong. Silhet. Fl. small, white, March; fr. June, but rarely. Timber considered excellent, and put to many uses by the natives. (Roxb.)
- 13. acuminata, Wall. 5 Nepal.
- 14. verrucosa, I.k. (Enum. 1, p. 33;—G. Don. l. c.—O. europæa, Thunb. not L.—O. sativa, var. verrucosa, Röm. and Sch.—O. africana, Mill. dict.—Burm, afr. p. 237, t. 83, f. 21.) 5 C. G. H. Has been cultivated in the garden here for many years, without flowering.
- 15. grata, Wall. MSS. 5 Native place? Introduced in 1840.
- myrtifolia, Wall. MSS. 5 North-east of Bengal. Fl. small, white,
   c. and H. S.; fr. 0.
- LINOCIEBA, Swz. (G. Don's Mill. dict. 4, p. 52.)

Don. 5 Khassya Mountains.

ORDER CCXIX.—JASMINACEÆ, Lindl. Nat. Syst. p. 308.

## THE JASMINE TRIBE.

Shrubs, usually twining, and 1 tree, by Lindl. referred to 3 genera. Of these, Spreng. syst. assigns 8 to New Holland and the South Sea Islands; 3 to S. Africa; 3 to Brazil and Peru; 2 to Guinea; 2 to China; 1 to Cochin China; 1 to the Azores; 1 to S. Europe; and 2 to Madeira. Wall. Cat. adds 1 Jasminum for Mauritius, and Lindl. 1 Bolivaria for Mexico. In the E. Indies have been discovered 66 species of Jasminum, and 1 of Nyctanthes. Of these about 20 have been found in the Himalayas, the Khassya Mountains, and Assam; the rest are natives of Bengal, both Peninsulas of India, Ceylon, Sunda Islands, and the Moluccas.

"Properties not very different from those of Oleaceæ, except that their oil is deliciously fragrant, and produced by the flowers, and not by the pericarp. The genuine essential oil of the shops is produced by the Jasminum officinale and grandiflorum; but a similar perfume is also procured from Jasminum Sambac." (Lindl.)

JASMINUM, Forsk. (G. Don's Mill. dict. 4, p. 59.)

1. Sambac, Ait. (G. Don. o. c.;—Roxb. fl. ind. 1, p. 88; ed. Carey, 1, p. 87;—B. Reg. 1, t. 1.—J. Grah. Cat. B. pl. p. 110.—I. undulatum, Willd.—Mogorium Sambac, Lam.—Nyctanthes Sambac, L.) 5 All over India. Fl. 14 lines long, white, delightfully fragrant, H. S.; fr. R. S. a. simplex. (B. CLASS 2D.

# GYMNOSPERMÆ.

Lindl. Nat. Syst. p. 310.

ORDER CCXX.-GNETACEÆ, Lindl. Nat. Syst. p. 311.

Small trees or shrubs, natives of the temperate parts of Europe, Asia, and S. America, and, in the case of Gnetum, of the hottest parts of India and Guiana. (*Lindl.*) The former constitute the genus *Ephedra*, containing 6 species, one of which inhabits the Himalayas; the latter has but 3 species, two Indian, and one from Guiana.

GNETUM, L. (Spreng. syst. 3, p. 758, No. 3071;—Endl. gen. pl. 1, p. 263.
—Gnemon, Rumph.—Thoa, Aubl.—Abutua, Lour.)

Gnemon, L. (Spreng. syst. 3, p. 777;—Rosb. fl. ind. 8, p. 518.—Gnemon domestica, Rumph. 1, t. 71.)
 Moluccas. Sumatra. Fl. small, greenish. Was introduced into H. C. G. in 1810, but has not fl. up to 1814. Strong ropes are made of the fibres of its bark at Sumatra, and its leaves are used as spinage. (Rosb.) The seeds are eaten roasted, boiled, or fried. (Rumph.)

2. scandens, Roxb. (f. ind. 3, p. 518; J. Grah. Cat. B. pl. p. 188.—Gnemon funicularis, Rumph. 5, t. 7, 8.—Thoa edulis, Willd. sp. 4, p. 477; —Rheed. 7, t. 22.) L. 5 Moluccas. Malabar. Lanowlee grove, near Kandalla. Ravines at Parr. Both Concans. Chittagong. Khassya Mountains. Assam. Fl. small, greenish. In H. C. G. fl. March and April; fr. Sept. and Oct. (Rost.)

## \* Gnetum urens. 5 Guiana.

# ORDER CCXXI.—CYCADACEÆ, Lindl. Nat. Syst. p. 313.

"Trees, with a simple cylindrical trunk, increasing by the development of a single terminal bud, and covered by the scaly bases of the leaves," (Lindl.) referred by the latter to 4 genera. Of these, Spreng. syst. enumerates 9 for S. America and the W. Indies; 1 for Florida, also found in the W. Indies; 1 for China and Japan; and 3 for New Holland.—In S. Africa have been discovered 12 species, (Harvey); and in the E. Indies 2 forms of Cycas.—Lindl. adds, that, according to R. Brown, species have also been found in Madagascar.

The only remarkable quality in the order is the production of a kind of Sago, by the soft centre of Cycas circinalis. They all abound in a mucilaginous nauseous juice. (Lindl.)

- ZAMIA, L. (Spreng. syst. 3, p. 895, No. 3199;—Endl. gen. pl. 1, p. 71.)
  - longifolia, Jacq. (Fragm. 1, p. 28, t. 29;—Spreng. syst. 3, p. 908.)
     C. G. H. Has been cultivated in the garden here for many years, without flowering.
  - 2. horrida, Jacq. (Fragm. 1, p. 27, t. 27, 28;—Spreng. l. c.;—J. Grah. Cat. B. pl. p. 198.) 5 C. G. H. Like the preceding species, it has not fl. here.
- CYCAS, L. (Spreng. syst. 3, p. 895, No. 3198;—Endl. gen, pl. 1, p. 71.)

  1. circinalis, L. (Spreng. syst. 3, p. 907;—Rosb. fl. ind. 3, p. 744;—

  B. M. 55, t. 2826-7;—J. Grah. Cat. p. 198.—C. inermis, Lour.;

  Spreng. l. c.;—Rheed. 3, t. 13, 21;—Rumph. 1, t. 22 and 23.) 5 Moluccas. China. Cochin-China. Fl. May; fr. Dec. and January. In gardens and plantations towards the sea-coast of the Southern provinces of Malabar, this plant is very common; it grows spontaneously from the nuts that accidentally fall. The nuts are collected, and having been dried for a month in the sun, are beaten in a mortar, and the kernels formed into a flour. This is reckoned superior to the flour obtained from the stem of the Caryota urens, L.; but is only used by the poor, who between the 14th of July and 13th of Sept. are in danger of perishing. It is prepared during the former month, and cannot be preserved longer than the end of the latter.

The Sago of the shops, formerly believed to come from the trunk of Cycas circinalis, is chiefly the product of Sagus farinifera. Gärtn. (Buch.)

- 2. revoluta, Thunb. (Spreng. syst. 3, p. 907;—Sm. in Linn. Soc. trans. 6, t. 29, 30;—Roxb. fl. ind. 3, p. 746;—B. M. 57, t. 2963-4;—Rumph. 1, t. 24.) 5 Japan. China. 2 Common in gardens about Calcutta. Fl. H. S.; fr. C. S. "The taste of the fruit is mealy, dry and sweetish, but insipid. It is the general opinion here, that this is the Sago Palm, or the plant that produces Sago. The Japanese eat the fruits, and from the trunk extract a kind of Sago, which is highly esteemed, especially by the people of rank. On this account, the plant is much cultivated about their houses, and is forbidden to be exported. A very small quantity of the medulla or pith suffices to satisfy the hunger of a soldier in the time of war." (B. M. l. c.) Roxb., however, says, that he has no reason to think, that the plant, which was introduced into H. C. G. in 1794, can ever be made a useful article of diet. 3. sphærica, Roxb. (fl. ind. 3, p. 747.) 5 Moluccas. Fl. R. S.; fr. C. S.
- \* Zamia furfuracea, Ait.; B. M. 45, t. 1969. 5 W. Indies.—Z. muricata, Humb. 5 New Granada.—Z. integrifolia, Ait.; B. M. 43, t. 1851. 5 W. Indies.—Z. debilis, Ait.; B. Cab. t. 155. 5 W. Indies.—Z. media, Jacq.; B. M. 43, t. 1838. 5 W. Indies.—Z. pygmæa, Sims.; B. M. 42, t. 1741. 5 W. Indies.—Z. pumila, L.; B. M. 45, t. 2006. 5 Bahama Islands.—Cycas media, R. Br. 5 Tropical N. Holland.—C. angulata, R. Br. 5 Tropical N. Holland.

ORDER CCXXII.—PINACEÆ, Lindl. Nat. Syst. p. 313.

(Coniferæ, Juss.)

## THE FIR TRIBE.

Trees or shrubs, by Lindl. referred to 11 genera. Of these, Spreng. systand Roxb. fl. ind. enumerate 20 species for Europe; 20 for N. America; 8 for Mexico, and the W. Indies; 5 for the Orient; 4 for Japan; 8 for China; 2 for the South Sea Islands; 2 for Siberia; 3 for Caucasus; 3 for S. Africa; 1 for N. Africa; 1 for the Canaries; 1 for Madagascar; and 1 for Arabia. In the E. Indies have been discovered about 19-20 species, viz. 7 of Pinus, Himalayas, (1 from Cochin-China); 1 of Abies; (Himalayas); 1 of Dammara, (Amboyna); 1 of Thuja, (Himalayas?); 2-3 of Cupressus, (Himalayas); 1 of Taxodium, (Himalayas); and 5 of Juniperus, (Himalayas.)

"No order can be named of more universal importance to mankind than this, whether we view it with reference to its timber or its secretions.

Gigantic in size, rapid in growth, noble in aspect, robust in constitution, these trees form a considerable proportion of every wood or plantation in cultivated countries, and of every forest where nature remains in savage state. Their timber, in commerce, is known under the names of Deal, Fir, Pine, and Cedar, and is principally the wood of the Spruce, the Larch, the Scotch Fir, the Weymouth Pine, and the Virginian Cedar; but others are of at least equal, if not greater value: the Norfolk Island Pine is an immense tree, known to botanists as Araucaria excelsa; the Kawrie tree of New Zealand, or Dammara australis, attains the height of 200 feet, and yields a light compact wood, free from knots. (Ed. Ph. Journ. 13. 378.) But they are both surpassed by the stupendous Pines of N. W. America, one of which, P. Lambertiana, is reported to attain the height of 230 feet, and the other, Abies Douglassii, to equal, or even to exceed it. The latter is probably the most valuable of the whole for its timber." (Lindl.) "The terebinthinate secretion, for which the order is chiefly noted, abounds in the bark, but is also found in the wood and in the cones. Turpentine, containing a resina and an essential oil, is known under different names, such as Common, Venice, Strasburg, American, &c., but might also be had in any quantity from the Himalayan Pine forests. Pitch and tar have both been made from Himslayan pines, but remain still unnoticed by the commercial world. As the seeds of several exotic pines are eaten in the countries where they are indigenous, so, in the Himalayas, the seed of one species, Pinus Gerardiana, forms one of the principal articles of subsistence in Kunawur, as well as of considerable trade from the hills to the plains." (Royle. ill. p. 351-53.)

A. PINER, (Abietinæ, Rich.)

Pinus, L. (Spreng. syst. 3, p. 763, No. 3143;—Endl. gen. pl. 1. p. 260.)

Pine.

1. longifolia, Lamb. (Pin. t. 21. 8vo.; -Spreng. syst. 3, p. 887; -Rosb. fl. ind. 3, p. 651;—Royle ill. t. 85, f. 1.) L. 5 Entrance to Nepal, in the Kheree Pass, along the Tonse and Jumna Rivers, and at elevations of 5-6000 feet within the Himalayas. Fl. C. S. In the Upper Provinces, called Cheer or Surul. Being found at the lowest elevations, and therefore most accessible from the plains, it is often employed as a substitute for English deal. The wood is light, and being full of resinous matter, like that of the Deodar, both are frequently employed in the hills for making torches, as pieces of other species often are in other parts of the world. The Cheer exudes, or yields to incisions, a very fine turpentine. This is chiefly valued by the natives for its resin, and as the latter is only obtained by exposing the turpentine to heat, the oil, the more valuable product, is dissipated to procure the resin; but by adopting a very simple still, the resin was obtained as good as ever for the purposes of the natives, while the oil of turpentine, which distilled over, was pronounced, on being sent to the General Hospital of Calcutta, "to be of very superior quality." (Royle.)

- 2. Deodara, Roxb. (H. B. p. 69; fl. ind. 3, p. 651;—Lamb. Pin. 8vo. t. 52.) GRANTE Debdaroo. L. 5 Narainhetty, in Nepal, and at Simla, Bhotea pergunnahs of Kemaon. Fl. Aug. to Oct. Sometimes thirty feet in circumference. The wood is particularly valued for its durability, and is therefore much used in the construction of Himalayan houses, as are also the planks of Abies Pindrow. Deodar yields a somewhat coarse, very fluid kind of turpentine, which is much valued in Upper India as a stimulating application to foul and indolent ulcers. The leaves and small twigs of the Deodar are likewise brought down to the plains, being much used in native medicine. (Royle.)
- sinensis, Lamb. (Loud. Hort. Brit. p. 387, No. 23,602.—P. chinensis. Roxb. H. B. p. 69.)
   China. Introduced into H. C. G. in 1811, Fl.?

The Pinus sylvestris, L.; E. B. 35, t. 2460. Europe. N. Asia;—P. Pumilis, Hänke.; (P. Mughus, Scop.) Austria. Hungary;—P. Pinaster, Ait; France, Italy; and P. Pinea, L.; S. Europe, have been introduced into H. C. G. but not succeeded.

CUNNINGHAMIA, R. Br. (MSS.;—Endl. gen. pl. 1, p. 260; not Schreb.)

1. sinensis, Rich. (Conif. p. 80;—B. M. 54, t. 2743;—Belis jaculifolia, Salisb.;—Spreng. syst. 3, p. 888.—Pinus lanceolata, Lamb. pin. p. 52, t. 34.—P. Abies, Lour, not L. and excl. most syn.) L. 5 China. Introduced into H. C. G. Fl.?

DAMMARA, Rumph. (Mirb.; -Endl. gen. pl. 1, p. 261.)

orientalis, Lamb. (D. alba, Rumph. 2, t. 57.—Pinus Dammara, Lamb.;
 —Rosb. H. B. p. 69.—Agathis loranthifolia. Salisb.)
 Amboyna. Introduced into H. C. G. in 1798, but had not fl. up to 1814.

ARAUCARIA, Juss. (Endl. gen. pl. 1, p. 261.)

- excelsa, R. Br. (in Hort. Kew.—Dombeya excelsa, Lamb. pin. t.
   39. 40.—Colymbea excelsa, Spreng. c. p. p. 315.) L. 5 Tropical N. Holland. N. Caledonia. Introduced in 1840.
- 2. Cunninghami. 5 N. Holland.

B. Cupresser, (Cupressing, Rich.)

- Thuja, Tournef. (Spreng. syst. 3, p. 763, No. 3148;—Endl. gen. pl. 1, p. 258.) Arbor Vita.
  - 1. occidentalis, L. (Spreng. syst. 3, p. 888;—Rosb. H. B. p. 69.) American Arbor Vitæ. 5 N. America. Siberia. Introduced into H. C. G. in 1809, but had not fl. up to 1814.
  - orientalis, L. (Spreng. l. c.; —Roxb. fl. ind. 3, p. 653; —J. Grah. Cat.

     2; —Lour.) Chinese Arbor Vita. 5 China. Japan. Nepal? Fl. H. S.;
     fr. R. S.
  - sphæroïdea, Rich. (Spreng. syst. 3, p. 889;—Cupressus thyoïdes, L.)
     N. America. Has not flowered here, though cultivated for many years.

- Cupressus, Tournef. (Spreng. syst. 3, p. 763, No. 3149;—Endl. gen. pl. 1, p. 259.) Cypress.
  - 1. sempervirens, L. (Spreng. syst. 3, p. 889;—Gärtn. fr. 2, p. 64, t. 91, f. 5;—Rosb. fl. ind. 3, p. 653.) 可知 Surus. 5 S. Europe. Himalayas. Fl. H. S.; fr. R. S. Leaves and berries thought by the natives to be a cure for every disease.
  - 2. torulosa, Lamb. (Spreng. syst. 3, p. 889.) 5 Bootan. Neetee. In H. C. G.?
  - 3. australis, Pers. (Syn. 2, p. 580;—Spreng. l. c.) 5 N. Holland. Has been introduced into H. C. G. Fl.?
  - fastigiata, Wall. MSS. 5 Native place? Introduced in 1838. Has not fl.

## PACHYLEPIS, Brongn. (Endl. gen. pl. 1, p. 259; not Less.)

- 1. cupressoïdes, Brongn. (Thuja cupressoïdes L.;—Spreng. syst. 3, p. 889.) 5 C. G. H. Has not fl. here.
- 2. juniperoïdes, Brongn. (Cupressus juniperoïdes, L.;—Schubertia capensis, Spreng. syst. 3, p. 890.) 5 C. G. H. Has been cultivated here for more than twelve years, without flowering.
- JUNIPERUS, L. (Spreng. syst. 3, p. 895, No. 3200;—Endl. gen. pl. 1, p. 258.)
  - communis, L. (Spreng. syst. 3, p. 908;—Gärtn. fr. 2, p. 62, t. 91, f. 3;—Blackw. t. 187;—Plenck. t. 719;—Roxb. fl. ind. 3, p. 839.)
     Common Juniper. 5 Europe. Middle Asia. Neetee Pass. Kunawar. China. Fl. C. S. Juniper berries, known to secrete sugar, as well as an essential oil, have long been noted for their diuretic properties, but are as famous for their employment in the manufacture of gin. They were formerly much employed in Europe, and at the present day may be bought in Indian bazars under the names of ubhul and hoober, being considered diuretic and emenagogue. They are now brought from the Himalayas, but were formerly from Kabul. (Royle.)
  - chinensis, L. (Spreng. syst. 3, p. 909;—Roxb. fl. ind. 3, p. 838.)
     China. Fl. C. S.
  - 3. aquatica, Roxb. (l. c.) 5 Rice lands near Canton, in China. Was introduced into H. C. G. in 1812. Fl.?
  - 4. cernua, Roxb. (fl. ind. 3, p. 839.) 5 China. Has not fl. here.
  - 5. dimorpha, Roxb. (l. c.) 5 China. Fl. C. S.
  - cæsia, Roxb. (H. B. p. 73.) China. Introduced into H. C. G. in 1812.
     Fl.?
  - patens, Roxb. (H. B. p. 73.) China. Introduced into H. C. G. in 1812. Fl.?
  - 8. bermudiana, L. (Spreng. syst. 3, p. 909.) Bermudas Cedar. 5 Bermudas Islands. Cultivated here for many years, without flowering.
  - barbadensis, L. (Spreng. l. c.) Barbadoes Cedar.
     Barbadoes. Cultivated here for many years, without flowering.

- Sabina, L. (Spreng. syst. 3, p. 910.) Common Savin. 5 S. Europe.
   Siberia. Has been introduced into H. C. G. Fl.?
  - \* Pinus Massoniana, Lamb. 5 China.—P. occidentalis, Swz. L. 5 W. Indies.—Callitris cupressiformis, Vent. 5 N. Holland.—Taxodium nuciferum, Brongn.—(Taxus nucifera, Kämpf.; Wall. tent. fl. nep. t. 44.) 5 Japan. Nepal.—Cupressus glauca, Lam. 5 Goa Cedar. Gardens in Bombay, and the Deccan.—Thuja articulata, Vahl. 5 Barbary.

# ORDER CCXXIII.—TAXACÆ, Lindl. Nat. Syst. p. 316.

#### THE YEW TRIBE.

Trees or shrubs, by Lindl. referred to 5 genera. Of these, Spreng. syst. assigns 4 to New Holland, and the South Sea Islands; 3 to China and Japan; 4 to S. Africa; 3 to Peru; 1 to N. America, and 1 to Europe. In the East Indies have been found 7-8 species, viz. 2-3 of Taxus, (Himalayas); 6 of Podocarpus, (Nepal, Khassya Mountains, Penang, Amboyna); and 1 of Dacrydium, (Penang.) The seeds of Salisburia adiantifolia, Sm. and Podocarpus neriifolius, Lamb. are eatable.

- Taxus, Tournef. (Spreng. syst. 3, p. 13, No. 2475;—Endl. gen. pl. 1, p. 261.) Yew tree.
  - baccata, L. (Spreng. syst. 3, p. 148;—E. B. 11, t. 746.) Common Yew tree. 5 Europe. North and Middle Asia. Nepal. Kemaon. Introduced into H. C. G.?
  - 2. latifolia, Thunb. (Spreng. l. c.) 5 C. G. H. Introduced into H. C. G. Fl.?
- Podocarpus, L'Herit. (Spreng. syst. 3, p. 763, No. 3150;—Endl. gen. pl. 1, p. 262.)
  - polystachys, R. Br. (Horsf. pl. jav. rar. 1, p. 40.—P. macrophylla, Wall. Cat. 6052, A; not Lamb.)
     Japan. China. Nepal. Khassya Mountains. Singapore. Malacca. Fl. C. S.
  - 2. elongatus, L'Herit. (Spreng. l. c.—Taxus elongata, Thunb.;—Rosb. H. B. p. 73.) 5 C. G. H. Has been cultivated here for many years. Fl.?
  - chinensis, Swt. (Loud. Hort. Brit. p. 388, No. 23648.—Taxus chinensis, Roxb. H. B. p. 73.)
     China. Fl. C. S.
  - 4. cupressinus, R. Br. (Horsf. pl. as. rar. 1, t. 10. P. Horsfieldii, Wall.) 5 Penang. Java.
- DACRYDIUM, Soland. (Endl. gen. pl. 1, p. 262.)
  - 1. elatum, Wall. (Cat.—Juniperus elata, Roxb. fl. ind. 3, p. 838.) L. 5
    Penang. A tree of very slow growth, cultivated in the garden here for many years, without flowering.

- Salisburia, Sm. (Spreng. syst. 3, p. 763, No. 3128;—Endl. gen. pl. 1, p. 262.)
  - 1. adiantifolia, Sm. (Spreng. syst. 3, p. 865;—Roxb. H. B. p. 68.—Ginkgo biloba, L.) 5 Japan. Was introduced into H. C. G. in 1806-7, but had not fl. up to 1814. Seeds large and eatable.
  - \* Podocarpus neriifolius, Lamb. (Lignum Emanum, Rumph. 3, t. 26.) 5 Amboyna.—P. latifolius, Wall.; pl. as. rar. 1, t. 26. 5 Khassya Mountains.—P. taxifolius, Kth. 5 N. Granada. Peru.—P. verticillatus, Hortul. 5 Japan.

# ORDER CCXXIV.—EQUISETACEÆ, DC.—Lindl. Nat. Syst. p. 317.

#### THE HORSE-TAIL TRIBE.

Leafless, branched herbs, found in ditches and rivers, comprehended under one genus. Of these, Spreng. syst. assigns 13 species to Europe, nearly all of which are likewise common to other parts of the world; 3 to 8. America and the W. Indies, and 1 to N. America. His species require, however, to be thoroughly re-examined. In the E. Indies, according to Royle, have been found 3 species, natives of Nepal, Kunawur, and Silhet. One of these is also common in Bengal, Dindygul, and Burma.

"In economical purposes the Equisetum are found highly useful, for polishing furniture and household utensils; a property which is due to the presence of a great quantity of silex in the cuticle. According to the observations of John of Berlin, they contain full 13 per cent. of siliceous earth. (Ed. P. J. 2. 394.) The quantity of silex contained in the cuticle of Equisetum hyemale, L. (E. B. 13, t. 915,) is so great, that Sivright succeeded in removing the vegetable matter and retaining the form. (Grev. A. edin. 214.) Brewster observed these siliceous particles beautifully arranged in two lines parallel to the axes of the stem. From these observations, it has been concluded, that the crystalline portions of silex and other earths found in vegetable tissues, are integral parts of the plants themselves." (Lindl.)

- EQUISETUM, L. (Spreng. syst. 4, p. 4, No. 3215;—Endl. gen. pl. 1, p. 58.) Horse-tail.
  - 1. debile, Roxb. (H. B. p. 75;—Wall. Cat.—E. pallens, Wall. Cat.) & Dindygul. Burma. Bengal, (Serampore.) Silhet. Northern Doab. Deyra-Dhoon. Fl. R. S.
  - \* Equisetum diffusum, D. Don. (E. scoparium, Wall. Cat.) Nepal.—E. Inglisii, Royle. Kunawar.—E. bogotense, Kth. New Granada.—E. giganteum, Spreng. W. Indies.

ORDER CCXXV.—ZINGIBERACEÆ, Rich.—Lindl. Nat. Syst. p. 322.

(Scitamineæ, R. Br.)

#### THE GINGER TRIBE.

Aromatic herbaceous plants by Lindl. referred to 25 genera. Of these, Spreng. syst. and Loud. Hort. Brit. (new edit.) enumerate 21 species for S. America and the W. Indies; 7 for Guinea; 5 for China; 2 for Japan; 1 for Madagascar, 1 for Mauritius; and 1 for New Holland. In the E. Indies, excluding Java, which our materials do not touch, have been discovered about 156 species, viz. 14 of Zingiber, (4 from the Himalayas and Khassya Mountains); 32 of Curcuma, (1 from the Khassya Mountains); 1 of Dischema; 9 of Kämpfera; 14 of Amonum, (4 from the Khassya and Morung Mountains); 4 of Elettaria, (1 from the Khassya Mountains); 28 of Hedychium, (about 22 from the Himalayas and Khassya Mountains); 17 of Alpinia, (3 extending to the Khassya Mountains); 2 of Hellenia, (according to Spreng.); 5 of Gastrochilus, (2-3 from Assam); 3 of Monolophus, (2 from the Khassya Mountains); 1 of Galanga; 3 of Costus, (1 from the Himalayas); 14 of Globba, (4 from the Himalayas) and Khassya Mountains); 2 of Hornstedtia, (Retz.); and 7 of Roscoea, (all from the Himalayas.) The rest of the Indian species, whose native places are not mentioned, belong to Bengal, the two Peninsulas of India, Ceylon, the Sunda and Molucca Islands. Properties under the species.

## A. ZINGIBEREA.

(Zingibera, Bl.; Endl. gen. pl. 1, p. 222.)

ZINGIBER, Gärtn. (Spreng. syst. 1, p. 4, No. 12;—Endl. gen. pl. 1, p. 222.) Ginger.

1. officinale, Roscoe. (Scit.;—Spreng. o. c. p. 12;—Rosb. ft. ind. 1, p. 47; ed. Carey, 1, p. 46;—J. Grah. Cat. B. pl. p. 207.—Amomum Zingiber, L.;—Jacq. hort. vind. 1, t. 75;—Lour.;—Rheed. 11, t. 12;—Rumph. 5, t. 66, f. 1.) Audruk. Ada. Commom Ginger. 4. Universally cultivated over all the warmer parts of Asia, but where indigenous, is not known. Fl. small, whitish-purple, R. S. but very rare. Seeds seldom perfected on account of the great increase of the roots. (Rosch. Sm.) Extensively cultivated in the Himalyas, at the elevations even of 4-5000 feet in moist situations; in Bengal, the Bombay Presidency, &c. The root is dug up in Oct.

- and Nov. in other situations in Feb. and March; the outer rind being rubbed off by various processes, the root is dried in the sun, and then called Soontho.
- 2. Zerumbet, Roscoe. (Scit.;—Sm. exot. bot. 2, t. 112;—Spreng. syst. 1, p. 12;—Roxb. fl. ind. 1, p. 48; ed. Carey, 1, p. 47;—J. Grah. Cat. B. pl. p. 207.—Zingiber spurium, Kön. in Retz. obs. 3, p. 60.—Amomum Zerumbet, Willd.;—Jacq. hort. vind. 3, t. 54.—A. sylvestre, Lam.—A. spurium, Gmel.—Rheed. 11, t. 13;—Rumph. 5, t. 64, f. 1.) To Buch. At at Muhubburee-buch. 4. Moluccas. Cochin China. Both Peninsulas of India. Bengal, (Calcutta, Serampore.) Fl. middle-sized, pale sulphur-coloured, R. S.; fr. Dec. and Nov. In the Moluccas the young leaves and shoots are used as greens. (Rumph.) Root employed by the natives as a stimulant stomachic. (Royle.)
- 3. Cassumunar, Roxb. (fl. ind. 1, p. 49; ed. Carey, 1, p. 48;—Roscoe Scit.;—Spreng. l. c.;—B. M. 35, t. 1426;—J. Grah. Cat. B. pl. p. 207.—Zingiber purpureum, Roscoe in Trans. Linn. Soc. 8, p. 348.—Z. Cliffordii, Andr. B. Repos. t. 558.—Cassumunar, Colla.) The Concans. Behar. Bengal, (Serampore.) Silhet. Fl. large, uniformly pale sulphur-coloured, July and Aug.; fr. Nov. and Dec. Has a strong camphoraceous smell, and yields the true Cassumunar of the shops, which is employed as a stimulant stomachic. (Roxb.)
- ligulatum, Roxb. (fl. ind. 1, p. 51; ed. Carey, 1, p. 50; Corom. 3,
   250; —Spreng. syst. 1, p. 12.)
   Nathpur. Nepal. Fl. reddish,
   pale yellow, R. S.; fr. Nov. and Dec.
- roseum, Roscoe. (Trans. Linn. Soc. 8, p. 348;—Roxb. fl. ind. 1, p. 50; ed. Carey, 1, p. 49;—Spreng. l. c.—Amomum roseum, Roxb. Corom. pl. 2, t. 12.)
   Circars. ·Fl. red and yellow, R. S.; fr. 0.
- 6. pardocheilum, Wall. Burma.
- 7. rubens, Roxb. (fl. ind. 1, p. 53; ed. Carey, 1, p. 51;—Roscoe Scit.;
  —Spreng. l. c.) 4. Rungpore District. Fl. red and yellow, R. S.;
  fr. 0.
- 8. squarrosum, Roxb. (fl. ind. 1. p. 54; ed. Carey, 1, p. 52;—Spreng. l. c.) 4. Rangoon. Prome. Fl. largish, pink-coloured, with the inner lip of the corol speckled with purple-red and yellow, R. S.; fr. 0.
- panduratum, Roxb. (fl. ind. 1, p. 55; ed. Carey, 1, p. 53;—Spreng. l. c.)
   Rangoon. Tavoy. Fl. smallish, red, pale-yellow, July; fr. Nov. and Dec.
- chrysanthum, Roscoe. (Scit.—Spreng. syst. c. p. p. 7.)
   Nepal. Fl. gold-coloured, R. S.; fr. 0.
- 11. barbatum, Wall. (pl. as rur. 1, t. 55.) 4. Mountains round Prome. Fl. largish, pale rose-coloured, Aug. and Sept.; fr. 0.
- 12. capitatum, Roxb. (fl. ind. 1, p. 55; ed. Carey, 1, p. 54;—Roscoe Scit.—Spreng. syst. 1, p. 13.) অধনা আৰু Junglee-adruk. Q. Raj-

- mal. Khassya Mountains. Fl. large, pure-yellow, R. S.; fr. Sept. and Oct. Bullocks sent into the jungles to graze in the rainy season in Northern India, have a portion of the roots of this plant given to them. (Royle.)
- 13. elatum, Roxb. (fl. ind. 1, p. 57; ed. Carey, 1, p. 56;—Roscoe Scit.;
  —Spreng. l. c.) 4. Interior of Bengal. Fl. bright-yellow, July and Aug.; fr. Sept. and Oct.
- CURCUMA, L. (Spreng. syst. 1, p. 4, No. 10;—Endl. gen. pl. 1, p. 223.)
  Turmeric.
  - 1. eruginosa, Roxb. (fl. ind. 1, p. 27; ed. Carey, 1, p. 27;—Roscoe Scit.;—Spreng. l. c.) 4. Burma. Fl. crimson, tinged with yellow, the tuft bright rose-coloured, May; fr. 0.
  - angustifolia, Roxb. (f. ind. 1, p. 31; ed. Carey, 1, p. 31;—Spreng. l. c.) Tikur of the Hindoos.
     Banks of the Sona, at Nagpore. Fl. large, bright-yellow, with a purple tuft, expanding at sunrise, and decaying at sunset of the same day, July; fr. Aug. and Sept. (See under No. 8.)
  - 3. aromatica, Salisb. (Parad. lond. 2, part 1, f. 96;—Roscoe Scit.;—
    Spreng l. c.—Curcuma Zedoaria, Roxb. fl. ind. 1, p. 23; ed. Carey,
    1, p. 23;—J. Grah. Cat. B. pl. p. 209.) অপৰা ইপাৰ্য Junglee-huldee.
    বৰ ইপাৰ্য Bun-huldee. Wild Turmeric. 4. Presidency of Bombay.
    Throughout the Concans. Kennery forests. Parell Hill, &c. Bengal,
    (Calcutta, Serampore.) China, and various other parts of Asia, and the
    Asiatic Islands. Fl. largish, aromatic, pale rose-coloured, with a yellow tinge along the middle of the lip, and the tuft large and rosy,
    H. S.; fr. June. The roots (round Zedoary of the shops) are, fresh as
    well as dry, of a pale-yellow colour, and possess at all times an agreeable fragrant smell, and a warm, bitterish, aromatic taste. The natives
    use them as a perfume, and also medicinally. (Roxb.)
  - 4. attenuata, Wall. (Cat.—J. Grah. Cat. B. pl. p. 210.) 4. Banks of the Irawaddi. This species, nearly allied to C. angustifolia, introduced here in 1827, (Carey.) we have not seen.
  - 5. cæsia, Roxb. (fl. ind. 1, p. 26; ed. Carey, 1, p. 26; —Spreng. l. c.—
    Tommon-itam, Rumph. 5, p. 169.) কাৰ হৰণা Kalo-huldee. 4. Moluccas. Bengal, (Serampore.) Fl. largish, red-yellow, with a crimsonish tuft, May; fr. 0.
  - comosa, Roxb. (fl. ind. 1, p. 29; ed. Carey, 1, p. 29;—Roscoe Scit.;
     Spreng. l. c.—C. latifolia, Roscoe Scit.?)
     Burma. Fl. yellow-rose-coloured, with a bright rosy red truft, May; fr. 0.
  - 7. elata, Roxb. (fl. ind. 1. p. 25; ed. Carey, 1, p. 25;—Roscoe Scit.;—Spreng. l. c.;—J. Grah. Cat. B. pl. p. 209.) 4. Burma. Fl. large, white, tinged with rose and yellow, the tuft white at base, purple above, March and April; fr. 0.
  - 8. ferruginea, Roxb. (fl. ind. 1, p. 27; ed. Carey, 1, p. 27;—Roscoe Scit.;—Spreng. l. c.—C. amarissima, Roscoe Scit.) Bengal. Fl.

-}

- large, red deep-yellow, with the tuft bright crimson, April and May; fr. 0.
- latifolia, Roscoe. (Scit.; Spreng. syst. c. p. p. 7.)
   Native place in India unknown. Fl. greenish-yellow, with a crimson tuft, R. S.; fr. 0. Near C. zanthorhiza.
- 10. leucorrhiza, Roxb. (fl. ind. 1, p. 30; ed. Carey, 1, p. 30;—Roscoe Scit.;—Spreng. syst. 1, p. 10.) 4. Forests of Behar. Fl. rosy-yellow, with a pale rosy tuft, R. S.; fr. 0. Tikur, mentioned under No. 8 is made of the roots of this plant, at Bhaugulpore, by rubbing them on a stone or beating them in a mortar; after which they are rubbed in water with the hand and strained through a cloth, the fecula having subsided, the water is poured off, and the Tikur dried for use. (Rosb.)
- ornata, Wall. Pegu. Habit of C. comosa and equally beautiful. In H. C. G. Unknown to us.
- 12. rubescens, Roxb. (fl. ind. 1, p. 28; ed. Carey, 1, p. 28;—Roscoe Scit.;—Spreng. l. c.) 4. Bengal. Fl. small, bright-yellow-purple, fragrant, with pale-rose-coloured tuft, April and May; fr. 0. The pendulous tubers of this species, as well as of C. leucorrhiza, angustifolia and others, yield an excellent fecula or strach, which forms a good substitute for the West Indian Arrowroot, a product of Maranta arundinacea, L. It is sold in the bazars of Benares, Chittagong, and Travancore, and is eaten by the natives. A very good kind, called Tikur, is also made at Patna and Bhaugulpore from the tubers of Batatas edule, Choisy. (Roxb. Royle.)
- xanthorrhiza, Roxb. (fl. ind. 1, p. 25; ed. Carey, 1, p. 25; —Spreng.
   c.) 4. Amboyna. Fl. red, with the tuft large, purple or crimson, April and May; fr. 0.
- 14. Zedoaria, Roscoe. (Scit.;—Spreng. o. c. p. 10;—B. M. 37, t. 1546, excl. syn.—not Roxb.—Curcuma Zerumbet, Roxb. ft. ind. 1, p. 20; ed. Carey, 1, p. 20; Corom. 3, t. 201;—J. Grah. Cat. B. pl. p. 209, excl. syn. Willd. Pers. Lam. and Ainslie.—Amomum Zerumbet, Kön.;—Retz. obs. 3, p. 55; not Willd.—Rheed. 11, t. 7;—Rumph. 5, t. 68.) [Shutee. ] Kakhura. 2. Chittagong. Fl. largish, deep-yellow, with a large white or pale straw-coloured, at the top bright crimson tuft, April; fr. 0. According to Banks, Roxburgh and Roscoe this plant yields the Long Zedoary of the shops. The dry root, powdered and mixed with the powdered wood of Cæsalpinia Sappan, L. (Bukkum) makes the red powder, called Abeer or Shagoo, which is copiously thrown about by the natives during the Hooli, or Hindoo holidays in the month of March. The root is also used medicinally amongst the natives. (Roxb.)
- 15. Amada, Roxb. (fl. ind. 1, p. 33; ed. Carey, 1, p. 33;—Roscoe Scit.;—Spreng. l. e;—J. Grah. Cat. B. pl. p. 209.—Tommon munga, Rumph. 5, p. 169,) WINTH Amoda. D: Mango-ginger. 4. Guzerat. The Concans.

- Bengal, (Serampore.) Fl. smallish, white or pale-yellow, with a deeper yellow line running down the middle of the lip. The tuft, pale purple or rose-coloured, latter part of R. S.; fr. 0. Root used medicinally by the Natives.
- 16. cordata, Wall. (pl. as. rar. 1, t. 10. not Roxb.) A Mountains near the Irawaddi. Fl. large, yellow, with violet tuft, July and Aug.; fr. 0. Allied to C. viridiflora.
- grandiflora, Wall. 4. "Native place unknown. Like No. 15." (Carey's MSS.) This plant we have not seen.
- 18. longa, Roxb. (fl. ind. 1, p. 32; ed. Carey, 1, p. 32;—Spreng. l. c.;—B. Reg. 11, t. 886;—J. Grah. Cat. B. pl. p. 209.—Amomum Curcuma, Gmel.;—Jacq. hort. vind. 3, t. 4;—Rheed. 11, t. 11;—Rumph. 5, t. 67.) Each Huldee. Long-rooted Turmeric. Common Turmeric. 4. Cultivated all over India, where it is much used for culinary purposes. The Javanese make an ointment with the pounded roots, and rub it all over their bodies, as a preservation against cutaneous diseases. (Rumph.) The Hindoos use it as a favorite application to recent wounds and bruises, leech-bites, &c. Fl. largish, whitish, with a faint tinge of yellowish, the tuft greenish-whitish, R. S.; fr. 0.
- montana, Roxb. (Corom. 2, t. 151; fl. ind. 1, p. 35; ed. Carey, 1, p. 34.—Spreng. l. c.)
   Circar Mountains. Fl. green, with a rose-coloured tuft; July and Aug.; fr. 0.
- parviflora, Wall. (pl. as, rar. 1, t. 57;—J. Grah. Cat. B. pl. p. 210.)
   Forests on the banks of the Irawaddi, near Prome. Fl. small, white, with a violet lip, and a small, white tuft, Feb.; fr. 0.
- 21. petiolata, Roxb. (fl. ind. 1, p. 37; ed. Carey, 1, p. 36;—Roscoe Scit.;—Spreng. l. c.;—J. Grah. Cat. B. pl. p. 210.—C. cordifolia, Roxb. H. B. p. 2; not cordata, Wall.) 24. Pegu. Fl. largish, deep-yellow, fragrant, with a deep purple or lilac-coloured tuft, August; fr. 0.
- 22. plicata, Wall. 4. Prome. Rangoon. Fl. largish, white, with a green tuft, R. S.; fr. 0. "Like C. Amada." (Carey's MSS.)
- 23. reclinata, Roxb. (fl. ind. 1, p. 36; ed. Carey, 1, p. 35;—Spreng. 1. c.) আৰু হ্ৰম্ Ambo-huldee. 4. Hindoosthan. Fl. small, dull darkpink, the lower segment of the inner limb tinged with yellow, and the tuft deeply coloured, R. S.; fr. 0.
- 24. strobilina, Wall. (Cat.—C. strobilina, Wall. MSS. in 1826;—J. Grah. Cat. B. pl. p. 210.) 4. Burma. Fl. unknown to me.
- 25. viridiflora, Roxb. (fl. ind. 1, p. 34; ed. Carey, 1, p. 34;—Spreng. syst. 1, p. 11;—J. Grah. Cat. B. pl. p. 210.—Tammon giring. Rumph. 5, p. 169.) 24. Sumatra. Fl. small, very pale-yellow, with a green tuft, July and Aug.; fr. 0.
- 26. Roscoeana, Wall. (pl. as. rar. 1, t. 9.—C. coccinea, Wall. MSS. in 1826, according to Carey's MSS.) 24. Pegu. Tenasserim. Fl. largish, pale-yellow, with a large, bright scarlet tuft, R. S.; fr. 0.

- DISCHEMA, (Hitchinia, Wall. in Trans. med. and phys. soc. Calcutta, vol. 7, part 2, 1835; not Hitchenia (misprinted Hutchinia,) Wight. and Arn. contrib. ind. bot. London, 1834.)
  - 1. glaucum, (Hitchenia glauca, Wall. o. c. p. 216.—Curcuma glauco-phylla, Wall. Cat.;—J. Grah. Cat. B. pl. p. 210.) 4. Hills on the banks of the Irawaddi, near Prome. Fl. large, white, and fr. from June to Sept.
- Kämpfera, L. (Spreng. syst. 1, p. 8, No. 9;—Endl. gen. pl. 1, p. 228.
  - 1. Galanga, L. (Spreng. o. c. p. 10;—Roscoe Scit.;—B. M. 22, t. 850;—Roscb. fl. ind. 1, p. 15; ed. Carey, 1, p. 14;—J. Grah. Cat. B. pl. p. 208.—Alpinia sessilis, Kön.;—Retz. obs. 3, p. 62.—Rheed. 11, t. 41;—Rumph. 5, t. 69, f. 2.) 5 3 3 3 Chundro-moola. 4. Moluccas. Cochin China. Both Peninsulas of India. Bengal. Much cultivated in gardens. Fl. large, white, the lip at base marked with two dark-purple spots separated by a broad sulphur-coloured line, R. S.; fr. C. S. Roots fragrant, of a somewhat warm, bitterish, aromatic taste. The natives use them both as a perfume, and medicinally. (Roscb.)

  - 3. Rosburghiana, Schult. (suppl. mant. 1, p. 33.)
  - 4. angustifolia, Roxb. (fl. ind. 1, p. 17; ed. Carey, 1, p. 16;—Roscoe Scit.;—Jacq.—Roscb.—Redout. lil. pl. 7, t. 389;—Spreng. syst. 1, p. 10.) 4. Bengal. was fulfile Mudun-nirbishi. Hind. Kanjon-boora. Fl. large, white, faintly purple tinged towards the apex, with the lip lilac, and at the middle dark-purple, June and July; fr. 0. Root used as a medicine for cattle by the Bengalees.
  - 5. pandurata, Roxb. (A. ind. 1, p. 18; ed. Carey, 1, p. 17;—Spreng. l. c.;—Roscoe Scit.;—B. Reg. 2, t. 174;—B. Cab. t. 587;—J. Grah. Cat. B. pl. p. 208.—K. ovata, Roscoe in Linn. soc. trans. 8, p. 351, and 11, p. 274.—Curcuma rotunda, L.—Rheed. 11, t. 10.—Rumph. 5, t. 69, f. 1.) 4. Java. Sumatra. The Concans. Guzerat. Moluccas. Fl. large, whitish-pale rose-coloured, with the lip striated in the centre, and deep purple round the margin, August; fr. 0.
  - ovalifolia, Roxb. (fl. ind. 1, p. 19; ed. Carey, 1, p. 18; Corom. 3,
     278;—Roscoe Scit.;—Spreng. l. c.;—J. Grah. Cat. B. pl. p.
     208.)
     Peninsula of Malacca. Fl. large, white, with the lip purple its claw purple streaked, on a yellow ground, July; fr. 0.
  - 7. marginata, Carey. (Roscoe Scit.;—Spreng. syst. c. p. p. 7.) 4. Burma. Fl. large, white light-purplish, with the lip bright purple, and at the base darker shaded, June and July; fr. 0.

- 8. candida, Wall. (pl. as. rar. 1, t. 56;—J. Grah. Cat. B. pl. p. 208.)

  4. Martaban, near Amherst and Moulmein. Fl. large, fragrant, white, with the middle of the limb yellowish. Root not aromatic. Fl. the largest of the genus. (Wall.) Has been introduced into H. C. G.
- 9. Roscoeana, Wall. (Cat.—B. Reg. 14, t. 1212.) 4. Mountains near Ava. Fl. large, inodorous, white, towards the base yellowish, R. S.; fr. 0. 10. parviflora, Wall. (Cat.) 4. Banks of the Attran River. Fl. small, purplish-white, R. S.; fr. 0.
- \* Zingiber Missionis, Wall. 4. Travancore.—Z. Mjoga, Roscoe. 4. Japan.—Z. dubium, Afzel. 4. Sierra Leona.—C. longifolia, Roxb. 4. Hb. Heyne.—C. caulina, J. Grah. 4. Mahableshwur.—C. Grahamiana, (C. pseudo-montana, J. Grah.) 4. Salsette.

B. AMOMER.

(Amoma, Bl.;—Endl. gen. pl. 1. p. 223.)

- Амомин, L. (Spreng. syst. 1, p. 4, No. 11;—Endl. gen. pl. l. c.)
  - Cardamomum, L. (Spreng. syst. 1, p. 11;—Rosb. fl. ind. 1, p. 37;
     ed. Carey, 1, p. 37; Corom. 3, t. 227;—Cardamomum minus, Rumph.
     t. 65, f. 1.) 4. Sumatra. Moluccas. Attran teak forests. Fl. middle-sized, pellucid, the middle lobe of the lip yellow, with two rosy lines leading up to it from the mouth of the tube. In H. C. G. fl. April. (Rosb.) Seeds agreeably aromatic, and by the Malays used for the true Malabar Cardamum. (Rosb.)
  - 2. angustifolium, Sonner. (It. 2, t. 137;—Lam. encycl. 1, p. 132;—Spreng. l. c.;—Roxb. fl. ind. 1, p. 39; ed. Carey, 1, p. 38.) 2. Madagascar. Fl. pretty large, spicy fragrant, blood-red yellow. In H. C. G. fl. at various times of the year. Every part of the plant, when bruised or wounded, diffuses a strong, but pleasant aromatic smell. (Roxb.)
  - sculeatum. Roxb. (fl. ind. 1, p. 40; ed. Carey, 1, p. 39;—Spreng. l. c.;—Roscoe Scit.)
     Malay Archipelago. Fl. deep orange, the lip marked with crimson spots down the middle on the inside, April and May; fr. Oct. and Nov.
  - 4. maximum, Roxb. (fl. ind. 1, p. 41; ed. Carey, 1, p. 41;—Spreng. 1. c.;—B. Reg. 11, t. 929.) 4. Malay Islands. In H. C. G. fl. H. S.; fr. R. S. Seeds of a warm, pungent, aromatic taste, not unlike that of Cardamuns, but by no means so grateful. (Roxb.)
  - 5. dealbatum, Roxb. (fl. ind. 1, p. 43; ed. Carey. 1, p. 42;—Spreng. l. c.) 4. Chittagong. Silhet. Fl. large, white, with the middle of the lip yellow, March and April; fr. Sept. and Oct. Seeds insipid. (Ross.)
  - 6. subulatum, Roxb. (fl. ind. 1, p. 44; ed. Carey, 1, p. 48;—Corom. 3, 1. 277;—Spreng. 1. c,) বজাৰী এলাচী Bungali-elachee. 4. Khassya Mountains. Fl. large, yellow, March and April; fr. R. S.

1

- 7. aromaticum, Roxb. (f. ind. 1, p. 45; ed. Carey, 1, p. 44;—Spreng. l. c.)

  (MING ANTEL Morang-elachee. Morang Mountains. Fl. middle-sized, pale-yellow, the lip tinged with red down the middle, H. S.; fr. Sept. Seeds spicy, by the natives used for medicinal, and other purposes. (Roxb.)
- sericeum, Roxb. (fl. ind. 1, p. 46; ed. Carey, 1, p. 45;—Spreng. l. c.)
   Khassya Mountains. Fl. large, white, the centre of the lip variegated with pink veins on a yellow ground, R. S. (Roxb.)
- 9. corynostachyum, Wall. (pl. as. rar. 1, t. 58.) 4. Teak Forests along the rivers of Martaban. Fl. large, white, with the centre of the lip yellow, R. S. Introduced in the garden here in 1810. (Carey.)

# ELETTARIA, Rheed. (Endl. gen. pl. 1, p. 223.)

- 1. Cardamomum, White and Maton. (Linn. soc. trans. 10, p. 254.—Alpinia Cardamomum, Roxb. fl. ind. 1, p. 70; ed. Carey, 1, p. 68; Corom. pl. 3, t. 226;—J. Grah. Cat. B. pl. p. 206;—Spreng. syst. 1, p. 14.—Amomum repens, seu Cardamomum, Wood. 2, p. 365, t. 131.—A. repens, Roscoe;—Willd.;—Sonner.—A. racemosum, Lam.—Cardamomum minus, Pharm. lond. and edin.—Cardamomum, Buch. journ. Mysore, 2, p. 336, 510; 538, and 3, p. 225.—Elettaria, Rheed. 11, t. 4, 5.) ANTERINGE. ANTERIA Elaüch. ANTERIA Elachee. 4. Hilly parts of Malabar and Travancore. Introduced at Poway in Salsette. Cultivated about Soonda Soopa, south of Dharwar. Fl. large, pale greenish-white, with the lip marked chiefly in the centre with purple-violet stripes. Was introduced into H. C. G. in 1809, but had not fl. up to 1814. Produces the well-known Cardamums.
- 2. punicea, Schult. (Mantissa.—Alpinia punicea, Rosb. fl. ind. 1, p. 73; ed. Carey, 1, p. 71:—Spreng. syst. 1, p. 15.) 4. Sumatra. Fl. large, crimson, March and April; fr. 0.
- 3. costata, (E? Cardamomum medium, Schult. Mant.—Alpinia costata, Rozb. Corom. 3, t. 252.—A. Cardamomum medium, Rozb. fl. ind. 1, p. 74; ed Carey, 1, p. 72.—A. media, Spreng. syst. 1, p. 14.) 2. Khassya Mountains. Fl. large, red, fragrant, June; fr. Sept.

# ORDER CCXXVI.—MARANTACEÆ, Lindl. Nat. Syst. p. 324.

#### THE ARROW-ROOT TRIBE.

- "While the Ginger-tribe is valued for its aromatic, heating principle, this tribe is esteemed on account of the fæcula, which abounds in the rhizoma and root of both tribes, being destitute of that principle. It is, therefore, collected as a delicate article of food, from Maranta arundinacea, L., M. Alloya, Jacq., &c. in the W. Indies, and from M. ramosissima, Wall., in the East." (Lindl.)
- PHRYNIUM, Willd. (Spreng. syst. 1, p. 3, No. 5;—Endl. gen. pl. 1, p. 226.)
  - 1. spicatum, Roxb. (fl. ind. 1, p. 5; ed. Carey, 1, p. 5;—Roscoe Scit.;
    —Spreng. syst. 1, p. 8.) 4 Pegu. Fl. small, whitish, April and May; fr. 0.
  - imbricatum, Roxb. (fl. ind. 1, p. 6; ed. Carey, 1, p. 6; —Spreng. l. c.)
     Chittagong. Fl. small, pale rose-coloured, March and April; fr. August.
  - 3. parviflorum, Roxb. (fl. ind. 1, p. 7; ed. Carey, 1, p. 7;—Roscoe Scit.;—Spreng. L. c.) 4. Khassya Mountains. Assam. Fl. very small, yellow, R. S.; fr. C. S.
  - capitatum, Willd. (Spreng. l. c.; —Roxb. fl. ind. 1, p. 8; ed. Carey, 1, p. 7;—J. Grah. Cat. B. pl. p. 212.—Phyllodes placentaria, Lour.—Rheed. 11, t. 34.)
     Cochin China. Chittagong. Silhet. Assam. Fl.

- small, in the morning rose-coloured, becoming purple by the evening, R. S.; fr. C. S. In Cochin China eatables are rolled up in the leaves and so boiled, to give them colour, and a grateful flavour. (Lour.)
- 5. macrostachyum, Wall. (Cat.) 4. Rangoon. Tavoy. Introduced in 1827.
  Unknown to us.
  - 6. setosum, Roscoe. (Scit.) Brazil.

Fl. largish, pure white, H. S.; fr. July and August. \*\*Philip Sectul-patee, O: Mats made of the split stems of this plant, being smooth and particularly cool and refreshing, are well known every where in India.
  - 4. virgata, Wall. (Cat.—Phrynium virgatum, Roxb. fl. ind. 1, p. 4; ed. Carey, 1, p. 4;—Spreng. l. c.) 4. Mountains between Travancore and Tinnevelly. Courtallum. Fl. smallish, pure white, the two longest of the inner segments yellow-margined, R. S.; fr. C. S.
  - bicolor, Ker. (B. Reg. 10, t. 786; Spreng. syst. c. p. p. 5.—B. Cab. 10. 921.)
     Brazil. Has been cultivated in the garden here for many years, without flowering.
  - CALATHEA, G. F. W. Meyer. (Spreng. syst. 1, p. 3, No. 2;—Endl. gen. pl. 1, p. 227.)
    - zebrina, Lindl. (Maranta Zebrina, Sims.; B. M. 44, t. 1926;—B. Reg. 5, t. 385;—J. Grah. Cat. B. pl. p. 212.—Phrynium zebrinum, Roscoe Scit.)
       Brazil. Fl. large, beautifully purple. Was introduced in 1824, but we do not know, whether it flowered. Has also been introduced into H. C. G. Fl.?
    - 2. flavescens, Lindl. (B. Reg. 11, t. 932; Spreng. syst. c. p. p. 5.) 4. Rio Janeiro. Introduced in 1841.

- CANNA, L. (Spreng. syst. 1, p. 3, No. 1;—Endl. gen. pl. 1, p. 227.) Indian Shot.
  - 1. Lamberti, Lindl. (B. Reg. 6, t. 470;—Spreng. syst. 1, p. 7, and p. 9.

    —C. indica, Ruiz and Pav.; not L.) 2. Peru. Introduced in 1841.
  - patens, Roscoe. (Scit.; —Spreng. l. c. and p. 9; —B. Reg. 7, t. 576.)—
     c. indica β. patens. Ait.—C. indica, Curt. B. M. 13, t. 454, not L. and excl. syn.)
     St. Helena? Fl. large, calyx pale-green; exterior limb of the corol in three yellow-greenish segments; upper lip of the interior limb deep red, lower lip yellow with red spots, R. S.
  - coecinea, Roscoe. (Scit.;—Spreng. syst. l. c.—C. indica γ. coecinea, Willd.—C. rubra (indica γ. coecinea,) Willd.—C. speciosa, major, Hegetschweiler Com. bot. t. 1, f. 7.)
     S. America. Fl. large; calyx pale-red; outer limb of the corol flesh-coloured; upper lip of the inner limb scarlet, lower lip yellow with scarlet spots. H. and R. S.; fr. C. S.
  - lutea, Roscoe. (Spreng. l. c. and p. 9;—B. M. 46, t. 2085;—J. Grah. Cat. B. pl. p. 211, excl. syn. B. Reg.—C. indica, β. lutea, Ait.)
     S. America? Fl. large, yellow, with large brownish-rush-coloured spots, R. S.
  - 5. gigantea, Redouté. (Lil. 331;—B. Reg. 3, t. 206;—B. M. 49, t. 2316;—Spreng. l. c. under C. patens.—C. latifolia, Roscoe;—Spreng. o. c. p. 9;—J. Grah. Cat. B. pl. p. 211.) 2. S. America. Fl. very large, scarlet, C. S.
  - 6. polymorpha, Lodd. (Bot. Cab.) 4. S. America. Has been introduced into the garden here. Not known to us.
  - 7. limbata, Roscoe. (Scit.;—B. Reg. 10, t. 771;—Spreng. syst. 1, p. 9.
    —C. auro-vittata, Lodd. B. Cab.) 4. Brazil. Fl. large; calyx palegreen; outer limb of corol pale-yellow; upper lip of the inner limb
    bright scarlet with orange margins; lower lip red-spotted, Feb. and
    March.
  - 8. speciosa, Roscoe. (B. M. 49, t. 2317;—B. Reg. 15, t. 1276;—J. Grah. Cat. B. pl. p. 211;—Spreng. syst. 1, p. 9.—C. nepalensis, Wall. Cat.;—J. Grah. o. c. p. 212.) 4. Nepal. Fl. large; calyx bright-red; outer limb of the corol deep-red; upper lip of the inner limb bright-red with yellow claws; lower lip yellow at base, red towards apex, nearly the whole year; fr. C. S.
  - 9. indica, L. (Rozb. fl. ind. 1, p. 1; ed. Carey, 1, p. 1;—J. Grah. Cat. B. pl. p. 211; excl. syn. Ait., Roscoe, B. Cab., B. Reg., and B. M.—C. orientalis, Roscoe Scit.—C. chinensis, Willd.;—Rheed. 11, t. 43; Rumph. 5, t. 71, f. 2.) 可知 对意识 Lal-surbo-juya. 4. Common all over India. Fl. large, bright scarlet, and fr. nearly throughout the year.
    - β. flava, Roxb. (l. c.—C. orientalis, β. flava, Roscoe Scit.) C 

      π σ σ Shwet-surbo-juya. Fl. pale-yellow. Equally common with a.

- 10. denudata, Roscoe. (Scit.; Spreng. syst. c. p. p. 5.) 4. Brazil. Introduced in 1821. Unknown to us.
- 11. pallida, Roscoe. (Scit.; —Spring. syst. c. p. p. 5.) 4. Barbadoes. Fl. large, pale-yellow, with orange spots, nearly throughout the year; fr. C. S.
- 12. pedunculata, Roscoe. (Scit.; —Spreng. syst. 1, p. 9, excl. syn. Willd. and c. p. p. 5; —B. M. 49, t. 2323.) 4. Brazil? Fl. large, orange-coloured, C. S.

ORDER CCXXVII.—MUSACEÆ, Agardh.—Lindl. Nat. Syst. p. 326.

#### THE BANANA TRIBE.

Stemless plants, or nearly so, by Lindl. referred to 4 genera. Of these, Spreng. syst. and Loud. Hort. Brit. new edit. enumerate 12 species for S. America, and the West Indies; 10 for S. Africa; 2 for China; 1 for Madagascar; and 1 for Mauritius.—In the E. Indies have been discovered 12 species of Musa; and 1 of Heliconia;—all except Musa nepalensis, natives of Tropical India.—Plantains are well known to every-body.

A. HELICONIER, A. Rich. (Endl. gen. pl. p. 228.)

- Heliconia, L. (Spreng syst. 1, p. 524, No. 956; Endl. gen. pl. p. 228.)
  - 1. buccinata, Roxb. (A. ind. 1, p. 670; ed. Carey, 2, p. 494;—Spreng. syst. c. p. p. 109;—J. Grah. Cat. B. pl. p. 213.—H. indica, Lam.; partly.—Folium buccinatum, Rumph. 5, t. 62, f. 2.) 4. Moluccas. Fl. largish, pale-yellow, H. S. (Roxb.) In the garden here it has not fl. during the last 12 years.
  - 2. brasiliensis, Hook. (Exot. fl. t. 190;—Spreng. syst. c. p. p. 109.) 4. Brazil. Introduced in 1841.
  - 3. bicolor, Benth. 4, Brazil.

## B. RAVENALËÆ.

(Uraniëæ, Rich.; Endl. gen. pl. p. 228.)

- STRELITZIA, Banks. (Spreng. syst. 1, p. 524, No. 955; —Endl. l. c.)
  - ovata, Dryand. (Spreng. syst. 1, p. 833.—B. Reginæ, Curt. B. M. 3, t. 119, 20, not Ait.)
     C. G. H. Fl. very large, bright orange, with a beautifully azure nectary, C. S.; fr. 0.
  - juncea, Lk. (S. parvifolia, Dryand. β. juncea, B. Reg. 6, t. 516.)
     C. G. H. Fl. very large, orange-coloured, with the nectary bluish-purple, Oct.; fr. 0.
- Musa, Tournef. (Spreng. syst. 1, p. 524, No. 954;—Endl. gen. pl. 1, p. 228.) Plantain Tree.
  - 1. paradisiaca, L. (Spreng. syst. 1, p. 833.—M. paradisiaca,  $\beta$ . sapientum, Bertol.—M. sapientum, Roxb. fl. ind. 1, p. 663; ed. Carey, 2, p. 484; Corom. 3, t. 275;—J. Grah. Cat. B. pl. p. 212.—Rheed. 1, t. 12, 13, 14;—Rumph. 1, t. 60.) 季町 Kula. Cultivated Plantain. 對 季町 Ram-Kula. Wild Plantain. Fl. large, yellowish-whitish, and fr. throughout the year. A native of the E. Indies, cultivated every where within the Tropics. The numerous varieties we have in vain tried to put into some order. The attempt made for this purpose, in Schult. tom. 8, p. 1289-92, appears to us only to have increased the confusion.
  - 2. rosacea, Jacq. (Hort. Schönbr. 4, t. 445;—Spreng. l. c. and c. p. 109;—B. Cab. t. 615;—B. Reg. 9, t. 706, A. B.—M. ornata. Roxb. fl. ind. 1, p. 666; ed. Carey, 2, p. 488.) 4. Chittagong, &c.

- Cultivated at the Mauritius. Fl. large, purple yellow-white, and fr. nearly the whole year.
- superba, Roxb. (fl. ind. 1, p. 667; ed. Carey, 2, p. 489; Corom. 3, t. 223;—Spreng. o. c. p. 833.)
   Dindygul. Fl. large, pale-coloured, R. S.; fr. C. S.
- 4. nepalensis, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 492;—Spreng. syst. c. p. p. 109, under M. glauca.—Schult. 8. p. 1295.) 4. Smaller Mountains of Nepal, in dense shady forests. Fl. large, yellowish. Has been cultivated for years in the garden here, without flowering. The Nepalese eat the fruit, though it contains little else than hard seeds. (Wall.)
- glauca, Roxb. (fl. ind. 1, p. 669; ed. Carey, 2, p. 490;—Spreng. syst.
   p. 833.)
   Pegu. Fl. like those of No. 1, May; fr. Oct. and Nov.
- 6. testilis, Nees.—(Schult. 8, p. 1297;—Roxb. H. B. p. 19.—Musa seminifera, var. 1. Lour.) Manilla Hemp. 4. Philippines. Has been cultivated for many years in the garden here, without flowering. The leaves yield a most valuable flax, from which some of the finest muslins are prepared.
- coccinea, Andr. (B. Repos. 1, t. 47;—B. M. 38, t. 1559;—Red. lil. t. 307-8;—Spreng. syst. 1, p. 833;—Roxb. fl. ind. 1, p. 665; ed. Carey, 2, p. 487.)
   China. Fl. large, scarlet, yellow-tipped, and fr. nearly the whole year. (Roxb.)
- 8. rubra, Wall. (not Hortul.) 4. In H. C. G.—Banks of the Irawaddi.? 9. chinensis, Swt. (M. Cavendishii, Paxt. Bot. Mag. 3, 51.) 4. China. In H. C. G.
- RAVENALA, Adans. (Endl. Nov. gen. 1, p. 228.) Traveller's tree.
  - 1. madagascariensis, Sonner. (voy. 2, p. 223, t. 124-126;—Poir. enc. meth. 6, p. 80.—Jacq. hort. schönbr. 1, t. 93.—Schult. 8, p. 1299.—Urania speciosa, Willd.;—Spreng. syst. 2, p. 115.;—Roxb. fl. ind. 2, p. 114.—U. Madagascariensis, Raüschel.) 5 Madagascar. Fl. large, white, inodorous, Sept. and Oct.; fr. May, June and July. While in blossom the spathes are all completely filled with clear gelatinous matter.
  - \* Heliconia Bihai, Swz. 4. W. Indies.—H. caribea, Lam. 4. W. Indies.—H. Ballia. Rich. 4. Maranhao.—H. humilis, Jacq. 4. Caraccas.—H. psittacorum, Willd. 4. W. Indies.—H. Swartziana, Röm. and Sch. (H. psittacorum, β. B. M. 14, t. 502.) 4. Jamaica.—H. hirsuta, Röm. and Sch. 4. S. America.—H. pulverulenta, Lindl.; B. Reg. 19, t. 1648. S. America.—Strelitzia augusta, Thunb. 4. C. G. H.—S. reginæ, Ait. 4. C. G. H.—S. humilis, Lk. 4. C. G. H.—S. farinosa, Ait. 4. C. G. H.—Musa maculata, Jacq. 4. Mauritius.—M. Berteroniana, Colla. 4. Moluccas.—M. Balbisiana, Colla. 4. Amboyna.—M. acuminata, Colla. 4. Amboyna.

# ORDER CCXXVIII.—AMARYLLACEÆ, (AMARYLLIDACEÆ, Lindl. Nat. Syst. p. 328.)

#### THE NARCISSUS TRIBE.

Bulbous, sometimes fibrous-rooted herbs, occasionally with a tall, cylindrical woody stem, by Lindl. referred to 67 genera. A very few are found in N. Europe, or the same parallel. These are plants of the genera Narcissus and Galanthus. As we proceed south, they increase. Pancratium appears on the shores of the Mediterranean; Crinum, in the E. Indies; Hymenocallis in the W. Indies. Hæmanthus is found for the first time with some Crinums on the Gold Coast. Hippeastra show themselves in countless numbers in Brazil, and across the whole Continent of S. America; and finally, at the Cape of Good Hope the maximum of the order is beheld in all the beauty of Hæmanthus, Crinum, Clivia, Cyrtanthus, and Brunswigia. A few are found in New Holland, the most remarkable of which is Doryanthes (Lindl.) The E. Indian Amaryllaceæ amount, according to our materials to 25 species, viz. 8 of of Curculigo; 1 of Hypoxis; 4 of Pancratium; 11 of Crinum; and 1 of Eurycles.

"One of the few monocotyledonous orders in which any poisonous properties are found. These are principally apparent in the viscid juice of the bulbs of Hæmanthus toxicarius, and some neighbouring species, in which the Hottentots are said to dip their arrow-heads. The bulbs of Narcissus poeticus have for ages been known as emetic; and it has recently been shewn that a similar power exists in Narcissus Tazetta, odorus, and Pseudonarcissus, as well as in Pancratium maritimum. DC. considers the principle found in Amaryllidaceæ analogous to that of the Squill." (Lindl.)

- A. Hypoxidem, R. Br.; Endl. gen. pl. 1, p. 173.
- Curculigo, Gärtn. (Spreng. syst. 2, p. 6, No. 1207;—Herb. amaryll. p. 83;—Endl. gen. pl. 1, p. 173.—Molineria, Herb. o. c. p. 84.)
  - 1. orchioides, Gärtn. (fr. 1, p. 63, t. 16, f. 11;—Rosb. Corom. 1, t. 13; fl. ind. 2, p. 144;—J. Grah. Cat. B. pl. p. 215;—Spreng. syst. 2, p. 60;—Herb. o. c. p. 83;—B. M. 27, t. 1076;—Rheed. 12, t. 59;—Rumph. 6, t. 54, f. 1.) 可可 可 Tal-loora. 4. Moluccas. Coromandel. Concans. Bengal, (Serampore.) Silhet. Assam. Kemaon. Fl. smallish, yellow, more or less throughout the year.
  - 2. plicata, Dryand. (Spreng. l. c.; —Herb. l. c. —Hypoxis plicata, Thunb. —Gethyllis plicata, Jacq. hort. schönbr. 1, t. 88.) 4. C. G. H.  $\beta$ . glabra (B. Reg. 4, t. 345.—Forbesia plicata, Ecklon. topogr.) 4.
    - C. G. H. Fl. smallish, yellow. Introduced in 1841.
  - 3. recurvata, Dryand. (Spreng. l. c.;—Rosb. fl. ind. 2, p. 145;—B. Reg. 9, t. 770.—Molineria recurvata, Herb. o. c. p. 83.) 4. Coromandel. Silhet. Nepal. Fl. 9 lines in diameter, yellow, R. S.; fr. C. S.

- 4. sumatrana, Roxb. (fl. ind. 2, p. 146;—B. Cab. t. 443.—Molineria sumatrana, Herb. l. c.;—Rumph. 6, t. 53.) 4. Moluccas. Sumatra. Penang. Fl. like those of No. 3, March and April; fr. 0.
- Hypoxis, L. (Spreng. syst. 2. p. 6, No. 1206;—Herb. amaryll. p. 84;— Endl. gen. pl. 1, p. 174.)
  - ovata, Thunb. (Spreng. o. c. p. 59;—Herb. l. c.;—B. M. 25, t. 1010.)
     C. G. H. Fl. 9 lines in diameter, externally green, internally yellow, June; fr. 0.
  - stellata, L. (Spreng. l. c.;—Herb. l. c.;—B. M. 18, t. 662;—Jacq. ic. rar. 2, t. 368;—B. Repos. t. 101.—Fabricia stellata, Thunb.—Amaryllis capensis, L. sp. pl. p. 420.)
     C. G. H. Fl. very large, beautiful, scentless, yellow, with a dark-brown spot at the base of each petal, May and June; fr. 0.
  - 3. linearis, Andr. (B. Rep. t. 171; Spreng. l. c.; Herb. l. c.) 24. C. G. H. Introduced in 1841.
  - 4. obtusa, Burch. (Spreng. o. c. p. 60;—B. Reg. 2, t. 159;—Herb. L. c.) 4. C. G. H. Fl. middle-sized, bright yellow, inodorous, May and June.

  - 1. filifolia, Herb. (o. c. t. 29, f. 8.—Strumaria filifolia, Jacq. ic. rar. 2, t. 14;—Spreng. syst. 2, p. 57;—B. Reg. 6, t. 440.—Leucojum strumosum, Jacq. ic. rar. t. 361; as to the plate, not the text.) 4. C. G. H. Fl. middle-sized, white, lined with red. Introduced in 1814.
- STERNBERGIA, Waldst. and Kit. (Sprang. syst, 2, p. 6, No. 1202;—Endl. gen. pl. 1, p. 175.)
  - lutea, Ker. (Spreng. o. c. p. 57.—Amaryllis lutea, L.; B. M. 9, t. 290.)
     Spain. Sicily. Greece. Fl. large, yellow. Introduced in 1808.
     Fl.?
- HAYLOCKIA, Herb. (Endl. gen. pl. 1, p. 175.)
  - 1. pusilla, Herb. (B. Reg. 16, t. 1371.) 4. Buenos Ayres. Fl. largish, pale sulphur, externally purplish spotted, internally purple streaked. Introduced in 1841. Has not fl. yet.
- COOPERIA, Herb. (Amaryll. p. 178;—Endl. gen. pl. 1, p. 176.)
  - 1. Drummondiana, Herb. (o. c. t. 24, f. 2, 5-11, t. 41, f. 16.—C. Drummondi, Herb.;—B. Reg. 22, t. 1835.) 4. Texas. Fl. middle-sized, white, underneath red lined, with a 4½ inches long red, streaked tube. Introduced in 1841.
- ZEPHYRANTHES, Herb. (Amaryll. p. 170;—Endl gen. pl. 1, p. 176, under Amaryllis.)
  - 1. mesochloa, Herb. (l. c.; —B. Reg. 16, t. 1361.) 24. Buenos Ayres. Fl. large, half green, above white, stained with red on the outside, inodorous, R. S.; fr. C. S.
  - 2. Atamasco, Herb. (o. c. p. 171.—Amaryllis Atamasco, L.; Spreng. syst. 2, p. 49, excl. c. p. p. 132;—Rosb. H. B. p. 24;—B. M. 7. t. 239; —B. Cab. t. 1899;—Catesb. car. 3, t. 12.) 4. Carolina. Fl. large, white, in the bud outside bright red. Introduced into H. C. G. in 1798, but had not fl. up to 1814. In the garden here it has not fl.
  - tubispatha, Herb. (l. c.—Amaryllis tubispatha, B. M. 38, t. 1586, not L'Herit.)
     Blue Mountains, Jamaica. Fl. large, white, green below, inodorous, and fr. R. S.
  - carinata, Herb. (o. c. p. 173;—B. M. 52, t. 2594.—Z. grandiflora, B. Reg. 11, t. 902, as to the flower, but not the leaves and seeds.)
     Mexico. Fl. large, bright rose-coloured, inodorous, and fr. R. S.
  - 5. rosea, Lindl. Herb. (l. c.; —B. Reg. 10, t. 821; —B. M. 52, t. 2537.)
    4. Mountains of Cuba. Fl. much smaller than No. 4, deep rose-coloured, inodorous, and fr. R. S.
  - 6. sessilis, Herb. (o. c. p. 175.)
    - a. verecunda, Herb. (l. c.—Z. verecunda, Herb.—B. M. 52, t. 2583; —J. Grah Cat. B. pl. p. 215.) 4. Mexico, Fl. small white, tinged with bluish outside, inodorous, and fr. R. S.
    - β. striata, Herb. (l. c.—Z. striata, Herb.;—B. M. t. 2593.) 4. Mexico. Fl. small, streaked with red outside, inodorous, and fr. R. S.

- candida, Herb. (o. c. p. 176;—B. M. 53, t. 2607.—Amaryllis candida, Ker.;—B. Reg. 9, t. 724;—Spreng. syst. 2, t. 49, not c. p.) 4. Peru. Buenos Ayres. Fl. largish, white, with a green tube, and a purplish spathe, inodorous, and fr. R. S.
- HABBANTHUS, Herb. (Amaryll. p. 156;—Endl. gen. pl. 1, p. 176, under Amaryllis.)
  - 1. spathaceus, Herb. (o. c. p. 160.)
    - β. angustus, Herb. (l. c.—H. angustus, Herb.—B. M. 53, t. 2639.)
       24. Buenos Ayres. Fl. large, deep rose-coloured, inodorous, R. S.
  - bifidus, Herb. (o. c. p. 160;—B. M. 52, t. 2597.)
     Buenos Ayres.
     Fl. 2 inches long, purplish red, darker and lined with green underneath, R. S.
  - 3. hesperius, Herb. (o. c. p. 161.)
    - a. advena, Herb. (l. c.—Amaryllis advena, Ker.;—Spreng. syst. 2, p. 53; B. M. 28, t. 1125;—B. Reg. 10, t. 849.) 4. Chili. Fl. large, red upwards, yellowish green below, inodorous, March; fr. 0.
  - gracilifolius, Herb. (o. c. p. 165;—B. M. 51, t. 2464.)
     Maldonado, S. America. Fl. largish, pale reddish-purple, with a green tube, inodorous, R. S.; fr. 0.
  - versicolor, Herb. (o. c. p. 166;—B. M. 51, t. 2485.)
     Maldonado,
     America. Fl. 2 inches, at first rosy, afterwards white, tinged with rose, inodorous, R. S.; fr. 0.
  - f. robustus, Swt. (Brit. fl. gard. 2, t. 14;—Herb. l. c.; —B. Cab. t. 1761.
     —Amaryllis tubispatha, L'Herit, sert. angl. 9, not A. Berterii, Spreng. syst. 2, p. 49.)
     Huenos Ayres. Fl. 3½ inches, purplish pink, fading to white, inodorous, R. S.; fr. 0.
  - 7. Andersonianus, Herb. (o. c. p. 167.—H. Andersonii, Herb.;—B. Reg. 16, t. 1345;—B. Cab. t. 1677.) 4. Monte Video. Fl. largish, golden or copper coloured, with external brownish streaks, and a brownish-reddish bottom, R. S.; fr. 0.
- SPREKELIA, Heist. (Herb. amaryll. p. 133;—Endl. gen. pl. 1, p. 176, under Amaryllis.)
  - 1. formosissima, Herb. (l. c.—Amaryllis formosissima, L.; Spreng. syst. 2, p. 50;—B. M. 2, t. 47;—Roxb. H. B. p. 24;—J. Grah. Cat. B. pl. p. 215.) Jacobean Lily. 4. S. America. Fl. very large, crimson, inodorous, H. and R. S.; fr. 0.
  - 2. Dalhousieæ, Wall. 4. Perfectly white. Brazil.
- HIPPEASTRUM, Herb. (Amaryll. p. 135;—Endl. gen. pl. p. 176, under Amaryllis.)
  - 1. aulicum, Herb. (l. c.; —B. M. 61, t. 3311.—Amaryllis aulica, Ker.; B. Reg. 6, t. 444; —Spreng. syst. 2, p. 50.) 4. Rio Janeiro. Fl. very large, crimson, with the mouth of the tube green, inodorous, H. S. 3. platypetalum. (Amaryllis aulica, var. platypetala, Lindl.; B. Reg. 12, t, 1038.) 4. Rio Janeiro, more robust, with broader petals.

- γ. glaucophyllum. (Amaryllis aulica, var. platypetala, glaucophylla, Hook.;—B. M, 57, t. 2983.) 4. Rio Janeiro. Leaves glaucous.
- calyptratum, Herb. (o. c. p. 136.—Amaryllis calyptrata, Ker.;—B. Reg. 2, t. 164;—Spreng. syst. 2, p. 50.)
   Brazil. Fl. large, green tinged with faint red. Has not fl. here within our experience.
- 3. psittacinum, Herb. (l. c.; —B. M. 63, t. 3528.—Amaryllis psittacina, Ker.; —B. Reg. 3, t. 199; —Spreng. syst. 2, p. 50; —J. Grah. Cat. B. pl. p. 215.) 4. Brazil. Fl. large, green, streaked and margined with bright red, R. S.; fr. 0.
- 4. solandræflorum, Herb. (l. c.; —B. M. 66, t. 3771.—Amaryllis solandræflora, Lindl. coll. t. 11; —Spreng. syst. 2, p. 51.) 2. Guiana. Fl. very large, green and yellowish-white, inodorous, H. and R. S.
  - β. striatum, Herb. (l. c.;—B. M. 52, t. 2573.) 4. Brazil. Fl. faintly streaked externally with red.
  - γ. conspicuum, Herb. (l. c.—Amaryllis solandræflora, β. vittata. B. Reg. 11, t. 876.) 4. Fl. 10½ inches long, on the outside faintly red, streaked, with the tube purple red, inodorous, and fr. R. S.
- 5. ambiguum, Herb. (l. c.)
  - a. longiflorum, Herb. (B. M. 64, t. 3542.) 4. Lima. Has been introduced into H. C. G. and, no doubt, flowered.
- vittatum, Herb. (o. c. p. 137.—Amaryllis vittata, L'Herit; —B. M. 4,
   t. 129; —Spreng. syst. 2, p. 51; —Roxb. H. B. p. 24.)
   Lima. Fl. very large, doubly striped with dull red, March and April.
- 7. reticulatum, Herb. (l. c.—Amaryllis reticulata, L'Herit;—Spreng. syst. 2, p. 53;—B. M. 18, t. 657.) 24. Brazil. Fl. very large, purplish red, reticulated with a deeper colour, star white, March.
  - β. striatifolium, Herb. (l. c.—Amaryllis reticulata, β;—B. Reg. 5, t. 352.—A. reticulata, β. striatifolia, Simo.; B. M. 47, t. 2113.)
     Prazil. Fl. larger, paler.
- 8. barbatum, Herb. (o. c. p. 138, t. 21, f. 1.—Crinum barbatum, L. MSS.—Amaryllis dubia, L. amæn. 8, 254, excl. syn.) 4. Surinam. Fl. large, tube green, limb with a green star. Fl.?
- 9. equestre, Herb. (o. c. p. 138.—Amaryllis equestris, Jacq.;—Spreng. syst. 2, p. 50, excl. syn;—Roxb. H. B. p. 24.) Barbadoes Lily).
  - a. minus, Herb. (Amaryllis equestris, B. M. 9, t. 305;—J. Grah. Cat. B. pl. p. 215, excl. A. dubia. L.—Belladonna, Merian. surinam. t. 22.) 4. Surinam. Fl. large, bright scarlet, with a green star, H. and R. S.; fr. R. S.
  - β. majus, Herb. (l. c.—Amaryllis equestris, β. major, B. Reg. 3, t.
     234.) 4. Demerara. Fl. much larger, H. and R. S.
  - y. semiplenum, Herb. (l. c.) 4. Havannah. Bahama. Fl. half-double, H. and R. S.
- stylosum, Herb. (o. c. p. 139; —B. M. 49, t. 2278.—Amaryllis maranensis, Ker.; —Spreng. syst. 2, p. 50; —B. Reg. 9, t. 719.)
   Maran-

- ham. Fl. large, of a dull coppery flesh colour, with a greenish tube, H. and R. S.
- miniatum, Herb. (o. c. p. 403, t. 47, f. 5.—Amaryllis miniata, Ruiz. and Pav.;—Spreng. syst. 2, 50, excl. c. p. p. 133.)
   Peru. Fl. large, miniated, the tube with six fimbriated white scales at the mouth. Introduced in 1819. Fl.?
- Reginæ, Herb. (B. M. 49, app.—H. regium, Herb. amaryll. p. 139.—Amaryllis Reginæ, L.; Spreng. syst. 2, p. 50, excl. c. p. p. 133;—B. M. 13, t. 453;—Roxb. H. B. p. 24;—J. Grah. Cat. B. pl. p. 215.)
   Mexico. Fl. large, scarlet, with a green star, H. and R. S.
- 13. bulbulosum, Herb. (Amaryll. p. 139.)
  - subbarbatum, Herb. (l. c.—H. subbarbatum, Herb.—B. M. 51, t. 2475.)
     Rio Janeiro. Fl. large, bright scarlet, with a greenish sulphur-coloured star, H. and R. S.
  - B. rutilum, Herb. (o. c. p. 140.—Amaryllis rutila, Ker.; B. Reg. 1, t. 23;—Spreng. syst. 2, p. 51.) 4. Brazil. Fl. smaller, brilliant, tending to scarlet, H. and R. S.
  - γ· fulgidum, Herb. (l. c.—Amaryllis fulgida, Ker.;—B. Reg. 3, t. 226;—Spreng. syst. 2, p. 51.) 4. Brazil. Fl. larger, paler, R. S.
  - pallidum, Herb. (l. c.) 4. Brazil? Fl. like those of γ, but much paler, H. and R. S.
  - E. Simsianum, Herb. (l. c.—Amaryllis miniata, Sims.; B. M. 45, t. 1943; not Ruiz and Pav.) 4. Brazil. Fl. large, red-lead-coloured, H. and R. S.
  - ξ. acuminatum, Herb. (l. c.—Amaryllis acuminata, Ker.; B. Reg. 7.
     t. 534;—Spreng. syst. 2, p. 53.—A. acuminata, β. longipedunculata Lindl.; B. Reg. 14, t. 1188.)
     Ψ. Rio Janeiro. Fl. large, pale red with a green sulphur-coloured star, undulate, acuminate, H. and R. S.
  - n. pulverulentum, Herb. (l. c.; B. M. 49, t. 2273.) 4. Rio Janeiro, Fl. large, darker, less acuminate, H. and R. S.
  - ignescens, Herb. (o. c. p. 141.)
     Rio Janeiro? Fl. smaller, fiery orange, H. and R. S.
  - crocatum, Herb. (l. c.—Amaryllis crocata, Ker.; B. Reg. 1, t. 38;—Spreng. syst. 2, p. 53.)
     Brazil. Fl. smaller, and more undulate, than those of γ H. and R. S.

The hybrid or mixed Crosses of Hippeastrum, the names of which may be found in Herbert's Amaryllideæ, p. 144, but which it appears tedious and useless to enumerate, amount, in the garden here, to 74, nearly all presented to the late Dr. Carey by the Hon'ble and Rev. Mr. Herbert, and appearing in all their beauty during the hot and the first part of the rainy season.

Vallota, Herb. (Amaryll. p. 133;—Endl. gen. pl. 1, p. 176, under Amaryllis.)

1. purpurea, Herb. (o. c. p. 134.)

ORDER CCXXIX.—HÆMODORACEÆ, R. Br.—Lindl. Nat. Syst. p. 330;—Endl. gen. pl. 1, p. 170.

### THE BLOOD-ROOT TRIBE.

Herbs, referred to about 12 genera. Of these, Spreng. syst. enumerates 12 species for New Holland; 12 for S. Africa; (10 *Harvey*) 4 for S. America; and 4 from N. America. One species, Aletris litoralis, Herb. Kön. is mentioned in Wall. Cat., but can scarcely be of Indian origin.

"The red colour found in the roots of Dilatris tinctoria, Pursh. in N. America, where it is used for dyeing, prevails in Hæmodorum, Sm., and Wachendorfia, L." DC. (*Lindl.*)

WACHENDORFIA, Burm. (Spreng. syst. 1, p. 127, No. 178;—Endl. gen. pl. 1, p. 171.)

- 1. thyrsiflora, L. (Spreng. syst. 1, p. 169;—B. M. 27, t. 1060.) 4. C. G. H. Introduced into the garden here in March 1841, but has not fl. vet.
- brevifolia, Ker. (B. M. 29, t. 1166.)
   C. G. H. Introduced with No. 1, and has likewise not fl. yet.
- \* Hagenbachia brasiliensis, Nees. 4. Brazil.—Xiphidium albidum, Lam. 4. W. Indies.—X. coeruleum, Aubl. 4. Guiana.—Hæmodorum coccineum, R. Br. 4. Tropical New Holland.

ORDER CCXXX.—BURMANNIACEÆ, Bl.—Lindl. Nat. Syst. p. 330; —Endl. gen. pl. 1, p. 163.

Herbs, by Lindl. referred to 5 genera. Of these, Spreng. syst. assigns 4 species to Brazil; 2 to Carolina; 2 to New Holland; (1 Indian) and 1 to S. Africa. Lindl. adds Apteria setacea, Nutt. for N. America. In the E. Indies have been discovered 3-4 species of Burmannia, (Ceylon, S. Concan; New Holland; 1 from Penang; 1 from Nepal; 1 from the Peninsula of India, Röttl.); 1 of Gonyanthes, (Java); and 1 of Gymnosiphon, (Java.) "Apteria setacea is slightly bitter, and very astringent. A similar flavour, something like that of Green Tea, is discernible in Tripterella cœrulea. Nuttall." (Lindl.)

BURMANNIA, L. (Spreng. syst. 1, p. 125, No. 144;—R. Br. pr. p. 264;— Endl. gen. pl. 1, p. 164.

disticha, L. (Spreng. syst. 1, p. 145;—Roxb. Corom. 3, t. 242; fl. ind. 2, p. 117;—J. Grah. Cat. B. pl. p. 223;—Burm. zeyl. t. 20, f. 1.—B. distachya, R. Br. pr. p. 264.) ⊙ Ceylon. S. Concan. New Holland. Fl. pale blue, and fr. R S.

\* Burmannia coelestis, D. Don.; Royle ill. t. 91, f. l. 

Nepal.—B. triflora, Roxb. Penang.—B. flava, Mart. Brazil.—B. dasyantha, Mart. Brazil.—Gonyanthes candida, Bl. 

Java.—Gymnosiphon aphyllus, Bl. 

Java.

ORDER CCXXXI.—TACCACEÆ, Lindl. Nat. Syst. p. 331;—Endl. gen. pl. p. 159.

Large, perennial, tuberous-rooted herbs, belonging to 1 genus. Of this, 7 species belong to the E. Indies, (the Concans, Silhet, Chittagong, Singapore, Penang, Java, the Moluccas). Tacca pinnatifida is also a native of Madagascar, New Holland, and the South Sea Islands.

- "The great fleshy tuberous roots are filled with a nutritive fæcula resembling arrow-root, but its petioles are acrimonious. Agardh." (Lindl.)

  Tacca, Forst. (Spreng. syst. 2, p. 10, No. 1294;—R. Br. pr. p. 340;—Endl. gen. pl. 1, p. 159.
  - 1. pinnatifida, Forst. (Spreng. syst. 2, p. 118;—Schult. 7, p. 166;—R. Br. l. c.;—Endl. l. c.;—Roxb. fl. ind. 2, p. 172;—J. Grah. Cat. B. pl. p. 230;—B. Cab. t. 692.—T. pinnatifolia, Gartn. fr. 1, p. 43, t. 14, f. 2, excl. syn. Rheed. and Rumph. 5, t. 12;—Rumph. 5, t. 114.) 4. Tropical New Holland. Otaheite. Moluccas. Worlee and Parell Hills, Bombay. Throughout the Concans. Madagascar. Fl. smallish, pale green. June, July and August; fr. Oct. Root intensely bitter when raw, but yielding a great quantity of white fæcula, of which the best flower for confectionary, puddings, &c., is made. (Roxb.) In the Islands of the South Sea, where grain of every kind disappears, its place is partly supplied by Tacca pinnatifida. (Schouse.)
  - levis, Roxb. (fl. ind. 2, p. 171;—J. Grah. Cat. B. pl. p. 230.)
     Silhet. The Concans. Fl. largish, of a dark greenish grey violet colour. H. and R. S.; fr. 0.
  - integrifolia, Ker. (B. M. 36, t. 1488;—Spreng. syst. 2, p. 118;—Schult. syst. 7, p. 169;—Rosb. Corom. 3, t. 257.—T. aspera, Rosb. fl. ind. 2, p. 169.—Ataccia integrifolia, Presl.; Schult. syst. 8, p. 1653.)
     Chittagong. Fl. largish, of a greenish-purple and yellow colour, R. S.; fr. C. S.
  - 4. cristata, Jack. 4. Singapore. In 1841, introduced into the Governor General's garden at Barrackpore by Dr. Cantor. Fl.?

<sup>\*</sup> T. Rafflesiana, Jack. 4. Singapore. Penang.—T. montana, Bl. Rumph. 5, t. 115. 4. Amboyna. Java.

# ORDER CCXXXII.—IRIACEÆ. (IRIDACEÆ, Lindl. Nat. Syst. p. 382;—Endl. gen. pl. 1, p. 164.)

### THE IRIS TRIBE.

Herbs, or very seldom undershrubs, by Lindl. (adding Phalocallis, Geasine, Nemostylis, Alophia, Trifurcia, and Beatonia) referred to 45 genera. Of these, according to Spreng. syst. B. M. and B. Reg. about 36 species belong to S. America, Mexico, and the W. Indies; 36 to Europe; 16 to N. America (referring Texas to Mexico); 15 to Tauria, Caucasus, and Iberia; 12 to Siberia; 11 to New Holland and Van Diemen's Land; 4 to N. Africa; 3 to Asia Minor; 2 to Persia; 2 to Japan; 2 to the Mascarenhas Islands; 1 to Madagascar; and 1 to China. 300 species have been discovered in S. Africa; (Harvey) and 8 in the Himalayas; viz. 6 of Iris.; 1 of Pardanthus; (also a native of China) and 1 of Crocus.

The plants of this order are "more remarkable for their beautiful fugitive flowers, than for their utility. The rhizoma of some of them is slightly stimulating, as the violet-scented Orris-root, the produce of Iris florentina. The substance called Saffron is the dried stigmas of Crocus sativus; the colouring ingredient is a peculiar principle, to which the name Polychroite has been given. It possesses the remarkable properties of being totally destroyed by the action of the solar rays, of colouring in small quantity a large body of water, and of forming blue and green tints when treated with sulphuric and nitric acid, or with sulphate of iron. DC." (Lindl.) Sisyeinchium, L. (Spreng. syst. 1, p. 127, No. 170;—Endl. o. c. p. 165;—not R. Br. pr. p. 160, as to the species.)

- micranthum, Cav. (Diss. 6, p. 345, t. 191, f. 2;—Spreng. syst. 1, p. 167;—B. M. 47, t. 2116.)
   Peru. Has been cultivated in the garden here for many years without flowering.
- luteum, Fisch. (Spreng. l. c. under S. convolutum, Nocc.) 4. Guiana. Introduced in 1841.
- LIBERTIA, Spreng. (Syst. 1, p. 127, No. 174;—Endl. gen. pl. 1, p. 165.)

  1. formosa, Grah. (B. M. 61, t. 3294;—B. Reg. 19, t. 1630.) 4. Island of Chiloe. Has been introduced into H. C. G. Fl.?
- CIPURA, Aubl. (Endl. gen. pl. 1, p. 165.)
  - paludosa, Aubl. (Guian. 1, p. 38, t. 13.—Marica Cipura, Gmel. syst. nat. 118.—M. paludosa, Willd.; Spreng. syst. 1, p. 165;—B. M. 18, t. 646;—Rosb. H. B. p. 5.)
     Moist Meadows. Guiana. Fl. 10 lines pure white, May and June: fr. 0.
  - Northiana, Lindl. (Marica Northiana, Ker.;—Spreng. l. c.;—B. M. 18, t. 654;—J. Grah. Cat. B. pl. p. 214.—Moræa Northiana, Schneevogt.;—B. Repos. t. 255.—Ferraria elegans, Salish. pr. hort. p. 42.)
     Island of Raza, near the mouth of Rio Janeiro. Fl. 22 lines, pale sulphur, variegated with blue, and spotted with brownish on a yellow ground, very fragrant, R. S.; fr. 0.

     C. G. H. Introduced in March, 1841, but has not fl. yet.
- MORRA, L. (Spreng. syst. 1, p. 126, No. 166;—Endl. gen. pl. 1, p. 165.)
  - 1. ciliata, Ker. (Spreng. syst. 1, p. 163;—B. M.  $\beta$ . 27, t. 1061.—Iris ciliata, Thunb.) 4. C. G. H. Introduced in 1816, and afterwards. Fl. middle-sized, pale blue, with the outer segments yellow at the base, March; fr. 0.
  - 2. papilionacea, Ker. (B. M. 20, t. 750:—Spreng. l. c.—Iris papilionacea, Thunb.; Jacq. coll. suppl. 159, t. 3, f. 2.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - 3. edulis, Ker. (B. M. 17, t. 613;—Spreng. l. c.—Iris edulis, Thunb.)
    4 C. G. H. Introduced in March, 1841, but has not fl. yet.
  - longiflora, Ker. (B. M. 19, t. 712;—Spreng. l. c.)
     C. G. H. Introduced in March, 1841. Has not fl. yet.
  - ramosa, Ker. (B. M. 20, t. 771;—Spreng. o. c. p. 164.—Iris ramosa, Thunb.—I. ramosissima, L. suppl. p. 99.)
     C. G. H. Introduced in 1821. Fl.?
  - 6. tristis, Ker. (Spreng. l. c.—Iris tristis, Thunb.; B. M. 16, t. 577.—
    Moræa sordescens, Jacq. ic. rar. 2, t. 225.—M. tricolor, B. Repos. t.
    83.) 4. C. G. H. Introduced in 1816. Fl.?
  - 7. viscaria, Ker. (B. M. 16, t. 587;—Spreng. l. c.—Iris viscaria, Thunb.)

    4. C. G. H. Introduced in March, 1841. Has not fl. yet.
  - 8. bituminosa, Ker. (B. M. 26, t. 1045;—Spreng. l. c.—Iris bituminosa, Thunb.) 4. C. G. H. Introduced in 1814. Fl.?
- 9. Gawleri, Spreng. (Syst. index, p. 462.—M. crispa, Ker.; B. M. 20, t. 759;—Spreng. syst. 1, p. 164;—not Thunb.—Iris crispa, Thunb. diss. 36, t. 1, f. 1;—prodr. 12.) 4. C. G. H. Introduced in 1815. Fl.? Homebia, Vent. (Endl. gen. pl. 1, p. 166; under Morsea).
  - collina. Swt. (Moræa collina, Thunb.; —Jacq. ic. rar. 2, t. 220; —B.
     M. 26, t. 1033; —Spreng. syst. 1, p. 165. —Sisyrinchium collinum, Cav.
     —Moræa miniata, B. Repos. t. 404.)
     C. G. H. Introduced in 1820. Fl.?

- flexuosa, Swt. (Moræa flexuosa, L.;—B. M. 19, t. 695.—Ixia longifolia, Jacq. hort. vind. 3, p. 47, t. 90.—Sisyrinchium flexuosum, Spr. syst. 1, p. 167.)
   C. G. H. Introduced in 1820. Fl.?
- Inis, L. (Spreng. syst. 1, p. 126, No. 165;—Endl. gen. pl. 1, p. 166.)
  - 1. persica, L. (Spreng. syst. 1, p. 159;—B. M. 1, t. 1;—J. Grah. Cat. B. pl. p. 214.—Xiphium persicum, Mill. dict.) The Persian bulbous Fleur-de-luce. 4. Persia. Introduced in 1817. Fl.?
  - 2. junces, Poir. (Spreng. l. c.; Desf. atl. p. 39, t. 4.) 4. N. Africa. Introduced in March, 1841; but has not fl. yet.
  - 3. lusitanica, Ker. (B. M. 18, t. 679;—Spreng. syst. 1, p. 159.) 4. Portugal. Fl. large, pale yellow, variegated with bright yellow and purple, H. S. but rare; fr. 0.
  - Xiphium, L. (Spreng. l. c.—B. M. 18, t. 686;—Roxb. H. B. p. 5.)
     Spain. Portugal. Fl. large, blue-violet, variegated with deep yellow, sweet-scented, H. S. but rare; fr. 0.
  - 5. ziphioïdes, Ehrh. (Spreng. l. c.; —B. M. 18, t. 687.) 4. Spain. Fl. larger than No. 3, purple, variegated with blue and yellow, scentless, H. S. but rare; fr. 0.
  - 6. tenuifolia, Pall. (Spreng. syst. 1, p. 160.) 4. Banks of the Wolga. Siberia. Introduced in 1818. Fl.?
  - 7. ventricosa, Pall. (Spreng. l. c.) 4. Siberia. Introduced in 1820. Fl.?
  - 8. graminea, Bauh. (Spreng. l. c.; Jacq. austr. 1, p. 5, t. 2; B. M. 18, t. 781.) 4. Austria. Introduced in 1818. Fl.?
  - 9. verna, Pursh. (Spreng. l. c.) 4. Virginia. Introduced in 1819. Fl.?
  - prismatics, Pursh. (Spreng. l. c.; —B. M. 37, t. 1504.)
     N. America. Introduced in 1819. Fl.?
  - 11. sibirica, L. (Spreng. l. c.; B. M. 2, t. 50.) 4. Germany. Switzerland. Dauphiny. Siberia. Introduced in 1818. Fl.?
  - moræoïdes, Ker. (Spreng. syst. 1, p. 160.—Moræa iridioïdes, L.; Lam. enc. 4, p. 274, t. 31, f. 1;—B. M. 19, t. 693;—M. irioides, Gürtn. fr. 1, p. 40, t. 13, f. 2.—Iris compressa, Thunb.)
     C. G. H. Fl. largish, white, scentless, H. S.; fr. 0.
  - 13. Pseudacorus, L. (Spreng. l. c.; E. B. 9, t. 578.) 4. Ditches, pools and margins of rivers in Europe. Fl. large, yellow, the larger petals pencilled with dark purple, H. S. but rarely; fr. 0.
  - 14. versicolor, L. (Spreng. l. c.; B. M. 1, t. 21.) 4. Virginia. Maryland. Pennsylvania. Introduced in 1818. Fl.?
  - cuprea, Pursh. (Spreng. l. c.—Iris fulva, Ker.; B. M. 36, t. 1496.)
     New Orleans. Fl. 3 inches, of a tawny or copper-colour, with purple veins, scentless. H. S. but rare; fr. 0.
  - virginica, L. (Spreng. syst. 1, p. 161;—Jacq. ic. rar. 2, t. 223;—B.
     M. 19, t. 703.)
     Virginia. Carolina. Introduced in 1818. Fl.?
  - 17. spuria, L. Spreng. l. c.—I. halophila, B. M. 22, t. 875.) 4. Meadows of Europe, Fl. large, deep-blue, H. S., but rare; fr. 0.

- Güldenstädtiana, Lepech. (Spreng. l. c.—I. ochroleuca, L.;—B. M. 2, t. 61.)
   Carniolia. Introduced in 1818. Fl.?
- 19. notha, Bieb. (Spreng. l. c.—I. spuria, & halophila, B. M. 28, t. 1131.)
  4. Caucasus. Introduced in 1819. Fl.?
- 20. spathulata, Lam. (I. spuria, B. M. 2, p. 58.) 4. Wet meadows of Germany. Introduced in 1817. Fl.?
- 21. desertorum, Güldenst. (I. spurea & desertorum, B. M. 87, t. 1514.) 4. Russia. Has been cultivated here since 1817, without flowering.
- 22. ochroleuca, Bieb. (I. spuria  $\rho$ . stenogyna, B. M. 37, t. 1515.) 4. Europe. Caucasus. Introduced in 1818. Fl.?
- germanica, L. (Spreng. syst. 1, p. 161. excl. syn.—B. M. 18, t. 670.)
   Europe. Introduced in 1820, but has not fl. since.
- 24. forentina, L. (Spreng. l. c.;—B. M. 18, t. 671;—Roxb. H. B. p. 5.)
  24. Italy and other parts of S. Europe. Grows plentifully on the walls of Florence. Fl. very large, greyish-white, outer segments with a somewhat bluer tint; sides of the ungues with brownish or greenish-yellow veins, H. S.; fr. 0. The dried root, formerly used in medicine, is now confined to the manufactory of the perfumer, to whom it is known by the name of Orris or Orris-root, being used to give to certain articles, such as hair-powder, the scent of violets. (Ker.)
- 25. pallida, Lam. (Spreng. l. c.;—B. M. 18, t. 685.—I. odoratissima, Jacq. hort. schönbr. 1, p. 5, t. 9.) 4. Italy. Greece. Fl. very large, pale blue, suffused with a purplish tint, having a strong scent resembling that of Elder-flowers, H. S. but very rare; fr. 0.
- 26. squalens, L. (Spreng. o. c. p. 162; excl. syn.;—B. M. 21, t. 787.)
  4. S. Europe. Introduced in 1818. Fl.?
- 27. lurida, Ait. (Hort. Kew. 1, p. 68;—B. M. 18, t. 669.) 4. S. Europe. Fl. large, purplish-blue, variegated with yellow and brown, somewhat sweet-scented, H. S.; but rare.
- 28. dichotoma, Pall. (Spreng. syst. 1, p. 162;—B. Reg. 3, t. 28, 246.) 4. Siberia. Introduced in 1818. Fl.?
- 29. subbiflora, Brot. (fl. lusit. 1, p. 50;—B. M. 28, t. 1130,) 4. Neighbourhood of Lisbon. Introduced in 1819. Fl.?
- 30. chinensis. Curt. (B. M. 11, t. 373;—Spreng. syst. 1, p. 162;—Roxb. fl. ind. 1, p. 170; ed. Carey, 1, p. 174.) 4. China. Fl. large, lilac, pencilled with yellow, fragrant, H. S.; fr. 0.
- 31. susiana, L. (Spreng. l. c.;—B. M. 3, t. 91;—Rosb. H. B. p. 5.) 4. Persia. Fl. very large, pale-grey, pencilled with brown, H. S.; but rare; fr. 0.
- nepalensis, Wall. (Cat.; Spreng. c. p. p. 24; B. Reg. 10, t. 818; Royl. ill. t. 90, f. 2.)
   Nepal. Kemaon. Has been introduced in H. C. G. Fl.?
- 33. variegata, L. (Spreng. syst. 1, p. 162;—B. M. 1, t. 16.) 4. Hilly pastures of Hungary. Introduced in 1819. Fl.?

- 34. hungarica, Kit. (Spreng. l. c.) 4. Hungary. Introduced in 1840, but has not fl. yet.
- 35. pumila, L. (Spreng. syst. 1, p. 163;—B. M. 1. t. 9.) 4. Germany. Hungary. Introduced in 1815. Fl.?
- 36. Intescens, Lam. (Spreng. l. c.;—B. M. 55, t. 2861.) 4. Germany. France. Introduced in 1822. Fl.?
- HERBERTIA, Swt. (Endl. gen. pl. 1, p. 166.)
  - 1. pulchella, Swt. (fl. gard. t. 222.) 4. Chile. Introduced in 1841. Has not fl. yet.
- CYPELLA, Herb. (End. gen. pl. 1, p. 166.)
  - 1. Herbertii, Herb. (Tigridia Herbertii, Sims.; B. M. 52, t. 2599.—
    Morsea Herbertii, Lindl.;—B. Reg. 11, t. 949;—Spr. c. p. p. 24.) 4.
    Buenos Ayres. Introduced in August, 1841. Has not fl. yet.
- TIGRIDIA, Juss. (Spreng. syst. 1, p. 127, No. 175;—Endl. gen. pl. 1, p. 166.)
  - Pavonia, Juss. (Spreng. syst. 1, p. 169;—J. Grah. Cat. B. pl. p. 214.

    —Ferraria Tigridia, Sims.;—B. M. 15, t. 532.—F. Pavonia, L. fil.—

    Moræa Pavonia, Thunb.) 4. Mexico. Peru. Fl. very large, bright-scarlet and yellow, dark purple spotted, July and Aug.; fr. 0.
- Ferraria, L. (Spreng. syst. 1, p. 127, No. 176;—Endl. gen. pl. 1, p. 166.)
  - 1. undulata. L. (Spreng. syst. 1, p. 169;—B. M. 4, t. 144.) 4. C. G. H. Fl. largish, very pale-yellow, with brownish curled margins, Feb. and March; fr. 0.
- Pardanthus, Ker. (Spring. syst. 1, p. 127, No. 169;—Endl. gen. pl. 1, p. 166.)
  - 1. chinensis, Ker. (Spreng. syst. 1, p. 166;—J. Grah. Cat. B. pl. p. 214.—Ixia chinensis, L.;—Gartn. fr. 1, p. 40, t. 13, f. 3;—Lour.—Moræa chinensis, Thunb.;—Rowb. fl. ind. 1, p. 170; ed. Carey, 1, p. 174.—Belamcanda chinensis, DC.—Ferraria crocea, Salisb. pr. hort. 41, No. 1;—Rheed. 11, t. 37.) The Dus-bahoo. 4. China. Japan. Cochin China. Nepal. Common in gardens. Fl. 10-12 lines, below bright-yellow, above dull-orange, with scarlet dots, scentless, R. S.; fr. C. S.
- ARISTRA, Soland. (Spreng. syst. 1, p. 126, No. 161;—Endl. gen. pl. 1. p. 167.)

- rubro-cyanea, Ker. (B. M. 12, t. 410;—Spreng. syst. 1, p. 156.—
   Ixia rubro-cyanea, Jacq. ic. rar. 2, t. 285.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- disticha, Ker. (B. M. 17, t. 626;—Spreng. l. c.—Gladiolus plicatus, Jacq. ic. rar. 2, t. 237, not of others.)
   C. G. H. Introduced in 1816. Fl.?
- 11. angustifolia, Ker. (Babiana stricta, a. B. M. 17, t. 637.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
- ringens, Ker. Herb. (B. Reg. 1838, app. p. 19.—Spreng. syst. 1, p. 155.—Antholyza ringens, L.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
- GLADIOLUS, Tournef. (Spreng. syst. 1, p. 126, No. 155;—Endl. gen. pl. 1, p. 168.)
  - edulis, Burch. (Spreng. syst. 1, p. 151;—B. Reg. 2, t. 169.) 4. S.
     Africa. Introduced in March, 1841, but has not fl. yet.
  - 2. tristis, L. (Spreng. l. c.; —B. M. 8, t. 272.) 4. C. G. H. Fl. large, sulphur-coloured, shaded in particular parts, especially underneath, with very fine pencillings, Feb. and March; fr. 0.
  - 3. gracilis, Jacq. (ic. rar. 2, t. 246;—Spreng. l. c.;—B. M. 16, t. 562.)

    4. C. G. H. Fl. largish, pale blue, Feb. and March; fr. 0.
  - 4. recurves, L. (Spreng. l. c.—B. M. 16, t. 578, not L. fil. nor Thunb.—G. carinatus, Ait.—G. punctatus, Jacq. ic. rar. 2, t. 247.—G. ringens, B. Repos. t. 27, and t. 227.) 4. C. G. H. Fl. largish, having a yellow ground, so thickly beset with minute blue dots, as to give the appearance of a uniform blue, of which colour they really at last become, smelling strongly like violets or Orris-root, Feb. and March; fr. 0.
  - 5. angustus, L. (Spreng, l. c.; —Jacq. ic. rar. 2; —B. M. 17, t. 602.)
    C. G. H. Fl. largish, outside crimson, inside pale-yellow, Feb. and March; fr. 0.
  - 6. tenellus, Jacq. (ic. rar. 2, t. 248;—Spreng. l. c.) 4. C. G. H. Introduced in 1822. Fl.?
  - 7. flexuosus, Thunb. (Diss. de. Glad. No. 2, t. 1, f. 1;—Spreng. syst. 1, p. 152.) 4. C. G. H. Introduced in 1821. Fl.?
  - 8. Watsonia, Thunb. (Jacq. ic. rar. 2, t. 333;—Spreng. l. c.;—B. M. 13, t. 450.) 4. C. G. H. Fl. largish, deep red, Feb. and March; fr. 0.
  - 9. Milleri, Ker. (B. M. 17, t. 632;—Spreng. l. c.) 4. C. G. H. Fl. large, pale-yellow, after first having been quite white, Feb. and March; fr. 0.
  - viperatus, Ker. (B. M. 18, t. 688; Spreng. l. c.—G. alatus, Thunb.; Jacq. ic. rar. 2, t. 259, not L.—G. orchidiflorus, B. Repos. t. 241.)
     C. G. H. Fl. largish, greenish-grey, with something of a livid hue and brown stripes, fragrant, Feb. and March; fr. 0.
  - namaquensis, Ker. (B. M. 16, t. 592;—Spreng. l. c.;—J. Grah. Cat. B. pl. p. 214.—G. galeatus, B. Repos. t. 122, excl. syn.)
     G. H. Introduced in 1815. Fl.?

- alatus, L. (Spreng. l. c. not Ait. nor Jacq.—B. M. 16, t. 586.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- hirsutus, L. (Spreng. l. c.—G. hirsutus, β. B. M. 16, t. 574;—Jacq. ic. rar, 2, t. 250.—G. roseus, B. Repos. t. 11.) 4 C. G. H. Introduced in 1818. Fl.?
- brevifolius, Jacq. (Fragm. 3, p. 12, t. 2, f. 3.—G. hirsutus β. B. M. 19, t. 727.—G. carneus, B. Repos. t. 240.)
   C. G. H. Fl. middle-sized, deep rose-coloured, marked with dark crimson lines. Fl. Feb. and March; fr. 0.
- versicolor, Andr. (B. Repos. t. 19;—Spreng. syst. 1, p. 152;—B. M. 16, t. 556, γ.)
   Q. G. H. Introduced in 1815. Fl.?
- cerneus, Jacq. (ic. rar. t. 255;—Spreng. l. c.;—B. M. 16, t. 591.—G. cuspidatus, Andr.;—B. Repos. t. 147, not L.) 4. C. G. H. Introduced in 1824. Fl.?
- 17. cuspidatus, L. (Spreng. l. c.; —B. M. 16, t. 582; —Jacq. ic. rar. 2, t. 257; —B. Repos. t. 219.—G. undulatus, L. mant.) 4. C. G. H. Introduced in 1819. F1?
- blandus, Ait. (Spreng. l. c.; B. M. 17, t. 625; B. Repos. t. 99, and t. 188.—G. albidus, Jacq. ic. rar. 2, t. 256.—G. carneus, Rocke.) 4.
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- undulatus, Jacq. (ic. rar. t. 251;—Spreng. syst. 1, p. 153;—B. M. 18, t. 647.)
   C. G. H. Fl. largish, pale-yellow, with the middle nerve of its segment somewhat crimson, Feb. and March; fr. 0.
- 20. floribundus, Jacq. (ic. rar. 2, t. 254;—Spreng. l. c.;—B. M. 17, t. 610.—G. grandiflorus, B. Repos. t. 118.) 4. Introduced in 1821. Fl.?
- 21. cardinalis, Curt. (B. M. 4, t. 135;—Spreng. l. c.) 4, C. G. H. Introduced in 1824. Fl.?
- 22. communis, L. (Spreng. l. c.; B. M. 3, t. 86.) Common Corn-flag. 4. Meadows of Europe. Fl. large, rose-coloured, Feb. and March; fr. April.
- psittacinus, Hook. (B. M. 57, t. 3032;—B. Reg. 17, t. 1442.)
   C. G. H. Introduced in March 1841, but has not fl. yet.
- 24. byzantinus, Mill. (Spreng. syst. 1, p. 153;—B. M. 22, t. 874.) 4. Neighbourhood of Constantinople. Introduced in 1822. Fl.?
- 25. hyalinus, Jacq. (ic. rar. 2, t. 242;—Spreng. l. c.) 4. C. G. H. Introduced in 1818. Fl.?
- segetum, Ker. (B. M. 19, t. 719.—Sphærospora segetum, Carey's MSS.)
   S. Europe. Fl. large, purple, Feb, and March; fr. April.
- SYNNOTIA, Sweet. (Endl. gen. pl. 1, p. 168, under Gladiolus.)
  - 1. bicolor, Sweet. (Ixia bicolor, Ker.; B. M. 15, t. 548.—Sparaxis bicolor, Ker.;—Spreng. syst. 1, p. 150.—Gladiolus bicolor, Thunb.;—Jacq. ic. rar. 2, t. 240.) 2. C. G. H. Fl. largish, yellow and blue, Feb. and March; fr. 0.

- galeata, Swt. (Sparaxis galeata, Ker.—Spreng. l. c.—Gladiolus galeatus, Jacq. ic. rar. 2, t. 258.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- Anisanthus, Sweet. (Endl. gen. pl. 1, p. 168.)
  - 1. Cunonia, Sweet. (Antholyza Cunonia, L.;—B. M. 10, t. 343.—Gladiolus Cunonia, Gärtn. fr. 1, p. 31, t. 11, f. 4;—Spreng. syst. 1, p. 152.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
- Antholyza, L. (Spreng. syst. 1, p. 126, No. 160;—Endl. gen. pl. 1, p. 168.)
  - 1. ethiopics, L. (Spreng. syst. 1, p. 157;—B. M. 16, t. 561;—J. Grah. Cat. B. pl. p. 214.—A. ringens, B. Repos. t. 32.—Gladiolus ethiopicus, Corn. canad. t. 79.) 4. C. G. H. Has been cultivated here for the last 12 years, without fl. or loosing its leaves. Introduced again in March, 1841.
- WATSONIA, Mill. (Spreng. syst. I, p. 126, No. 154;—Endl. gen, pl. 1, p. 168.)
  - 1. spicata, Ker. (Spreng. syst. 1, p. 150.—Gladiolus spicatus, L.—lxia spicata, Willd.—I. fistulosa, Sims.; B. M. 15, t. 523.) 24. C. G. H. Fl. small, greenish-white rose-coloured, Feb. and March; fr. 0.
  - 2. plantaginea, Ker. (B. M. 16, t. 553;—Spreng. l. c.—Ixia plantaginea, Ait.—I. triticea, Burm. prodr. fl. cap. 1.) 4. C. G. H. Fl. small, blue, 3 of the segments red-tipped, Feb. and March; fr. 0.
  - 3. marginata, Ker. (Spreng. l. c.;—B. M. 17, t. 608.—Gladiolus marginatus, Thunb.;—Roxb. H. B. p. 25.) 4. C. G. H. Fl. largish rose-coloured, Feb. and March; fr. 0.
  - 4. rosea, Herb. Banks (Ker.; B. M. 27, t. 1072;—Spreng. l. c.—Gladiolus pyramidatus, Andr. B. Repos. t. 335.) 4. C. G. H. Fl. large, rose-coloured. Feb. and March; fr. 0.
  - brevifolia, Ker. (B. M. 17, t. 601;—Spreng. l. c.—Antholyza spicata, Andr. B. Repos. t. 56.)
     C. G. H. Fl. largish, tawny, Feb. and March; fr. 0.
  - fulgids, Salisb. (W. iridifolia, β. fulgens, B. M. 17, t. 600.—Antholyza fulgens, B. Repos. t. 192,) 4. C. G. H. Introduced in March 1841, but has not fl. yet.
  - 7. iridifolia, Ker. (Spreng. l. c. excl. syn. B. Repos.—Gladiolus iridifolius, Jacq. ic. rar. 2, t. 234.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - 8. Meriana, Mill. (Spreng. l. c.;—Antholyza Meriana, L.; B. M. 12, t. 418.) 4. C. G. H. Introduced in 1825. Fl.?
  - hemilis, Mill. (Ker.; B. M. 17, t. 631.—Gladiolus laccatus, Jacq. ic. rar. 2, t. 232.)
     C. G. H. Introduced in March, 1841, but has not fl. yet.
  - aletroïdes, Ker. (Spreng. syst. 1, p. 150.—Gladiolus aletroïdes, Vall.
    —Antholyza Merianella, L.; B. M. 13, t. 441, excl. syn.)
     C. G. H. Introduced in March, 1841, but has not fl. yet.

- roseo-alba, Ker. (B. M. 15, t. 537;—Spreng. syst. 1, p. 151.—Gladiolus roseo-albus, Jacq. hort. schönbr. 1, p. 7, t. 13.)
   C. G. H. Introduced in 1819. Fl.?
- SPARAXIS, Ker. (Spreng. syst. 1, p. 126, No. 153;—Endl. gen. pl. 1, p. 168.)
  - 1. tricolor, Ker. (Spreng. syst. 1, p. 149.—Ixia tricolor, Curt.; B. M. 11, t. 381.) 4, C. G. H.
  - grandiflora, Ker. (Spreng. l. c.—Ixia grandiflora, Roche;—Ker.; B. M. 15, t. 541.)
     G. G. H. Fl. large, purple, Feb. and March; fr. 0.
     striatiflora, Ker. (B. M. 20, t. 779. β.)
     Fl. outside purple-streaked, inside pale-yellowish, at base purple-spotted, Feb. and March.
    - γ. Liliago, Ker. (B. Reg. 3, t. 258.) Introduced in March, 1841, but has not fl. yet.
    - δ. alba, Fl. white, Feb. and March.
  - 3. bulbifera Ker. (Spreng. l. c.—Ixia bulbifera, L.—B. Repos. t. 48;—B. M. 15, t. 545.) 华. C. G. H. Fl. largish, bright-yellow. Feb. and March; fr. 0.
  - 4. fragrans, Ker. (Spreng. l. c.—Ixia fragrans, Jacq. ic. rar. 2, t. 272.)

    4. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - pendula, Ker. (Spreng. l. c.—B. Reg. 16, t. 1360.—Ixia pendula, Thunb.—Watsonia palustris, Pers.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - 6. reflexa, Villet's MSS. 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
- Montbertia, DC. (Endl. gen. pl. 1, p. 168.—Tritonia, Ker.—Spreng. syst. 1, p. 126, No. 156.)
  - 1. viridis, (Tritonia viridis, Ker.; B. M. 31, t. 1275;—Spreng. syst. 1, p. 154,—Gladiolus viridis, Ait.) 4. C. G. H. Introduced in 1819. Fl.?
  - 2. crispa, (Tritonia crispa, Ker.; B. M. 18, t. 678;—Spreng. l. c.—Gladiolus crispus, L. suppl.) 4. C. G. H. Introduced in 1818, Fl.?
  - 3. rosea, (Tritonia rosea, R. Br.;—Srpeng. l. c.—T. capensis, B. M. 17, t. 618.—Gladiolus roseus, Jacq. ic. rar. 2, t. 261.) 4. C. G. H. Introduced in 1818. Fl.?
  - 4. longistora, (Tritonia longistora, Ker.;—Spreng. l. c.—Ixia longistolia, Ait.;—B. M. 8, t. 256.—Gladiolus longistorus, L. fl. suppl.) Q. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - striata, (Tritonia striata, Ker.;—Spreng. l. c.—Gladiolus striatus, Jacq.)
     C. G. H. Introduced in 1819. Fl.?
  - 6. lineats, (Tritonia lineats, Ker.;—Spreng. l. c.—Gladiolus lineatus, Salisb.;—B. M. 14, t. 487.) 4. C. G. H. Fl. large, straw-coloured, more or less tinged with orange, Feb. and March; fr. 0.
  - 7. securigers, Redout. (Tritonia securigers, Ker.;—Spreng. l. c.—Gladiolus securiger, Ait.;—B. M. 11, t. 383.) 4. C. G. H. Fl. largish, yellow, tinged with orange, Feb. and March; fr. 0.

- 8. squalida, (Tritonia squalida, Ker.;—B. M. 16, t. 581;—Spreng. l. c. —Ixia squalida, Ait.) 24. C. G. H. Introduced in 1820. Fl.?
- crocata, (Tritonia crocata, Ker.—Ixia crocata, Thunb.;—B. M. 6,
   184.)
   C. G. H. Fl. large, deep-orange, with a transparent base,
   Feb. and March; fr. 0.
- fenestrata, (Tritonia fenestrata, Ker.; —B. M. 19, t. 704; —Spreng. l. c.—Ixia fenestrata, Jacq. ic. rar. 2, t. 289.)
   C. G. H. Fl. large, bright vermillion, varying to a deep-orange colour, Feb. and March; fr. 0.
- 11. miniata, (Tritonia miniata, Ker.; B. M. 17, t. 609;—Spreng. l. c.—Ixia miniata, Jacq. schönbr. 1, p. 10, t. 24.) 24. C. G. H. Fl. largish, yellow-orange, Feb. and March; fr. 0.
- 12. deusta, (Tritonia deusta, Ker.;—B. M. 17, t. 622.—Spreng. l. c.—Ixia deusta, Ait.) 4. C. G. H. Fl. large, copper-coloured, Feb. and March; fr. 0.
- concolor, (Tritonia concolor, Swt.—T. longiflora, B. M. 37, t. 1502, γ.)
   C. G. H. Introduced in 1816. Fl.?
- tenuistora, (Tritonia tenuistora, Ker.;—T. longistora, β. B. M. 37, t. 1502.)
   C. G. H. Introduced in 1819, Fl.?
- capensis, (Tritonia capensis, Ker. β. B. M. 37, t. 1531.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- IXIA, L. (Spreng. syst. 1, p. 126, No. 158;—Endl. gen. pl. 1, p. 169.)
  - capillaris. L. (Spreng. syst. 1, p. 156;—B. M. 17, t. 617.)
     C. G. H. Fl. middle-sized, lilac, Feb. and March; fr. 0.
  - aulica, Ait. (Spreng. l. c.—I. capillaris. γ. aulica, B. M. 25, t. 1013.)
     C. G. H. Fl. middle-sized, outside rose-coloured, inside crimson, Feb. and March; fr. 0.
  - 3. flexuosa, L. (Spreng. l. c.; —B. M. 17, t. 624.—I. polystachia, Burm. fl. cap. prodr. 1, var. maculata more Ixiæ maculatæ.—I. capitata, B. Repos. t. 232.) 4. C. G. H. Fl. middle-sized, white, with red streaks, Feb. and March; fr. 0.
  - $\beta$ . rubriftora. Fl. red, Feb. and March.
    - y. violacea. Fl. violet, frequently stained as in Ixia maculata, Feb. and March.
  - 4. aristata, Thunb. (Spreng. l. c.; —B. M. 16, t. 589, not Ait. nor Willd.) 4. C. G. H. Fl. largish, pale rose-coloured, with deep rosy streaks, Feb. and March; fr. 0.
  - monadelpha, Roche. (Spreng. l. c.; B. M. 17, t. 607.—I. columnaris, Salisb.; Andr.; B. Repos. t. 203, 211, 213, 250.)
     C. G. H. Fl. large, varying in colour from bluish-purple to purple, yellow, &c., often variegated, and generally having a large, round stain at the base more or less obsolete, and of various tints, Feb. and March; fr. 0.
  - 6. columellaris, Ker. (B. M. 17, t. 630;—Spreng. l. c.) 4. C. G. H. Fl. middle-sized, outside dingy purplish-white, inside very brilliant and iridescently variegated in circles, with a dark spot at the base of the

- limb, having a strong scent like that of Tongo Bean, Feb. and March; fr. 0.
- maculata, L. (Spreng. l. c.;—B. M. 21, t. 789. β. amethystina.)
   G. G. H. Fl. largish, pale-blue, with a dark spot at the base of the limb, Feb. and March; fr. 0.
  - β. ochroleuca, Ker. (B. M. 31, t. 1285.) 4. C. G. H. Fl. large, pale-yellow, with brownish spot at the base of the limb, Feb. and March.
- 8. crateroïdes, Ker. (B. M. 16, t. 594;—Spreng. syst. 1, p. 157.—I. speciosa, B. Repos. t. 186.) 4. C. G. H. Fl. largish, outside purplish-red, inside deep-crimson, Feb. and March; fr. 0.
- scillaris, Thunb. (Spreng. l. c.;—B. M. 15, t. 542. a.—I. reflexa, Andr.; B. Repos. t. 14.—I. polystachia, var. Jacq. coll. suppl. 159, t. 2, f. 1.)
   C. G. H. Fl. middle-sized, deep rose-coloured, each segment with a dark purple spot, Feb. and March; fr. 0.
- patens, Ait. (Spreng. l. c.—B. M. 15, t. 522.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- leucantha, Jacq. (ic. rar. 2, t. 278;—Pers. syn. 1, p. 48.)
   C. G. H. Introduced in March, 1841, but has not fl. yet.
- 12. conica, Salisb. (Spreng. syst. 1, p. 157;—B. M. 15, t. 539.) 4. Fl. largish, orange-coloured, Feb. and March; fr. 0,
- erecta, Berg. (Spreng. l. c.; Jacq. schönbr. l, p. 18; B. M. 17, t. 623.—I. polystachya, L.; B. Repos. t. 155; not Jacq.)
   C. G. H. Fl. middle-sized, before expanding pale-green on the outside, afterwards entirely white, Feb. and March; fr. 0.
- viridiflora, Pers. (Syn. 1, p. 48.—I. maculata, γ viridis, B. M. 16, t. 549.)
   C. G. H. Fl. large, pale-green, with a dark purple spot at the base of the limb, Feb. and March; fr. 0.
- HESPERANTHA, Ker. (Spreng. syst. 1, p. 125, No. 150;—Endl. gen. pl. 1, p. 169.)
  - 1. falcata, Ker. (Spreng. syst. 1, p. 148.—Ixia falcata, Thunb.;—Jacq. ic. rar. 2, t. 276;—B. M. 16, t. 566;—I. cinnamomea, B. Repos. t. 44, not Thunb.) 4. C. G. H. Introduced in 1818. Fl.?
  - 2. cinnamomea, Ker. (B. M. 26, t. 1054;—Spreng. l. c.—Ixia cinnamomea, Thunb.) 4. C. G. H. Introduced in March, 1841, but has not fl. yet.
  - pilosa, Ker. (B. M. 36, t. 1475;—Spreng. l. c.—Ixia pilosa, Thunb.)
     C. G. H. Introduced in March, 1841, but has not fl. yet.
- GEISSORRHIZA, Ker. (Spreng. syst. 1, p. 125, No. 151.—Endl. gen. pl. 1, p. 169.)

ORDER CCXXXIII.—BROMELIACEÆ, Lindl. Nat. Syst. p. 334; Endl. gen. pl. 1, p. 181.

### THE PINK-APPLE TRIBE.

Stemless or short stemmed plants, by Lindl. referred to 21 genera. All, without exception, are natives of the continent or Islands of America, whence they have migrated eastwards in such numbers, as to have established themselves as part of the present Flora of the West Coast of Africa, and some parts of the E. Indies. The most remarkable is the Ananas, which is well known for the sweetness and fine aromatic flavour of its fruit. No other species is of the same interest. They are all capable of existing in a dry air without contact with the earth; on which account they are favourites in S. American gardens, where they are suspended in the dwellings or hung to the balustrades of the balconies; situations in which they flower abundantly, filling the air with their fragrance. Ropes are made in Brazil from a species of Bromelia, called Grawatha. *Pr. Mas. Trav.* (Lindl.)

Ananas, Plum. (Schult. syst. 8, p. LXXIII. No. 1486.—Ananassa, Lindl.;
B. Reg. 13, t. 1068. app. and t. 1381;—Endl. gen. pl. 1, p. 182.)

1. sativus, Schult. (Syst. 8, p. 1283.—Ananassa sativa, Lindl. B. Reg. 13, t. 1068, app.—Bromelia Ananas, L., spec, p. 408, excl. δ.—Willd. spec. 2, p. 7, excl. γ.—Lam. enc. 1, p. 143, excl. ξ.—Lour.;—Spreng. syst. 2, p. 20; -Rosb. fl. ind. 2, p. 116; -J. Grah. Cat. B. pl. p. 222; -B. M. 38, t. 1554;—Rheed 11, t. 1, 2;—Rumph. 5, t. 81.) ज्यांत्र Anannas. 4. W. Indies. Domesticated in the Mascarenhas Islands. the E. Indies, Guinea, &c. Fl. small, bluish, H. S.; fr. R. and C. S. Pine-apples succeed as far north as 30° in the open air, but are plentiful in the garden of the Taj-muhul at Agra. They are so abundant in Ceylon, parts of Burma, and the Khassya Mountains. as to appear wild there, and are considered most delicious in the two latter places. It is evident, therefore how well suited the climate and soil of many parts of India are to the cultivation of the pine-apple. This is important not only on account of the fruit, but also on account of the fibre, which abounds in the leaves, as with it cloth has been manufactured as fine as some muslins. (Royle.)

- β. striatifolia, Roxb. (H. B. p. 23.)
   Q. Malacca. Introduced into H.
   C. G. in 1800, but had not fl. up to 1814.
- 2. bracteatus. Schult. (syst. 8, p. 1286.—Ananassa bracteata, Lindl.; B. Reg. 13, t. 1081.) 4. Brazil. Has been introduced into H. C. G. Fl? BROMELIA, L. (Schult. syst. 8, p. LXXII. No. 1485;—Spreng. syst. 2, p. 3, No. 1165;—Endl. gen. pl. 1, p. 182.)
  - 1. Karatas, L. (Schult. syst. 8, p. 1274;—Spreng. syst. 2, p. 21;—Jacq. amer. 90, t. 178, f. 26; pict. t. 260;—hort. vind. 1, 31, 32, 33, t. 73, 74;—Rosb. H. B. p. 23.) 4. W. Indies. Fl. smallish, white, R. S.; fr. 0.
  - 2. humilis, Jacq. (Ic. rar. t. 60;—Schult. o. c. p. 1275;—Spreng. l. c.)
    4. W. Indies. Lately introduced.

## ORDER CCXXXIV.—HYDROCHARACEÆ, Lindl. Nat. Syst. p. 335.

Floating or water plants, by Lindl. referred to 12 genera. Of these Spreng. syst. assigns 3 species to Europe, (1 also Indian); 2 to S. America; 2 to N. Holland, (1 also a native of India); 1 Egypt, (also a native of India); and 1 to N. America. In the E. Indies have been discovered 4 species of Ottalia; 3 of Vallisneria; 1 of Hydrilla; 1 of Blyza; 1 of Enhalus; and 1 of Hydrocharis. A species of Blyza has been found in Madagascar. Properties under the species.

# ORDER CCXXXV.—ORCHIACEÆ, (ORCHIDACEÆ, Lindl. Nat. Syst. p. 336.)

#### THE ORCHIS TRIBE.

Herbs, found in almost all parts of the world, except upon the verge of the frozen zone, and in climates remarkable for dryness. In Europe, Asia, N. America, and New Holland they are seen growing every where,—in groves, in marshes, and in meadows; in the drier parts of Africa they are either rare or unknown; at the C. G. H. they abound in similar situations as in Europe; but in the hot damp parts of the W. and E. Indies, in Madagascar, and the neighbouring islands, in the damp and humid forests of Brazil, in the warm mild parts of central America, and W. Mexico! in the damp tropical parts of India, (in Assam, on the Khassya Mountains, on the lower mountains of Nepal, &c.,) these Orchideous plants flourish in the greatest variety, and profusion, no longer seeking their nutriment from the soil, but clinging to the trunks and limbs of trees, to stones, and bare rocks, where they vegetate among ferns and other shade-loving plants, in countless thousands. The number of species of this tribe is unknown, but probably is not less than 1860?" (Lindl.)

Although the last fascicle of Lindl's. genera and species of Orchideous plants has not come to hand, it is, perhaps, not too much to say, that the number of hitherto described Indian species of this order amounts to 700, which are thus distributed among the following divisions; Malaxiëæ, 390; Epidendieæ, 153; Vandeæ, 487; Ophydëæ, 449; Arethuseæ, 218; Neottiëæ, 270; and Cypripedieæ, 23.

"It often happens, that those productions of nature which charm the eye with their beauty, and delight the senses with their perfume, have the least relation to the wants of mankind, while the most powerful virtues or most deadly poisons are hidden beneath a mean and insignificant exterior. Thus the Orchidacese beyond their beauty, can scarcely be said to be of known utility, with a few exceptions. The nutritive substance called Salep, has been said to be prepared from the subterraneous succulent roots of Orchis mascula and others; but it is now known from the enquiries of Royle, to be the produce of the tubers of a species of Eulophia; it consists almost entirely of a chemical principle called Bassorin, (Turner, 699.) The root of Bletia verecunda is said to be stomachic, (Lunas). Some of the S. American species, such as the Catasetums, Cyrtopodiums, &c. contain a viscid juice, which being inspissated by boiling, becomes a kind of vegetable glue used for economical purposes in Brazil." (Lindl.)

   Paras. Khassya Mountains. Sirmore. Kemaon. Fl. large, white, lip-tinged with yellow, veined with orange, each lateral lobe having a large ocellated orange spot, and the terminal one 3 smaller spots at the base, C. S.
- 17. media, Wall. MSS. 4. Paras. Khassya Mountains. Has been introduced into H. C. G. Fl.?
- elata, Lindl. (o. c. p. 40;—Wall. pl. as. rar. 3, t. 218;—B. Reg. 1839, app. p. 92.)
   Paras. Khassya Mountains. Nepal. Fl. largish, white, inodorous, C. S.
- 19. ovalis, Lindl. (B. Reg. 1838, app. p. 91.) 4. Paras. Nepal. Kemaon. Introduced into H. C. G. Fl.?
- 20. Gardneriana, Lindl. (l. c.—1837.—Past. Mag. 6, t. 73.) Fl. very large, white, immaculate.
- MEGACLINIUM, Lindl. (gen. and sp. orch. pl. p. 47.)
  - falcatum, Lindl. (l. c.; —B. Reg. 12, t. 989.) Sierra Leona. Introduced in 1840. Has not fl.
  - 2. maximum, Lindl. (B. Reg. 23, t. 1951.) Sierra Leona.

- Bolbophyllum, Pet. Th. (Lindl. gen. and sp. orch. pl. p. 47.)
  - 1. leopardinum, Lindl. (o. c. p. 48.—Dendrobium leopardinum. Wall. tent. fl. nep. 1, p. 39, t. 28.) 4. Paras. Chandagiri Mountain, Nepal. Fl. large, pale yellowish-green, spotted with purple. Has I believe fl. in H. C. G., not here.
  - 2. auricomum, Lindl. (o. o. p. 50.) 4. Paras. Tavoy. Kyook-Phyoo. Introduced in 1840, but has not fl. yet.
  - umbellatum, Lindl. (o. c. p. 56.)
     Paras. Khassya Mountains. Nepal.
     Fl. dull dirty-yellow, spotted with brown, 1838.
  - 3. Careyanum, Spreng. (Syst. 3, p. 732;—Lindl. o. c. p. 51.—Pleurothallis purpurea, D. Don. A. nep. p. 33.—Tribrachia purpurea, Lindl. coll.—Anisopetalum Careyanum, Hook. exot. A. t. 149.) 4. Paras. Nepal. Martaban. In H. C. G. 1836.
  - 5. flexuosum, Wall. Khassya, 1836.
  - fuscescens, Wall. Upper Assam. Capt. Jenkins, 1838. Very near B. umbellatum, L., but distinct.
  - 7. cocoinum, Batem (Lindl. B. R. 23, No. 1964.) Sierra Leona. 1838.
  - 8. serpens, Wall. Khassya Hills. H. Inglis, 1838. Fl. June 1839. Very near Bolbophyllum reptans, Lindl., Orch. p. 51.—Tribrachia reptans, Coll. Bot. No. 41, f. A.,
  - 9. recurvum, Lindl. (Orch. 53.—Tribrachia pendula, Lindl. B. R. 12, 963.) Sierra Leona.
- 10. Jenkinsii, Wall. Assam, 1840.
- CIRRHOFETALUM, Lindl. (gen. and sp. orch, pl. p. 58;—Endl. gen. pl. p. 191.)
  - 1. Rosburghii, Lindl. (l. c.; Wall. pl. as. rar. 1, t. 67.—Aerides radiatum, Rosb. fl. ind. 3, p. 476.) 4. Paras. Soonderbuns. Fl. small, yellow, June and July. (Rosb.)
  - 2. Lindleyanum, Wall. Comes very near to No. 1, Burma, 1828.
  - cæpitosum, Wall. MSS. (B. Reg. 1838, app. p. 35.)
     Paras. Khassya Mountains, 1836.
  - 4. cornutum, Lindl. (B. Reg. 1838, app. p. 75.) 4. Paras. Khassya Mountains. Has been introduced into H. C. G. Fl.?
  - 5. macrophyllum, Wall. Khassya Mountains. 1836.
- TRIAS, Lindl. (gen. and sp. orch. pl. p. 60;—Endl. gen. pl. 1, p. 191.)
  - 1. oblonga, Lindl. (l. c.; Wall. pl. as. rar. 1, t. 70.) 4. Paras. Moulmein. Fl. smallish, brownish-green, with a purplish labellum, March, 1836.
  - 2. racemosa, Wall. Khassya, 1836.
- ERIA, Lindl. (gen. and sp. orch. pl. p. 65;—Endl. gen. pl. 1, p. 192.)
  - 1. paniculata, Lindl. (l. c.—Wall. pl. as. rar. 1, t. 36.) 4. Paras. Khassya Mountains, 1833.
  - flava, Lindl. (o. c. p. 65.—Dendrobium pubescens, Hook. exot. fl. t. 124.—Octomeria flava, Wall.—O. pubescens, Spreng. syst. 4, p. 310.)
     Paras, Moulmein. Chappedong. Noakoti, Nepal. Khassya. 1810.

- 3. pusilla, Wall. MSS. 4. Paras Khassya Mountains, 1836.
- 4. densiflora, Wall. 4. Paras. Khassya Mountains, 1835.
- 5. clavicaulis, Wall. Khassya, 1837.
- 6. planicaulis, Wall. MSS. 2 Paras. Khassya Mountains. In H. C. G. Fl.?
- 7. excavata, Lindl. (o. e. p. 67; —Wall. pl. as. rar. 2, t. 160.) 4. Paras. Sheopore Mountains. Nepal. In H. C. G.
- 8. pumila, Lindl. (o. c. p. 68;—B. Reg. 1838, app. p. 79.) 24. Paras. Fl. small, membranous, slightly tinged with pink. In H. C. G.
- ferrugines, Lindl. (B. Reg. 1839, t. 35.)
   Paras. Khassya Mountains? In H. C. G. Fl.?
- convallarioides, Lindl. (o. c. p. 70.—Pinalia, Lindl. orch. scel. No. 71, p. 23, with a plate.—Pinalia alba, Buch. MSS. in D. Don. fl. nep.—Octomeria spicata, D. Don. pr. fl. nep. p. 31.—O. convallarioides, Wall.)
   Paras. Nepal. Khassya Mountains. Fl. small, white, inodorous, C. S.
- APORUM, Bl. (Lindl. gen. and sp. orch. pl. p. 70;—Endl. gen. pl. 1, p. 192.)
  - 1. anceps, Lindl. (o. c. p. 71;—B. M. 64, t. 3608.—Dendrobium anceps, Swz.;—B. Reg. 15, t. 1239;—Spreng. syst. 3, p. 438;—Rosb. fl. ind. 3, p. 487.) 4. Paras. Soonderbuns. Fl. middle-sized, pale yellowish-green, H. S.
  - cuspidatum, Wall. MSS. 4. Paras. Khassya. In H. C. G. Fl.? Like No. 1.
- DENDROBIUM, Swz. (Lindl. gen. and sp. orch. pl. p. 74.)
  - Pierardi, Roxb. (f. ind. 3, p. 482;—Lindl. o. c. p. 79, excl. syn. R. Br.;—Hook. exot. fl. t. 9;—B. M. 52, t. 2584;—B. Reg. 21, t. 1756.
     —J. Grah. Cat. B. pl. p. 204.) 4. Paras. Chappedong. Chittagong. Soonderbuns. Silhet. Fl. large, pale yellow, H. S.
  - 3. heterocarpum, Wall. (Lindl. o. c. p. 78;—Wall. pl. as. rar. 2, t. 196.)
    4. Paras. Nepal. Fl. large, pale-yellow, fragrant, H. S.
  - chrysanthum, Wall. (Lindl. o. c. p. 80;—B. Reg. 15, t. 1299.)
     Paras. Nepal. Fl. large, intensely yellow, May.
  - 5. Pastonii, Lindl. (B. Reg. 1839, app. p. 43.) 4. Paras. Khassya Mountains. Fl. largish, orange-yellow, with a deep brown spot in the middle of the lip. In H. C. G.
  - longicornu, Lindl. (o. c. p. 80;—B. Reg. 16, t. 1315.)
     Paras. Khassya Mountains. Nepal. Fl. large, with a yellow lined lip, inodorous, April.
  - 7. formosum, Roxb. (f. ind. 3, p. 485;—Lindl. o. c. p. 81;—Wall. pl. as. rar. 1, t. 39;—B. Reg. 1839, t. 64;—Paxt. 6, t. 49.) 4. Paras. Tavoy. Martaban. Khassya Mountains. Garrow Hills. Nepal. Fl. very large, pure white, sweet-scented, with the middle of the lip yellow. April and May.

- 8. pulchellum, Roxb. (fl. ind. 3, p. 486;—Lindl. o. c. p. 82.) 4. Paras. Khassya Mountains. Fl. large, pale rose-coloured, May and June.
- Calceolus, Roxb. (fl. ind. 3, p. 488.—D. moschatum, Wall.;—D. Don. pr. fl. nep. p. 34;—Lindl. o. c. p. 82.—Epidendrum moschatum, Buch. in Syme's. emb. 3, p. 315, with a plate.—Rumph. 6, t. 50, f. 3.)
   Paras. Amboyna. Pegu. Fl. very large, dull orange-coloured, slightly veined, with dull red, R. S.
- denudans, D. Don. (pr. fl. nep. p. 34;—Lindl. o. c. p. 84;—B. Reg. 1838, app. p. 84.)
   Paras. Nepal. In H. C. G. Fl.?
- crumenatum, Swz. (Lindl. o. c. p. 88;—Rosb. fl. ind. 3, p. 480;—B. Reg. 1839, t. 22.—Onychium crumenatum, Bl.;—Rumph. 6, t. 47.
   2.) Paras. Amboyna. Java. Sumatra. Penang. Fl. large, white, rose-tipped, with the disc of the labellum yellow, R. S.
- 12. densiforum, Wall. (Lindl. o. c. p. 90; Wall. pl. as. rar. 1, t. 40; Paxt. 5, 121.—B. M. 62, t. 3418; —B. Reg. 21, t. 1828.—Epidendrum Dumunsutta, Buch. in. Sm. Hb.) 4. Paras. Nepal. Fl. large, pale-yellow, with an orange-coloured lip, May.
- sulcatum, Lindl. (B. Reg. 1838, t. 65.)
   Paras. Khassya Mountains.
   Fl. largish-yellow, with a tinge of orange. Has been introduced into H. C. G.
- aggregatum, Roxb. (fl. ind. 3, p. 477;—Past. Mag. 6, 145;—B. Reg. 20. t. 1695.)
   Paras. Chappedong. Fl. large, yellow, March.
- 15. bicomeratum, Lindl. (B. Reg. 1839, app. p. 59.) 4. Paras. Khassya Mountains. Fl. dull-yellow, spotted and streaked with purple. Has been introduced into H. C. G. Fl.?
- Jenkinsii, Wall. (B. Reg. 1839, t. 87.) 4. Paras. Assam. Fl. large, vellow, March.
- 17. coorulescens, Wall. MSS. 4. Paras. Khassya Mountains. Fl. large, bluish-purple, C. S.
- Gibsonii, Paxt. (Mag. 6, t. 916.)
   Paras. Khassya Mountains? In H. C. G. Fl.?
- 19. candidum, Wall. (B. Reg. 1838, app. p. 36.) 4 Paras. Khassya Mountains. Fl. white, exquisitely scented. Has been introduced into H. C. G. Fl.?
- 20. stuposum, Lindl. (B. Reg. 1838, app. p. 52.) 4. Khassya Mountains. Fl. white, a little smaller than those of the preceding species. In H. C. G.
- Cambridgeanum, Paxt. (Mag. 6, t. 265.—D. fimbriatum, Paxt. Mag. 2, t. 172.)
   Paras. Rangoon. Fl. middle-sized, white. In H. C. G. fl. C. S. (Roxb.)
- 22. flavum, Roxb. 4. Paras. Chittagong. In H. C. G. fl. Feb. and March. (Roxb.)
- 23. pumilum, Roxb. (fl. ind. 3, p. 279.) 4. Chittagong. Fl. middle-sized, yellow, inodorous. In H. C. G. fl. R. S. (Rost).

- 24. clavatum, Roxb. (fl. ind. 3, p. 481; Wall. Cat.?) 4. Paras. Garrow Hills. Khassya Mountains? Nepal? Fl. largish, lively-yellow. In H. C. G. fl. April and May. (Roxb.)
- 25. purpureum, Roxb. (fl. ind. 3, p. 484;—Rumph. 6, t. 50, f. 1.) 2. Paras. Amboyna. Moulmein? Fl. small, lively-purple. In H. C. G. fl. Feb. and March. (Roxb.)
- 26. pendulum, Roxb. (fl. ind. 3, p. 484.) 4. Paras. Chittagong. In H. C. G. fl. April and May. (Roxb.)

# B. EPIDENDRËE.

Lindl. gen. and sp. orch. pl. p. 95; -Endl. gen. pl. 1, p. 193.

#### EPIDENDRUM, L. (Lindl. l. c.;—Endl. l. c.)

- fragrans, Swz. (Lindl. o. c. p. 97;—B. M. 40, t. 1669;—B. Cab. t. 1039.—E. lineatum, Salisb.)
   Paras. Jamaica. Introduced in 1840, but has not fl. yet.
- odoratissimum, Lindl. (o. c. p. 99;—B. Reg. 17, t. 1415.—Macradenia lutescens, Lodd. B. Cab., not R. Br.—Encyclia patens, Hook.;
   B. M. 57, t. 3013.)
   Paras. Rio Janeiro. Introduced in 1840. Has not fl.
- 3. variegatum, Hook. (B. M. 59, t. 3151.) 4. Paras. Rio Janeiro. Introduced in 1840. Has not fl.
- CATTLEYA, Lindl. (gen. and sp. orch. pl. p. 166;—Endl. gen. pl. 1, p. 194.)
  - Forbesii, Lindl. (o. c. p. 117;—B. Reg. 11, t. 933;—B. M. 60, t. 3265.
     Paras. Brazil. Introduced in 1840. Has not fl.
- SPATHOGLOTTIS, Bl. (Lindl. o. c. p. 119.)
  - 1. pubescens, Lindl. (o. c. p. 120.) 4. Terrest. Prome. Taong-Dong. Khassya Mountains. 1836. Fl. smallish, yellowish, C. S.
- BLETIA, Ruiz, and Pav. (Lindl. gen. and sp. orch. pl. p. 120;—Endl. gen. pl. 1, p. 194.)
  - verecunda, R. Br. (Lindl. o. c. p. 121.—Limodorum altum, L.; Jacq. icon. rar. 3, t. 602;—B. M. 24, t. 930.—L. verecundum, Salisb.—L. trifidum, Michs.—L. purpureum, Red.—Cymbidium verecundum, Swz.; Rosb. H. B. p. 63.—C. altum, Willd.; Pers.—Gyas verecunda, Salisb.)
     Terrest. W. Indies. Jamaica, but found only in the cooler parts of the mountains, in dry and sandy situations. Fl. beautifully light purple, middle-sized, inodorous, and fr. R. and C. S.
  - hyacinthina, R. Br. (Lindl. o. c. p. 122.—Limodorum striatum, Thunb. ic. pl. jap. t. 9, p. 28.—Epidendrum striatum, Thunb. act. soc. Linn.
     p. 327.—Cymbidium striatum, Sws.; Rosb. H. B. p. 63.—C. hyacinthinum, Sm. exot. bot. 1, t. 60;—B. M. 36, t. 1492.—Gyas humilis, Salisb.)
     Terrest. China. Japan. Fl. largish, beautifully bright-purple, inodorous, March and April; fr. 0.
- ARUNDINA, Bl. (Lindl. o. c. p. 125;—Endl. gen. pl. p. 195.)
  - 1. bambusifolia, Lindl. (l. c.—Cymbidium bambusifolium, Rozb. fl. ind. 3, p. 460.—Bletia graminifolia, D. Don. pr. fl. nep. p. 29.) 4. Ter-

- rest. Chittagong. Khassya Mountains. Fl. largish, rosy, with the lip of a lively-red purple, inodorous, March and April, sometimes also May and June; fr. 0.
- PHAIUS, Lour. (Lindl. o. c. p. 126; -Endl. gen. pl. 1, p. 195.)
  - 1. grandifolius, Lour. (Lindl. l. c.—Limodorum Tankervilliæ, Ait.— Rosb. fl. ind. 3, p. 466.—L. Incarvilla, Per.—Pachyne spectabilis, Salisb.—Bletia Tankervilliæ, R. Br.; B. M. 44, t. 1924.) 4. Terrest. China. Khassya Mountains. Fl. very large, many-veined, above sulphur-coloured, densely marked with rust-coloured dots, underneath white and crystallinely micant, inodorous, the lip whitish-yellowish, variegated with rose and purple, March and April; fr. 0.
  - 2. Wallichii, Lindl. (l. c.; —Wall. pl. as. rer. 2, t. 158.—P. grandifolius, Lindl. in. Wall. Cat. not Lour.) 4. Terrest. Khassya Mountains. Fl. very large, brown, inodorous with lip yellowish-white, variegated with rose-colour, March; fr. 0.
  - 3. albus, Lindl. (o. c. p. 128;—Wall. pl. as. rar. 2, t. 198;—J. Grak. Cat. B. pl. p. 205.) 4. Terrest. Khassya Mountains. Fl. very large, white, sweet-scented, the lip purple-veined with a yellow disc, April and May; fr. 0.
  - 4. maculatus, Lindl. (Orch. p. 127.—Bletia Woodfordii, Hook.; B. M. 54, t. 2719.) Khassya Mountains. 1836.

ORDER CCXXXVII.—COCOACEÆ, (PALMACEÆ, Lindl. Nat. Syst. p. 343.)

#### THE PALM TRIBE.

"Inhabitants of the tropics of either world, they hardly range beyond 35° in the southern, or 49° in the northern hemisphere. Particular species scarcely extend beyond their own peculiar and contracted limits, on which account there are few countries favorable for their production in which some local and peculiar species are not found. The few that are dispersed

over many lands are chiefly Cocos nucifera, Acrocomia sclerocarpa, and Borassus flabelliformis. It is probable that the number of species thus scattered over the face of nature will be found to amount to 1000 or more. Of these, not a few love the humid banks of rivulets and streams; others occupy the shores of the ocean, and some ascend into alpine regions. Some collect into dense forests, others spring up singly in clusters over the plains, (Martins.) If this statement be true as to the probable number of Palms, how little can be known of their structure, seeing that not more than 175 are at this moment, (1836,) described, of which 119 are S. American, 14 African, and 42 E. Indian. The testimony of Martius is, however, confirmed by Humboldt, who also asserts that there must be an incredible number still to discover in equinoctial regions, especially if we consider how little is yet known of Africa, Asia, New Holland, and America. ent opinion is entertained by Professor Schouw of Copenhagen. He seems to consider that we are acquainted already with the greater part of the Palms; for he says, "it appears from the report of travellers that such Palm woods as those of S. America are less frequent in other parts of the world. Africa and N. Holland seem to be less favorable to this tribe, for on the Congo, Smith found only 3-4 Palms; in Guinea we know merely of the same number, and of the other Africa Palms, 6 belong to the Isles of Bourbon and France; New Holland has, in the torrid zone, three species, while Forster's Prodromus of the Flora of the South Sea Islands contains four." "The most northern limit of Palms is that of Chamærops Palmetto, Michr. in N. America, in lat. 34°-36°, and of C. humilis, in Europe, near Nice, in 43°-44° N. lat. They are found in the southern hemisphere as low as 38° in New Zealand." (Lindl.) In S. Africa has only been found 1 species, viz. Phoenix reclinata, Jacq. (Harvey.) Properties under the species.

#### A. ARECEA.

(Arecineæ, Mart.; -Endl. gen. pl. 1, p. 245.)

       5 Chittagong. Fl. R. S.; fr. C. S.
  - ARENGA, Labill. (Mem. d'instit. 4, p. 209;—Endl. gen. pl. 1, p. 248.)
    - 1. saccharifera, Labill. (Borassus Gomutus, Lour.—Saguerus Rumphii, Roxb. fl. ind. 3, p. 626.—Gomutus v. Saguerus, Rumph. 1, t. 13.) 5 Moluccas. Sunda Islands. Cochin China. Malay Islands, &c. Fl. of largish, yellow-purple, 2 very small, H. and R. S.; fr. Feb. This palm yields sago, sugar, palm-wine, and from the black horse-hair-like fibres, surrounding the petioles of the leaves, very good cordage and cables! In Java and Baleyn, it is employed for making sugar. Its sap is boiled down to syrup, and allowed to concrete, but it always retains some degree of moisture. The best is of a yellowish-colour, the inferior kinds, called saccharum nigrum, which are blackish-coloured, are commonly mixed with the muscovados of the cane. The tree itself is highly desirable for cultivation in low situations near the coasts of India. One of the trees cut down in H. C. G. yielded about 150 pounds of good Sago meal. (Roxb. Royle.)
  - Caryota, L. (Spreng. syst. 2, p. 563, No. 1992;—Endl. gen. pl. 1, p. 248.)
    - 1. urens, L. (Spreng. syst. 2, p. 623; ... Roxb. fl. ind. 3, p. 625; ... J. Grah.

Cat. B. pl. p. 226;—Gärtn. fr. 1, p. 20, t. 7, f. 3;—Jacq. fragm. bot. t. 12, f. 1;—Lam. ill. t. 897;—Rheed. 1, t. 11;—Rumph. 1, t. 14.) 5 Moluccas. Coromandel. The Ghauts and Concans. Cultivated here. Fl. small, greenish-white, H. and R. S. This palm, where it grows in abundance, is highly valuable to the natives. It yields them, during the hot season, an immense quantity of sap. The constituents of this, as well as that of the preceding species, being such as may easily be made to undergo the fermentation process, we find that, instead of being boiled down to procure sugar, the sap is allowed to undergo the vinous fermentation, when it forms Palm-wine, often called Toddy. This being distilled, yields the spirit called Arrack, from the Arabic Aruk, the general term for spirit. The best trees will yield at the rate of 100 pints of sap in the 24 hours. The pith of the trunk of old trees is said to be equal to the best sago. The natives make it into bread, or boil it into thick gruel. (Roxb. Royle.)

horrida, Jacq. (fragm. bot. p. 20;—Spreng. syst. 2, p. 623.)
 Caracas. Has been introduced into H. C. G. Fl.?

3. sobolifera, Wall. Mauritius.

  6.—B. M. 33, t. 1371.) 5 China. Japan. In H. C. G. Fl.?

- PHENIX, L. fil. (Spreng. syst. 2, p. 13, No. 1839;—Endl. gen. pl. 1, p. 253.)
  - 1. dactylifera, L. (Spreng. syst. 2, p. 138;—Lam. ill. t. 893;—Gärtn. fr. 1, p. 23, t. 9, f. 2;—Roxb. fl. ind. 3, p. 786;—J. Grah. Cat. B. pl. p. 224.) Date-tree. 5 Tropical and Middle Asia. N. Africa. Decchn. Baroda. Cultivated in S. Europe. Does not thrive in Lower Bengal. In H. C. G. some male trees have lived to flower, soon after which, however, they uniformly perished. The sap of this tree is seldom employed, because the fruit is thereby injured. Baskets are made with the leaf-stalks.
  - 2 farinifera, Roxb. (Corom. 1, t. 74; fl. ind. 3, p. 785;—Spreng. syst. 2. p. 138.—P. pusilla, Gārin. fr. 1, p. 24, t. 9, f. 2.—Lour.) 5 Sandy hills, at a short distance from the Sea, near Coringa. Fl. Jan. and Feb.; fr. May. Its stem contains fecula, which is used as food by the natives in times of famine. The leaflets are wrought into mats, for sleeping on, &c. The common petioles are split into three or four, and used to make common baskets of various kinds, which, however, are inferior to those constructed of bamboo. Fruit edible. (Roxb.)
  - 3. acaulis, Buch. (Roxb. fl. ind. 3, p. 783;—Spreng. syst. 2, p. 138.)
    ক্ষমী খাৰুৰ Junglee-khajoor. 5 Behar. Fl. C. S.; fr. April and May.
    Fruit edible. (Roxb.)
  - 4. sylvestris, Roxb. (fl. ind. 3, p. 787; -J. Grah. Cat. B. pl. p. 224.-Elate sylvestris, L.; Spreng. syst. 2, p. 141; -Rheed. 3, t. 22-25, incl.) Alagor. Wild Date. 5 Common all over India. Fl. March, fr. C. S. This tree yields, Palm-wine during the C. S. But free extraction destroys the appearance and fertility of the tree, the fruit of those that have been cut for drawing off the juice being The mode of drawing off the juice is by removing very small. the lower leaves and their sheaths, and cutting a notch into the pith of the tree near the top, whence it issues and is conducted by a small channel made of a bit of the Palmyra palm-leaf into a pot suspended to receive it. On the coast of Coromandel this Palm-juice is either drunk fresh from the tree, or boiled down into sugar, or fermented for distillation, when it gives out a large portion of ardent spirit, commonly called Paria-arak on the coast of Coromandel. There as well as in Guzerat, and epecially in Bengal, the Khajur is the only tree whose sap is much employed for boiling down to sugar, mixed more or less with the juice of the sugar-cane. At the age of from 7-10 years, when the trunk of the trees will be about 4 feet high, they begin to yield juice, and continue productive for 20 or 25 years. It is extracted from Nov. till Feb., during which period, each tree is reckoned to yield from 120 to 240 pints of juice, which averages 180 pints. Every 12 pints or pounds is boiled down to one of Goor or Jagari, and 4 of this yield one of good

powder sugar, so that the average produce of each tree is about 7 or 8 pounds of sugar annually. This date sugar is not so much esteemed as cane-sugar, and sells for about one-fourth less. (Rosb.) Baskets, boxes, mats and punkahs are made with the leaf-stalks.

5. paludosa, Roxb. (fl. ind. 3, p. 789.) Total Hintal. 5 Soonderbuns, where it forms a considerable part of those impenetrable woods, which completely cover that extensive tract of country. Fl. H. S.; fr. C. S. The trunks of the smaller trees serve for making sticks. The larger ones serve for rafters to the houses of the natives, and the leaves for thatch. (Roxb.)

#### E. Cocoë.

(Cocoïne, Mart.; --- Endl. gen. pl. 1, p. 254.)

Elmis, Jacq. (Spreng. syst. 2, p. 13, No. 1350;—Endl. o. c. p. 255.)

guineënsis, Jacq. (Amer. t. 172; ed. pict. t. 257;—Gürtn. fr. 1, p. 17, t. 6, f. 2;—Lam. ill. t. 896;—Spreng. syst. 2, p. 141.) Oil Palm.
 Guinea. W. Indies. Introduced in 1836, and thriving, though growing very slowly. Palm-oil is obtained from the fruit of this tree, which is also said to yield the best kind of Palm-wine.

Cocos, L. (Spreng. syst. 2, p. 14, No. 1353; -Endl. gen. pl. 1, p. 256.)

1. nucifera, L. (Spreng. syst. 2, p. 141;—Roxb. fl. ind. 3, p. 614;—J. Grah. Cat. B. pl. p. 225.—Coccos nucifera, Gärtn. fr. 1, p. 16, t. 4, 5.—Rheed. 1, t. 1-4, incl.—Rumph. 1, t. 1, 2.) 可谓证明 Narikel. L. 5 Shores of equinoctial Asia, and its islands, &c. Fl. H.S.; fr. C. S. The root is sometimes masticated instead of the Betle-nut. In Brazil baskets are made of the small fibres. The hard case of the stem is converted into drams, and used in the construction of huts. lower part is so hard as to take a beautiful polish, when it resembles The reticulated substance at base of the leaf is formed into cradles, and, as some say, into a coarse kind of cloth. The unexpanded terminal bud is a delicate article of food. The leaves furnish thatch for dwellings, and materials for fences, buckets, and baskets; they are used for writing on, and make excellent torches; potash in abundance is yielded by their ashes. The midrib of the leaf serves for oars. The juice of the flower and stems is replete with sugar, and is fermented into excellent wine, or distilled into arrack, or the sugary part is separated as Jagary. The tree is cultivated in many parts of the Indian islands, for the sake not only of the sap and milk it yields, but for the kernel of its fruit, used both as food and for culinary purposes, and as affording a large proportion of oil which is burned in lamps throughout India, and forms also a large article of export to Europe. The fibrous and uneatable rind of the fruit is not only used to polish furniture and to scour the floors of rooms, but is manufactured into a kind of cordage, (Koir,) which is nearly equal in strength to hemp, and which Roxburgh designates as the very best of all materials for cables, on account of its great elasticity and strength. The

sap of this as well as of other palms is found to be the simplest and easiest remedy that can be employed for removing constipation in persons of delicate habit, especially European females. (Ainslie. Rosb. Lindl.)

ORDER CCXXXIX.—MELANTHACEÆ, R. Br.—Lindl. Nat. Syst. p. 347.

#### THE COLCHICUM TRIBE.

Herbs, by Lindl. (excluding Paridëæ, and adding Ledebouria and Asagræa) referred to 29 genera. Of these Spreng. syst. enumerates 32 species for N. America; 11 for Europe; 8 for N. Holland and the Society Islands; 3 for S. America and Mexico; 3 for N. Africa; 2 for Siberia; 1 for Cancasus; 1 for Senegal; and 2 for Japan and China. In S. Africa have been discovered 20 species (Harvey); and in the E. Indies 14; viz. 1 of Tofieldia, (Himalayas); 3 of Anguillaria, (1 from the Himalayas, Coro-

mandel, Prome, and N. Holland, I herb Heyn., I Spreng. (from Cochin China); I of *Ledebouria*, (Peninsula of India, Bundlekund); I of *Tricyrtis*, (Himalayas); 7 of *Disporum*, (Himalayas, Khaasya Mountains, Neelgherries); and I of *Drapiesia*. (Java.)

"This order is poisonous in every species, but more especially in the Colchicum and Veratrum. The cormus of the former is a well known acrid cathartic, narcotic, and diuretic; the latter is a nauseous, dangerous emetic. The medicinal properties of the root of Veratrum are owing to a peculiar alkaline principle called Veratrin, which acts with singular energy on the membrane of the nose, exciting violents neezings, though taken in very minute quantity. When taken internally in very small doses, it produces excessive irritation of the mucous coat of the stomach and intestines; and a few grains are found fatal to the lower animals. Turner." (Lindl.) Ornithoglossum, Salisb. (Spreng. syst. 2, p. 14, No. 1370;—Endl. gen. pl. 1, p. 135.)

1. glaucum, Salisb. (Parad. p. 54;—Schult. syst. 8, p. 1536.—O. viride, Ait.;—Spreng. 2, p. 147.—Lichtensteinia lævigata, Willd.—Cymation lævigatum, Spreng. 2, p. 147.—Melanthium viride, Thunb.; B. M. 25, t. 994.) 4. C. G. H. Fl. middle-sized, green, edged with brown.

Introduced in March 1841. Has not fl. yet.

Anguillaria, R. Br. (pr. p. 273;—Spreng. syst. 2, p. 14, No. 1368;— Endl. gen. pl. 1, p. 136.)

- 1. indica, R. Br. (l. c.; —Spreng. syst. 2, p. 146; —Schult. syst. 8, p. 1538; —Wall. pl. as. rar. 3, t. 259; —J. Grah. Cat. B. pl. p. 222, excl. syn. Roth.—Melanthium indicum, L.) 4. Tropical N. Holland. Coromandel. The Concans. Kandalla. Prome. Nepal. Kamaon. Fl. smallish, dark-purple, inodorous. Introduced into H. C. G. Fl.?

ORDER CCXL.—SMILACEÆ, R. Br.—Endl. gen. pl. 1, p. 152.

## THE SMILAX TRIBE.

Herbs or shrubs, sometimes climbing, by Endl. referred to 15 genera. Of these, about 54 species, according to Spreng. belong to N. America; 26 to S. America, Mexico, and the W. Indies; 11 to Europe; 9 to New Holland and the South Sea Islands; 3 to Japan; 3 to China; 6 to S.

Africa; 1 to the Mascarenhas; 1 to N. Africa; 1 to the Canaries; 3 to Iberia, and Caucasus; 2 to Armenia; and 2 to Siberia. In the E. Indies have been discovered 1 species of Trillium, (Himalayas); 1 of Paris, (Himalayas); 1 of Stretopus, (Himalayas); 4 of Smilacina, (Himalayas); 9 of Polygonatum, (Himalayas, Khassya Mountains); 27 of Smilax, (all over India); 4 of Tupistra, (Himalayas, Khassya Mountains, Singapore, Amboyna); 2 of Stemona, (Circars, Moluccas, Cochin China, Silhet); 4 of Teta, (Chittagong, Penang, Banks of the Attran); 10 of Liriope, (Himalayas, Rangoon, Peninsula of India); and 1 of Bulbospermum, (Java). Properties under the species.

POLYGONATUM, Tournef. (Endl. gen. pl. 1, p. 154.)

- oppositifolium, D. Don. (Convallaria oppositifolia, Wall. as. res. 13, p. 380, with a plate;—B. Cab. t. 640;—Hook. esot. fl. 2, t. 125;—Spreng. syst. 2, p. 76;—Don. pr. fl. nep. p. 47;—Schult. syst. 7, p. 298, and 8, p. 1669;—B. M. 63, t. 3529.) 4. Khassya Mountains. Nepal. Fl. nearly 1 inch, greenish-white, marked with 6 lines of reddish dots, C. S.; fr. 0.
- SMILAX, Tournef. (Spreng. syst. 2, p. 9, No. 1272;—Endl. gen. pl. 1, p. 155.)
  - Sarsaparilla, L. (Spreng. syst. 2, p. 100;—Plenck. t. 712;—Blackw.
     t. 393.) 5 Virginia. Has been cultivated for many years in the garden here, without flowering.
  - Rosburghiana, Wall. (Cat.—S. laurifolia, Rosb. fl. ind. 3, p. 793, not L.)
     Garrow Hills. Khassya Mountains. Introduced into H. C. G. in 1811, but had not fl. in 1814.
  - 3. retusa, Roxb. (fl. ind. 3, p. 793.) 5 Usengal, (Serampore.) Fl. small, greenish-white, H. S.; fr. R. S.
  - 4. grandifolia, (S. macrophylla, Roxb. fl. ind. 3, p. 793;—J. Grah. Cat. B. pl. p. 219, excl. syn.; not Willd.) L. 5 Concans. Deccan. Bengal. Fl. smallish, greenish-yellow, H. and R. S.; fr. Sept. and
  - 5. ovalifolia, Roxb. (fl. ind. 3, p. 794;—Spreng. c. p. p. 137;—J. Grah. Cat. B. pl. p. 219.) কুমারিকা Koomarika. L. 5 U Bengal, (Serampore.) Concans. Fl. smallish, greenish, H. S.; fr. C. S.
  - 6. prolifera, Roxb. (fl. ind. 3, p. 795.) L. 5 Usengal, (Serampore. Poorneeya.) Rajmahl. Fl. smallish, green, Feb. and March; fr. R. S.
  - maculata, Roxb. (fl. ind. 3, p. 796;—Spreng. e. p. 137;—Royle.
     ill. t. 94, f. 1.) 5 Nepal. Fl. small, white, fragrant, C. S.; fr. H. S.
  - 8. Bona nox, L. (Spreng. syst. 2, p. 102.) 5 Carolina. Introduced into H. C. G. before 1814. Fl.?
  - 9. herbacea, L. (Spreng. l. c.;—B. M. 44, t. 1920.) 4. N. America. Introduced into H. C. G. before 1814. Fl.?
  - Pseudochina, L.? (Spreng. l. c.?—Sloane hist. 1, p. 31, t. 143, f. 1.?—Rosb. fl. ind. 3, p. 792.)
     Virginia.? Jamaica.? Garrow Hills. Introduced into H. C. G. in 1810, but had not fl. in 1814.

- lanceæfolia, Roxb. (fl. ind. 3, p. 792; not S. lanceolata, Wall. nor Lour.)
   Silhet. Introduced into H. C. G. in 1811, but had not fl. in 1814. Its large, tuberous roots are much used by the natives in medicine. (Roxb.)
- 12. glabra, Roxb. (fl. ind. 3, p. 792.) 5 Garrow Hills. Silhet. Introduced into H. C. G. in 1811, but had not fl. in 1814. The natives of Silhet use a decoction of the large, tuberous, fresh root for the cure of sores and syphilitic complaints. (Roxb.)
- 13 grandis, Wall. MSS. (S. macrophylla, Rosb. not Willd.) In H. C. G. Fl.?
- 14. stipulacea, Bojer. (Hort. Mauritianus 352.) Mauritius.
- 15. anceps, Willd, Mauritius. Bombay.

Genera allied to Smilacese.

## A. ASPIDISTREE.

# ORDER CCXLI.—GILLIESIACEÆ, Lindl. Nat. Syst. p. 348.

Small herbaceous plants, of 2 genera, containing but a few species, natives of Chile. "Properties unknown." (Lindl.)

\* Gilliesia graminea, Lindl.; B. Reg. 12, t. 992; B. M. 54, t. 1716.

24. Valparaiso.

## ORDER CCXLII.—DIOSCOREACEÆ, Lindl. Nat. Syst. p. 359.

#### THE YAM TRIBE.

Twining shrubs, by Lindl. referred to 4 genera. Of these, Spreng. syst. enumerates 28 species for S. America, and the W. Indies, (Rajania and Dioscorea); 5 for Japan, (Rajania and Dioscorea); 4 for New Holland, (Dioscorea); 2 for N. America, (Dioscorea); and 2 for Europe and Middle Asia. In S. Africa have been discovered 3 species of Testudinaria, (Harvey), and in the E. Indies about 30 of Dioscorea, but of these several will undoubtedly be united on a rigid examination of authentic specimens.

The Yams, so important an article of food in all tropical countries, contain, before they are dressed, more or less acridity, which, however, generally evaporates by heat. This is particularly the case, observes Royle, with those species, that have compound leaves.

- TESTUDINARIA, Salisb. (Lindl.; B. Reg. 11, t. 921;—Endl. gen. pl. p. 158, under Dioscorea.—Tamus, L.; Spreng. syst. 3, p. 894, No. 3187.)
  - 1. Elephantopus, Burch. (Trav. 2, p. 147;—of B. Reg. l. c.—Tamus Elephantopus, L'Herit.; Spreng. syst. 3, p. 905;—Q B. M. 33, t. 1347.—Dioscorea Elephantopus, Spreng. c. p. p. 143.) 4. C. G. H.

Has been cultivated for several years in the garden here, without fl.—The fleshy mass of the tubers are made use of as food by the Hottentots in times of scarcity, and are hence called Hottentot's bread. (Royle.)

- DIOSCORRA, Plum. (Spreng. syst. 2, p. 15, No. 1380;—Endl. gen. pl. 1, p. 158.) Yam.
  - 1. globosa, Roxb. (fl. ind. 3, p. 797;—J. Grah. Cat. B. pl. p. 218.)

    ETTY TIE Choopri-aloo. 4. Bengal, (Scrampore), cultivated.

    Fl. small, white, R. S.—Most esteemed of all the yams among the Natives, as well as Europeans.
  - 2. alata, L. (Spreng. syst. 2, p. 152;—Roxb. fl. ind. 3, p. 797;—J. Grah. Cat. B. pl. p. 218, excl. syn. Rumph.—Rheed. 7, t. 38.)

    WH WING Khum-aloo. 2, 
    Wild in both Concans. Cultivated on the coast of Coromandel and in Bengal. Fl. small, green, R. S.—Of yams it holds in Bengal the second place.
  - 3. purpures, Roxb. (fl. ind. 3, p. 799.) থ. Only found in a cultivated state, under the name of কৰ প্রাণিয়া আৰু Rukto-guraniya-aloo. Fl. small, whitish, R. S. Holds the third rank among the yams.
  - 4. rubella, Roxb. (fl. ind. 3, p. 798;—Rumph. 5, t. 121.) পরাণিয়া আৰু
    Guraniya-aloo. থ. Only found in a cultivated state. Fl. small,
    whitish, very fragrant, R. S. In the estimation of the Natives this
    species holds the fourth place among the yams.
  - 5. atropurpurea, Roxb. (fl. ind. 8, p. 800.) Malacca yam. 4. Malacca. Pegu. Malay Islands. Fl. small, greenish-white, R. S. Extensively cultivated in its native place.
  - 6. aculeata, L. (Spreng. syst. 2, p. 152;—Rosb. fl. ind. 3, p. 800;—J. Grah. Cat. B. pl. p. 218, excl. most of the syn.—Rumph. 5, t. 126.)

    The Mou-aloo. 4. Bengal, (Serampore.) Goa, &c. Fl. small, whitish, R. S. Roots about 2 pounds or more in weight, not cultivated, but dug up in the woods during the cold season, and carried for sale to the bazars. (Rosb.)
  - 7. fasciculata, Roxb. (fl. ind. 3, p. 801.) হসৰি আৰু Soomi-alco. 4. Bengal, (Serampore.) Fl. R. S. Cultivated to a considerable extent in the vicinity of Calcutta, not only for food, but to make starch of the roots, (Roxb.)
  - 8. pulchella, Roxb. (fl. ind. 3, p. 801.) 4. Chittagong. Fl. at the close of the R. S.
  - 9. crispata, Roxb. (fl. ind. 3, p. 802.) 4. \( \sim \) Interior of Bengal. Fl. small, R. S.
- 11. nummularia, Lam. (Spreng. syst. 2, p. 152;—Roxb. fl. ind. 3, p. 803.) সোর আৰু Sora-aloo. 4. A Bengal. Calcutta, (Serampore.) Fl. R. S. The root appears to be unfit for food. (Rosb.)

- 12. glabra, Roxb. (fl. iad. 3, p. 804.) 4. A Lower Bengal. Peninsula of India, west of the Ganges. Silhet. Sukanaghur. Introduced into H. C. G. in 1812, but had not fl. in 1814.
- 13. heterophylla, Roxb. (ft. ind. 3, p. 804.) 4. Penang. Moluccas. Introduced into H. C. G. in 1798, and a of plant fl. for the first time in Oct. and Nov. 1809.
- 14. oppositifolia, L. (Spreng. syst. 2, p. 154;—Roxb. fl. ind. 3, p. 804;
  —J. Grah. Cat. B. pl. p. 219.) 4. 

   Coromandel. Mahableshwur.
  The Ghauts, about Kandalla. Has been introduced into H. C. G.?
- 15. dæmona, Roxb. (fl. ind. 3, p. 805.—Ubium silvestre, Rumph. 5, t. 127.) of Goruckpore forests. Moulceas. Fl. R. S.—Root very nauseous, even after it has been boiled. (Roxb.)
- 16. pentaphylla, L. (Spreng. syst. 2, p. 151.—Rosb. fl. ind. 3, p. 806;—
  J. Grah. Cat. B. pl. p. 218, excl. syn. Rumph.—Rheed 7, t. 34, 35.)

  To Kanta-aloo. 2. Bengal, (Serampore.) Monghyr. Morung. Vendalore. Silhet. Kemaon. Not cultivated, though the root is large, white, and reckoned very wholesome and palatable, and eaten by the Natives. Fl. R. S.
- \* Tamus communis, L.; E. B. 2, t. 91. 4. England. S. Europe. Middle Asia.—T. cretica, L. 4. Candia.—Dioscorea triphylla, L. 4. Molucas. Both Concans.—D. verticillata, Lam. ORDER CCXLIII.—LILIACEÆ, DC.—Endl. gen. pl. 1, p. 139.

#### THE LILY TRIBE.

Scattered widely over the world, but much more abundant in temperate climates than in the tropics. Aloes are mostly found in S. Africa. One species is a native of the W. Indies, and two or three more of Arabia and the East. Dracænas, the most gigantic of the order, attain their largest size in the Canaries. Dracæna Draco is described in the Annales des

Science, 14, p. 140, as being between 70-75 feet high, 46½ feet in circumference at the base, and it was known to have been a very ancient tree in the year 1436. The northern flora comprehends for the most part the genera Scilla, Hyacinthus, Allium and Ornithogalum. In New Holland Liliacese form a distinctly marked feature of vegetation. (Lindl.) In the E. Indies about 66 species seem to have been discovered, viz. 1 of Tulipa; 4 of Gagea; 2 of Lloydia; 4 of Fritillaria; 4 of Lilium; 1 of Notholirion; 1 of Methonica; 1 of Polianthes; 1 of Funkia; 3 of Scilla; 9 of Allium; 2 of Asphodelus; 1 of Hemerocallis; 2 of Anthericum; 3 of Chlorophytum; 2 of Chloropsis; 4 of Dianella; 2 of Rhuacophila; 6 of Asparagus; and 13 of Dracæna.

## A. TULIPEE.

(Tulipacese, Endl. gen. pl. 1, p. 139.)

- Tulipa, Tournef. (Spreng. syst. 2, p. 6, No. 1209;—Endl. o. c. p. 140.)
  Tulip.
  - Gesneriana, L. (Spreng. syst. 2, p. 63;—Scult. syst. 7, p. 376;—B.
     M. 28, t. 1135;—B. Reg. 5, t. 380.—Rosb. H. B. p. 24.) Common Tulip. 4. Cappadocia, whence, according to Gesner, it was introduced into Europe. Introduced into H. C. G. in 1810, but had not fl. in 1814.
  - stellata, Hook. (B. M. 54, t. 2762;—Schult. syst. 8, p. 1684.—T. Clusiana, Wall. MSS. not Red.)
     Kemaon. Fl. large, yellowishwhite, H. S.
- FRITILLARIA, L. (Spreng. syst. 2, p. 6, No. 1210;—Endl. gen. pl. 1, p. 140.) Fritillary.
  - Meleagris, L. (Spreng. syst. 2, p. 63;—Schult. syst. 7, p. 395;—E.
     B. 9, t. 622.)
     Europe. Caucasus. N. Africa. Introduced here in 1820. Fl.?

## NOTHOLIBION, Wall. MSS.

- 1. roseum, Wall. MSS. (Fritillaria Thomsoniana, Royle, ill. t. 92, f. 1.?) 4. Gossain Than. In H. C. G. Fl.?
- LILIUM, L. (Spreng. syst. 2, p. 6, No. 1208;—Endl. gen. pl. 1, p. 141.) Lily.
  1. candidum, L. (Spreng. syst. 2, p. 61;—Schult. syst. 7, p. 416;—B.
  M. 8, t. 278;—Roxb. H. B. p. 24.)
  24. Levant. Sardinia. Introduced into H. C. G. in 1799, but had not fl. in 1814.
  - 2. nepalense, D. Don. (pr. fl. nep. p. 52;—Spreng. syst. 2, p. 62;—Wall. pl. as. rar. 3, t. 291.) 4 Nepal. Has been introduced into H. C. G.
  - giganteum, Wall. (Tent. fl. nep. t. 12, 13, p. 21, excl. syn.; Spreng. syst. c. p. p. 135; Schult. syst. 7, p. 419.)
     Nepal. Has been introduced into H. C. G.
  - 4. Wallichianum, Schult. (syst. 8, p. 1689.—L. longiflorum, Wall. tent. fl. nep. t. 29;—D. Don. pr. fl. nep. p. 52; not Thunb.) 4. Nepal. Kemaon. Has been introduced into H. C. G. Fl.?

Besides these, 12 species of Lilium have been introduced into the Serampore garden without however, producing a flower.

- Метноніса, Herm. (Lugd. bot. cat. t. 689;—Endl. gen. pl. 1, p. 141.— Gloriosa, L.;—Spreng. syst. 2, p. 6, No. 1213.) Gloriosa.
  - 1. superba, Lam. (Enc. 4, p. 133, excl.  $\beta$ .; ill. t. 247, f. 1;—Red. lil. t. 26.—Gloriosa superba, L.;—Gärtn. 1, p. 69, t. 18, f. 1;—Spreng. syst. 2, p. 65;—Schult. syst. 7, p. 365;—Roxb. fl. ind. 2, p. 143;—B. Reg. 1, t. 77;—B. Repos. t. 129;—J. Grah. Cat. B pl. p. 221.—Rheed. 7, t. 57.) Antibelan Ulatchandul. 2. Ceylon. Coromandel. Guzerat. Concans. Mahableshwur. Tavoy. Bengal, (Serampore.) Morung. Fl. large, from the base to the middle first yellow, then blood-coloured, from thence to the apex blood-coloured, R. S.; fr. C. S. The root is said to be a violent poison. (Roxb.)
  - \* Tulipa suaveolens, Roth.; B. M. 22, t. 839. 4. S. Europe.—T. præcox, Ten. 4. Italy.—T. Clusiana, Red; B. M. 34, t. 1390. 4. Europe.—T. sylvestris, L.; E. B. 1, t. 63. 4. Europe.—Gagea pygmæa, Schult. 4. Madrid.—Calochortus pallidus, Schult. fil. 4. Mexico.—C. fuscus, Schult. fil. 4. Mexico.—Cyclotbothra lutea, Lindl.; B. Reg. 20, t. 1663. 4. Mexico.—Methonica virescens, Endl. (Gloriosa virescens, Lindl.; B. M. 52, t. 2539.) 4. Guinea.

## B. AGAPANTHEE,

## (Endl. gen. pl. 1, p. 141.)

Funkia, Spreng. (syst. 2, p. 5, No. 1190;—Endl. l. c.)

- coerulea, (T. ovata, Spreng. syst. 2, p. 40;—Schult. syst. 7, p. 421.
   —Hemerocallis coerulea, Andr. B. Repos. 1, t. 6;—Vent. Malm. t.

Fl. very large, snowwhite, sweet-scented, R. S.; fr. 0.
- AGAPANTHUS, L'Herit. (Spreng. syst. 2, p. 5, No. 1184;—Endl. gen. pl. 1, p. 141.)
  - 1. umbellatus, L'Herit. (Sert. angl. 18;—Spreng. syst. 2, p. 29;—Schult. syst. 8, p. 997;—B. M. 14, t. 500.—Crinum africanum, L.—Mauhlia linearis, Thunb.) 2. C. G. H. Has been introduced into H. C. G. Fl.?
  - pracos, Willd. (Schult. syst. 8, p. 998.—A. umbellatus, β. præcox, Spreng. syst. 2, p. 29.)
     C. G. H. Introduced into H. C. G. Fl.?

- Polianthes, L. (Spreng. syst. 2, p. 7, No. 1225;—Endl. gen. pl. 1, p. 142.) Tuberose.
  - 1. tuberosa, L. (Spreng. syst. 2, p. 75;—Schult. syst. 7, p. 625;—Ruiz. and Pav. fl. per. 3, p. 66.—Lour. fl. cochinch. 1, p. 244;—B. Reg. 1, t. 63;—B. M. 43, t. 1817;—Rosb. fl. ind. 2, p. 166;—J. Grah. Cat. B. pl. p. 217.—Amica nocturna, Rumph. 5, t. 98.) America. Gardens in India, Ceylon and Java. Fl. large, white, fragrant, R. S.; fr. 0.  $\beta$ . plena. Fl. double, fragrant, R. S.

This plant emits its scent most strongly after sunset, and has been observed in a sultry evening, after thunder, when the atmosphere was highly charged with electric fluid, to dart small sparks, or scintillations of lucid flame, in great abundance, from such of its flowers as were fading. (*Edinb. phil. journ.* 3, p. 415.)

\* Funkia albo-marginata, Hook.; B. M. 65, t. 3657. 4. Japan.—F. Sieboldiana, Hook.; B. M. 65, t. 3663. (F. Sieboldii, Lindl; B. Reg. 1839, t. 50.—Hemerocallis Sieboldiana Lodd.; B. Cab. t. 1869.) 4. Japan.—Milla biflora, Cav.; B. Reg. 18, t. 1555. 4. Mexico.—Bessera elegans, Schult. (Pharium fistulosum, Herb.; B. Reg. 18, t. 1546.) 4. Mexico.—Polianthes gracilis, Lk. 4. Brazil.—P. maculata, Mart. 4. Mexico.

### C. ALOËE.

#### (Aloinëæ, Endl. gen. pl. 1, p. 143.)

Sanseviera, Thunb. (Spreng. syst. 2, p. 8, No. 1254; -Endl. l. c.)

- 1. guineënsis, Willd. (Spreng. syst. 2, p. 93;—Schult. syst. 7, p. 355;—B. M. 29, t. 1180, excl. syn. Cavan.—Aloe guineënsis, Jacq.—Aletris guineënsis, Jacq. vind. 1, p. 36, t. 84.) 4. Guinea. C. G. H. Fl. large, greenish-white, during the evening and night very fragrant, R. S., but very rare; fr. 0.
- 2. Rosburghiana, Schult. (syst. 7, p. 357;—Rozb. Corom. 2, t. 184; fl. ind. 2, p. 161, excl. syn. L. and Willd.;—J. Grah. Cat. B. pl. p. 218, excl. syn. Rheed. and Ker.) and Moarba. Bowstring Hemp. 24. Peninsula of India. Bengal, (Serampore,) &c. Fl. middle-sized, greenish-white, somewhat fragrant, and fr. R. S. This plant yields fibres of a fine and very strong quality, fitted for bowstrings, fishing lines, as well as for cordage, which, indeed, is made from it on the Coromandel coast. Roxburgh is of opinion, that the fine fibres, called China grass, are made from this plant, which he strongly recommends as a profitable cultivation in sandy soils of S. India. (Royle.)

B. p. 24.—Asphodelus comosus, Houtt. Linn. pfl. syst. 2, p. 381, t. 83.—Ornithogalum punctatum, Thunb. pr. 62.—Basilæa punctata, Lam. ill. t. 289, f. 2.—Tritillaria punctata, Gmel.) 2. C. G. H. Fl. 1 inch, green, outside purplish, the inner segments whitish, R. S.; fr. 0. The whole plant has a somewhat unpleasant, heavy smell.
    - β. striata, (B. M. 37, t. 1539.—E. striata, Donn. hort. cant. 6, p. 86.)
       4. C. G. H. Leaves purple-streaked on the back, R. S.; fr. 0.

- undulata, Ait. (Spreng. l. c.;—Schult. l. c.;—B. M. 27, t. 1083.—E. regia, L'Herit. sert. angl. 17, not Ait. and excl. syn. Dill. and L.;—Red. lil. t. 175, excl. syn. Dill., L., Mill., and Ait.—Ornithogalum undulatum, Thumb.—Fritillaria longifolia, Hill.; H. Kew. 354, t. 15.—F. autumnalis, Mill.—Basilæa coronata, Lam.)
   C. G. H. Fl. 6 lines, yellowish-green, R, S.; fr. 0.
- Scilla, L. (Spreng. syst. 2, p. 6, No. 1217;—Endl. gen. pl. 1, p. 146.)
  Squill.
  - 1. peruviana, L. (Spreng. syst. 2, p. 68;—Schult. syst. 7, p. 558;—Red. lil. t. 167;—B. M. 20, t. 749;—Rosb. H. B. p. 24.—Ornithogalum speciosum, Rafin.) 4. Algiers. Tunis. Sicily. Italy. Portugal, but not Peru. Fl. 4-5 lines, bluish-violet. Introduced into H. C. G. in 1804, but had not fl. in 1814.
  - autumnalis, L. (Spreng. o. c. p. 67;—Schult. o. c. p. 568;—E. B. 2,
     t. 78;—Red. lil. t. 317;—B. M. 23, t. 919.—Anthericum autumnale, Scop.—Ornithogalum autumnale, Law.)
     W. and S. Europe. N. Africa. S. Tauria. Fl. 3 lines, rose-coloured. Introduced in 1821. Fl.?
  - 3. bifolia, L. (Spreng. l. c., excl. syn.;—Schult. o. c. p. 569;—E. B. 1, t. 24;—Jacq. austr. t. 117;—B. M. 20, t. 746;—B. Cab. t. 283;—Red. lil. t. 254.—Stellaris bifolia, Mönch.—Anthericum bifolium, Scop.—Ornithogalum bifolium, Neck.) 24. Middle and S. Europe. Fl. 4-8 lines, blue. Introduced in 1821. Fl.?
  - 4. amena, L. (Spreng. l. c.;—Schult. o. c. p. 571;—Jacq. austr. t. 218;—B. M. 10, t. 341;—Red. lil. t. 298.) 4. S. and M. Europe. Fl. 10-12 lines in diameter, bright azure. Introduced in 1821. Fl.?
  - corymbosa, Ker. (Spreng. o. c. p. 66;—Schult. o. c. p. 574.—Hyacinthus corymbosus, L.;—B. Repos. t. 345.—Massonia corymbosa, B. M. 25, t. 991.)
     C. G. H. Fl. 4-5 lines, purple, with a red keel. Introduced in March, 1841. Has not fl. yet.
  - 6. indica, Roxb. (A. ind. 2, p. 147;—J. Grah. Cat. B. pl. p. 220.) 4. Common on the sandy shores of both Concans. Introduced into H. C. G. in 1800, where it fl. and fr. March and April. Here it has not fl. for the last 12 years. The taste of the root is fully as nauseous and bitter as that of the true Squill, (Urginea maritima, Steinh.) and it may be possessed of the same qualities. (Roxb.)
  - 7. coromandeliana, Roxb. (A. ind. 2, p. 147.) 4. Sand-hills on the Coromandel Coast. Introduced in 1802, into H. C. G. where it fl. and fr. April and May. Here it has not fl. for the last 12 years.
- URGINBA, Steinhell. (Endl. gen. pl. 1, p. 146.)
  - maritima, Steinh. (Ann. sc. nat. 1834, 1, p. 321.—Scilla maritima, L.;—Spreng. syst. 2, p. 68;—Schult. syst. 7, p. 556;—Red. lil. t. 116.—Ornithogalum maritimum, Tournef.—O. Squilla, a. B. M. 23, t. 918.)
     Shores of the Mediterranean. Fl. 6-8 lines in diameter, white, tinged with green. Has been cultivated for many years in the Serampore garden, without fl.

- ORNITHOGALUM, L. (Spreng. syst. 2, p. 5, No. 1185;—Endl. gen. pl. 1, p. 146.)
  - aureum, Curt. (B. M. 6, t. 190; Spreng. syst. 2, p. 33; Schult. syst.
     p. 508; B. Cab. t. 1183.)
     C. G. H. Introduced in 1824. Fl.?
  - thyrsoides, Jacq. (Spreng. l. c.—Schult. o. c. p. 509.)
     C. G. H. a. album, (B. Reg. 4, t. 316;—Jacq. vind. 3, p. 17, t. 28;—B. M. 29, t. 1164;—Red. lil. t. 333;—Roxb. H. B. p. 24;—J. Grah. Cat. B. pl. p. 220.—O. arabicum, L., as to description, but excl. syn.)
    - β. flavescens, (B. Reg. 4, t. 305;—Jacq. ic. rar. 2, t. 437;—Roxb. H. B. p. 24.) Both varieties introduced into H. C. G. in 1799, but had not fl. in 1814.
  - 3. arabicum, L. (Spreng. l. c.; Schult. o. c. p. 511; B. M. 19, t. 728.) 4. S. Europe. N. Africa. Introduced in 1825. Fl.?
  - 4. revolutum, Jacq. (hort. schönbr. 1, p. 46, t. 89;—Spreng. o. c. p. 31;—Schult. o. c. p. 513;—B. M. 18, t. 653;—B. Reg. 4, t. 315.)

    4. C. G. H. Introduced in 1831. Has not. fl.
  - 5. lacteum, Jacq. (Ic. rar. 2, t. 344;—Spreng. o. c. p. 32;—Schult, l. c.;—B. M. 28, t. 1134;—Red. lil. t. 418.) 4. Introduced in 1831. Has not fl.
  - pyramidale, L. (Spreng. l. c.; Schult. o. c. p. 515; Jacq. ic. rar. 2,

   Europe. Introduced in 1822. Has not fl.
- caucasicum, Bieb. (Spreng. o. c. p. 1053.—A. paniculatum, B. M. 25,
   973, excl. syn.) 4. Caucasus. Introduced in 1822. Has not fi.
- nutans, L. (Spreng. o. c. p. 34.—Schult. o. c. p. 1065;—B. M. 28, t. 1143.)
   Siberia. Introduced in 1822. Has not fl.
- glaucum, Schrad. (Schult. o. c. p. 1066.—A. senescens, B. M. 29, t. 1150, not L. and excl. most of the syn.) 4. Siberia. Introduced in 1822. Has not fl.
- stellatum, Ker. (B. M. 38, t. 1576, excl. β;—Spreng.o.c.p. 38.—Sokult. o. c. p. 1088.)
   N. America. Introduced in 1822. Has not fl.
- triquetrum, L. (Spreng. l. c.; —Schult. o. c. p. 1111.—B. M. 22, t. 869.—Red. lil. t. 319.)
   S. Europe. N. Africa. Fl. middle-sized, white with green keels, C. S.; but rare.

- Moly, L. (Spreng. o. c. p. 36;—Schult. o. c. p. 1119;—B. M. 14, t. 499.)
   S. Europe. Introduced in 1825. Has not fl.
- 20 victorialis, L. (Spreng. l. c.;—Schult. o. c. p. 1122.—Red. lil. t. 265;—B. M. 30, t. 1222.) 4. Alps of M. and S. Europe. Introduced in 1825. Has not fl.
- fragrans, Vent. (Spreng. o. c. p. 37;—Schult. o. c. p. 1125;—Red. lil. t. 68.—A. inodorum, Ait.; B. M. 28, t. 1129, excl. syn. Michx.)
   Virginia, Carolina. Mexico.
  - y. nepalense, (A. fragrans, β. nepalense, B. Reg. 11, t. 898.) 4. Nepal, Introduced in 1840. Has not fl.
  - striatum, Jacq. (ic. rar. 2, t. 366;—Spreng. o. c. p. 39;—Schult. o. c. p. 1128;—B. M. 26, t. 1035, and 37, t. 1524.)
     Canada. Carolina. Virginia, not H. C. G. Fl. 5-6 lines, white, with green keels, C. S.; fr. 0.
- 23. tuberosum, Roxb. (H. B. p. 24; fl. ind. 2, p. 141, not Rottl.)

  24. Cultivated about Calcutta. In H. C. G. fl. R. S. The natives use it as an article of diet, as leeks are used in Europe. (Roxb.) This species, in Roxb. fl. ind. l. c. called In fluid Bunga-ghundeena, is unknown to us, as well as to our oldest native gardeners, who have hitherto been unsuccessful in their endeavours to procure it from the neighbourhood, or H. C. G. It is enumerated in Wall. Cat., as "Roxb. Hb. Madr. Cultivated in the Mission garden, Tranquebar," while Royle simply mentions it as Roxburgh's plant. A. tuberosum, Rottl. (Spreng. syst. 2, p. 38;—Schult. 8, p. 1119.) differs from Roxburgh's described in. fl. ind. l. c. by its terete scapes, two-valved spathes, obtuse sepals, and its stamens equalling the perianth.

## ORDER CCXLIV.—COMMELYNACÆ, Lindl. Nat. Syst. p. 354.

#### THE SPIDER-WORT TRIBE.

Herbs, by Lindl. (excluding Hagenbachia, and adding Murdannia,) referred to 14 genera. Of these, Spreng. and Schult. enumerate about 45 species for S. America, Mexico, and the W. Indies; 15 for New Holland; 8 for N. America; 3 for Guinea; 2 for Arabia; 2 for China; and 2 for Japan. In S. Africa have been discovered about 5 species (*Harvey*); and in the E. Indies 59, viz. 12 of *Commelyna*, (all over India); 28 of *Aneilema*, (all over India.); 2 of *Pollia*, (Java.); 8 of *Tradescantia*, (all over India.); 6 of *Cyanotis*, (all over India.); 1 of *Murdannia*, (Himalayas, Khassya Mountains, Kheree Jungles,); and 2 of *Campelia*, (Java.) Properties unknown.

## ORDER CCXLV.—BUTOMACEÆ, Lindl. Nat. Syst. p. 355.

Water and marsh plants, by Lindl. referred to 3 genera. Of these, I species of Hydrocleis is a native of S. America; I of Limnocharis a native of the W. Indies; and 2 of Butomus, natives of the E. Indies. One of the latter is also common to Europe and N. Asia. Properties unimportant.

Butomus, Tournef. (Spreng. syst. 2, p. 264, No. 1534;—Endl. gen. pl. 1, p. 129.)

- umbellatus, L. (Spreng. syst. 2, p. 273;—E. B. 10, t. 651.) Flowering Rush.
   Europe. N. Asia. N. India. Loodiana. Cashmere. Fl. largish, variously shaded with rose-colour, purple and white. Introduced in 1813. Fl.? Plant acrid, formerly considered deobstruent.
- lanceolatus, Roxb. (f. ind. 2, p. 315;—Royle ill. p. 401, t. 95, f. 1;

  —J. Grah. Cat. B. pl. p. 251.—B. latifolius, D. Don.;—Spreng. c. p. p. 157.)
   Tank at Chiblee in the Surat district, N. W. Provinces of India, from the Turai of Nepal, as far as Scharunpore. Fl. middle-sized, white, with the sepals pale-green outside, and rose-tipped, R. S. but very rare.
- \* Limnocharis Plumieri Rich.; B. M. 52, t. 2525. 4. W. Indies.—
  Hydrocleis Humboldtii, Rich. (Limnocharis Humboldtii, B. M. 60, t. 3248;—B. Reg. 19, t. 1640.) 4. S. America.

ORDER CCLVI.—ALISMACEÆ, R. Br.—Lindl. Nat. Syst. p. 355.

#### THE WATER PLANTAIN.

"All aquatic plants, with a lax tissue, and many with a fleshy rhizoma, which is eatable," (Agardh.) by Lindl. referred to 5 genera. Of these, Spreng. syst. enumerates about 12 species for N. America; 6 for Europe; 6 for S. America and the W. Indies; 1 for Guinea; 1 for Madagascar; 1

for Dahuria; I for China; and I for New Holland. In the E. Indies have been discovered 3 species of Sagittaria, (all over India, I also common to Europe and N. America); and 7 of Alisma, (Deyrah-Dhoon, the Khassya Mountains. Assam. Serampore. Tavoy. Nathpur. Ratangunj. Cheetam. I of them also common to Europe.) The rhizoma of several Alismas and Sagittarias eatable. A species of the latter is cultivated for food in China. The herbage is acrid. (Agardh.)

- Sagittaria, L. (Spreng. syst. 2, p. 564, No. 2015;—Endl. gen. pl. 1, p. 128.) Arrow-Head.
  - 1. sagittifolia, L. (Spreng. syst. 2, p. 632;—E. B. 2, t. 84;—Gärtn. fr. 2, p. 21, t. 84, f. 8;—Roxb. fl. ind. 3, p. 645.) (Str. Choto-kut. 4. Peninsula of India. Bengal, (Serampore.) Nepal. ORDER CCXLVII.—JUNCACEÆ, AGARDH. Lindl. Nat. Syst. p. 356.

#### THE RUSH TRIBE.

Herbs, by Lindl. (adding Prionium, Susum and Narthecium) referred to 14 genera. Of these Spreng. syst. enumerates 46 species for Europe; 37 for New Holland; 18 for S. America; 18 for N. America; 3 for Siberia; 3 for N. Africa; 2 for the Straits of Magellan; 2 for the Canaries; 1 for Terra del Fuego, and, adds Lindl. 2 for Melville Island. In S. Africa have been discovered 10 species (Harvey); and in the E. Indies 18; viz. 13 of Juncus, (Himalayas, I from Delhi, I from Hazaribagh, several European); 1 of Luxula, (Kunawur, Europe, Caucasus, Altai); 3 of Flagllearia, (Moluccas, Cochin China, Ceylon, both Peninsulus of India, Bengal, Java; one also a native of New Holland); and 1 of Susum (Java.) "Only employed for mechanical purposes, as the Rush, and others, for making the bottoms of chairs, &c. the pith of the same for the wick of common candles. Juncus effusus is cultivated in Japan for making floor-mats. (Thunb.) The leaves of Flagellaria are said to be astringent and vulnerary." (Lindl.)

ORDER CCXLVIII.—PHILYDRACEÆ, Lindl. Nat. Syst. p. 357.

Herbs, natives of marshes or other wet places, belonging to 1 genus, and 2 species, both belonging to New Holland, and 1 of them also to China and Cochin China. "Properties unknown." (Lindl.)

\* Philydrum lanuginosum, Banks. (Garciana cochin-chinensis, Lour.)
Tropical New Holland. S. China. Cochin China.

ORDER CCXLIX.—PANDANACEÆ, Lindl. Nat. Syst. p. 361. (Pandaneæ, Endl. gen. pl. p. 242.)

Palm-like plants, by Lindl. referred to 2 genera. Of these, Spreng. syst. enumerates 8 species for the Mascarenhas Islands; 2-3 for Madagascar; 2 for New Holland; and 1 for Guinea. In the E. Indies have been found 12 species of *Pandanus*, and 4 of *Freycinetia*. The American species of this order, alluded to by Humb. in Lindl. 1. c. p. 362, are unknown to us.

"The seeds of Pandanus are eatable. The fruit of several is also an article of food. The leaves are used for thatching and cordage. The immature fruit is reputed emmenagogue. Hamb." (Lind.)

Pandanus, L. fil. (Spreng. 3, p. 892, No. 3158;—R. Br. pr. p. 341;— Endl. gen. pl. 1, p. 242.)

- 1. odoratissimus, L. fil. (Spreng. syst. 3, p. 897;—Roxb. Corom. 1, t. 94, 95, 96; fl. ind. 3, p. 738, excl. syn. As. res.—Lour. cochinch. 2, p. 603;—Rheed. 2, t. 8;—J. Grah. Cat. B. pl. p, 227.—Athrodactylis spinosa, Forst. gen. No. 75;—Rheed. 2, t. 1-5;—Rumph. 4, t. 74.) (ANI Kea. 5 Native place uncertain. Cultivated over all the warmer parts of Asia. Fl. small, delightfully fragrant, R. S.; fr. C. S. The fusiform, tough, fibrous roots are used by basket-makers to tie their work with, and on account of their softness, by the natives, as corks, (Roxb.) Matting and package bags are made of them at the Mauritius. Avenues are formed of the shrubs themselves in China, Cochin China and Mauritius, and in the two former countries elephants are fed on them. (Lour. Hardw.) The lower yellow pulpy part of the drupe, is sometimes eaten by the natives during times of scarcity and famine, the same is the case with the white base of the leaves, which is consumed raw or boiled. (Rosb.)
- 2. moschatus, Rumph. (Amb. 4, p. 147, cap. 85;—P. lævis, Lam.;—Spreng. 3, p. 398.—P. inermis, Rosb. fl. ind. 3, p. 744.) 5 Meluccas. Cochin China. Introduced into H. C. G. in 1810, but had not fl. in 1814.

- Leram, Jones. (P. Millore, Roxb. H. B. p. 71.) Nicobar Bread-fruit. (As. Res. 3, p. 161.) 5 Nicobar Islands. Introduced into H. C. G., before 1814. Fl.?
- 4. foetidus, Roxb. (fl. ind. 3, p. 742.) কোৱা কাটা Kea-Kanta. 5 Bengal, (Calcutta, Serampore.) Fl. small, almost as offensive as those of Sterculia foetida, L.; C. S.; fr. R. S. Only employed for hedges. (Roxb.)
- 5. furcatus, Roxb. (fl. ind. 3, p. 744;—Spreng. syst. 3, p. 898. excl. syn. Rheed. 2, t. 8.) 5 Pegu. Chittagong. Malabar, &c. Introduced into H. C. G. in 1811. Had not fl. in 1814.
- 6. marginatus, Roxb. (H. B. p. 71.) 5 Mauritius. Introduced in H. C. G. in 1811. Had not fl. in 1814.
- utilis, Bory. (Willd. enum. Diebr. Lesi. Nachtrag, 5, p. 503.—Spr. syst.
   p. 897.—P. nudus. Pet. Th.—P. odoratissimus, Jack. not L.) Amboyna. Cochin China. Bourbon. Mauritius.
- 8. amaryllifolius, Roxb. (fl. ind. 3, p. 743.) 5 Amboyna. Introduced into H. C. G. in 1798, but had not fl. in 1814. In the Serampore garden it has been cultivated for about 30 years, without fl.
- 9. Candelabrum? Pal. Beauv. (fl. Owar. and Benin. 1, p. 37, t. 21, and 22.—Spr. p. 898,) Guinea. Royal. Bot. Gard. Ceylon.
- edulis, Pet. Th. (Spreng. syst. 8, p. 898.)
   Madagascar. Fl. small,
   R. S.; fr. C. S.
- 11. drupaceus, Pet. Th. (*Poir. cycl. suppl.* 1, p. 576, Spr. 898.)—
  Mauritius ♀ fl. May 1840, fr. Sept. to Oct.
  - \* Pandanus utilis, Bory. Madagascar,—P. fascicularis, Lam. Moluccas.—P. caricosus, Rumph. Moluccas.—P. spiralis, R. Br. Tropical New Holland.—P. pedunculatus, R. Br. Tropical N. Holland.—P. palustris, Pet. Th. Mascaranhas Islands.—P. elegans, Pet. Th. Mascaranhas Islands.—P. kumilis, Rumph. Moluccas.

## ORDER CCL.—CYCLANTHACEÆ, Lindl. Nat. Syst. p. 362.

Palm-like plants, by Lindl. referred to 3 genera with 11 species, all natives of S. America and the W. Indies. "Buttons are turned from the hard albumen of Phytelephas, or the Tagua plant. Humb." (Lindl.)

\* Carludovica latifolia, Ruiz. and Pav.; B. Cab. t. 1068. (Ludovia latifolia, Pers; B. M. 56, t. 2950, 51.) 5 Peru.—C. palmæfolia, Endl. St. Domingo.—Cyclanthus bipartitus, Poit. Guiana.—C. Plumieri, Poit. Martinico.

Genus allied to Pandanaceæ, which according to Endl. embrace the lastmentioned order.

NIPA, Thunb. (Spreng. syst. 3, p. 757;—Endl. gen. pl. 1, p. 244.) Contains only one species, viz:—

1. fruticans, Thunb. (Act. holm. 1782, p. 231;—Spreng. syst. 3, p. 772;
—Lam. ill. 3, t. 897;—Labill. in mem. mus. 5, p. 297, t. 21, 22;—
Roxb. fl. ind. 3, p. 650.—Nypa, Rumph. 1, t. 16.—Cocos Nypa,
Lour.) 电可引 Goolga. 5 Moluccas. Cochin China. Soonderbuns, &c.
Introduced into H. C. G. in 1810. Fl.?

## ORDER CCLI.-ARACEÆ, Schott.

(Aroideæ, Juss.;-Endl. gen. pl. p. 232.)

#### THE ARUM TRIBE.

Herbaceous plants, frequently with a fleshy cormus, or shrubs; stemless or arborescent, or climbing by means of aërial roots," (Lindl.) referred by Endl. to 38 genera. Of these, Spreng. syst. enumerates 42 species for S. America, Mexico and the W. Indies; 11 for Europe? 6 for N. America; 4 for N. Holland; 1 for Siberia; 1 for China; 3 for Japan; 1 for S. Africa; I for Guinea; I for N. Africa; I for Syria; and I for Tauria, and The Indian species, described by Roxb., amount to 48. Of additional species Wallich's several publications enumerate about 16, Royles ill. 3, and J. Graham's. Cat. B. pl. p. 4, in all 71; viz. 1 of Pistia; 1 of Ambrosinia; 3 of Cryptocoryne; 4 of Arisæma; 1 of Sauromatum; 5 of Typhonium; 4 of Pythonium; 1 of Amorphophallus; 1 of Remusatia; 9 of Colocasia; 1 of Aglaonama (Arum. Lk.); 3 of Homalonema (one of these Calla occulta, Lour.); 13 of Scindapsus; 1 of Pothos; 2 of Lasia; 1 of Dracontium; and 2 of Acorus. The remaining 22 species we have not been able to adapt to Endl. and Schott's Araceous synopsis, partly from want of specimens, and partly from the inaccuracy of the descriptions. Acridity prevails in most species of the order, and is in some American ones so concentrated as to make them dangerous poisons. As, however, this principle is abstracted by cooking, drying, washing with water, and even by long cultivation, the fecula redundant in many of their under-ground stems remains, and may be rendered available as an article of diet. This is the case with a great many of our Indian Arums, well known under the common name of Kuchoo.

A. AREM, (Aracem, Endl. gen. pl. p. 233.)

a. Pistëinæ. (Pistiaceæ, Endl. l. c.)

PISTIA, L. (Spreng. syst. 3, p. 757, No. 3063;—Endl. l. c.)

1. Stratiotes, L. (Spreng. syst. 3, p. 772; — Jacq. amer. p. 234, t. 148; ed. pict. t. 225; — Roxb. fl. ind. 3, p. 131; — J. Grah. Cat. B. pl. p. 200. — Tala indica, Lour.; — Rheed. 11, t. 32; — Rumph. 6, t. 74.)

Takepana. © Swimming on pools of stagnant water in the Moluccas, Cochin China, Sunda Islands, Ceylon, both Peninsulas of India, Bengal. Fl. small, pale-yellow, H. and R. S.; fr. R. and C. S. (Serampore,) &c. extending as far as Saharunpore. Tropical America. In Jamaica, in hot dry weather it impregnates the water with its acrid particles to such a degree, as to give rise to the bloody flux. (Browne. hist. of Jam. 330.) Cut into small pieces and mixed with rice, it is given to sucklings, who greedily devour this mixture. The leaves are almost tasteless, but their acridity soon attacks the mouth and lips as much as in Arum. (Rumph.) The natives make them into a poultice for the piles. (Ainslie.)

- Ambrosinia, Bassi. (Spreng. syst. 3, p. 757, No. 3062;—Endl. gen. pl. 1, p. 233.)
  - 1. Rozburghiana, (A. unilocularis, Rozb. fl. ind. 3, p. 493.) 4. Coromandel. Has been introduced into H. C. G.?
    - b. Cryptocorynæ, (Cryptocorynëæ, Bl.; Endl. gen. pl. 1, p. 234.)
- CRYPTOCORYNE, Fisch. (from Wydler in Linnæa, 5, p. 428;—Endl. l. c.)
  - 1. ciliata, Schott. and Endl. (Ambrosinia ciliata, Roxb. Corom. 3, t. 262; fl. ind. 3, p. 491;—Spreng. syst. 3, p. 771.) ( Keralee. 4. Banks of rivulets, ponds, and wet places in Bengal, (Serampore.) Fl. minute, and fr. R. S. (Roxb.)
  - spiralis, Schott. and Endl. (Ambrosinia spiralis, Rosb. fl. ind. 3, p. 492.—Arum spirale, Retz.;—Spreng. syst. 3, p. 768;—B. M. 48, t. 2220;—J. Grah. Cat. B. pl. p. 228.)
     Moist, shady banks of ponds or standing sweet water, or rivers of the coast of Coromandel, of the Deccan, and the Concans. Fl. minute, and fr. R. S. (Rosb.)
  - 3. retrospiralis, (Ambrosinia retrospiralis, Rosb. fl. ind. 3, p. 492.) 4. N. Bengal in moist places. Fl. minute, R. S. (Rosb.)
    - c. Dracunculinæ, Endl. and Schott.

Endl. gen. pl. 1, p. 234.

#### ARISAMA, Mart. (Endl. l. c.)

- 1. triphyllum, Endl. (Arum triphyllum, L.;—Spreng. syst. 3, p. 769, excl. syn;—B. M. 24, t. 950, a.) 4. N. America, from Canada to Carolina. Introduced in 1825. Fl.? The milk in which the acrid root has been boiled, is said to have cured consumption. (DC.)
- 2. Dracontium, Endl. (Arum Dracontium, L.;—Spreng. l. c.;—B. Reg. 8, t. 668.) 4. N. America. Introduced in 1825. Fl.?

TYPHONIUM, Schott. (Endl. gen. pl. 1, p 235.)

- divaricatum, (Arum divaricatum, L.;—Spreng. syst. 3, p. 768;—Rozb. fl. ind. 3, p. 503;—J. Grah. Cat. B. pl. p. 228;—Rheed. 11, t. 20.)
   China. Coromandel Coast. The Concans. Bengal, (Serampore.)
   Fl. small, R. S.

- 3. orizense, Schott. (Arum orizense, Rosb. fl. ind. 3, p. 503;—R. Br. pr. p. 336;—Spreng. syst. 3, p. 769;—B. Reg. 6, t. 450;—B. Repos. 5, t. 356.—A. trilobatum, Lour. not L.) ( The sy Ghet-kuchov. 4. New Holland. Cochin China. Both Peninsulas of India. Ceylon. Bengal, (Serampore,) &c. Fl. minute, R. 8. the roots are exceedingly acrid, and used by the natives in poultices. (Rosb.)
- 4. trilobatum, Schott. (Arum trilobatum, L.;—Spreng. l. c.;—Roxb. fl. ind. 3, p. 505;—B. M. 10, t. 239, not Lour,—Rumph. 5, t. 110, f. 2.) 4. Moluccas. Fl. minute, R. S.
- ?5. sylvaticum, (Arum sylvaticum, Rosb. fl. ind. 3, p. 511.) 4. Circars. Fl. minute, R. S.

PYTHONIUM, Schott. (Endl. gen. pl. 1, p. 236.)

- 1. bulbiferum, Schott. (Arum bulbiferum, Roxb. fl. ind. 3, p. 510;—B. M. 46, t. 2072, and 51, t. 2508;—Spreng. syst. 3, p. 770;—J. Grak. Cat. B. pl. p. 229.) The Gold Umblo-bela. 4. Peninsula of India. Bengal, (Serampore.) Fl. small, May.
- 2. nepalense, Schott. (Thomsonia nepalensis, Wall. pl. as. rar. 1, t. 99.)
  2. Nepal. Has been introduced into H. C. G. Fl.?
- Amorphophallus, Bl. (in diar. batav. (1825.)—Endl. gen. pl. 1, p. 236.) 1. campanulatus, (Arum campanulatum, Rosb. H. B. p. 65; - Corom. 3, t. 272; fl. ind. 8, p. 509;—Spreng. syst. 8, p. 770;—B. M. 55, t. 2812; -J. Grah. Cat. B. pl. p. 228. -Arum Rumphii, Gaudich .- Arum zeylanicum, Commel. hort. v. 1, p. 101, t. 53 .- Candarum Roxburghii, Schott.—Rheed. 11, t. 18, 19; - Remph. 5, t. 112, 113, f. 2.) and Ol. Moluccas. Ceylon. Both Peninsulas of India. Bengal, (Calcutta, Serampore,) &c. Fl. minute, June. This species. which deserves to be called the Telinga Potatoe, is much cultivated in the N. Circars and about Surat, and highly esteemed for the wholesomeness and nourishing quality of the roots. A very rich soil, repeatedly ploughed, suits it best. The small tuberosities found in the large roots are employed for sets, and planted in the manner of potatoes. In twelve months they are reckoned fit to be taken up for use; the larger roots will then weigh from 4-8 or more pounds, and keep well if preserved dry. The natives employ them for food in the manner of the common yam. (Rosb.) In the Kainah Zilla, it is planted in May, and yields from 100-250 maunds per beegah. It sells for about a Rupee per maund. (Kirkland.)

d. Caladieæ, Schott. Endl. gen. pl. 1, p. 236.

REMUSATIA, Schott. (Endl. l. c.)

- 1. vivipara, Schott. (Arum viviparum, Rosb. fl. ind. 3, p. 496;—J. Grah. Cat. B. pl. p. 228.—Caladium viviparum, Nees.—Rheed. 12, t. 9.) 4. Both Concans. Mussooree, Nepal. Fl. R. S.
- COLOCASIA. Ray. (Endl. gen. pl. 1, p. 236.)
  - 1. antiquorum, Schott. (Eucolocasia.—Arum Colocasia, L.; Spreng. syst. 3, p. 769;—Roxb. fl. ind. 3, p. 494;—J. Grah. Cat. B. pl. p.

- 228.—A. ægypticum, Rumph. 5, t. 109.) ar Kuchoo. 4. Greece. Asia Minor. Syria. E. Indies. Fl. R. S.
- a. 电传 季夏 Goori-kuchoo.
- β. আৰ কছ Ashoo-kuchoo.
- These two varieties are cultivated in Lower Bengal, about Calcutta, Serampore, &c. Small offsets from the larger tubers are, like potatoes, planted about the beginning of the rains, in May and June, in a well laboured, friable, rich soil, not subject to inundations. The roots of a. are taken up in Feb. and March; those of  $\beta$ . about the close of the year. (Roxb.)
- 8. 513 Ex. Char-kuchoo. Disk of the leaves marked with dark-purple or bluish clouds, not cultivated. (Roxb.)
- ε. বৰ ক Bun-kuchoo. Leaves uniformly green. Not cultivated, and like δ. seldom eaten by the natives. (Resb.)
- 2. nymphææfolia, Royle. (Eucolocasia.—Arum nymphæifolium, Roxh. fl. sind. 3, p. 495;—J. Grah. Cat. B. pl. p. 228.—Caladium nymphæifolium, Vent.—Spreng. syst. 3, p. 771;—Rheed. 11, t. 22.) সার কছ Sar-kuchoo. 4. Both Concans. Bengal, (Serampore,) &c. Fl. R. S.
- 3. esculenta, Schott. (Eucolocasia.—Arum esculentum, L.;—Spreng. 3, p. 771.—Calla calyptrata, Roxb. fl. ind. 3, p. 514.—Arisarum esculentum, Rumph. 5, t. 111, f. 1.) 4. Jamaica. Brazil. Amboyna. Fl. May.
- 4. indica, (Alocasia.—Arum indicum, Lour.;—Roxb. fl. ind. 3, p. 498.)

  AND TO Man-kuchoo. 4. Various parts of India. In Bengal it is cultivated about the huts of the natives for its esculent stems and small pendulous tubers, these being very generally eaten by people of all ranks in ourries, &c. (Roxb.) Fl. Sept. Oct. and Nov.
  - β. মান গিড়ি Man-giri. Petioles darker-coloured. This as well as a seldom produce ripe seeds.
- ? 5. odera, (Arum odorum, Rosb. fl. ind. 3, p. 499; ... B. Reg. 8, t. 641.—Caladium odoratum, Spreng. syst. 3, p. 770.) 4. Pegu. Fl. very fragrant, Oct. to January; fr. March and April.
  - 6. fornicata, (Arum fornicatum, Rosb. fl. ind. 8, p. 501.) 河南 季 Salo-kuchoo. 4. Bengal, (Serampore.) Chittagong, &c. Fl. R. S.
  - 7. cucullata, Schott. (Arum cucullatum, Lour.;—Roxb. fl. ind. 3, p. 501.
    —Caladium cucullatum, Pers.;—Spreng. syst. 3, p. 770.) विस्थान
    Bishman. 4. Bengal, (Serampore.) Fl. R. S.
- HOMALONEMA, Schott. (Endl. gen. pl. 1, p. 236.)
  - 1. aromaticum, Schott. (Calla aromatica, Rosb. fl. ind. 3, p. 518.—Zantedeschia aromatica, Spreng. syst. 3, p. 765.) 4. Chittagong. Fl. C. S.

When cut, it diffuses a pleasant aromatic scent. The medicinal virtues of the root are in high estimation amongst the natives. (Rost).

? 2. rubescens, (Calla rubescens, Rosb. fl. ind. 3, p. 515;—Dracunculus amboinicus, Rumph. 5, t. 111, f. 2.) 4. Amboyna. Chittagong. Fl. August.

## RICHARDIA, Kth. (Endl. gen. pl. 1, p. 238.)

1. athiopica, Kth. (Calla ethiopica, L.; B. M. 21, t. 832; Rozb. H. B. p. 64.—Zantedeschia ethiopica, Spreng. syst. 3, p. 765.) 4. Fl. C. S.

Rumph.—A. odoratus, Lam.,—Rheed. 11, t. 60?) CTS TO Shwet-buch. Sweet Flag. 4. Europe. Siberia. N. America. Japan. Common in gardens. Fl. R. S. Schultes l. c. is of opinion, that Rheede's plant is widely different from that of Linneus. The latter remarks, that it is the only native aromatic plant of northern climates The root powdered might supply the place of foreign spices. It has a strong aromatic smell, and a warm, pungent,

bitterish taste. The flavour is greatly improved by drying. The Turks candy the roots, and regard them as a preservative against contagion. In many counties in England, in which the plant abounds, it was formerly used to strew the floors of houses instead of rushes; a purpose for which its fragrant leaves made it very suitable. The aromatic principle is an essential oil, which can be obtained by distillation. The root has been employed in medicine since the time of Hippocrates. By the moderns it is successfully used in the intermittent fevers, even after bark has failed, and is certainly a very useful addition to Cinchona. It is also a useful adjunct to bitter, and stomachic infusions. Thomson (Mat. Med. 134) says, it is too seldom prescribed. (Lond. enc. p. 257.)

- gramineus, Ait. (Spreng. l. c.; Schult. o. c. p. 174; Sm. spicil. p. 15, t. 17.)
   Cultivated in China. Has been cultivated here for more than 14 years, without fl.
- terrestris, Spreng. (syst. 2, p. 118.—Acorum terrestre, Rumph. 5, 178,
   72.

## ORDER CCLII.-LEMNACEÆ, Schleiden,

Comp. gen. and sp. in Mag. Nat. Hist. vol. 6, p. 259. Endl. gen. pl. 1, p. 232.

#### THE DUCK-WEED TRIBE.

Minute floating plants, 5 inhabiting Europe, America, and Van Dieman's Land, and 5 discovered in India, viz.:—

- LEMNA, L. (Spreng. syst. 2, p. 28, No. 125;—R. Br. pr. 1, p. 345;— Endl. gen. pl. 1, p. 232.) Duck-weed.
  - 1. orbiculata, Roxb. (fl. ind. 3, p. 565.) ⊙ Bengal. (Calcutta, Serampore,) &c. Fl. lateral, with a spathe, minute, R. and C. S.
- ? 2. cruciata, Roxb. (o. c. p. 566.) 

  Bengal, under the surface of the water in tanks, in most extensive interwoven masses. Has not been found here, and may perhaps belong to the next genus.
  - 3. obcordata, Hb. Buch. ⊙ Goruckpore.
- GRANTIA, Griff. (MSS.\* 1838.—Wolfia, Horkel. Miscel.? Schleiden compgen. and sp. Lemnaceæ, in Mag. Nat. Hist. vol. 6, p. 259.?) Named by Mr. W. Griffith, in honour of J. W. Grant, Esq.. of the Bengal Civil Service, one of the best microscopical observers of the present day.
  - 1. microscopica, Griff. MSS. © Calcutta. Serampore. Fl. most minute, terminal, naked, R. and C. S.
- ? 2. globosa, Griff. MSS. (Lemna globosa, Roxb. fl. ind. 3, p. 565;—J. Grah. Cat. B. pl. p. 252.) ⊙ Bengal. Serampore. Bombay. Fl. R. and C. S.
- Flos monandrus, terminalis. Spatha nulla. Anthera unilocularis. Planta minima, claviformis inter Phanerogameas simplicissima. (Griffith.)

ORDER CCLIII.—TYPHACEÆ, DC. Lindl. Nat. Syst. p. 365; Endl. gen. pl. 1, p. 241.

Marsh or ditch plants, generally inhabiting Europe and N. America. Of the genus *Sparganium*, one species is found in New Holland, another in India, and a third in Cashmere. The other genus *Typha*, contains 6 species, of which three are found in Europe and N. America, one of these also in Van Dieman's Land and India; two in the W. Indies and S. America; and one in India.

Турна, Tournef. (Spreng. syst. 3, p. 764, No. 3154;—R. Br. pr. p. 338;—Endl. o. c.) Cat's Tail.

- 1. angustifolia, L. (Spreng. o. c. p. 890;—E. B. 21, t. 1456;—Roxb. fl. ind. 3, p. 567;—R. Br. l. c.—T. minor, Curt. fl. lond. t. 169, not Sm.) রাম হোগলা Ram-hogla. 4. Peninsula of India. Bengal, (Serampore.) N. India. Fl. R. S. Leaves used for making mats.
- 2. elephantina, Roxb. (fl. ind. 3, p. 566;—J. Grah. Cat. B. pl. p. 227.)

  (a) Hogla. Elephant Grass. 4. Margins of tanks and beds of rivers throughout India. Fl. R. and C. S. Elephants are fond of this grass. (Roxb.) It is of great importance for binding the soil on the banks of the Indus with its long tortuous roots, of which great care is taken, when the culms are cut down to make matting of. They are also tied in bundles, and used as buoys to swim with, like sedges (Sparganium ramosum, Swz.) in England. (J. Grah. l. c.) The pollen of the flowers is abundant in this as well as in the other species, and if a light is applied to it, a flash of fire is produced.
- \* Typha minor, Sm., (E. B. 21, t. 1457.) 4. England. France. Germany.

  —T. latifolia, L.; E. B. 21, t. 1455. 4. Europe.—T. truxillensis,
  Kth. 4. Peru.—T. domingensis, Pers. 4. St. Domingo.—Sparganium
  ramosum, Swz.; E. B. 11, t. 744. 4. Europe.—S. natans, L.; E. B.
  4, t. 273. 4. Europe.—S. simplex, Swz.) E. B. 11, t. 745. 4. Europe.—S. stgloniferum, Hb. Buch. 4. Magahur.—S. carinatum,
  Falconer. 4. Cashmere.

ORDER CCLIV.—NAJACEÆ, (NAJADACEÆ, Lindl. Nat. Syst. p. 366;—Endl. gen. pl. 1, p. 229.)

Water plants, by Lindl. (including Aponogeton? and Spathium) referred to 16 genera. Of these, Spreng. syst. enumerates 26 species for Europe, of which several are also natives of America, Africa and Asia; 6 for S. America, Mexico and the W. Indies; 6 for N. America; 8 for N. Holland and the South Sea Islands (4 also natives of Europe,); 5 of S. Africa; 2 of Arabia; and 1 of Egypt. In the E. Indies have been found 1 species of Caulinia?

4 of Najas; 1 of Ruppia (Soonderbuns, Griffith,); 1 of Zannichellia; 13 of Potamogeton; 4 of Spathium; and — of Epigynanthus. Royle mentions, that Röttl. herb. contains numerous specimens of Ruppia, under the name of Zannichellia indica. Perhaps this species may be the same with that of the Soonderbuns. With the Cape species of Aponogeton we are not acquainted. "Properties unimportant. The root of Potamogeton natans is said to be eaten in Siberia. Zostera, or Sea-wrack, is a common material for packing, or for stuffing cottager's cushibns." (Lindl.)

NAJAS, L. (R. Br. pr. p. 345.)

- 1. dichotoma, Roxb. (fl. ind. 3, p. 749.) ⊙ Bengal. Has been introduced into H. C. G.
- ? 2. indica, Griff. MSS. (Caulinia indica, Willd. ? Spreng. syst. 1, p. 20.—Fluvialis indica, Pers. syn. 2, p. 530.) ⊙ Tranquebar. Serampore. Fl. R. S.
- 3. seminuda, Griff. MSS. O Serampore. Fl. R. S.
- 4. heteromorpha, Griff. MSS. @ Serampore. Fl. R. S.
- Potamogrton, L. (Spreng. syst. 1, p. 375, No. 566;—R. Br. pr. p. 343; Endl. gen. and ph. 1, p. 231.) Pond-weed.
  - indicus, Roxb. (fl. ind. 1, p. 452; ed. Carey, 1, p. 471;—Spreng. syst. c. p. p. 48;—J. Grah. Cat. B. pl. p. 200.) ⊙ Both Peninsulas of India. Bengal, (Calcutta, Serampore.) Oude, &c. Fl. small, green, Feb. and March; fr. April and May.
  - 2. tuberosus, Roxb. (fl. ind. 1, p. 452; ed. Carey, 1, p. 472; Spreng. syst.
    1, p. 499, excl. syn. Roth.; J. Grah. Cat. B. pl. p. 200.) ⊙ Peninsula of India. Bengal. (Calcutta, Serampore.) Oude. Nepal. Fl. small, green, Feb. and March; fr. April and May. Much employed in the N. W. Provinces of India in the process of purifying sugar. (Royle.)
- Spathium, Lour. (Endl. gen. pl. 1, p. 267.—Aponogeton, L. partly. Erroneously referred to Saururacese.)
  - chinense, Lour. (Aponogeton monostachys, L. fil.;—Spreng. syst. 2, p. 465;—Schult. syst. 8, p. 1591;—Lam. ill. t. 276, f. 1;—B. Repos. t, 406;—Roxb. Corom. 1, t. 81; fl. ind. 2, p. 210;—J. Grah. Cat. B. pl. 200.—Saururus nutans, L. mant.—Rheed. 11, t. 15.)
     GE Ghechoo. 4. S. China. Banks of the Irawaddi. Ceylon. Coromandel. Salsette. Concans. Bengal, (Serampore.) Silhet. Monghir. Fl. small, purplish-white, with blue anthers), R. S.; fr. C. S. The natives are fond of the roots, which are nearly as good as potatoes. (Rosb.)
  - 2. undulatum, (Aponogeton undulatus, Roxb. fl. ind. 2, p. 211.) 4. Bengal. In H. C. G. fl. R. S.; fr. C. S. (Roxb.)
  - 3. microphyllum, (Aponogeton microphyllus, Rozb. fl. ind. 2, p. 211.) 4. Bhootan Mountains. fl. R. S.; fr. C. S. (Rozb.)
  - \* Spathium? crispum (Aponogeton crispus, Hb. Buch.; Thunb.?) Muhuyadabad. Patangunj.—S.? echinatum. (Aponogeton echinatus, Roxb.) Shallow fresh water all over the Circars.

# ORDER CCLV.—TRIGLOCHINACEÆ (JUNCAGINACEÆ, Lindl. Nat. Syst. p. 367.)

Marshy plants, by Lindl. referred to 4 genera. Of these Spreng. syst. enumerates 5 species for New Holland and Van Diemen's Land; 5 for 8. America; 4 for Europe; 3 for N. America; and 1 for the Straits of Magellan. In S. Africa have been discovered 3 species of Triglochin, 2 of which are common to Europe, and in the Himalayas, Triglochin himalense, which, according to Royle, is scarcely to be distinguished from T. palustre of Europe. "Properties unknown." (Lindl.)

\* Triglochin palustre, L.; E. B. 6, t. 366. of Europe.—T. Barrelieri, Loisel. 2. S. Europe. N. Africa.—T. striatum, Ruiz. and Pav. 2. Inundated places of Peru.—T. procerum, R. Br. Tropical N. Holland.—T. dubium, R. Br. Tropical N. Holland.—Scheuchzeria palustris, L.; E. B. 26, t. 1801. 2. Swamps of England, &c.—Lilea subulata, Humb. Sides of lakes in New Granada.

# ORDER CCLVI.—PANICACEÆ, (GRAMINACEÆ, Lindl. Nat. Syst. p. 369.)

#### THE GRASS TRIBE.

This order is exceedingly numerous, and likely to increase in a larger ratio than the other phænogamous plants, so that the future proportion of grasses to the rest of Endogens will perhaps be as 1 to 20, or even perhaps as I to 16. Among the grasses there are both land and water-plants, but no marine ones. They occur in every soil, in society with others or alone, the latter in such abundance as entirely to occupy considerable districts. Sand appears to be less favourable to them, but even this has species nearly peculiar The diffusion of the order has almost no other limits than those of the whole vegetable kingdom. Species of it have been discovered on Spitzbergen, on the mountains of S. Europe, nearly to the snow-line, and on the Andes. The tropical grasses differ from the extra-tropical ones, by their greater size, some (f. ex. the bamboos) being 50-60 feet high; by their larger leaves; by their frequently separate sexes, and lastly by their softer, more downy and elegant flowers, The extra-tropical grasses on the contrary, far surpass the tropical ones in the number of individuals. That compact grassy turf, which, especially in the wilder parts of the temperate zones, in spring and summer composes the green meadows and pastures, is almost entirely wanting in the torrid zone. The grasses here do not grow crowded together, but, like other plants, more dispersed. Even

in the southern parts of Europe, the assimilation to the warmer regions, in this respect, is by no means inconsiderable. Donax arundinaceus, by its height, reminds us of the bamboo; while Saccharum Ravennæ, S. Teneriffæ, Imperata arundinacea, Lagurus ovata, Lygeum Spartum, and the species of Andropogon, Ægilops, &c., by their separate sexes exhibit tropical characters. The grasses are also less gregarious, and meadows occur seldomer in the south than in the north of Europe. (Extr. from Schow, in Jameson's philos. journ. April 1825, copied by Lindl.)

What may be the amount of Indian species of grasses, hitherto discovered, it is impossible for us to state, Nees von Esenbeck's synopsis of Wight's and Royle's grasses not being procurable, and those enumerated in Wall. Cat. still remaining in the hands of R. Brown. Supposing, however, the aggregate of the former to be 200, and the latter, after abstracting common forms, to amount to 100, the sum total of discovered Indian grasses will, on reducing Griffith's gramineous collections, probably be about 1300. The collections stand thus:—

Griffith, 270 from Affganisthan; 150 from the Peninsula of India; 128 from the Khassya Mountains; 100 from Assam; 100 from Serampore; 93 from Mergui; 73 from the Mishmee Hills; and 51 from Bhootan. In all 965, but after abstracting common forms perhaps 800.

Rosb.—217.—Royle and Wight.—200?—Wall. Cat. 131, reducible perhaps to 100.

As the Indian tropical grasses are abundant, and large in foliage, so do the species which extend along the foot of the Himalayas form a grass jungle sufficiently high to conceal the elephant and rhinoceros, while in ascending, we find many of the same genera and species which are met with in proceeding from the equator to the poles. The grasses found in the plains of India, some of which are confined to the Peninsula, but many of which are as common in the northern as in the southern plains, belong to genera, of some of which a few species ascend the mountains, and are found there at considerable elevations in the rainy season of the year. The majority of these genera are Asiatic, and the greater number of their species are contained in, and some of them confined to India; but some of the genera are as characteristic of the floras of America, New Holland and In the plains of N. India there are a few species likewise found in European countries, or which belong to genera more like European than Indian forms, f. ex. the common Doob grass, (Cynodon Dactylon.) Among the cold weather cultivation of wheat and barley, two European species are very commonly found, viz. Lolium temulentum, L. (the only grass, in its normal state of a deleterious nature,) and Avena fatua, L. Though many of the Gramineæ found in the Himalayas belong to genera of which the greater number of species inhabit tropical situations, yet it is only in the rainy season that these occur, and the mass of the grasses, like that of the vegetation in general of these mountains, will be found to be analogous to that of European countries; and many of those very species which are most

valued as pasture grasses in England, are found forming the grassy sward of the Himalayas. The plains of India being subject to great heat, with draught at one season and heavy rains at another, cannot be expected to present any pasture grounds resembling those of the best parts of Europe; but the temperature of the cold weather months, especially in the northern provinces, being such as to be most favourable for the cultivation of the same cereal grasses as in Europe, it is not surprising that good grass is produced there, and that many Europeans prepare very excellent hay. Their rapid growth, great height, and subsequent dryness render many of the Indian grasses unfit for pasture, at the end of the year. This the inhabitants of the tracts at the base of the Himalayas, as well as those within these mountains, remedy by yearly burning down the old and dry grass, so as to allow the young blades, which immediately sprout up, to afford fodder for the cattle. But most Europeans in India prefer, or indeed only give their horses, the creeping stems and leaves of the Dooba grass, which is by far the most common in every part of India, and moreover flowers through the greater part of the year. In N. India it is a common practice to form lawns and pastures of moderate extent, by planting pieces of the creeping stems of this grass, which yields excellent hay in what is the spring of the year in Europe. It forms indeed three-fourths of the food of the horses and cows in the south of India. (Royle ill. p. 415-21.) Cattle are also fed on the grass, whether green or dry, of Kodu (Paspalum scrobiculatum, L.); Cheena-ghas (Panicum miliaceum, Willd.); Jalgantee (Panicum Helopus Trin.); Kungoo Panicum miliare (Panicum italicum, L.); Burogalgantea (Panicum setigerum, Retz.); Chhoto-jalgantee (Panicum repens, Roxb.; Shama (Panicum colonum, L.); Damra-shama (Panicum frumentaceum, Roxb.); Bujura (Penicillaria spicata, Willd.); Jooar (Sorghum vulgare, Pers.; Sorghum cernuum, Willd; S. saccharatum, Pers. Roxb,); Makurjalee (Panicum ciliare, Retz.); Kash. (Saccharum spontaneum, L.); Andropogon Martini, Roxb.; Buksa (Rottböllia glabra, Roxb.); Juva (Hordeum hexastichon, L.,) &c.

The prevalence of particular grains in the zones and continents depends not only on climate, but is determined also by the civilization, industry and traffic of the people, and often by historical events, thus the earth may, according to Schouw, be divided into five grand tracts, distinguished by the prevalence of barley and oats, rye, wheat, maize or rice. The two first extend farthest to the north in Europe, constituting in the northern parts of Norway and Sweden, and in a part of Siberia and Scotland, the principal vegetable nourishment. Rye is the prevailing grain in the South of Norway and Sweden, in part of Siberia, in Denmark, and all the countries bordering on the Baltic. In the latter, another very nutritious grain, Buck-wheat, is very frequently cultivated. The rye tract is generally associated with the cultivation of wheat, barley there being chiefly cultivated for the manufacture of beer, and oats for supplying food for horses, The wheat tract comprehends the middle or the south of France,

England, part of Scotland and Germany, Hungary, the Crimea and Caucasus, as also the lands of middle Asia, where agriculture is followed. The next tract, where wheat still abounds, but no longer exclusively furnishes bread, maize and rice becoming frequent, includes Portugal, Spain, part of Mediterranean, France, Italy, Greece, the Canaries, Barbary, Egypt, Nubia, Arabia, Persia and N. India. In China and Japan rice is found to predominate. The cause of this difference between the east and the west of the old continent appears to be in the manners and peculiarities of the people. In N. America, wheat and rye grow as in Europe, but more sparingly. Maize is more reared in the new than in the old continent, and rice predominates in the southern provinces of the In the torrid zone, Maize predominates in America, Rice United States. in Asia, and both these grains in nearly the same ratio in Africa. The cause of this distribution is, without doubt, historical; for Asia is the native country of rice, and America of maize. In some situations, especially in the neighbourhood of the tropics, wheat is also met with, but always subordinate to maize and rice. In the high lands of S. America, maize grows to the height of 7200 feet above the level of the sea, but only predominates between 3000 and 6000 f. of elevation. Below 3000 it is associated with yams, manihot, batatas and plantains; while, from 6000 to 9260, the European grains abound, wheat in the lower regions, and rye and barley in the higher, along with which Chenopodium Quino, Willd, as a nutritious plant must also be mentioned. Potatoes alone are cultivated from 9260 to 12800 feet. In the torrid zone in Africa, plantains, manihot, yams, Arachis hypogea, L. and Sorghum vulgare, Pers. are added to the maize and rice. To the south of the Capricorn, f. ex. in S. Brazil, Buenos Ayres, Chili, C. G. H., and the temperate zone of New Holland, wheat predominates; barley, however, and rye, make their appearance in the southernmost parts of these countries, and in Van Dieman's Land, and in New Zealand, the European grains are now cultivated with success. In the Islands of the South Sea, grain of every kind disappears, its place being supplied by the Bread-fruit-tree, the Plantain and Tacca pinnatifida, Forst. Tropical New Holland exhibits no agriculture, the inhabitants living on the produce (Sago) of various palms, and some species of Arum. (Schouw. 1. c.) The Cerealia of India will be mentioned under the several species.

- 4. arundinaceus. (Anthisteria arundinacea, Rozb. fl. ind. 1, p. 251; ed. Carey, 1, p. 256.—Cymbopogon arundinaceus, Schult.) 4. Bengal, (Serampore.) Fl. R. S.; fr. C. S.
- 5. Schoenanthus, L. (Rosb. fl. ind. 1, p. 274; ed. Carey, 1, p. 278;—Wall. pl. as. rar. 3, t. 280;—J. Grah. Cat. B. pl. p. 238.—Cymbopogon Schoenanthus, Spreng. syst. l. c.;—Rheed. 12, t. 72.—Rumph. 5, t. 72, f. 2.) A Gall Gundho-bena. Lemon-grass. 4. Cultivated in gardens, but very seldom flowering. In the North of

- Bengal large tracts of waste land are covered with this grass. (Carey.) The fresh leaves are much used as a substitute for tea. The white succulent centre of the leaf-bearing culms is often put into curries, to give them an agreeable flavour. (Rosb.) The natives of the Moluccas extract a pleasant tasted essential oil from the leaves. (Carey.)
- 6. Martini, Roxb. (fl. ind. 1, p. 277; ed. Carey, 1, p. 280.—A. nardoïdes, Nees.?—A. Calamus aromaticus, Royle.?) 2. Central India extending north as far as Delhi, and south to between the Godavery and Nagpore. In H. C. G. fl. R. S.; fr. C. S. This grass has a strong aromatic and pungent taste, so that not only the flesh of the animals (which eat it voraciously) but also the milk and butter, have a very powerful scent of it. (General Martin.) It yields the fragrant grass-oil of Namaur.
- Iwarancusa, Blane. (Roxb. ft. ind. 1, p. 275; ed. Carey, 1, p. 279.)
   Hurdwar. Kheree Pass. Fl. and fr. C. S. Comes remarkably near
   A. Schoenanthus both in habit and taste. (Roxb.)
- 8. Nardus, Röttl.? (Spreng. syst. 1, p. 287;—Rosb. H. B. p. 7.) 4. Courtallum. Tinnevelly. In H. C. G. fl. R. S.; fr. C. S. Ainslie calls this grass ginger, or spice-grass, and says that the natives use its infusion as a stomachic, and occasionally prepare from it an essential oil useful in rheumatism. (Royle.) It is not mentioned in Roxb. fl. ind. but it is, evident that Dr. Carey, in H. B. l. c. took it to be A. Iwarancusa, Bl. which it perhaps may be.

Wall. pl. as. rar. 3, p. 273. Burma.-Lygeum Spartum, L. 4. Spain, used for making ropes, baskets, nets, &c. Alopecurus pratensis, L.; E. B. 11, t. 759. 4. Europe. Excellent meadow-grass.—A. geniculatus, L.; E. B. 18, t. 1250. 4. Burope.—Phleum pratense, L.; E. B. 15, t. 1076. 4. Europe. Good meadow-grass.—Ammophila arenaria, Lk. Arundo arenaria, L.; E. B. 8, t. 520. 4. Europe. Used to fix shore-sands against winds and tides.-Glyceria fluitans, R. Br. (Poa fluitans, L.; E. B. 22, t. 1520.) 4. Europe. A floating grass, greedily eaten by horses and cattle.— Hydrochloa aquatica, Hartm. (Poa aquatica, L.; E. B. 19, t. 1315.) 4. Europe. A good pasture grass forming in England the chief winter's fodder.—Poa abyssinica, Ait. O Grown as a bread-corn in Abyssinia, and furnishes the teff bread, that made from wheat being used only by the superior ranks. The dough is allowed to turn sour, and by generating carbonic gas, answers instead of yeast, it is then baked into circular cakes, which are white, spongy, of a hot disagreeable sourish taste, but light of digestion. The same bread, well

toasted, and infused in water for some days, furnishes the bouz, or common beer of the country. (Loud.)—Elymus arenarius L.; E. B. 24, t. 1672. 4. Europe. Prevents by its matted roots the shifting of loose sand thrown up by the tides.—Lolium perenne, L.; E. B. 5, t. 315. Rye-grass 4. © Europe. The annual sort well adapted for producing a bulky crop of hay—Centotheca lappacea, Desv. Coromandel.—Windsoria quinquefida, Lindl. 4. Pennsylvania. A very good fodder grass.

ORDER. CCLVII.—CYPERACEÆ, R. Br.—Lindl. Nat. Syst. p. 384.

#### THE SEDGE TRIBE.

"Plants resembling much those of the last tribe in appearance, though essentially distinguished by many important points of structure. Found in marshes, ditches, and running streams, in meadows, and on heaths, in groves and forests, in the blowing sands of the sea-shore, on the tops of mountains, from the Arctic to the Antarctic circle, wherever phænogamous vegetation can exist. Humboldt remarks, that in Lapland Cyperaceæ are equal to Gramineæ, but that thence, from the temperate zone to the equator, in the northern hemisphere, the proportion of Cyperaceæ to Gramineæ very much diminishes. As we approach the line, the character of the order also changes. Carex, Scirpus, Schænus, and their allies, cease to form the principal mass of the order, their room being usurped by Cyperus, Kyllinga, Mariscus, and the like genera, comparatively unknown in northern regions, or at least not forming any marked feature in the vegetatiom." (Lind!.)

The number of Indian Cyperaceæ, by Nees von Essenbeck, described from Lindley's, Royle's, Wallich's, and Wight's Herbaria, amount to 233 species, including nearly all Roxburgh's, viz. 54 of Cyperus; 5 of Papyrus; 5 of Mariscus; 5 of Kyllinga; 1 of Curtoisia; 1 of Remirea; 1 of Anosporum; 1 of Hemicarpha; 2 of Lipocarpha; 1 of Hypolytrum; 3 of Fuirena; 1 of Dichostylis; 4 of Abildgaardia; 1 of Chælocyperus; 1 of Echinolytrum; 21 of Fimbristylis; 14 Trichelostylis; 13 of Isolepis; 1 of Eleogiton; 1 of Malacochate; 1 of Hymenochate; 2 of Eriophorum; 7 of Scirpus; 2 of Eleogenus; 3 of Eleocharis; 5 of Limnochloa; 1 of Rhynchospora; 1 of Morisia; 1 of Haplostylis; 2 of Cephaloschoenus; 13 of Scleria; 1 of Cobresia; 1 of Cylindropus; 2 of Hypoporum; 1 of Diplacrum; 1 of Trilepis; 50 (52 Boott.) of Carex; and 1 of Uncinia,—(Contributions to Indian Botany, by R. Wight. Lond. 1834, p. 69-129 incl.) Griffith's herbarium comprehends of Cyperaceæ, 80 species from Serampore; 73 from Affghanistan; 70 from Mergui; 50 from Assam; 30 from the Khassya Mountains; 22 from the Mishmee Hills; 20 from Bootan. How many among these may be new forms, we have had no means of ascertaining.

The Cyperaceæ, though so nearly allied to Panicaceæ, differ from them much in utility, inasmuch as the order contains but few plants, which are of any importance, and of these the value depends upon the presence of mucilage and fecula in the roots of a few species, accompanied in others with a little bitterness, and some aromatic principle. (Royle.)

ORDER CCLVIII.—DESVAUXIACEÆ, Lindl. Nat. Syst. p. 386.

Small herbs, by Lindl. referred to 2 genera of 12 species, all natives of New Holland and Van Diemen's Land. Properties unknown.

\* Desvauxa exserta, R. Br. Tropical New Holland.—D. Banksii, R. Br. Tropical New Holland.—D. pusilla, R. Br. Tropical New Holland.

ORDER CCLIX.—RESTIACEÆ, R. Br.—Lindl. Nat. Syst. p. 386.

Herbs or undershrubs, by Nees von Essenbeck referred to 18, by Lindl. to 19 genera. Of these, according to R. Br., Harvey and Spreng., 60 species are natives of S. Africa; 47 of New Holland and Van Diemen's Land; 1 of S. America, (Lyginia montividensis, Spreng.); and 1 of Tranquebar. (Restio articulatus, Retz. Spreng.) The latter is not mentioned by either Roxb., Wall. or Royle. "Properties none, except that the tough wiry stems of some species are manufactured into baskets and brooms." (Lindl.) Restio tectorum, Thunb. is employed at the C. G. H., both in town and country, for thatching, and sometimes whole huts are

built of it. A roof thatched with it will last twenty or thirty years, and it is said would last much longer, if the S. E. wind did not blow dirt into it, which causes it to rot. It seems well worthy of introduction into India, where the thatch is of so perishable a nature." (Royle.) It has been introduced in Dapooree, where it is much used for thatching houses. (Dr. Lush.)

ELEGIA, Thunb. (Endl. gen. pl. 1, p. 122.)

- 1. juncea, Thunb. (Spreng. syst. 1, p. 362.—E. thyraifera, Pers. syn. 2, p. 607.—Restio thyraifer, Rottb. enc. bot. 6, p. 177;—Lam. ill. t. 804.) 4. C. G. H. Fl. C. S. fr. 0.

### ORDER CCLX.—XYRIDACEÆ, Lindl. Nat. Syst. p. 388.

Herbs, by Lindl. referred to two genera. Of these, R. Br., Harvey, and Spreng. enumerate 15 for New Holland and Van Diemen's Land, of which one also is common to India; 7 for S. America; 5 for N. America; 1 for Sierra Leona; 1 for S. Africa; and 1 for Madagascar. In the E. Indies, have been discovered 6 species of *Xyris*, 5 of which are described by Martius in Wall. pl. as. rar. 3, p. 29 and 30; and one (X. anceps, Lam.), according to Spreng. a native of Malabar. Properties unimportant. Xyris, L. (Endl. gen. pl. 1, p. 124;—Mart: o. c. p. 29.)

- 1. indica, L. (Mart. o. c. p. 30;—Rosb. fl. ind. 1, p. 179; ed. Carey, 1, p. 183;—J. Grah. Cat. B. pl. p. 223;—Rheed. 9, t. 71.) WITELL Dabee-doobee. © Bengal, (Serampore.) S. Concan. Coromandel. Fl. Nov. and Dec.; fr. January and Feb. "The natives of Bengal esteem it a plant of great value, because they think it an easy, speedy, and certain cure for the troublesome eruption called ring-worms." (Hon'ble. John Hyde in a letter to Rosb.) "This accords with what Rheede. says of it, vol. 9, p. 139. Foliorum succus cum aceto mixtus impetigini resistit. Folia cum radice oleo incocta, contra lepram sumuntur." (Rosb.)
- \* Xyris pauciflora, Willd. 4. Both Peninsulas of India. Silhet. Nepal.

#### CLASS 4TH.

## RHIZANTHÆ.

Lindl. Nat. Syst. p. 389.

ORDER CCLXI.—RAFFLESIACEÆ, Endl.; -Lindl. Nat. Syst. p. 392.

Stemless parasitical plants, by Lindl. referred to 4 genera; "natives of the E. Indies, and probably all astringent." (Endl.)

ORDER CCLXII.—CYTINACEÆ, Lindl. Nat. Syst. p. 392.

Parasitical herbaceous plants, by Lindl, referred to 5 genera. Of these, Spreng. enumerates 3 species from S. Africa; 1 from S. Europe. Apodanthes, Poit. is probably a native of Guiana. Properties unimportant.

## ORDER CCLXIII.—BALANOPHORACEÆ, Lindl. Nat. Syst.

Leafless parasitical plants, by Lindl. referred to 4 genera. Of these, Spreng. enumerates 3 species for 8. America and the W. Indies, and 1 for the New Hebrides. In the E. Indies, according to Wall. Cat., have been discovered 4 species of Balanophora, viz. B. dioica, R. Br. (B. elongata, Bl.?) Nepal, Java?; B. indica, Wall. Peninsula of India; B. typhina, Wall. Prome. Taong-Dong, and B. gigantea. Wall. which, perhaps, may form a new genus, Sarcocordylis, Wall. Taong-Dong. "Properties unknown." (Lindl.)

ORDER CCLXIV.—CYNOMORIACEÆ, Lindl. Nat. Syst. p. 394.

Leafless parasitical plants, by Lindl. referred to 3 genera. Properties unimportant.

CLASS 5TH.

## ACROGENÆ.

Lindl. Nat. Syst. p. 395, or Flowerless Plants.

A. FILICALES, Lindl. Nat. Syst. p. 397.—Filices of others.

THE PERN PAMILY.

Leafy plants, producing a rhizoma, which creeps below or upon the surface of the earth, or rises into the air like the trunk of a tree. (Lindl.) They differ much from all living plants, and come nearest to the flowering classes by Cycadacese. They prevail chiefly where there is a certain degree of moisture; hence they are abundant in insular situations, in the forests of tropical countries, as well as on the mountains of northern latitudes. In the E. Indies they have been found in the greatest abundance in the Malayan Peninsula, the Khassya Mountains, the Mishmee Hills, Bootan, Nepal, the Himalayas, Mergui, and the west coast of the Peninsula of India. In Royle's collection there are about 80 species, obtained mostly from the tract of the Himalayas, between the Ganges and Sutlej rivers, and only 1 species from the plains of India; that is Asplenium radiatum, Sws., which is found at Saharunpore and Delhi. The only other fern Royle found in the plains was Cheilanthes farinosa, Kaulf; but even this only near the Rajmahl hills, where there are also a few other species. About Serampore have been discovered only 20 species, growing in ditches, on old walls, trees, &c. although moisture here is considerable throughout the greater part of the year. Wall. Cat. excluding exotics, contains about 430 species. viz. 22 of Acrostichum; 95 of Polypodium; 2 of Hemionitis; 12 of Grammitis; 2 of Antrophyum; 5 of Meniscium; 2 of Tanitis; 3 of Notholana; 1 of Matonia; 62 of Aspidium, 58 of Asplenium; 1 of Allantodia; 34 of Pteris; 7 of Cheilanthes; 1 of Cryptogramma; 18 of Lindsaa; 3 of Vittaria; 9 of Adiantum; 1 of Woodwardia; 2 of Blechnum; 8 of Lomaria; 3 of Cyathea; 1 of Spheropteris; 9 of Alsophila; 3 of Dickeo. nia: 30 of Davallia; 3 of Gleichenia; 1 of Ceratopteris; 8 of Hymenophyllum; 5 of Trichomanes; 3 of Osmunda; 1 of Angiopteris; 1 of Schizea; 7 of Lygodium; 1 of Ophioglossum; 1 of Helminthostachys; 2 of Botruchium; I of Actinostachys; and 2 of Arthrobotrys. - Many of these are natives of the Indian Archipelago, but by far the greater part have been collected on the Malayan Peninsula, the Khassya Mountains, Nepal. and the Himalayas.

The properties of the fern-family are upon the whole unimportant.

Lindley thinking it not inexpedient to consider ferns as a collection of genera equivalent to the alliances of Flowering Plants, has divided them into the following natural orders: Polypodiaceæ, Gleicheniaceæ, Osmundaceæ, Danæaceæ, and Ophioglossaceæ.

ORDER CCLXV.—POLYPODIACEÆ, R. Br.—Lindl. Nat. Syst. p. 400.

Ophioglossum moluccanum, Schlecht. (Hook. and Grev. p. 45.—Rumph. 6, t. 68, f. 2.) Moluccas. Mauritius. Peninsula of India.

## B. Lycopodales, Lindl. Nat. Syst. p. 402.

ORDER CCLXX.—LYCOPODIACEÆ, DC.;—Lindl. Nat. Syst. p. 403.

#### THE CLUB-MOSS TRIBE.

Usually moss-like plants, with creeping stems and imbricated leaves, or stemless plants, with erect subulate leaves, and a solid cormus. (Lindl.) They are most abundant in damp hot situations in the tropics, but are also natives of even the north of Europe, where whole tracts are found covered with Lycopodium alpinum and selaginoïdes, L. The genera usually included in the order are Lycopodium, Psilotum, and Isoetes. Of the first of these, Wall. Cat. enumerates 30 species, chiefly discovered in Nepal, the Khassya Mountains, the Neelgherries, Courtallum, Penang, and Singapore; of the second, 2 (Nepal, Singapore); and of the third, only 1, (Peninsula of India.)

The thecæ of Lycopodium contain an inodorous powder, which is used externally to cover excoriations, especially of new-born children. The powder is very inflammable, and used in fireworks. A decoction of L. clavatum and L. Selago, L. excites vomiting. The latter is prescribed in Russia as a purgative and emetic, but only in small doses, as it otherwise brings on convulsions.

LYCOPODIUM, L. (Endl. gen. pl. 1, p. 69.)

- 1. Hookeri, Wall. (Hook. and Grev. 2, t. 85.) 4. Nepal. Fl. R. S.

ORDER CCLXXI.—MARSILEACEÆ, R. Br.;—Lindl. Nat. Syst. p. 404.

#### THE PEPPERWORT TRIBE.

Creeping plants, by Lindl. referred to 2 genera, both of which are inhabitants of ditches or inundated places, in various parts of the world. They do not appear to be affected by climate so much as by situation, whence they have been detected in various parts of Europe, Asia, Africa, America and New Holland, chiefly, however, in temperate latitudes. Properties unknown. (Lindl.) One of the genera, Pilularia, contains but a single species: P. globulifera, L.; E. B. 8, t. 521. The other, Marsilea, has several representatives. In India there appear, according to Royle, to be three distinct species: M. agyptiaca, Willd., which is found in the Peninsula of India, as well as in Egypt, and which appears to be M. erosa, Willd.;—M. coromandelina, N. L. Burm.; (M. minuta, Lam.) a species apparently peculiar to the most southern part of the Indian Peninsula; and

ORDER CCLXXII.—SALVINIACEÆ, Bartl.;—Lindl. Nat. Syst. p. 405.

Floating plants with rooting stems, by Lindl. referred to 2 genera. Of Azolla, 1 species has been found in S. America, down even to the Straits of Magellan; 1 in Portorico; 1 in Carolina and Canada; 2 in New Holland and Van Diemen's Land, and 1 to the eastward of Bengal, and in Behar. The latter, according to Royle, appears to be nearly allied to, if not identical with, A. pinnata, R. Br. The second genus, Salvinia, has

1 species in Europe and N. America; 2 in S. America; 1 in Cuba; and 4 in the E. Indies, one of which is also common to Europe and N. America. Salvinia, Mich. (*Endl. gen. pl.* 1, p. 67.)

ORDER CCLXXIII.—BRYACEÆ, Lindl. Nat. Syst. p. 407.

(Musci, Juss.)

#### THE MOSS TRIBE.

Erect or creeping, terrestrial or aquatic, cellular plants, (Lindl.) abundant only in temperate climates, though also found within the tropics. From India, (especially Nepal) Dr. Hooker has according to Wall. Cat. examined and named 109 species, viz. 5 of Gymnostomum; 1 of Grimmia; 1 of Orthodon; 2 of Orthotrichum; 1 of Schlotheimia; 4 of Syrrhopodon; 1 of Calymperes; 1 of Zygodon; 4 of Didymodon; 6 of Dicranum; 1 of Trematodon; 4 of Tortula; 16 of Bryum; 2 of Brachymenium; 1 of Funaria; 1 of Bartramia; 6 of Polytrichum; 1 of Lyellia; 3 of Fissidens; 17 of Hypnum; 7 of Leskea; 18 of Neckera; 2 of Hookera; and 4 of Pterogonium. In Royle's collection are about 55 species, almost all from Mussooree, several of which are identical with those of Wall. Cat. During a journey into Upper Assam, in 1835 and 1836, Mr. W. Griffith collected, chiefly on the Khassya Hills, 143 species of Musci, by himself, fully described in M'Clelland's Journal of Natural History, Calcutta, 1842, Nos. 8 and 9, and forming about 1th of the whole number (1,324) contained in Bridel's Bryologia universalis. "Some idea," says the author, "may be formed of the probable great number of species that remain to be found, when I mention, that the whole of the Hill collection was formed between the 8th October and the 20th of November, and that the most interesting portions of the Hills to the eastward of the route mentioned were not visited." Of the 143 species, I belongs to Sphagnum; 6 to Polytrichum; 1 to Diphyscium; 7 to Gymnostomum; 1 to Orthodon; 5 to Orthotrichum; 1 to Schlotheimia; 3 to Weissia; 3 to Barbula; 3 to Grimmia; 2 to Trematodon; 13 to Dicranum; 10 to Fissidens; 4 to Didymodon; 2 to Rumaria; 3 to Bartramia; 3 to Brachymenium; 7 to Bryum; 4 to Pterogonium; 20 to Neckera; 1 to Daltonia; 1 of Anhymenium (a new genus); 3 of Pleuropus (a new genus); 4 of Hookera; 7 of Leskia; and 28 of Hypmum. According to the abstract, given in the Proceedings of the Linnean Society, before which latter Mr. Griffith's paper was read, his "collection contains Sphagnum obtusifolium, Polytrichum urnigerum, and aloïdes, Weissia Templetoni, Dicranum scoparium, and glaucum, Bartramia fontana, and several others familiar to the European muscologist; but the far greater number of the species, have not been previously described." Properties insignificant.

## ORDER CCLXXIV—MARCHANTIACEÆ, Lindl. Nat. Syst. p. 412.

(Hepaticæ, Juss.)

#### THE LIVER-WORT TRIBE.

Plants growing on the earth or trees, in damp places, all over the world, except where excessive dryness prevails. In India they are but imperfectly known, so that out of 237 species enumerated by Sprengel only 25 Indian ones have been named by Lehmann, according to Wall. Cat., viz. 5 of Marchantia; 1 of Grimaldia; 2 of Plagiochasma; 4 of Fimbriaria; 1 of Dumortiera; 1 of Riccia; 10 of Jungermannia; and 1 of Blandovia; all, with 4 exceptions, natives of Nepal, and the Khassya Mountains.—Royle adds to the above Marchantia polymorpha, L. and Jungermannia scorpicides, Nees.—Griffith's collection of Marchantiaceæ on the Khassya Hills and in Assam amounts to 48 species. Properties "unknown." (Lindl.)

\* Marchantia polymorpha, L. Europe. Himalayas.—M. androgyna, L. Europe. Nepal.

### D. Charales, Lindl. Nat. Syst. p. 441.

ORDER CCLXXV.—CHARACEÆ, Rich. and Kth.;—Lindl. Nat. Syst. p. 415.

Aquatic plants, always submersed, referred to 3 genera. Of these have been discovered in India about 13 species of *Chara*. Properties unknown. Chara, L. (*Endl. gen. pl.* 1, p. 7.)

#### E. Fungales, Lindl. Nat. Syst. p. 418.

ORDER CCLXXVI.—AGARICACEÆ, (FUNGACEÆ, Lindl Nat. Syst. p. 419.)

#### THE MUSHROOM TRIBE.

Mushrooms, Puff Balls and Mildews are found growing in the earth, or upon decayed animal or vegetable substances, and scarcely ever upon living bodies of either kingdom, in which respect they differ from Lichens, which commonly grow upon the living bark of trees. They are as remarkable for the rapidity of their growth, which frequently takes place during the night, as for their perishable nature and the short space of time (only a few hours,) that some of them require to vegetate in, and to attain perfection. Their geographical distribution is but little understood; in fact, the Fungi themselves of most countries, are but little known, from the difficulty of preserving specimens; so that in many instances, if not completely examined, and described, or drawn on the spot, it is in vain to remedy the deficiency from the contents of an herbarium. Those of tropical countries are almost unknown; only 25 are enumerated by Humboldt and Bonpland from S. America, and only 10 (and these European species) by R. Brown, as found in New Holland. None are mentioned in Roxburgh's. flor. ind.

or in Wall.? Cat., and in Royle's collection there are only about 40 species from the Himalayas. These have been examined by D. Don., who finds as in Lichens, that the majority have the closest resemblance to European species, but, from the perishable nature of the specimens, their identification is difficult. (Royle.)

"Fungi are important either as food or as poison, or as parasites destructive to the plants upon which they grow. As food, the most valuable are Agaricus campestris, or common mushroom, the various species of Helvella or Morel, and Tuber or Truffle.—It is necessary to exercise the utmost care in employing Fungi as food. L. C. Richard, though no one was better acquainted with the distinctions of Fungi, would never eat any except such as had been raised in gardens in mushroom beds." (Lindl.)

AGARICUS, L. (Endl. gen. pl. 1, p. 40.)

- 1. campestris, L. (Spreng. syst. 4, p. 446.—Grev. cryp. fl. 161.—A. edulis, Bull. champ. t. 134 and 514.) ⊙ Serampore, &c.
- LYCOPERDON, L. (Spreng. syst. 4, p. 378, No. 3500.) Puff Ball.
  - 1. pratense, Pers. (Spreng. syst. 4, p. 523;—Bull. herb. 435. 2.) ⊙ Serampore.

ORDER CCLXXVII.—PARMELIACEÆ, (LICHENACEÆ, Lindl. Nat. Syst. p. 426.)

#### THE LICHEN TRIBE.

Perennial plants, often spreading over the surface of the earth, or rocks or trees in dry places, in the form of a lobed and foliaceous, or hard and crustaceous, or leprous substance, called a Thallus. (Lindl.) Feé estimates the number actually known either in herbaria or in books, at 2,400. It has been remarked that the same species are found in very different parts of the world, and that the lichens of Europe, for example, differ little from those of N. America. This is observed, says Royle, in a very remakable manner, in the comparatively few lichens collected by him in the Himalayas, almost the whole of which are pronounced by D. Don, who has examined them, to be identical with European species. Rosb. passes over this order entirely, and Wall. enumerates only 4 species, borrowed from Buch.'s Herbarium. The amount of Lichens in Griffith's Collection we do not know, but judging from his botanical completeness generally, it must be considerable. Among Royle's Lichens are mentioned Usnea florida, Ach. (Lichen floridus, L.; E. B. 13, t. 872.) U. barbata, Ach. (Lichen barbatus, L.; —E. B. 4, t. 258, f. 2.) — Borrera ciliaris, Ach. (Lichen ciliaris, L.; -E. B. 19, t. 1352.)-B. furfuracea, Ach. (Lichen furfuraceus, L.;-E. B. 14, t. 984.)—Rocella fuciformis, Ach. (Lichen fuciformis, L.; E. B. 11, t. 728.)—Ramalina farinacea, Ach. (Lichen farinaceus, L.;—E. B. 13, t.

889.)—Gyrophora murina, Ach.? (Lichen murinus, Ach.;—E. B. 35, t. 2486.)—Peltidea canina, Ach. (Lichen caninus, L.;—E. B. 32, t. 2299.)—Parmelia perlata; Ach. (Lichen perlatus, L.;—E. B. 5 t. 341.)—P. caperata, Ach. (Lichen caperatus, L.;—E. B. 10, t. 654.)—P. physodes, Ach. (Lichen physodes, L.;—E. B. 2, t. 126.)—Sticta pulmonaria, Ach. (Lichen pulmonarius, L.;—E. B. 8, t. 572.)—S. scrobiculata, Ach. (Lichen scrobiculatus, L.;—E. B. 7, t. 497.)—Stereocaulon paschale, Ach. (Lichen pascalis, L.;—E. B. 4, t. 282.) &c.

Lichens have been remarked by DC. to possess two distinct classes of characters, the one rendering them fit for being employed as dyes after maceration in urine, the other making them nutritive and medicinally useful to men. Of those used in dyeing, the principal crustaceous kinds are Lecanora Parella, Ach. (E. B. 11, t. 727. Orseille de terre, or Perelle d'Auvergne of the French.)—L. tartarea, Ach. (E. B. 3, t. 156. When sold to the Dyers, it appears in form of a purple powder, called Cudbear, a corruption of Cuthbert, the name of its inventor.)—L. Hæmatomma, Ach. (E. B. 7, t. 486.)—L. atra, Ach. (E. B. 14, t. 949.)—Variolaria lactea. Ach. (E. B. 34, t. 2410.)—Urceolaria scruposa, Ach. (E. B. 4, t. 266.)— U. cinerea, Ach. (E. B. 25, t. 1751.)—Isidium Westringii, Ach. (E. B. 31, t. 2204.)—Lepraria chlorina, Ach.;—E. B. 29, t. 2038. Of the foliaceous species: Parmelia sazatilis, Ach. (E. B. 9, t. 603.)—P. omphalodes, Ach. (E. B. 9, t. 604.) — P. encausta, Ach. (E. B. 29, t. 2049.) — P. conspersa, Ach. (E. B. 30, t. 2097.)—P. parietina, Ach. (E. B. 3, t. 194.)—Sticta pul. monaria, Ach. (E. B. 8, t. 572.)—Solorina crocea, Ach. (E. B. 7, t. 498.)— Gyrophora deusta, Ach.; E. B. 35, t. 2483.—G. pustulata, Ach. (E. B. 18, t. 1283);—but the most important are: Roccella tinctoria, Ach. (E. B. 3, t. 211.) and R. fuciformis, Ach. (E. B. 11, t. 728.) the dye of which is so largely used by manufacturers under the name of Orchall, or Archill, or Orseille des Canaries. The nutritive properties of Lichens probably depend upon the presence of an amylaceous substance analogous to gelatine, which, according to Berzelius, exists in the form of pure starch or amylaceous fibre, to the amount of 80-8 per cent. in Cetraria islandica, Ach. (E. B. 19, t. 1330,) which is the common Iceland Moss. Other Mosses, f. ex. Cetraria nivalis, Ach. (E. B. 28, t. 1994.)—Sticta pulmonaria, Ach. and Alectoria usneoïdes. Ach. will all answer the same purpose. The Reindeer Moss, which forms the winter food of that animal, is Cladonia rangiferina, Hoffm. (E. B. 3, t. 173.) Borrera? Ashneh, Royle, by the Natives called Chulcheleera, is commonly employed as a dye in India. (Lindl. and Royle.)

# ORDER CCLXXVIII.—FUCACEÆ, (ALGACEÆ, Lindl. Nat. Syst. p. 430.—Algæ, Juss.)

#### THE SEA-WEED TRIBE.

Of these leafless, flowerless water-plants, Wall. Cat. only enumerates, 2 Indian species, borrowed from Buch. Herb. Royle mentions none, but says, that Röttler's Herb. contains a few species of *Conferva*, collected from the neighbourhood of Tranquebar. A general account of this order will be found in Lindl. l. c.

FINIS.
